CONTENTS

SPE 49269 Miscibility Variation in Compositionally Grading Reservoirs ............................................ 9
Lars Høier, Statoil, and C.H. Whitson, NTNU

SPE 59743 Reservoir Characterization During Underbalanced Drilling: A New Model .................. 21
J.L. Hunt and Stephen Rester, Halliburton Energy Services

SPE 62880 An Innovative Approach for the Analysis of Production History in Mature Fields:
A Key Stage for Field Re-Engineering ................................................................. 31
J-F. Coste and J-P. Valois, TotalFina Elf

SPE 62881 Field Application of Production Analysis ................................................................. 41
W-C. Chu, S.A. Cox, J.V. Gilbert, and C.J. McCarthy, Marathon Oil Co.

SPE 62882 Improvements to Reservoir Material Balance Methods ............................................ 53
J.L. Fletcher, Marathon Oil Co. (Retired)

SPE 62883 A New Approach to Gas Material Balance in Tight Gas Reservoirs ...................... 67
T.W. Engler, New Mexico Tech

SPE 62922 History Matching Geostatistical Reservoir Models With Gradual
Deformation Method ........................................................................................................ 75
Y. Le Gallo and M. Le Ravalec-Dupin, Inst. Français du Pétrole, and the
HELIOS Reservoir Group

SPE 62925 Quantifying Uncertainty in Production Forecasts: Another Look at the
PUNQ-S3 Problem ........................................................................................................ 89
J.W. Barker and Maarten Cuypers, Elf Exploration UK, and Lars Holden, Norwegian
Computing Centre

SPE 62926 A Novel Approach for Reservoir Forecasting Under Uncertainty .................... 101
S. Mishra, Duke Engineering & Services, and M.K. Choudhary and A. Datta-Gupta,
Texas A&M U.

SPE 62927 Optimal Uplayering for Scaleup of Multimillion-Cell Geologic Models ............ 113
D. Li and B. Beckner, Mobil Technology Co.

SPE 62928 Full Tensor Upscaling of Geologically Complex Reservoir Descriptions ........ 129
X-H. Wen, Chevron Petroleum Technology Co.; L.J. Durlofsky, Chevron Petroleum Technology
Co. and Stanford U.; S.H. Lee, Chevron Petroleum Technology Co.; and M.G. Edwards,
Stanford U.

SPE 62929 Calculation of Convective and Dispersive Flows for Complex
Corner Point Grids ........................................................................................................ 141
P.H. Sammon, Computer Modelling Group Ltd.

SPE 62930 Condensate Banking Dynamics in Gas Condensate Fields: Compositional Changes
and Condensate Accumulation Around Production Wells ........................................... 153
R.J. Wheaton and H.R. Zhang, BG Intl.

SPE 62931 Phase Behavior of Gas-Condensate/Water Systems ........................................... 167
Sunil Kokal and Mohammad Al-Dokhi, Saudi Aramco, and Selim Sayegh, Sayegh Engineering
Consulting Ltd.

SPE 62932 Measurements and Simulation of Inertial and High Capillary Number Flow
Phenomena in Gas-Condensate Relative Permeability .............................................. 179
Robert Mott, Andrew Cable, and Mike Spearing, AEA Technology

SPE 62933 The Relative Significance of Positive Coupling and Inertial Effects on Gas
Condensate Relative Permeabilities at High Velocity ................................................. 193

SPE 62934 Relative Permeability Modification in Gas-Liquid Systems Through Wettability
Alteration to Intermediate Gas-Wetting ....................................................................... 203
G-Q. Tang and Abbas Firoozabadi, Reservoir Engineering Research Inst.

SPE 62935 Use of Solvents To Improve the Productivity of Gas Condensate Wells ........ 215

SPE 62990 Successful Miscible Gas Injection in a Mature U.K. North Sea Field ........... 227
SPE 62991  Integration of Dynamic Data of Pilot Waterflood With Rock Fabric-Implications for the Full Field Waterflood Startup in Mauddud Reservoir, North Kuwait  .......... 237
H.Z. Al-Ajmi, Raja Mukherjee, and H.B. Chetri, KOC

SPE 62993  Understanding Coning Performance in a High-Anisotropy Reservoir: The Burgan Reservoir Case Study  ........................................... 253
C.S. Kabir, Chevron Overseas Petroleum Inc., and E.D.C. Ma, Q. Dashti, and O. Al-Shammari, KOC

SPE 62995  Effects of Phase Behavior, Dispersion, and Gridding on Sweep Patterns for Nearly Miscible Gas Displacement  .......... 265
M. Haajizadeh, BP Amoco; F.J. Fayers, Consultant; and A.P. Cockin, BP Amoco

SPE 62996  Gas Injection in Paleo Oil Zones  ........................................... 281
Arne Skauge, Norsk Hydro ASA, and Leonid Surguchev, Rogaland Research/PETEC

SPE 62997  Effect of Trapped Gas on Relative Permeability and Residual Oil Saturation in an Oil-Wet Sandstone  .......... 291
J.G. Kralik, L.J. Manak, G.R. Jerauld, and A.P. Spence, Arco

SPE 62999  Compositional Simulation of Water-Alternating-Gas Processes  .......... 307
J.R. Christensen, Elf Exploration UK plc; M. Larsen, Technology U. of Denmark; and H. Nicolaisen, Elf Petroleum Norge A/S

SPE 63000  Visualisation of Oil Recovery by Water Alternating Gas (WAG) Injection Using High Pressure Micromodels—Water-Wet System  .......... 319

SPE 63001  A Relationship Between the Fractal Dimension and Scaling Groups of Unstable Miscible Displacements  .......... 327
R.B. Gharbi and F. Qasem, Kuwait U., and E.I. Peters, U. of Texas Austin

SPE 63083  Fast and Robust Algorithm for Compositional Modeling: Part I—Stability Analysis Testing  .......... 341
Abbas Firoozabadi and Huanquan Pan, Reservoir Engineering Research Inst.

SPE 63084  Theoretical and Experimental Investigation of Isothermal Compositional Grading  .......... 357
J. Rauladowski, A.N. Fuex, J.T. Westrich, and J.J. Sieler

SPE 63087  Guidelines for Choosing Compositional and Black-Oil Models for Volatile Oil and Gas-Condensate Reservoirs  .......... 373
Oivind Fevang, PERA; Kameshwar Singh, NTNU; and C.H. Whiston, NTNU/PERA

R.W. Smith and W.A. Bard, Integrated Reservoir Management Inc.; Claudia Lugo, Ivan Venez, and Agostino Guerini, PDVSA; C.H. Whiston, NTNU/PERA; and Oivind Fevang, PERA

SPE 63094  A New Rate-Time Type Curve for Analysis of Tight-Gas Linear and Radial Flows  .......... 403
H-Y. Chen and L.W. Teufel, New Mexico Inst. of Mining and Technology

SPE 63095  Determination of Formation Properties From Stabilized and Unstabilized Gas-Well-Test Data  .......... 415
O.I. Tureyen, Abdurrahman Satman, and Mustafa Onur, Istanbul Technology U.

SPE 63096  Benchmarking of Restimulation Candidate Selection Techniques in Layered, Tight Gas Sand Formations Using Reservoir Simulation  .......... 431
S.R. Reeves, Advanced Resources Intl.; P.A. Bastian, J.P. Spivey, and R.W. Flumerfelt, Schlumberger Holditch-Reservoir Technologies; S. Mohaghegh, West Virginia U.; and G.J. Koperna, Advanced Resources Intl.

SPE 63144  Field-Wide Variations of Wettability  .......... 447
Gerald Hamon, Elf Exploration Production

SPE 63145  Rate Effects on Centrifuge Drainage Relative Permeability  .......... 457
Arne Skauge, Norsk Hydro ASA, and Susanne Poulsen, DTU

SPE 63146  An Investigation of Three-Phase Counter-Current Flow Using X-Ray Computerized Tomography and Neuro-Simulation Modeling  .......... 469
M. Al-Wadahi, A.S. Grader, and T. Ertekin, Pennsylvania State U.
SPE 63147 Comparison of Reservoir Simulation Hysteresis Options ........................................ 481  
C.A. Kossack, Schlumberger Holditch-Reservoir Technologies

SPE 63148 Relative Permeability Measurements for Post-Waterflood Depressurisation of the Miller Field, North Sea .................................................. 491  
Peter Naylor, Terrence Fishlock, David Mogford, and Robert Smith, AEA Technology

SPE 63149 Critical Gas Saturation and Relative Permeability During Depressurization in the Far Field and the Near-Wellbore Region .................................. 499  
P. Egermann and O. Vizika, Inst. Français du Pétrole

SPE 63150 A Coupled Model for Three-Phase Capillary Pressure and Relative Permeability .................................................. 515  
O.S. Hustad, SINTEF Petroleum Research

SPE 63151 A Hybrid Streamtube Simulator Using A Semianalytical Method .................................. 529  
Munseok Baek, Korea Gas Corp., and T.A. Hewett, Stanford U.

SPE 63152 Waterflood Management: A Case Study of the Northwest Fault Block Area of Prudhoe Bay, Alaska, Using Streamline Simulation and Traditional Waterflood Analysis .................................. 545  
G.H. Grinestaff and D.J. Caffrey, BP-Amoco

SPE 63154 Application of 3D Streamline Methodology in the Saladin Reservoir and Other Studies .................................................. 553  

SPE 63155 Applications of 3D Streamline Simulation to Assist History Matching .................................. 559  
W.J. Milliken, Chevron Petroleum Technology Co.; A.S. Emanuel, Consultant; and A. Chakravarty, Chevron Petroleum Technology Co.

SPE 63158 Inflow Performance Relationships for Gas Condensates .................................. 567  
F.M. Guehria, Schlumberger Integrated Project Management

SPE 63159 Application of Radial Flow Theory and PLT Surveys to Determine Reservoir Pressure and Wellbore Conditions for Gas Reservoirs .................................. 581  
S-W. Wang, Unocal Corp.

SPE 63160 Gas-Condensate Well Test Analysis With and Without Relative Permeability Curves .................................. 593  
Gherson Penuela and Faruk Civan, U. of Oklahoma

SPE 63161 Laboratory Based Evaluation of Gas Well Deliverability Loss Due to Waterblocking .................................. 605  

SPE 63162 Managing Uncertainties in Oman Liquified Natural Gas Gas-Condensate Reservoir Development .................................. 621  
S.M. Al-Shaidei, B.J. Perriman, and Koen Vogel, Petroleum Development Oman

SPE 63163 Matching Production Rates From the Saih Rawl and Barik Gas-Condensate Fields Using State-of-the-Art Single Well Reservoir Simulation Models .................................. 627  
R.G. Skaar and K.S. Walpot, Petroleum Development Oman, and Niko van der Post, Shell E&P Technology and Research

SPE 63164 Comparison of the Performance of Vertical and Horizontal Wells in Gas-Condensate Reservoirs .................................. 637  
A. Dehane, Sonatrach PED, and D. Tiab and S.O. Osisanya, U. of Oklahoma

SPE 63219 A New Method for Assessing the Impacts of Small-Scale Solvent Supply Variations Within the Prudhoe Bay Miscible Flood .................................. 651  
J.W. Weaver, Phillips Alaska Inc., and J.W. Ra, U. of Alaska Anchorage

SPE 63221 Optimization of Well Placement in a Gulf of Mexico Waterflooding Project .................................. 667  
Baris Gicyagiller and R.N. Horne, Stanford U.; Leah Rogers, Lawrence Livermore Natl. Laboratory; and J.J. Rosenzweig, BP Amoco

SPE 63222 Simulation Model Development for Bayu-Undan Field .................................. 677  
J.C. Currie, Consultant, and S.C. Balke, Phillips Oil Co. Australia

SPE 63224 Steam-Water Capillary Pressure .................................. 688  
Kewen Li and R.N. Horne, Stanford U.
SPE 63225 The Dynamics of Combustion Fronts in Porous Media .............................. 695
I.Y. Akkutlu and Y.C. Yortsos, U. of Southern California

SPE 63226 Imbibition Processes in Fractured Chalk Core Plugs with Connote
Water Mobilization ............................................. 709
C.M. Nielsen, D. Olsen, and N. Bech, Geological Survey of Denmark and Greenland

SPE 63227 Viscous-Elastic Polymers Can Increase Microscale Displacement
Efficiency in Cores ............................................. 719
Wang Demin, Cheng Jiecheng, Yang Qingyan, Gong Wenchao, Li Qun, Daqing Oil Co.

SPE 63228 Mobility of Foam in Heterogeneous Media: Flow Parallel and Perpendicular
to Stratification .............................................. 729
Dickson Tanzil, G.J. Hirasaki, and C.A. Miller, Rice U.

SPE 63229 Reservoir Engineering Analysis of Microbial Enhanced Oil Recovery ........... 741
S.L. Bryant, U. of Texas Austin, and T.P. Lockhart, Enitecnotiue

SPE 63230 Oxidation of Heavy Oil and Their SARA Fractions: Its Role in Modeling
In-Situ Combustion ............................................. 757
Serhat Akin, M.V. Kok, Suat Bage, Middle East Tech U., and Ozgen Karacman, Penn State

SPE 63279 Well Testing in Ultra-High Permeability Formations .............................. 769
D.O. Cox, Questa Engineering Corp.; S.H. Stinson, Fall Line Energy Inc.; and J.N. Stellavato,
Nye County, Nevada

SPE 63280 Modeling of Complex Geometry Reservoirs ....................................... 775
Gang Zhao and L.G. Thompson, U. of Tulsa

SPE 63281 Maximizing Profitability in Reservoirs Using New Technologies for Continuous
Downhole Pressure Systems .................................. 789
J.L. Buchwalter and R.E. Calvert, Gemini Solutions, and C.S. McKay and S.J. Thompson,
Wood Group

SPE 63282 An Improved Empirical Approach for Prediction of Formation Water Saturation
and Free Water Level for Uni-modal Pore Systems .................................. 799
Shahin Negahban, BP Amoco; G.W. Gunter, NExT; and C.R. Smart, BP Amoco

SPE 63283 Geostatistical Inversion of 3D Seismic Data to Extrapolate Wireline Petrophysical
Variables Laterally Away from the Well .................................. 809
Alvaro Grijalba-Cuenca and Carlos Torres-Verdin, U. of Texas Austin, and
Pieter van der Made, Jason Geosystems

SPE 63284 Well Data Acquisition Strategies ....................................... 825
A. Louis, C. Boehm, and J. Sancho, ELF EP, and S. Carlin, R. Cerri, and R. Maglione, ENI
Agip Division

SPE 63285 Petrophysical Inversion of Resistivity Logging Data .............................. 835
Zhiyi Zhang, Raghu Chunduru, Elton Frost Jr., and Alberto Mezzatetta, Baker Atlas

SPE 63286 Reservoir Characterization for Naturally Fractured Reservoirs ................. 843
R.O. Baker and Frank Kuppe, Epic Consulting Services Ltd.

SPE 63290 Accounting for Seismic Scale in Stochastic Reservoir Simulations Constrained
by Seismic Data ............................................... 855

SPE International Student Paper Contest

Modelling of Gas Condensate Relative Permeability and its Impact on
Prediction of Reservoir Performance ................................ 871
B.S. Al-Kharusi, Heriot-Watt U.

A Practical Model for Determining "Average" Oil Prices for Net Present
Value Calculations ........................................... 881
Frank Hoke, U. of Oklahoma

7
Papers not received in time for publication:

SPE 62936 Near-Wellbore Multiphase Flow in Gas-Condensate Reservoirs
K.K. Mohanty and X. Wang, U. of Houston

SPE 62989 Induced Natural Waterflooding, La Pena Oil Reservoir, La Pena Field
J.A. Canas, Schlumberger Wireline & Testing, and J.L. Rivero and W. Navia, Andina S.A.

SPE 62998 Field Evaluation of Different Recovery Processes in Zone 4 of the Prudhoe Bay Field

SPE 63085 Compositional Grading—Theory and Practice
L. Hoier, Statoil, and C.H. Whitson, Pera A/S

SPE 63090 Aquifer Controls on Coalbed Methane Development in the Powder River Basin, Wyoming
P.R. Onsager and D.O. Cox, Questa Engineering Corp.

SPE 63091 The Lewis Shale, San Juan Basin: What We Know Now

SPE 63092 Integrated Development Plan for a Naturally Fractured Gas-Bearing Granite Reservoir

SPE 63093 Reservoir to Surface Network Simulation Modeling for Management of the Aliso Canyon Underground Gas Storage Field
C.O. Ikoute, Southern California Gas; J.M. Brown, Computer Modelling Group; and H. Yao, Southern California Gas

SPE 63153 A Full-Physics, Streamline-Based Method for History Matching Performance Data of a North Sea Gas-Condensate Field
B. Agarwal, Phillips Petroleum UK Ltd.; and M.J. Blunt, Imperial College

SPE 63156 A Fully Compositional Streamline Simulator
M.J. Crane, Schlumberger GeoQuest, and F. Bratvedt, K. Bratvedt, and P.N. Childs, GeoQuest

SPE 63157 The Use of Streamline Simulation in Reservoir Management: Methodology and Case Studies
O.T. Lolomari and K. Bratvedt, GeoQuest; M.J. Crane, Schlumberger GeoQuest; W.J. Milliken, Chevron Petroleum Technology Co.; and J.J. Tyrie, Schlumberger Holditch-RT

SPE 63218 Sopa Reservoir Simulation Case Study: A New Method of Reservoir Modelling Using Seismic Attributes
C. Briantor, S. Adi, and E.A. Salam, PERTAMINA OEP Prabumulih, and D. Harsono, Schlumberger

SPE 63220 Active Uncertainty Management of an Early Waterflood Development: Minagish Field, West Kuwait
A.D. Al-Shammar, S. Matar, and H. Al-Ajmi, Kuwait Oil Co., and O.E. Ibe, BP Exploration Kuwait

SPE 63223 Re-Engineering Reservoir Management Practices in Ghawar Field Through Data Mining and 3D Visualization in the New Millennium
A.M. Al-Shahri, Saudi Aramco
