Proceedings
of the 12th International Workshop on
Implementation of
Functional Languages

Aachen/Germany
September 4th – 7th 2000

Editors:
Markus Mohnen
RWTH Aachen, Germany
Pieter Koopman
Nijmegen University, The Netherlands
Contents

John O'Donnell
The Collective and Individual Semantics in Functional SPMD Programming ........................................ 5

Thomas Richert
Skil: Programming with Algorithmic Skeletons — A Practical Point of View ........................................ 15

Claes Thornberg and Björn Lisper
Elemental Function Overloading in Explicitly Typed Languages .................................................. 31

Olaf Chitil, Colin Runciman, and Malcolm Wallace
Tracing and Debugging of Lazy Functional Programs — A Comparative Evaluation of Three Systems .................................................. 47

Frank Huch, Olaf Chitil, and Axel Simon
Typeview: A Tool for Understanding Type Errors ................................................................................ 63

Jun Yang, Greg Michaelson, Phil Trinder and J. B. Wells
Improved Type Error Reporting ........................................................................................................ 71

Frank Huch and Ulrich Norbisrath
Distributed Programming in Haskell with Ports ................................................................................ 87

Robert Pointon, Phil Trinder, and Hans-Wolfgang Loidl
The Design and Implementation of Glasgow distributed Haskell ...................................................... 101

John Sargeant, Chris Kirkham, and Ian Watson
Exploiting Implicit Parallelism in Functional Programs with SLAM ........................................ 117

Ulrike Klusik, Rita Loogen, Steffen Priebe, and Fernando Rubio
Process Schemes in Eden — Efficient Parallel Programming with Low Effort ................................ 133

Ricardo Peña and Clara Segura
Non-determinism analysis in a parallel-functional language .......................................................... 153

Clemens Grelck
Improving Cache Effectiveness through Array Data Layout in SAC ........................................ 169

Hans-Wolfgang Loidl
Investigating the Memory Management in a Parallel Graph Reducer ........................................ 185

Marco T. Morazan and Douglas R. Troeger
A Case Study of Heap Paging in the MT System ................................................................................ 201

Kevin Hammond
The Dynamic Semantics of Hume: a Functionally Based Concurrent Language with Bounded Time and Space Properties ................................................................. 215

Greg Michaelson
Constraints on recursion in the Hume expression language .......................................................... 231

Peter Achten and Simon Peyton Jones
Porting the Clean Object I/O Library to Haskell ............................................................................. 247

Robert Ennals
Feris: A Function Environment for Retargetable Interactive Systems ........................................ 263

Jörgen Gustavsson, Josef Svenningsson
A usage analysis with bounded usage polymorphism and subtyping ........................................ 279
