PROCEEDINGS

Asia-Pacific Conference on
Environmental Electromagnetics
CEEM’ 2000

May 3-7, 2000  Shanghai, China
CONTENTS

Keynote Speech

K-1 M. Ianoz, H. Wipf
Modeling and Simulation Methods to Assess EM Terrorism Effects----------------------1

K-2 Yasumitsu Miyazaki, Paul Selormey
Electromagnetic Interference Characteristics by Group of Buildings in High-Speed Mobile Communication systems------------------------------------------5

K-3 Matthias Ehrich, Lars Ole Fichte, Michael Luer
Electric Properties and Magnetic Field of a Coaxial Bus Bar----------------------------11

K-4 M.W. Wik, W.A. Radasky, R.L. Gardner
The Threat of Intentional Electromagnetic Interference--------------------------------17

K-5 Joong-Geun Rhee
A Study on a Reduced Crosstalk for the Design of “CAT 6” High Speed Data Transmission Modular Jack---------------------------------------------20

K-6 K.M. Soohoo, C.Y. Wu
EMC Design Techniques of Large Computing Systems-----------------------------------24

K-7 X.T. Song, Z.H. Zou, Y.G. Li
Spectrum Consideration for Wireless Communications in the Twenty First Century-----------------------------------------------29
5A1 Session Chairmen
Ehrich M. Ma Xinshan

5A1-01 M. Ehrich, L.O. Fichte, M. Luer
Magnetic Field Reduction of Power Cables by Multi-Splitting of Conductors and Compensation Effects----------------------------------------------------------33

5A1-02 J.Z. Cao, G.R. Chen
On Integral Computation of Bessel Function for 3-D Electromagnetic Scattering Computation in the Earth Half-Space---------------------------------------------39

5A1-03 Y.Q. Xia, P.G. Xu, W. Liu
Investigation of the Characteristics of the Electromagnetic Scattering Near Field from Complex Targets-----------------------------------------------43

5A1-04 G. Mrozynski
Energy Radiated by the Switching of Currents in a System of Conductors------------------47

5A1-05 S.W. Ma, Y.G. Gao
Comparison between Some Absorbing Boundary Conditions and Numerical Validation---------------------------------------------------------------53

5A1-06 J.X. Xie
Suspended Stripline and Ka Band Integrated Mixer----------------------------------------57

5A1-07 L.H. Ren, Z.Y. Chen
Representations of Electric Field between Two Inclined Conductor Boards-------------------61

5A1-08 K. Zhang, Y.G. Gao
Radiation of Wire Buried in a Lossy Half-Space---------------------------------------------65

5A1-09 Y. Sun, H.J. An, P. Liu
The Model of Electromagnetic Field Through --Borders of Different Medium------69
5A2 Session Chairmen
Yu Q. Liu Yuanan

5A2-01 H. Trzaska
Counterpoise in Mobile Radiotelephony---------------------------------72

5A2-02 Z. Yang, H.B. Zhu
A Comparison of Interference Cancellation and Multi-user Detection--------76

5A2-03 Y. Wan, H.B. Zhu
Outage Probability for Microcellular Mobile Radio Systems in Rician Fading
Channels---------------------------------------------------------------82

5A2-04 Y.A. Liu, W.M. Wang
The Capacity Increase of CDMA by the Interference Suppression for Multibeam
Application-------------------------------------------------------------87

5A2-05 W. Cui, X.N. Ye, B.Archambeault, D. White, M. Li, J.I. Drewniak
EMI Resulting From a Signal Via Transition Through DC Power Bus---------91

5A2-06 T.H. Ooi, S.Y. Tan, H.D. Li
Common Mode Currents and Radiation from PCBNGP------------------------96

5A2-07 S.W. Leung, L.C. Fung, L.X. Wan
A Mathematical Model for Ground Voltage Fluctuation in PCBs-------------100

5A2-08 K. Aunchaleevarapan,
K. Paithoonwatanakij,
Y. Preampraneerach,
W. Khan-ngern, S. Nitta
Classification of PCB Configurations from Radiated EMI by Using Neutral
Network---------------------------------------------------------------105

5A2-09 X. Teng, L.C. Zhang
A Method for Analyzing and Modeling Electromagnetic Radiation Property due to
Common-Mode Current in Clock Strip on PCB-------------------------------111
5A3  Session Chairmen
Soohoo K.M. Qi Lanfen

5A3-01  H.A. Kunz
Automatic Component Immunity Testing-----------------------------------------116

5A3-02  W.D. Zhang, X. CUI, T.B. Liu
Busbar Transient current Computation based on Singularity Expansion
Method---------------------------------------------------------------122

5A3-03  J. Fan, H. Shi, J.L. Knighten, J.L. Drewniak
DC Power Bus Modeling in High-Speed Digital Designs Including Conductor and
Dielectric Losses----------------------------------------------------------126

5A3-04  A. Mutoh, S. Nitta
A Response of Series Regulator to Incident High Frequency Noise on
AC – mains------------------------------------------------------------------132

5A3-05  L.H. Shi, B. Chen, B. H. Zhou, C. Guo
An Adaptive Wavelet Denoising Method for the Method for the Measuring System
of EMP Signals-------------------------------------------------------------138

5A3-06  T.B. Lu, X. Cui, W.D. Zhang
A New Time-domain Model of the Impedance of Lossy Soil in MTL Model--------142

5A3-07  Y.Z. Chen, S.H. Liu, G.H. Wei
Development and Application of LEMP-Simulating Device------------------------147

5A3-08  Y. Du, S. Kong, J. Bernett
Management of Magnetic Fields in Large Commercial Buildings------------------152

5A3-09  R. Koga, O. Wada, Y. Toyota, T. Miyazaki
Power Decoupling Circuit for Modeling 4 Measurement of EMC Characteristics of
IC/LSI---------------------------------------------------------------------444
5P1   Session Chairmen
     Deb G.K.       Cao Wei

5P1-01  G.D. Li, Y. Yang
        Theoretical Analysis of Electric Parameters of Wire Antennas in Communication
        Base Stations--------------------------------------------159

5P1-02  Z.M. Zhou, L.F. Qi
        The CMA Adaptive Array for CDMA Cellular Communication Systems--------163

5P1-03  MG. Floreani, R.E. Zich, G. Aulisio
        Design and Experimental Validations of a New Shaped Subreflector Geometry for
        Cassegrain System-------------------------------------------------------------------167

5P1-04  R. Zhang, D.G. Fang, Y.X. Sun, W.X. Sheng
        Computer-Aided Design of Microstrip Antenna Array-----------------------------170

5P1-05  R. Zhang, D.G. Fang, K.L. Wu, W.X. Sheng
        Study on the Elimination of Surface Wave by Metal Fences----------------------174

5P1-06  Y. Cheng, W. Cao
        A Method-of-Moments Approach to EM Environment Assessment nearby High-
        Voltage Transmission Lines------------------------------------------------------179

5P1-07  G.L. Li, D.Y. Zhu, C.S. Shi
        Surface Impedance Matrix Boundary Condition of Coaxial Cables Braided
        Layer--------------------------------------------------------------------------185

5P1-08  D.Y. Zhu, C.S. Shi
        Common-mode Currents in Transmission Line Structures Caused by Asymmetric
        Sources on Load Impedance-------------------------------------------------------189

5P1-09  C.S. Yang, W.B. Fu, Y.F. Pan, J. Zhou
        Solution of Distributed Capacitance of Eccentric Coaxial Line by PMOBBG
        Method--------------------------------------------------------------------------193

5P1-10  C.S. Yang, W.B. Fu, L.H. Hu, B.Q. Peng
        Improvement on WKB Solution of Parallel Polarized Waves Propagating in Slowly
        Varied Dielectric---------------------------------------------------------------196

XII
5P2 Session Chairmen
Trzaska H. Lu Yinghua

5P2-01 Y.H. Lu, X.P. Yu, Y.X. Dong, Y.T. Shen
Scattering from Apertures in an Infinitive Long Conducting Cylinder---------198

5P2-02 W.M. Li, B.Q. Gao
Comparison of Backscattering from Cylinders with Different Cross Section------203

5P2-03 Y.X. Dong, Y.H. Lu, Y.N. Hung
Influence of the Loaded Network on Electromagnetic Scattering Characteristic from
Slots--------------------------------------------------------------------------207

5P2-04 H.L. Yang, W. Lin, S. Lu
EM Scattering by Rectangular Conducting Flat Plates with Thin Uniaxial
Anisotropic Materials---------------------------------------------------------213

5P2-05 R. Pirjola
Space Weather Effects on Technological Systems on the Ground--------------217

5P2-06 J.C. Cheng
Analysis of the Earth Potential Problems of the Electrified Railway---------222

5P2-07 B.W. Jaekel
Power Frequency Magnetic Fields of Medium Voltage Switchgear-------------226

5P2-08 S. Kaitwanidvilai, W. Khan-ngern, M. Panarut
The Impact of Deadtime Effect on Unwanted Harmonics Conducted Emission of
PWM Inverters----------------------------------------------------------------232

5P2-09 Y.T. Li, Y. Guo, Z.Y. Ji, Y.G. Gao
Observations and Analysis of the Quasi-Electrostatic Field Anomaly before the 6.2
Earthquake in Zhangbei-------------------------------------------------------238

5P2-10 F.M. Ma, T. Yang, L.P. Bu, Z.G. Wu
A Novel Simplified SVPWM Control Scheme for 3 Φ AC/DC Voltage-Source
Converters------------------------------------------------------------------242

5P2-11 R. Doebbelin, H. Mecke, Th. Winkler, D. Heyder
Sources of Electromagnetic Disturbances in Resistance Welding Inverter Topologies
and Effective Reduction Techniques-------------------------------------------247

XIII
5P3 Session Chairmen
Miyazaki Y.  Gao Benqing

5P3-01  Y. Miyazaki, K. Takahashi
Electromagnetic Compatibility Characteristics of Wireless LAN for Indoor
Environment of Buildings by FDTD Method--------------------------------------251

5P3-02  S.H. Jing, Q.X. Jiang
Application of FD-TD Method in Calculating Electric and Magnetic Fields in
T-TEM Cell---------------------------------------------------------------257

5P3-03  X.P. Yu, Y.H. Lu, X.W. Wang, Y.M. Huang
Used FDTD Method with PML and Mur ABC to Calculate Dielectric
Constant-------------------------------------------------------------262

5P3-04  C.J. Li, S.W. Ma, Z.A. Wei, Y.G. Gao
Analysis of a Thin-Wire Square-Loop Antenna using FDTD Method--------266

5P3-05  G.R. Zhou, D.G. Fang, N.N. Feng
Entire Domain Based Diakoptic Method of Lines---------------------------------270

5P3-06  Y. Zhang, W. Ren, S.R. Ding, B.Q. Gao
The Implementation of a Simple Local Matched Load in FDTD Computation of
Microstrip Circuits------------------------------------------------------------274

5P3-07  C. Zhang, J. Zhao, J.D. Huang
The Evaluation of the Electromagnetic Emission from High-Speed Railway by
Pantograph and Network Parameters-------------------------------------------279

5P3-08  J.Y. Li, S.M. Hu
A Frequency Spectrum Model of the Intermodulation Products Generated by
Paging Transmitters----------------------------------------------------------285
6A1 Session Chairmen
Rhee Joong-Geun Chen Guorui

6A1-01 J. Zou, J.S. Yuan, X.S. Ma
Fictitious Multi-Medium Method and Its Application in Electromagnetic Shielding Calculations of Underground Telecommunication Cables--------------------292

Experimental Investigation of EMP Shielding Effectiveness of Reinforced-Concrete Cell Model--------------------------------------------296

6A1-03 G.F. Liu, G.M. Ge, Q.M. Liu, etc.
An Experimental Research on EMI Filters' Capacity in Controlling EMP-------301

6A1-04 S.W. Ma, C.J. Li, Y.G. Gao
Shielding Properties of Infinite Metallic Plate with an Aperture-----------------305

Design of Elliptic Function LPF and Its Group Delay Equalizer----------------309

6A1-06 T.Y. Bai, Z.M. Zhang
Wave Mode Coupling in Lossy Cut-off Wave-guide-----------------------------315

6A1-07 Y. Hotta, X.H. Li, S. Nitta
A Study on Suppression of Self Resonance of Metal Chassis by Means of the Hybrid Magnetic Material-----------------------------------320

6A1-08 D. Liu, S.Q. Deng
The Study of Metal Meshes on Electromagnetic Interference Shielding Effectiveness-----------------------------------------------326

6A1-09 D. Liu, Q.L. Li, S.Q. Deng
Study of Lightning Electromagnetic Field Distribution Inside and Outside the Microwave Communication Building----------------333

6A1-10 D. Bellan, M.G. Floreani, R.E. Zich
Analysis of the Emittance of a Chirally Shield--------------------------338

6A1-11 Z. Wang, S.P. Ren
Electromagnetic Compatibility Analysis of GPS Receiver------------------------438
6A2  Session Chairmen
Lu G.S.  Zhou Bihua

Full-Waveform Measuring System for Lightning Current Caused by Lightning Strikes to Tall Structures---------------------------------------------340

6A2-02  W.A. Rodasky, M.W. Wik
IEC Standardization of Immunity to High Power Transient Phenomena------344

6A2-03  Y.N. Jin, P.B. Zhou, N.X. Ma, Z.S. Zhu
Nonuniform Potential Distribution Caused by Lightning-------------------------------347

6A2-04  D. Liu, S.Q. Deng
The Study of Lightning-Protection Grounding for Power Dispatching & Communication Equipments-----------------------------------------------351

6A2-05  J.K. Liu, J.M. Feng
Lightning Overvoltage Protection Connected to Low-Voltage Power Distribution Systems According to EMC-------------------------------------------355

Full-Wave Analysis of the EMP Induced Current in Cables Near the Ground------359

6A2-07  C.R. Qui, S.G. Li
Lightning Overvoltage Protection for Financial Computerizing Systems----------364

6A2-08  J.Q. Teng, Z.G. Sun, L.J. Yu, N.X. Ma, P.B. Zhou
A Brief Introduction of “Technique Regulation for Protection of Electro-Static Discharge” -----------------------------------------------370

6A2-09  S.N. Lai
The Consideration of Same Problems of Lightning Protection and Earthing in Telecom Center-----------------------------------------------374

Analysis of the Field within Bounded Wave simulator with a Large Test Object in the Working Volume-------------------------------------433
6A3 Session Chairmen
Hansen D. Song Xiaoting

6A3-01 D. Hansen, D. Ristau
Antenna Factors of the New EUROTEM Cell for Fully Compliant Emission and Immunity Testing-----------------------------------------------378

6A2-02 Z.H. Xue, B.Q. Gao, R.X. Liu, S.M. Yang, C. Liu
Using IDFT Technique for Antenna's Time-Domain Near-Field Measurement----------------------------------------------------------383

6A3-03 X.N. Ye, D.M. Hochanson, J.L. Drewniak
A Common-Mode Current Measurement Technique for EMI Performance Evaluation of PCB Structures----------------------------------------389

6A3-04 S.F. Li, Y.G. Gao
Calculation of Normalized Site Attenuation from Antenna Factors----------------------395

6A3-05 J.L. Xian, Y.G. Gao
Electric Field of Asymmetric TEM Cell---------------------------------------------399

6A3-06 Y.F. Bian
Test and Study of Impact of Electrified Railway on Audio-Video Program Production---------------------------------------------402

6A3-07 T.C. Li, J.B. Wang, A.D. Zhou
Electromagnetic Compatibility Test for Aircraft System----------------------------408

6A3-08 J.S. Huang
The Test of Electromagnetic field Radiated by Electrostatic Discharge (ESD) from the Real Charged Human Baly in the Office---------------412

6A3-09 L. Xiao
Audio Test in Telecommunication Equipment EMC Performance------------------------417

6A3-10 L. Xiao
The Evaluation for Emission Measurements above 1 GHz-------------------------------422

6A3-11 H.B. Wang, Y. Xie, B.S. Lu, Y.G. Guo, S.F. Li
Development on Waveguide Cell for Generating Standard Field----------------------427

XVII
