A new systemic fungicide – SYP-L190
CH L Liu, W CH Liu and Z CH Li

Simeconazole (F-155), a novel systemic fungicide with broad-spectrum activity for seed treatment
M Tsuda, H Itoh, K Wakabayashi, T Ohkouchi et al.

Brevibacillus brevis – a novel candidate biocontrol agent with broad-spectrum antifungal activity
B Seddon, R C McHugh and A Schmitt

SESSION 5B
ADVANCES IN APHID MANAGEMENT

The field scale distribution of insects in winter wheat
L Winder, C Woolley, J M Holland, J N Perry and C J Alexander

The use of field margins in the manipulation of parasitoids for aphid control in arable crops
W Powell

Opportunities for managing aphids in outdoor lettuce crops
G M Tatchell

Improved strategies for aphid resistant transgenic crops
A M R Gatehouse, R E Down, J A Gatehouse and P Christou

Modelling of aphid pests: an aid to rational management
D Morgan

SESSION 5C
ADVANCES IN SENSING AND CONTROL FOR PRECISION MANAGEMENT OF INPUTS

Site specific control of pest and diseases – a challenge and an opportunity
B J M Secher, K D Bjørre and M Seierø

On-the-go optical measurements to assess the crop nitrogen status
K Dumont, J De Baerdemaeker and R Oberti

Is precision management of nematicide inputs an option for the control of potato cyst nematodes?
K Evans, R Webster, A D P Barker, P D Halford et al.

Matching the application of fungicides to crop canopy characteristics
P C H Miller, A G Lane and H C Wheeler

SESSION 6A
ECONOMICS OF PEST AND DISEASE MANAGEMENT IN CEREALS

Economics of cereal disease control – A European perspective
A J Leadbeater, S J E West and E Pichon
Cereal disease control – are fungicides the sole answer?
N V Hardwick, J E Slough and D R Jones .......................................................... 6A-2 647

Margin over cost in disease management in winter wheat and spring barley in Denmark
L N Jørgensen, K E Henriksen and G C Nielsen ................................................ 6A-3 655

Economics of pest control in cereals in the UK
J N Oakley and J E B Young .............................................................................. 6A-4 663

SESSION 6B
ADVANCES IN FORMULATION AND APPLICATION TECHNOLOGY

Triggered controlled delivery
I M Shirley, H B Scher and J E van Koppenhagen ......................................... 6B-1 673

Applying biological agents; needs and new developments for controlling foliar pests
G A Matthews .................................................................................................. 6B-2 681

Adjuvant technology to reduce spray application volumes on potatoes
R E Gaskin, G S Elliot and J P Munro ................................................................. 6B-3 687

Specifying the requirements for optimised application and formulation by computer simulation – an holistic approach
S J Cox, D W Salt, M G Ford, A B M N U Chowdhury and B E Lee ............... 6B-4 693

SESSION 6C
MYCOTOXINS: CONTROL AND FOOD SAFETY

Mycotoxins in cereals – prevention is better than cure
A J Alldrick and C Knight ................................................................................ 6C-1 701

Overview of fusarium ear blight in the UK – effect of fungicide treatment on disease control and mycotoxin production
P Jennings, J A Turner and P Nicholson .............................................................. 6C-2 707

Post-harvest control of mycotoxigenic fungi in cereals
V Sanchis and N Magan ................................................................................... 6C-3 713

Strategies for the detoxification of Fusarium mycotoxins and assessing in vivo the relevant effectiveness
A Visconti, M Solfrizzo, G Avantaggiato and A De Girolamo ......................... 6C-4 721

SESSION 7A
STROBILURINS AND RELATIVES: A CRITICAL APPRAISAL

Variety as a factor in the response of cereals to strobilurins
R A Bayles and G J Hilton ................................................................................ 7A-1 731

The physiological effects of kresoxim-methyl on wheat leaf greenness and the implications for crop yield
R J Bryson, L Leandro and D R Jones ............................................................... 7A-2 739
Strobilurins for the control of diseases of vegetables and ornamental crops in Italy
M L Gullino ................................................................. 7A-3 747

Resistance to fungicides in the Qol-STAR cross-resistance group: current perspectives
S P Heaney, A A Hall, S A Davies and G Olaya ......................................................... 7A-4 755

SESSION 7B
RESISTANCE RISK ASSESSMENT AND ITS IMPACT ON EU PRODUCT REGISTRATION

Development of an international standard on resistance risk analysis
D G McNamara and I M Smith ................................................................. 7B-1 765

Implementation of resistance risk analysis of plant protection products in the German authorisation procedure
U Heimbach, G Kral and P Niemann ................................................................. 7B-2 771

Evaluating pesticide resistance risk – the UK experience
C Furk ................................................................. 7B-3 777

The European Plant Protection Organisation's resistance risk analysis guideline is here – now it’s time for change
P K Leonard ................................................................. 7B-4 785

SESSION 7C
FORECASTING AND MODELLING AS PART OF DECISION-MAKING PROCESSES

A weather-based decision support system for managing oilseed rape pests
A Johnen and H Meier ................................................................. 7C-1 793

A comparison of modelling methods for forecasting light leaf spot (Pyrenopeziza brassicae) on winter oilseed rape in the UK
S J Welham, K Papastamati, B D L Fitt, J A Turner and P Gladders ............................. 7C-2 801

Modelling infection of strawberry flowers by Botrytis cinerea (grey mould) using field data
X-M Xu, D C Harris and A M Berne ................................................................. 7C-3 809

Predicting the effects of fungicides on wheat grain quality
J P R E Dimmock and M J Gooding ................................................................. 7C-4 815

VOLUME 3

POSTER SESSION 8A
PEST AND DISEASE MANAGEMENT IN ARABLE CROPS

Yield responses to control of pasmo (Mycosphaerella linicola) in winter linseed
S A M Perryman and B D L Fitt ................................................................. 8A-1 823
