Groundwater:
Past Achievements and Future Challenges

Edited by
Oliver Sililo et al.
The Water Programme, Environmentek, CSIR, South Africa

A.A. BALKEMA / ROTTERDAM / BROOKFIELD / 2000
# Keynote Papers

1. **The mineralogy of microbial ecology**  
   *P.C. Bennett & J.R. Rogers*  
   Page 3

2. **Towards comprehensive groundwater resource management in South Africa**  
   *E. Braune*  
   Page 7

3. **Assessing pesticide pollution of groundwater: Current knowledge and remaining gaps**  
   *P.J. Chilton, M.E. Stuart, A.R. Lawrence, D.C. Gooddy, R.J. Williams & A.C. Johnson*  
   Page 17

4. **Groundwater resources at the turn of the millennium: Taking stock and looking forward**  
   *S.S.D. Foster*  
   Page 27

5. **Hydrogeology and waste management strategies**  
   *M.J. Knight*  
   Page 35

6. **The use of monitored natural attenuation as a cost-effective technique for groundwater restoration**  
   *D.N. Lerner, S.F. Thornton & R.M. Davison*  
   Page 41

7. **Modeling groundwater flow and mass transport in heterogeneous media: Issues and challenges**  
   *C.-F. Tsang*  
   Page 49

---

## 1 Determination of aquifer parameters, resource assessment/evaluation

1. **The applicability of DC resistivity in some geological surroundings in Sweden**  
   *J. Aaltonen*  
   Page 61

2. **The vertical head distribution in a coastal sand-dune aquifer**  
   *R.I. Acworth, R. Soriano & I.L. Turner*  
   Page 67
Application of remote sensing and geographical information system to hydrogeological studies in the Upper West Region, Ghana
B.K. Banoeng-Yakubo & L. Skjerna

Groundwater reservoir characterization based on pumping test curve diagnosis in fractured formation
I. Bardenhagen

Determination of aquifer characteristics of semi-confined aquifers from single well tests
W.K. Boehmer

The value of groundwater resources associated with carbonatites
F.S. Botha, J.L. van Rooy & J.J. P. Viviers

The study of karst spring recession in Slovenia
M. Brenic

Preliminary assessment of the groundwater potential of the Tsumeb Aquifers in northern Namibia
R. Bufler, P. Ambs, T. Himmelsbach, E. Tordiffe & R. Bäumle

Groundwater occurrence in hard rocks in the federal district of Brasilia – A sustainable supply?
J. E. G. Campos & U. Tröger

Quantifying the heterogeneity of fracture systems: An index for fracture flow network representations at different scales
D. Cesano, A. Bagtzoglou & B. Olofsson

Adequate depth of boreholes in hard rocks: A case study in Ghana
P. K. Darko & J. Krásny

The use of borehole tomography to image the saline interface – A case study from New South Wales, Australia
G. R. Dasey & R. I. Acworth

Thermal analyses for groundwater flow assessment in a sedimentary basin of Japan
J. R. Dim, Y. Sakura, A. Miyakoshi & K. Fukami

Application of the electrokinetic sounding technique for geohydrological investigations in a fractured rock aquifer system
F. D. Fourie, J. F. Botha, R. Grobbelaar & G. J. van Tonder

Specific surface area of glacial drift material determined by laboratory experiments
A. Fransson

Recharge assessment: Comparing tracers, micro-meteorology and soil water models
J. C. Gehrels

VLF method applied to hydrogeological prospecting in the gneissic-migmatitic hard rock aquifer of Évora, South Portugal
A. Gomes, A. Chambel & J. Duque

Hydraulic seepage within an astatic karst lake, North-Central Florida
J. D. Hirsch & A. F. Randazzo

CSAMT mapping of a deep hydrogeological structure in Mauritius Island
J. L. Join, B. Robineau, M. Courteaud & M. Ritz
Groundwater resource developments in the Northern Territory, Australia
P. Jolly, D. George, S. Tickell, U. Zaar & D. Chin

Benefits of incorporating remote sensing techniques as a methodological approach for improved borehole siting in fractured rock aquifers
N. Kellgren & P. Sander

The valuation of major aquifers of the Upper Silesia region
A. Kowalczyk, A. Różkowski & A. J. Witkowski

Geologic factors influencing distribution of hardrock transmissivity
J. Krásný

A geophysical perspective in siting high yielding boreholes in the lower Karoo aquifer in western Botswana
H. Kumar, D. Sarma & L. Carlsson

Groundwater evapotranspiration – Underestimated component of the groundwater balance in a semi-arid environment – Serowe case, Botswana
M. W. Lubczynski

Location of a well field in a coastal alluvial aquifer of southern Sardinia, Italy, subjected to saline water intrusion
G. Luise, C. Sechi & P. Ciabatti

Hydrogeology of the coastal region of Jakarta, Indonesia
H. Maathuis, W. Mak & S. Adi

The effects of alien vegetation clearing on a coastal aquifer, Bushmans River Mouth, Eastern Cape
L. G. A. Maclear & J. C. Kotze

Hydrodynamic investigations in a recent volcanic aquifer, Reunion Island, using single well tracer test
J. S. Martial, J. L. Join & J. Coudray

Conceptual model of groundwater flow in stratified mountainous terrain, Utah, USA
A. L. Mayo & T. H. Morris

Estimating the reliable output of wells
B. D. R. Misstear & S. Beeson

The use of thermal imagery in ground water studies
K. L. Morton & A. J. Franszen

Rational utilization of groundwater for water supply engineering
P. Némethy & D. Vlčková-Michalíková

Groundwater exploration in complex fractured rock
I. Neumann & K. Sami

Recharge-discharge relations of the Vipava karst aquifer, Slovenia
M. Petric

Water table variation due to time-varying recharge and withdrawal
S. N. Rai & A. Manglik

2 Groundwater modelling

Comparison of genetic algorithms with other methods for the ambient groundwater monitoring network planning
L.-C.Chang, H.-C.Su & C.-L.Tien

Construction of groundwater model for Pusan area, South Korea

Hydraulic fracturing of water wells in Botswana
V.Devalpally, M.S.Nidamarty & L.Carlsson

Complementarity of electromagnetic prospecting and groundwater modelling to study shield volcano hydrogeology: Piton de la Fournaise volcano case study, Reunion Island
J.L.Folio, J.L.Join, B.Robineau, J.Coudray & M.Ritz

Groundwater conditions in the Upper Shire Valley, Malawi: A modelling synthesis
S.L.Horrocks, W.G.Burgess & P.Mkandawire

The interaction between coastal lakes and the surrounding aquifer
B.E.Kelbe & T.Germishuyse

Assessing uncertainty in sustainable yield
N.P.Merrick

Three-dimensional numerical models of groundwater flow and solute transport in fractured granites: Impact of tunnel construction in the groundwater system at the Åspö island, Sweden
J.Molinero, J.Samper & R.Juanes

Robust groundwater management through second-order cone programming, SOCP
J.M.Ndambuki, T.Terlaky, C.B.M.Stroet & E.J.M.Veling

Hydrogeological investigations in the Otavi Mountain Land
G.Schmidt & D.Ploethner

On variable-density groundwater flow in heterogeneous porous media

Groundwater investigation and modelling of effluent irrigation: A case study
J.J.G.Vermaak, D.G.Walker & J.C.F.Barnes

Optimised calibration of regional groundwater model through inverse modeling
Y.S.Yang, A.A.Cronin & R.M.Kalin

3 Chemical and isotopic characterization of groundwater

Groundwater salinization in parts of southern Ghana
T.E.K.Armah

A study on the mixing phenomena between surface water and groundwater induced pumping using environmental isotope tracers
D.Bae, C.Kim, Y.Koh & K.Kim

Groundwater sampling during the mud-rotary drilling process
A.Bittner & G.Christelis
Application of environmental isotope techniques to hydrological and pollution problems in the urban environment

*M.J. Butler, B.Th. Verhagen & M. Levin*

Geochemical modelling and laboratory experiments to test the feasibility of artificial recharge

*L. C. Cavé*

Geochemical processes affecting the composition of mineral waters in the South Portuguese Zone, Portugal

*A. Chambel & C. Almeida*

Dissolved radon concentrations in fractured rock aquifers

*P.G. Cook & J.C. Dighton*

High nutrient and chloride loads to surface waters in polder areas due to groundwater seepage

*P.G. B. de Louw, G.A. P. H. van den Eertwegh & J. Griffioen*

Isotope based assessment of groundwater renewal: An international study of the unsaturated zone

*W.M. Edmunds & B. Th. Verhagen*

Evolution of high-pH Na-HCO₃ groundwaters in anorthosites: Silicate weathering or cation exchange?

*B. Frengstad & D. Banks*

Regional scale solute transport modelling of a Permo-Triassic sandstone aquifer

*B. V. Furlong, J. H. Tellam, R. Mackay, J. A. Ingram & A. W. Herbert*

Arsenic in groundwaters of the southeast of Tucumán Province, Argentina

*M. G. García, D. S. Fernández, M. del Valle Hidalgo & M. A. Blesa*

Hydrochemical characteristics of the Faria basin, northeastern West Bank

*M. Ghanem & B. Merkel*

Modelling mixing of waters in a layered basaltic aquifer in a tropical climate at Rivière de l’Est, Reunion Island

*J. L. Hoareau, E. Nicolini & S. Violette*

Sustainable management of groundwaters in dryland salinity affected Spring Creek catchment, New South Wales, Australia

*J. Jankowski & S. Shekarforoush*

Biofouling in boreholes of the Klein Karoo Rural Water Supply Scheme, Oudtshoorn, South Africa, and the effect on well scheme management

*J. L. Jolly*

Isotopic characterization of groundwater and surface water in the Keta Basin, Ghana

*N. O. Jørgensen & B. K. Banoeng-Yakubo*

An aquifer model based on chemistry, isotopes and lineament mapping: Little Karoo, South Africa

*J. C. Kotze, B. Th. Verhagen & M. J. Butler*

Assessment of fluoride concentration in groundwater, Saldungaray, Argentina

*E. E. Kruse & J. E. Ainchil*
Hydrogeology, groundwater resources and salinification processes in the lower Okavango Delta, northwestern Botswana
F. Linn, M. Masie & A. J. Rana

Chemical character of groundwater in a basalt aquifer, North Queensland, Australia
K. L. Locsey & M. E. Cox

Boron isotope geochemistry as a tool to delineate natural groundwater processes
J. D. Mather & N. C. Porteous

Groundwater quality and sustainability in an alluvial aquifer, Australia
W. McLean, J. Jankowski & N. Lavitt

Environmental isotopes as indicators for groundwater recharge conditions below glaciated areas in crystalline rocks of the central Swiss Alps
U. S. Ofterdinger, W. Balderer, S. Loew & T. Vitvar

Predicting ion exchange parameters for Triassic Sandstone aquifers
K. E. Parker, J. H. Tellam & M. I. Cliff

Geochemical evolution of groundwater in metamorphic rocks of Trás-Os-Montes, Portugal
M. Rosário Pereira & C. Almeida

Rapid water quality changes in a thick clay sequence
B. A. Robinson, J. H. Tellam, J. B. Joseph & A. W. Herbert

Example of O- and H-isotope use to identify surface water pollution in groundwater
I. C. Saayman, S. Adams & C. Harris

Hydrogeology of the Baltimore region, central New South Wales, Australia
S. Schofield & J. Jankowski

Salinisation of a coastal aquifer in Mauritania: Salt wedge or bedrock alteration?
B. M. Semega, M. Lacroix, H. Q. Wang & J. P. Dupont

Arsenic and acidity in a groundwater system affected by acid sulfate soils, Stuarts Point, Australia
J. V. S. Smith, J. Jankowski & J. Sammut

Geohydrology and isotope hydrology of the Lomagundi dolomite, Zimbabwe
S. Sunguro, K. Froehlich, B. Th. Verhagen & W. Wagner

Kart aquifer characterization using physico-chemical spring data, Gran Sasso, Central Italy
M. Tallini, M. Petitta, D. Ranalli & S. Tersigni

CFC tracing of groundwater in fractured rock aided with $^{14}$C and $^3$H to identify water mixing
A. S. Talma, J. M. C. Weaver, L. N. Plummer & E. Busenberg

Characteristics of groundwater quality in the United Arab Emirates
C. Tang, S. Shindo, Y. Sakura & I. Machida

Calibration of a groundwater flow model for water management in Hamburg, Germany, using groundwater age measurements and hydrochemical data
R. Taugs & L. Moosmann

Depth variations in aquifer hydrochemistry using a low-cost, multilevel piezometer
Groundwater quality trends related to aquitard salt storage at selected sites in the Lower Murrumbidgee alluvium, Australia
W.Timms, R.L.Acworth, J.Jankowski & S.Lawson

Groundwater flow in fractured rocks of central Namaqualand, South Africa
R.A.Titus, S.Adams, K.C.Pietersen & G.Tredoux

In-situ measurement of physico-chemical parameters down a borehole as a tool for resource evaluation
G.Tredoux, L.C.Cavé & J.F.P.Engelbrecht

Environmental isotopes assist in ground water sustainability assessment of the Taaibosch fault zone, Northern Province, South Africa
B.Th.Verhagen, M.J.Butler, M.Levin & E.van Wyk

3D groundwater modelling of isotope data at Äspö, Sweden
B.Wallin & K.Innings

Pilliga Sandstone hydrogeochemistry, Great Artesian Basin, Australia
C.A.Wolfgang & L.White

4 Groundwater pollution vulnerability and remediation

Sources of faecal contamination of shallow groundwaters in Kampala
M.H.Barrett, K.Johal, G.Howard, S.Pedley & M.Nalubega

Using K_d-Test data in the estimation of contaminant attenuation and risk assessment
P.H.Beck & J.Jankowski

Simulation of mass transfer kinetics for chemically enhanced removal of residual trichloroethene
T.B.Boving, Z.Zhang, W.Ji & M.L.Brusseau

Field relationships and models of arsenic in aquifers of southern Bangladesh

The closure of existing waste piles in terms of the south African Department of Water Affairs and Forestry Waste Management Series
I.S.Cameron-Clarke & J.A.Palmer

Effect of rapidly urbanizing environment on the Thiaroye, Senegal, unconfined sandy aquifer
I.Cisse, S.Faye, C.B.Gaye, A.Faye & S.Wohnlich

Pollution vulnerability assessment in karstic aquifers: A case study of the Matese Mountains, Southern Italy
A.Corniello & D.Ducci

Natural redox processes and bioremediation in the Gardermoen glaciofluvial aquifer, Norway
A.Dagestad

Proving natural attenuation with modeling at a site contaminated by ammonium and phenolics
R.M.Davison & D.N.Lerner

XII
Delineation of borehole protection zones in fractured rock aquifers  
S.S.de Lange & G.J.van Tonder

Degradation behaviour of halogenated aliphatics influenced by concurrent chromate reduction in subsurface Fe°-reactor systems  
M.Fruth & M.Schneider

Bacterial contamination in Norwegian groundwater wells in bedrock  
S.Gaut, G.Storrø & B.Brattli

Soil pore manipulations to increase bioaccessible pore volume  
J.H.Görres, M.A.Stolt, J.A.Amador, C.Schulthess & P.W.Johnson

Using urban aquifers: Assessing water quality issues  

Colloid release due to degradation of organic contaminants at a former gas plant, Gaisburg, Germany  
T.Hofmann & T.Schäfer

Transport of suspended solids from karst to alluvial aquifer: Column/field experiment  
N.Massei, M.Lacroix, H.Q.Wang & J.P.Dupont

Characterization and remediation of a low permeability formation contaminated with halogenated solvents  
B.A.Memon, L.D.George & M.M.Azmeh

Hydrogeological characterization of fractured rock for Sweden’s nuclear waste storage  
M.Morosini & I.Rhén

Practical and responsible approaches to soil and groundwater contamination management at a South African metal plating factory  
R.D.Morris, H.G.Allerton III & J.P.Wvan der Westhuysen

Risk-based decision analysis for the selection of remediation strategy at a landfill  
J.Norrman

Groundwater pollution, landuse and environmental impacts on Lusaka aquifer  
I.A.Nyambe & C.Maseka

Modelling and field trials for the development of a rehabilitation strategy for an existing hazardous waste site  
J.A.Palmer, A.J.Oliver & I.S.Cameron-Clarke

Enteric virus detection in groundwater using a glass wool trap  
K.L.Powell, M.H.Barrett, S.Pedley, J.H.Tellam, K.A.Stagg, R.B.Greswell & M.O.Rivett

Natural resistance to agricultural contamination of a limestone aquifer  
S.C.Roberts & J.M.McArthur

Passive in situ treatment of Cr(VI)-contaminated groundwater by zero-valent iron: Results of a field study  
M.Schneider
Risk assessment, modeling groundwater contamination, capping and optimizing hazardous waste landfills from metal smelters
J.E. Sorlie & K. Rudolph-Lund

In situ measurement of oleoporic fracture aperture by DNAPL surrogate injection
A. Steele & D.N. Lerner

Experiences with an in situ groundwater remediation of VOCs in Hamburg, Germany
J. Taugs

A volume-based approach to predicting the fate of DNAPLs in fractured aquifers
G.P. Wealthall & D.N. Lerner

Changes of quantity and quality of groundwater in the Triassic carbonate formation in Upper Silesia, Poland
A.J. Witkowski & A. Kowalczyk

Effects of soil environment changes on the behavior of VOC’s in unsaturated zone
M. Yoshimura & C. Tang

5 Integrated water resource management

Groundwater status of the City of Stockholm
M. Aastrup, J. Anderberg & B. Thunholm

A review of impacts of forestry on groundwater and implications for forest management
A. R. Allen & D. V. Chapman

Current and future challenges for managing groundwater quality in Perth, Western Australia
S. I. Appleyard

Groundwater resources management in Africa with the aid of databases and GIS
I. F. Blecher

Groundwater management below sea-level coastal areas in the Po Delta, NE Italy
M. Bondesan, A. Gargini & A. Giovannini

US regulation of animal feeding operations: Need for a watershed approach
T. J. Centner, M. E. Wetzstein & J. W. Worley

Experiences from implementation of artificial recharge projects in India
D. K. Chadha

Assessment of saline groundwater resources in the goldfields of Western Australia
D. P. Commander & S. L. Johnson

Classification of groundwater resources under the South African National Water Act
J. Conrad & I. van der Voort

The potential of riverbank filtration for drinking water supplies when aquifers are brackish
P. J. Dillon, W. Rhebergen, M. Miller & H. Fallowfield

Small scale aquifer storage and recovery – A case study from England and implications for wider development
J. E. Dodds
Developmentscenario for sustainable urban water systems
*M.Eiswirth, H.Hötzl & L.S.Burn* 917

Hydrogeological decision analysis for selection of alternative road stretches and designs
*H.S.Eklund & L.Rosén* 923

Investigation of trace elements for the assessment of sustainable water supply
*B.Fritz, C.Sommer-von Jarmersted, A.Pekdeger, S.Wischnack & M.Jekel* 929

Managing groundwater resources with increasing sulphate concentration: A case study from Germany
*T.Grischek, V.Schmalz, E.Worch, J.Herlitzius & W.Nestler* 935

Salinity and floodplain tree health in the lower River Murray, Australia

Advancing technologies in the hydrogeological design of urban subdivisions

A framework for assessing water resources and abstraction sustainability
*S.Kirk & R.Soley* 953

Information on interactions between groundwater and vegetation relevant to South African conditions: A review
*D.C.Lemaître, D.F.Scott & C.Colvin* 959

Failure of rural schemes in South Africa to provide potable water
*G.Mackintosh & C.Colvin* 963

Aquifer Storage and Recovery (ASR) using water treated to irrigation standards
*R.R.Martin, N.Z.Gerges & P.J.Dillon* 969

Major issues in sustainable water supply in Botswana
*O.A.Masedi, O.Katai, I.Muzila & L.Carlsson* 975

Groundwater resources management in the SADC region: A field of future regional cooperation
*P.Molapo, S.K.Pandey & S.Puyod* 981

Testing borehole injection for artificially recharging secondary aquifers in Southern Africa
*E.C.Murray & G.Tredoux* 987

Management of groundwater resources in Lusaka, Zambia, and expectations for the future
*D.C.W.Nkhuwa* 993

Determination of the groundwater component of the reserve using the intermediate reserve determination method
*R.Parsons & H.MacKay* 999

Challenges in evaluating solute transport from a long-term ASR trial in a heterogeneous carbonate aquifer
*P.Pavelic, P.J.Dillon & N.Z.Gerges* 1005

Sustainable management of groundwater in Neapolitan volcanic areas, Italy
*V.Piscopo, F.Formica & V.Allocca* 1011
Support for integrated groundwater/surface water monitoring and assessment for sustainable catchment management  
*D.W.Peach, B.Adams, J.P.Bloomfield & H.Wheater*

Semi-arid regions being the millstone of new developed countries: Case study Rioverde basin, Mexico  
*B.Planer-Friedrich & B.J.Merkel*

Towards a groundwater management plan for the Taabos Spruit and Leeu Spruit catchments, South Africa: A situation analysis  
*J.A.Pretorius & B.H.Usher*

Sustainable water resources management in an agricultural environment  
*M.Razack, M.Larminach & O.Gaillard*

Sustainable groundwater supplies for rural communities: A common approach to project audit  
*N.S.Robins, R.C.Calow, K.Pietersen & R.Titus*

Groundwater resources in Berlin, Germany: Will there be enough fresh water in the future?  
*C.Sommer-von Jarmersted, B.Fritz & A.Pekdeger*

Sustaining ecosystems and cultures dependent on springs of the Grand Canyon, USA  
*A.E.Springer & E.S.Wilson*

Managing mine de-watering for bulk groundwater supply in the Kalahari region, South Africa  
*G.Sdu Toit van Dyk, L.D.Ferris & J.M.Nel*

The role of groundwater quality monitoring in the strategy of groundwater protection  
*J.Vrba*

The impacts of dual-porosity aquifers on Aquifer Storage Recovery (ASR) schemes  
*A.T.Williams, I.Gaus & I.N.Gale*

Comprehensive determination of the resource directed measures for groundwater in South Africa  
*Y.Xu, E.Braune, C.Colvin, D.Le Maitre, K.Pietersen & T.Hatton*

Groundwater resources protection and aquifer recovery in China  
*Z.Han*

Geostatistical approach to groundwater quality assessment in a rural zone of the Tejo River basin border, Portugal  
*J.Duque & A.Chambel*

6 Groundwater and mining

Hydrogeochemical tools to define sources of ground-water inflow to surface and underground mines  
*D.A.Bird & J.J.Mahoney*

Hydrogeological and geochemical investigations of an acidic mining lake as a basis for a biotechnological remediation  
*E.Buzau, K.Knöller & G.Strauch*
Investigation on deep water resources by tunnels within the “Piton des Neiges” volcano, Reunion Island
L. Bret, J.-L. Join & J. Coudray

Dewatering and the tourist potential of hydrogeological resources of the Gavorrano mine, Tuscany, Italy
C.A. Garzonio

Salinity issues relating to decommissioned open pits in Western Australia
J.W. Hall

The impact of mining on groundwater quality in the Tarkwa area, Ghana
B.K. Kortatsi

Witwatersrand deep Au mines: Windows into deep subsurface microbial communities
T.C. Onstott, D.P. Moser & R.J. Wilson

Assessment and rehabilitation of reclaimed gold tailings dams areas in South Africa
T.Rösner, J.J.G. Vermaak, A.van Schalkwyk & C.J. Viljoen

Management of coal mining impacts on water resources in South Africa
D.A. Salmon
