Proceedings

1st Intercontinental Landfill Research Symposium

Luleå, December 11 – 13, 2000

http://lst.sb.luth.se/iclrs/web/symposia.html

Editor: Anders Lagerkvist

Organising committee:

Morton Barlaz, North Carolina State University, USA
Anders Lagerkvist, Luleå University, Sweden
Toshihiko Matsuto, Hokkaido University, Japan
CONTENTS

Schedule 1

General Session A, Dec. 11 2000, 9.30 am – 10.30 am 2

General Session B, Dec. 13 2000, 9.30 pm – 1.00 pm 3

Session A, Dec. 11 2000, 11.00 am – 4.00 pm

Bioreactor Technology 4

Augenstein, D.
Bioreactor Landfills: Transport Processes and Chemical Engineering Perspectives 5

Pelkonen, M. & Nykänen, V.
Enhancement of waste degradation with leachate recirculation at an old landfill 7

Oonk, H. & Woelders, H.
Treatment of MSOR (mechanical separation organic residues) in a landfill bioreactor 9

van der Sloot, H. A. & Woelders, J. A.
Leaching behaviour of VAM Bioreactor Rest Product at different stages of degradation at laboratory and pilot scale to assess potential utilization options 10

Hater, G. R.; Green, R. B & Goldsmith, C. D.
Measurement of carbon and nitrogen cycles in landfill bioreactors 11

Environmental Management Issues 12

Finnveden, G., Johansson, J., Lind, P. & Moberg, Å.
Environmental effects of landfilling of solid waste compared to other options - assumptions and boundaries in life cycle assessment 13

Caine, M. & Pugh, M.
The development of low cost landfilling techniques for emerging countries 15

Rushbrook, P.
Upgrading Landfill Disposal in Kosovo 16

http://ist.sb.liith.se/iclrs/web/symposia.html
Session B, Dec. 11 2000, 4.30 pm – 7.30 pm

**Ash Landfilling and Carbonation**

Anthony, E. J. & Jia, L.
Carbonation of Ca based waste materials from FBC boilers

Marzi, T., Palitzsch, S., Keldenich, K. & Kümmel, R.
Factors and technical methods influencing the quality of MSWI bottom ash

Sabbas T., Mostbauer P., Rautner T., Kochberger M., Kraxner M., Saxer A., Czermak O., Wruss W., Lukas W., Lechner P.
Development of a prediction model for the assessment of the middle and long term emission behaviour of inorganic wastes

Mizutani, S., Sakai, S.-i. & Takatsuki, H.
Acid neutralizing capacity (ANC) and leaching test scheme for short and long term behaviour of granular waste

Grischek, H., Rotschky, G., Bilitewski, B.
Effects of lignite ashes on acid buffering and metal emissions of flooded MSW landfills

Rautner, T., Sabbas, T., Mostbauer, T., Huber, H. & Lechner, P.
Influence of different artificial weathering methods on the long-term leaching behaviour of thermal residues from municipal solid waste incineration

**Defining Landfill Stability and the End of the Post-Closure Monitoring Period**

Kjeldsen, P.; Barlaz, M.; Rooker, A.; Ledin, A. & Christensen, T. H.
An evaluation of the composition of MSW landfill leachate from mature refuse

Zach, A.
Organic matter stability after mechanical-biological pre-treatment of MSW

Gronow, J.
Landfill Stabilisation in a Generation?

Barlaz, M. A., Rooker, A. & Kjeldsen, P.
Closing the Gaps in the Regulation of Municipal Solid Waste Landfills: Defining the End of the Post-Closure Monitoring
## Leachate Management

Session D, Dec. 12 2000, 2.00 pm – 6.30 pm

*Methane Oxidation at Various Scales: Small-Scale Laboratory Studies to Field-Scale Optimization*

- Fischer, C. M. & Bichsel, M.
  Microbial oxidation of landfill methane in a biofilter

- Bajic, Z. & Zeiss, C.
  Methane oxidation in simulated landfill cover soils

- Dote, Y.
  Kinetics of methane oxidation in mixed culture

- Scheutz, C. & Kjeldsen, P.
  Methane oxidation and degradation of halogenated organic compounds in landfill gas affected soil

- Christophersen, M. & Kjeldsen, P.
  Field investigation of methane oxidation in soil adjacent to an old landfill

- Humer, M. & Lechner, P.
  Methane oxidation in optimized landfill cover layers under different seasonal conditions

- Ettala, M. & Väisänen, P.
  New technology to enhance methane oxidation at landfills

*Aerobic and Anaerobic Landfills*

- Hudgins, M. & Green, L.
  Results from a Large-Scale Aerobic Landfill System

- Shimaoka, T & Hanashima, M.
  Characteristics and mechanism of semi-aerobic landfill on the stabilization of solid waste

- Lagerkvist, A.
  Experiences of Acidogenic Treatment of Waste in Landfill Environments

- Reinhart, D. D. & Townsend, T.
  Aerobic vs Anaerobic Bioreactor Landfill Case Study - The New River Regional Landfill

*http://lst.sb.luth.se/iclrs/web/symposio.html*
Poster Presentation, Dec. 12 2000, 6.30 pm – 7.30 pm

Qdais, H. A.
Analysis of leachate treatment technologies

Haarstad, K. & Mæhlum, T.
The use of chloride concentrations for estimating dilution in aerobic leachate treatment systems

Gomiscek, T. & Lechner, P.
The Possibility to Minimise the Leachate by Using Compost Substrates and Fast Growing Fuel Plants as a Recultivation Cover on Landfills

Binner E. & Zach, A.
The incubation test - development of a test method describing the biological reactivity of mechanically-biologically pre-treated waste

D.L. Barry & S. Schwarze
Minimising methane emissions from landfills

Duncan J Martin
Could there be three rate-limiting steps in solid-state digestion?

Dr. Chris Zeiss, P. Eng. and Dr. R. Li
In-situ moisture content measurement and control in bioreactor landfills

http://lst.sb.luth.se/iclrs/web/symposia.html
