3rd European Thermal Sciences Conference

2000

Proceedings of the 3rd European Thermal Sciences Conference
Heidelberg, Germany, 10-13 September, 2000

Editors

E. W. P. Hahne        W. Heidemann        K. Spindler

Institute of Thermodynamics and Thermal Engineering
University of Stuttgart
Stuttgart, Germany

Volume 2
Application of multi-zone two-dimensional thermal radiation models for control of a metal reheating furnace under transient conditions
S.A.C. Correia, J. Ward, J.L.V.A. Sousa

Radiative heat transfer in a packed bed of spheres by a Monte Carlo technique
I. Malico, J.C.F. Pereira

Small scale surface combustion of industrial gas oil (IGO) supported by cool flames
F. von Issendorff, A. Wittmer, D. Diarra, K. Lucka, H. Köhne

Heat transfer analysis in combustion of biofuels
T. Nilsson, B. Sunden

Response of an anchored V-flame to incoming vortices
C.W. Rhee

Radiative heat transfer and NOx emissions of a 300 kW variable swirl gas burner: numerical and experimental study
B. Pesenti, C. Vanderpypen, H. Meunier

Measurement Techniques

A noncontact technique for the determination of the longitudinal thermal conductivity and diffusivity of foils
V. Drach, H.P. Ebert, J. Fricke

Improved thermal property measurements during curing of thermoset materials using steady periodic conditions
B. Garnier, A. Sommier

Measurement of free surface deformation by reflectance-schlieren method
B. Scheid, O.A. Kabov, C. Minetti, P. Colinet, J.C. Legros

3D-transition of low Reynolds number flow around a heated cylinder
R. Kieft, C. C.M.Rindt, A.A. van Steenhoven

Frequency response of a cold-wire in a flow seeded with oil particles
F. Weiss, P. Paranthoën, J.C. Lecordier

Local heat transfer in the spherical cavity at the forced convection
V.Y. Mitiakov, S.Z. Sapozhnikov, A.V. Mitiakov

Heat transfer and turbulence measurements in high temperature natural convection boundary layers using a single thermoanemometric probe
T. Delarochelambert

Instationary heat transfer measurements in a Ludwieg tube
H.C. de Lange, R. Schook, A.A. van Steenhoven

Transient phenomena in gradient heat flux sensors
V.Y. Mitiakov, S.Z. Sapozhnikov, A.V. Mitiakov
New technique in radiation thermometry to eliminate the influences of emissivity and absorption in the optical path
G. Neuer, E. Schreiber

Local heat transfer to transitional impinging gaseous jets
M. Angioletti, R. Di Tommaso, E. Nino, G. Ruocco

Heat transfer between transport rollers and plates
E. Specht, K.U. Holzapfel

**Boiling**

Information on bubble dynamics and heat transfer in subcooled boiling systems using an acoustic sensor
A. Bode, J.J. Schroeder

Boiling investigation by laser and acoustic diagnostics methods
Yu. A. Kuzma-Kichta, A.K. Ustinov, A.A. Ustinov

Measurements on the bubble behaviour and the phase boundary velocity in subcooled flow boiling
R. Maurus, K. Hermanson, T. Sattelmayer

Nonlinear analysis of site interactions in pool nucleate boiling
P.E. McSharry, L.A. Smith, T. Kono, D.B.R. Kenning

Nucleation site density and heat transfer in nucleate pool boiling of refrigerant R 134a in a wide pressure range
G. Barthau, E. Hahne

New methods of characterization for the microstructure of heated surfaces in boiling
A. Luke

Pool boiling heat transfer from tubes with basic surface modifications for enhancement – design of the test tubes and first measurements

Prediction of bubble departure diameters in nucleate boiling
M. Mann, K. Stephan

High speed flow visualization of pool boiling from enhanced evaporator tubes
R. Kulenovic, R. Mertz, M. Groll

Steady state pool boiling experiments with water between nucleate and film boiling
M. Buchholz, T. Lüttich, H. Auracher, W. Marquardt

Heat transfer in nucleate boiling of binary and ternary mixtures
Y. Fujita, M. Tsutsui, Q. Bai

Pool boiling in binary mixtures of ammonia/water
T. Inoue, M. Monde, Y. Teruya
Assessment of a theoretical model for the nucleate boiling heat transfer coefficient of binary mixtures
J. Kern, P. Stephan

Pool boiling heat transfer of R134a-oil mixture on a smooth tube and an enhanced tube
K. Mohrlok, K. Spindler, E. Hahne

Pool boiling of propane from enhanced tubular surfaces
R. Mertz, R. Kulenovic, M. Groll

Boiling heat transfer from a superhydrophilic surface

Heat and mass transfer when boiling on coated surfaces and in porous structures
H.F. Smirnov

Enhancement of heat transfer at boiling with porous coated surfaces

An experimental study on microbubble emission boiling of water
K. Suzuki, K. Saito, T. Sawada, K. Torikai

Boiling heat transfer from an array of two cylinders to a water slot jet
C. Bartoli, S. Faggiani, M. Lorenzini

Flow boiling of ammonia and ammonia-oil mixtures in a plain and low finned horizontal tube
H.J. de Buhr, S. Kabelac

Convective boiling heat transfer in helically coiled tubes
Y.C. Sa, S.M. You, J.S. Lee, S.T. Ro

Dryout quality and post-dryout heat transfer coefficient in horizontal evaporator tubes
H. Mori, S. Yoshida, K. Ohishi, Y. Kakimoto

Liquid-vapor behavior and temperature fluctuation near dryout point in flow boiling under different gravity conditions
H. Ohta, Y. Shinmoto, S. Morioka, H. Tanouchi, H. Fujiyama

Heat transfer to falling liquid films with high Prandtl numbers
V.V. Wadekar

Effect of porous coating on the mechanisms of CHF at low pressures and at low mass flow rates
S. Yildiz, G. Bartsch

Heat transfer at vaporization of liquid film on smooth horizontal tube
V. Rifert, I. Zolotukhin, V. Sidorenko
Transitional processes at boiling
A.N. Pavlenko, I.P. Starodubtseva, V.V. Lel

Transient boiling on a thin wire: the onset of film boiling
M.C. Duluc

Thermodynamics of wire explosion
V.S. Vorobev, A.A. Eronin, S.P. Malyshenko

Condensation

Prediction of condensation heat transfer on horizontal tube with condensate drainage
D. Butrymowicz, M. Trela, J. Karwacki

Retention and draining of condensate on heat exchangers surface
C. Tribes, S. Russeil, B. Baudoin

Condensation of vapours of immiscible liquids in the presence of a non-condensing gas
C. Mönning, R. Numrich

Onset of the Marangoni effect during condensation of ammonia-water mixtures - effect of temperature driving force variation
C. Korte, J. Deans, M.G. Dunstall

Combined heat transfer, mass transfer and interface convection during evaporation of binary mixtures from planar gaps
S. Post, E. Tsotsas

Dropwise condensation on ion implanted metallic surfaces
A. Leipertz, K.H. Choi

About particularities of dropwise condensation process at organic stimulator application
A.S. Gavrish

Condensation pressure losses in smooth tubes
A. Cavallini, D. Del Col, L. Doretti, G.A. Longo, L. Rossetto

Experimental investigation of the influence of countercurrent flow of the phases on condensation heat transfer in a vertical tube
S. Thumm, C. Philipp, U. Gross

Spontaneous condensation in boundary layers at stratified flow
M. Goldbrunner, J. Karl, D. Hein

Condensation of ternary refrigerant mixtures of HFC 32 / 125 / 134a inside a horizontal micro-fin tube
S. Koyama, S.M. Lee, J. Yu
