CHAPTER 9 - SEPARATION AND CLASSIFICATION

• A DE-DUSTING DEVICE FOR REMOVING FINES FROM PELLETS AND GRANULES
  S.R. de Silva and F.O. von Hafenbradl
  1. Telemark University College, NORWAY
  2. Telemark Technological R&D Centre, NORWAY .......................................................... 9.1

• DRY TRIBOSEPARATION: A NEW TECHNOLOGY FOR POWDER MATERIALS SEPARATION
  B. Eiderman, M. Voskoboinik, H. Levy and M. Soskine
  SORTECH Separation Technologies Ltd., ISRAEL .......................................................... 9.9

• PARTICLE SURFACE INSPECTION WITH FOURIER-WAVELETS TRANSFORM
  M. Takei, H. Li, M. Ochi, Y. Saito and K. Horii
  1. Nihon University, Tokyo, JAPAN
  2. Kagoshima University, Kagoshima, JAPAN
  3. Hosei University, Tokyo, JAPAN
  4. Shirayuri College, Tokyo, JAPAN ............................................................................ 9.15

• ASSESSMENT OF A MULTISTAGE GRAVITY SEPARATION IN TURBULENT AIR FLOW
  J. Tomas and T. Groger
  The Otto-von-Guericke-University Magdeburg, GERMANY ........................................... 9.20

• EFFICIENCY OF PARTICULATE SOLIDS REDISTRIBUTION AS THE PARAMOUNT DIRECTION FOR SCREENING EFFICIENCY RISE
  V. Grozubinsky and E. Sultanovich
  A.S.T. Advanced Screening Technologies Ltd., ISRAEL .................................................. 9.28

• DISPERSION STRUCTURE OF MIXES OF PARTICULATE SOLIDS
  G. Efremov
  Kosigin State Textile University of Moscow, RUSSIA ...................................................... 9.35

CHAPTER 10 - PNEUMATIC CONVEYING

• DENSE PHASE (PLUG) CONVEYING – OBSERVATIONS AND PROJECTIONS
  G.E. Klinzing
  University of Pittsburgh, USA ...................................................................................... 10.1

• MODELLING THE UNSTABLE BOUNDARY FOR LOW-VELOCITY SLUG-FLOW PNEUMATIC CONVEYING
  J. Yi and P.W. Wypych
  University of Wollongong, AUSTRALIA ......................................................................... 10.11

• GRANULAR JUMP IN LOW VELOCITY PNEUMATIC CONVEYING OF SOLID PARTICLES IN A HORIZONTAL PIPELINE
  Y. Tomita, K. Funatsu and S. Harada
  Kyushu Institute of Technology, JAPAN ......................................................................... 10.18

• EXPERIMENTAL INVESTIGATION OF LOW-VELOCITY SLUG-FLOW IN A HORIZONTAL PIPELINE
  D.B. Hastie, R. Pan, P. Wypych and P.R. Guiney
  1. University of Wollongong, AUSTRALIA
  2. University of Newcastle, AUSTRALIA ....................................................................... 10.24
• PRESSURE DROP OF SLUGS IN THE UNSTABLE ZONE OF PNEUMATIC CONVEYING
  R. Pan¹ and P.W. Wypych²
  1. University of Newcastle, AUSTRALIA
  2. University of Wollongong, AUSTRALIA ......................................................... 10.31

• A MODEL FOR NON-SUSPENSION GAS-SOLIDS FLOW OF FINE POWDERS IN PIPES
  D.J. Mason¹ and A. Levy²
  1. Glasgow Caledonian University, UK.
  2. Ben-Gurion University of the Negev, ISRAEL .................................................. 10.37

• THE PROBLEM WITH DILUTE-PHASE PNEUMATIC CONVEYING
  P.W. Wypych
  University of Wollongong, AUSTRALIA ............................................................... 10.45

• A NUMERICAL STUDY OF GAS-SOLIDS FLOW THROUGH INCLINED PIPES USING
  THE DISTINCT ELEMENT METHOD
  D.J. Mason¹, J. Li¹ and A. Levy²
  1. Glasgow Caledonian University, UK
  2. Ben-Gurion University of the Negev, ISRAEL .................................................. 10.59

• LATEST DEVELOPMENT OF THE DIRECT TECHNIQUE FOR MEASUREMENT OF THE
  PNEUMATIC CONVEYING CHARACTERISTICS OF BULK MATERIALS
  M.S.A. Bradley, L.M. Hyder and R.J. Farnish
  University of Greenwich, UK .............................................................................. 10.66

• THE DESIGN OF PIPELINE SYSTEMS FOR TRANSPORTING ICE INTO DEEP MINES
  T.J. Sheer¹, R. Ramsden² and M. Butterworth³
  1. University of the Witwatersrand, Johannesburg, SOUTH AFRICA
  2. Bluhm Burton Engineering (Pty) Ltd., SOUTH AFRICA
  3. CSIR Mining Technology, SOUTH AFRICA ....................................................... 10.75

• EXPERIMENTAL STUDIES ON PNEUMATIC CONVEYING OF WET SNOW
  T. Kobayashi¹ and Y. Nohguchi²
  1. Nagaoka Institute of Snow and Ice Studies, JAPAN
  2. Atmospheric and Hydroscopic Science Division, JAPAN .................................. 10.81

• PNEUMATIC CONVEYING UNDER EXTREME CONDITIONS
  H.-J. Roski
  Deutsche Montan Technologie GmbH, GERMANY ............................................... 10.87

• NUMERICAL SIMULATION OF SOLIDS FEEDING IN A GAS-SOLIDS PNEUMATIC
  TRANSPORT SYSTEM
  D.J. Mason, J. Li and P. Marjanovic
  Glasgow Caledonian University, UK ................................................................. 10.93

• THE USE OF HIGH PRESSURE BLOW TANKS FOR THE PNEUMATIC CONVEYING OF
  PELLETISED MATERIALS
  D. Mills
  Pneumatic Conveying Consultant, UK .................................................................. 10.102

• A NOVEL ANALYTICAL MODEL FOR THE ACCELERATION OF PARTICLES FOLLOWING
  BENDS IN PNEUMATIC CONVEYING SYSTEMS
  M.S.A. Bradley, R.J. Farnish and L.M. Hyder
  University of Greenwich, UK ........................................................................... 10.108

• THE INFLUENCE OF A BEND ON THE FLOW CHARACTERISTICS IN PNEUMATIC
  CONVEYING SYSTEMS
  A. Levy
  Ben-Gurion University of the Negev, ISRAEL ..................................................... 10.118
CHAPTER 11 - PARTICLE FLOW

- PNEUMATIC CONVEYING WITH TURBUFLOW®-ADVANTAGES AGAINST CONVENTIONAL DENSE PHASE CONVEYING
  M. Geweke and U. Gade
  1. Johannes Moller Hamburg Engineering GmbH, GERMANY
  2. VEAG Vereinigte Energiewerke AG, GERMANY ......................................................... 10.124

- FLUIDSTAT®: LOW VELOCITY CONVEYING OF COAL-FIRED BOILER FLY ASH
  G. Pavoni
  Hamon Research-Cottrell Italia S.p.A., ITALY ................................................................. 10.130

- THE APPLICATION OF LOW VELOCITY SLUG FLOW IN PNEUMATIC UNLOADER
  H.X. Chen¹, R. Pan² and Q. Xu¹
  1. The Ministry of Communications, CHINA
  2. The University of Newcastle, AUSTRALIA ................................................................. 10.137

- MESOSCOPIC NATURE OF GRANULAR FLOWS
  I. Goldhirsch
  Tel-Aviv University, ISRAEL ............................................................... 11.1

- SPIRAL FLOW AND ITS INDUSTRIAL APPLICATIONS
  K. Horii
  Shirayuri College, JAPAN ............................................................... 11.11

- NUMERICAL AND EXPERIMENTAL STUDIES FOR THE IMPACT OF PROJECTILES ON GRANULAR MATERIALS
  K. Tanaka, M. Nishida, T Kunimochi and T. Takagi
  Nagoya Institute of Technology, JAPAN ................................................................. 11.21

- ON GAS-SOLID INTERACTIONS IN THE FLOW OF GRANULAR MATERIAL DOWN A CHUTE
  Y. Zhang and J.M. Reese
  University of Aberdeen, UK ................................. 11.27

- DEVELOPMENT OF A SIMULATION MODEL OF RAPID GRAVITY FLOWS OF PARTICULATE SOLIDS ON A ROUGH CHUTE
  V.N. Dolgunin, V.J. Borschov and P.A. Ivanov
  Tambov State Technical University, RUSSIA ......................................................... 11.33

- INLET CONDITIONS EFFECT ON THE NUMERICAL SOLUTIONS OF PARTICLE-GAS FLOWS, A PARAMETRIC STUDY
  M. Haim, Y. Weiss and H. Kalman
  Ben-Gurion University of the Negev, ISRAEL ......................................................... 11.38

- EFFECTS OF PARTICLE COLLISIONS ON THE SCALING OF FLUIDIZED SYSTEMS
  M. Swanson, M. Detamore, and C. Hrenya
  University of Colorado, USA ................................................................. 11.45

- THEORETICAL AND EXPERIMENTAL STUDY ON CHOKING PHENOMENON OF GAS-PARTICLE FLOW
  S.M. Tan, A.H. Liu and Z.S. Zou
  Northeastern University, CHINA ................................................................. 11.51
• THEORETICAL STUDY ON THE BEHAVIORS OF GAS-PARTICLE FLOW IN THE DIVERGENT PART OF DE LAVAL NOZZLES
  X.F. Dong¹, T. Han², X.G. Xiao³, Z.S. Zou¹ and Y.C. Peng³
  1. University of New South Wales, AUSTRALIA
  2. Ben-Gurion University of the Negev, ISRAEL
  3. Northeastern University, CHINA ........................................ 11.58

• LIVE BED TRANSPORT OF GRANULAR MATERIALS
  D.M. Hanes
  The University of Florida, USA ........................................ 11.64

• MODELING OF GRANULAR MATERIAL FLOW
  J. Zegzulka
  VŠb-Technical University Ostrava, CZECH REPUBLIC .............. 11.65

CHAPTER 12 – HYDRAULIC CONVEYING

• DEPOSITION VELOCITIES FOR SLURRY FLOWS
  C.A. Shook and R.J. Sumner
  University of Saskatoon, CANADA ........................................ 12.1

• PARTICLE MOTION IN SHEARED NON-NEWTONIAN MEDIA
  K.C. Wilson
  Queen's University at Kingston, CANADA ................................ 12.9

• LAMINAR AND TURBULENT FLOW OF DENSE KAOLIN AND ASH HYDROMIXTURES
  P. Vlasak and Z. Chara
  The Academy of Sciences of the Czech Republic, CZECH REPUBLIC ........................................ 12.14

• SOLIDS DISTRIBUTION IN PIPELINE FLOWS OF HIGHLY CONCENTRATED SAND-WATER MIXTURES
  V. Matousek
  Delft University of Technology, THE NETHERLANDS .................. 12.20

• RHEOLOGICAL CHARACTERIZATION OF INDUSTRIAL MINERALS SLURRIES
  A. de Pretis, A. Papo and L. Piani
  Università degli Studi di Udine, ITALY ................................ 12.26

• AUTOMATED AND RHEOLOGICALLY CONTROLLED MAKE-UP OF SLURRY AND PASTE FOR BACKFILL AND BUILDING MATERIAL APPLICATION
  E.W. Hollinderbäumer
  Deutsche Montan Technologie GmbH, GERMANY ......................... 12.32

• NET POSITIVE SUCTION HEAD REQUIREMENT FOR CENTRIFUGAL SLURRY PUMPS
  L. Whitlock¹, A. Seilgren² and K. Wilson³
  1. GIW Industries Inc., USA
  2. Lulea University of Technology, SWEDEN
  3. Queen's University, CANADA ........................................ 12.38

• SLURRY AND TIP CLEARANCE EFFECTS ON A CENTRIFUGAL PUMP PERFORMANCE USED IN HYDRAULIC TRANSPORTATION SYSTEMS
  T. Engin, M. Gür and İ. Çalı
  University of Sakarya, TURKIE ........................................ 12.44
CHAPTER 13 - CAPSULE CONVEYING AND FREIGHT PIPELINE

- PNEUMATIC CAPSULE PIPELINES IN JAPAN AND FUTURE DEVELOPMENTS
  S. Kosugi
  Sumitomo Metal Industries, Ltd., JAPAN .......................................................... 13.1

- A CONTRIBUTION TO HYDROTRANSPORT OF CAPSULES IN BEND AND INCLINED PIPELINE SECTIONS
  P. Vlasak¹ and V. Berman²
  1. Institute of Hydrodynamics ASCR, CZECH REPUBLIC
  2. Institute of Hydromechanics NAU, UKRAINE .................................................. 13.7

- DRAG REDUCTION IN HYDRAULIC CAPSULE PIPELINES
  T.R. Marrero and G.S. Kuhlman
  University of Missouri – Columbia, USA .............................................................. 13.13

- PAST, PRESENT AND THE FUTURE OF FREIGHT PIPELINE INDUSTRY
  R. Marcus¹ and I. Zandi²
  1. Synergy Consulting (PTY) Ltd., SOUTH AFRICA
  2. University of Pennsylvania, USA ................................................................. 13.20

- RESEARCH OF HYDROTRANSPORTATION OF THE BOTTLES
  A. Jvarsheishvili, D. Robakidze, I. Doreuly and L. Shatakishvili
  Georgian Technical University, GEORGIA ....................................................... 13.21

CHAPTER 14 - MECHANICAL CONVEYERS AND FEEDERS

- RECENT DEVELOPMENTS IN FEEDER DESIGN AND PERFORMANCE
  A.W. Roberts
  University of Newcastle, AUSTRALIA ................................................................. 14.1

- VERTICAL SCREW CONVEYORS. ANALYSIS OF WORK AND DESIGN CALCULATIONS
  D. Schlesinger and A. Papkov
  Dafna Eng. Ltd., ISRAEL ...................................................................................... 14.11

- FLAT BELT BULK MATERIAL FEEDER ACCURACY
  K.A. Alexeff and W. E. Downs
  Stock Equipment Company, USA ........................................................................ 14.17

- RECENT DEVELOPMENTS IN THE BELT CONVEYING OF BULK SOLIDS
  A.W. Roberts
  University of Newcastle, AUSTRALIA ................................................................ 14.24

- LONG DISTANCE OVERLAND CONVEYING - THE ADVANTAGES OF CABLE HAULED CONVEYING AND COLLABORATIVE PARTNERING
  G. Thomas
  JLV Industries Pty. Ltd., AUSTRALIA ................................................................ 14.30

- PUTTING THE PEDAL TO THE METAL
  S. Kubo, G. Lodewijks and A. Neuman
  Conveyor Experts B.V., THE NETHERLANDS .................................................... 14.37

- CORELESS SCREW CONVEYORS
  A. Atlas
  Makhteshim, Chemical Works, Ltd., ISRAEL ....................................................... 14.43
CHAPTER 15 - MEASUREMENT

- APPLICATION OF TOMOGRAPHIC TECHNIQUES FOR IMAGING FLUIDIZED BEDS
  T. Dyakowski and A.J. Jaworski
  UMIST, UK ............................................................. 15.1

- MEASURING THE PHASE DISTRIBUTION IN A TRANSIENT GAS-SOLID FLOW USING CAPACITANCE TOMOGRAPHY
  T. Loser¹, M. Geweke² and D. Mewes¹
  1. Universität Hannover, GERMANY
  2. Johannes Möller Hamburg Engineering GmbH, GERMANY ........................................... 15.11

- ELECTRICAL TOMOGRAPHY TECHNIQUES FOR MULTIPHASE FLOW APPLICATIONS
  R.C. Waterfall¹, W.W. Loh¹, Arko¹, J. Cory¹ and G.P. Lucas¹
  1. UMIST, UK
  2. University of Huddersfield, UK ...................................................................................... 15.17

- EFFECT OF MASS LOADING ON GAS-SOLIDS MOTION AND PARTICLE SEGREGATION PATTERNS
  E.N. Jones, C.U. Yurteri and J.L. Sinclair
  Purdue University, USA ..................................................................................................... 15.26

- VISUALISATION AND ANALYSIS OF DENSE PHASE POWDER CONVEYING FOR REAL - TIME MEASUREMENT AND CONTROL
  K.L. Ostrowski¹, M.A. Bennett¹, R. A. Williams¹ and S.P. Luke²
  1. University of Leeds, UK
  2. University of Exeter, UK ............................................................................................... 15.32

- MEASUREMENT OF THE DYNAMIC BEHAVIOR IN DISCHARGING SILOS USING OPTICAL FLOW ANALYSIS
  M. Ostendorf, J. Theuerkauf and J. Schwedes
  Technical University of Braunschweig, GERMANY .......................................................... 15.41

- ON-LINE SEDIMENTATION KINETICS MONITOR
  D. Kanugasha and H. Mahgerefteh
  University College London, UK .......................................................................................... 15.47

- APPLICATION OF ELECTRICAL TOMOGRAPHY TO PARTICULATE PROCESSES
  R.A. Williams
  University of Leeds, UK .................................................................................................... 15.54

CHAPTER 16 - ENVIRONMENTAL ASPECTS

- DUST GENERATION AND CONTROL IN CONVEYING OF POWDERS: REALITY, TECHNOLOGY AND HUMAN ATTITUDE
  M.E. Fayed
  Ryerson Polytechnic University, CANADA ........................................................................... 16.1

- EFFECT OF DUST CONCENTRATION ON A PREHEATER CYCLONE IN PARTICULATE TRANSPORT FOR CEMENT PROCESS
  V. Ars, M. Gär, T. Engin and I. Çalh
  University of Sakarya, TURKIE .......................................................................................... 16.12

- ELIMINATING FUGITIVE DUST AND SPILLAGE IN CONVEYING - ITS APPLICATION IN THE EUROPEAN PULP AND PAPER INDUSTRY
  R. Johansson
  Sicon Roullunds AB, SWEDEN ............................................................................................ 16.16
INFLUENCE OF INTERPARTICLE FORCES ON POROSITY AND PERMEABILITY OF FILTER CAKES
Th. Neesse, J. Dueck and E. Zvetanov
University Erlangen-Nuremberg, GERMANY .......................................................... 16.21

EVALUATION OF AIR POLLUTION LEVEL BY MEANS OF A MULTILAYER PERCEPTRON
W. Kaminski
Technical University of Lodz, POLAND ................................................................. 16.27

DUST EXPLOSION HAZARD CONSIDERATIONS FOR MATERIALS HANDLING PLANTS AND PROCESSES
P.W. Wypych
University of Wollongong, AUSTRALIA ................................................................. 16.33

PRODUCT CONTAINMENT AND STATIC SAFETY WHEN HANDLING VOLATILE POWDERS IN FIBCs
M.B. Ranson
Spiroflow Limited, UK ......................................................................................... 16.40

MECHANISM OF COLLECTION OF AEROSOLS BY AN ARRAY OF OPPOSITELY CHARGED DROPS
S. Kojevnikova and Y. Zimmels
Technion-Israel Institute of Technology, ISRAEL ................................................. 16.45

RACEMIC LACTIC ACID SEPARATION BY HOLLOW FIBER SUPPORTED LIQUID MEMBRANE EXTRACTION
P. Hadík¹, L.-P. Szabó² and E. Nagy¹
1. Pannon University of Agricultural Sciences, HUNGARY
2. University of Veszprém, HUNGARY ................................................................. 16.53
