TWENTY-SECOND NATIONAL
INDUSTRIAL ENERGY TECHNOLOGY
CONFERENCE

April 5 & 6, 2000
JW Marriott Hotel
Houston, Texas

W. D. Turner
Conference Director

Host
Energy Systems Laboratory
Texas A&M University

Sponsors
Armstrong International, Inc.
Chemical Manufacturers Association
Electric Power Research Institute
Entergy
Reliant Energy
Spirax Sarco, Inc.
Texas State Energy Conservation Office
TXU Electric & Gas
Union Carbide Chemicals & Plastics
U.S. Department of Energy
U.S. Environmental Protection Agency, Climate Wise Program

Portions or all of this workbook may be copied with the permission of the authors and Texas A&M only.

Admission to Texas A&M University and any of its sponsored programs is open to qualified individuals regardless of race, color, religion, sex, age, national origin, or educationally unrelated handicaps.
# TABLE OF CONTENTS

## New & Emerging Technologies

- "Freeze Concentration Applied to Hazardous Waste Management," Ray Ruemekorf, Niro Process Technology ................................................................. 1
- "NOx Reductions in the Cofiring of Coal and Emulsified Fuels," W. C. Tao and Tom Houlihan, A-55 Clean Fuels; Richard Ellis, St. Laurent Paper Products Corporation; and Anthony Conti, Electric Power Technologies ........................................ (not available at press time)

## Efficient Steam Systems

- "Steam Management – The 3M Approach," Robert L. Renz, 3M Corporation ................. 18
- "Steam Efficiency: Impacts from Boilers to the Boardroom," Chris Russell, Alliance to Save Energy ................................................................. 22

## Chemical Manufacturers Association Award Winners

- "Sugar Land Facility: Lighting and Window Tinting Upgrades," Craig Mesenbrink, Nalco/Exxon Energy Chemicals, L.P ..................................................... 42
- "Integration of a Process Waste Gas Into a Site’s Energy Concept," John Peterson, BASF Corporation ................................................................. 49
- "Gas Turbine Generator Utilization Improvements," Doug A. Leonard, ExxonMobil Chemical Company ......................................................... (not available at press time)
- "Flash Steam Recovery Project," Carl J. Bronold, Vulcan Chemical Company ................ 53
Department of Energy Industries of the Future Panel

Success Stories in Thermal and/or Water Management

“Thermal and Water Pinch Success Stories in Europe,” Alan Eastwood, Linnhoff March ........62

“Water Management Technologies from Europe,” Sam G. Woinsky, EPRI Chemicals, Petroleum, and Natural Gas Center .................................................63

"Water Pinch Success Story at Solutia's Krummrich Plant," Jimmy Kumana, EPRI Consultant .................................................................70

Deregulation Panel Discussion

No papers published.

Analysis Methods & Techniques

“Comparison of Bottom-up and Top-down Forecasts: Vision Industry Energy Forecasts with Items and Nems,” Joseph M. Roop and Robert T. Dahowski, Pacific Northwest Laboratory .....................................................................................84

“Exergy Analysis of Industrial Air Compression,” Wayne Bader and Kelly Kissock, University of Dayton Industrial Assessment Center ........................................89

“Energy and Demand Savings from Implementation Costs in Industrial Facilities,” J. A. Razinha and W. M. Heffington, Texas A&M University.........................................................104

The New World of Computing Solutions

“SUNOCO’S Experience with the Climate Wise Environmental Database and Tracking Software,” Don Verdiani, Sunoco Shared Services and Kevin James, U.S. Environmental Protection Agency.................................................................121

“How to Conduct an Insulation Energy Appraisal (Audit),” W. J. Brayman, National Insulation Association and Rockwool Manufacturing Company.........(not available at press time)

“Environmental Cost Analysis,” David Edge, Texas Natural Resource Conservation Commission..........................................................131

Steam Best Practices

“Steam Best Practice Resources and Tools: ‘Old’ News IS ‘New’ News!” Anthony L. Wright, Oak Ridge National Laboratory; Fred Hart, U.S. Department of Energy; Christopher Russell and David Jaber, Alliance to Save Energy.................................136

Studies in Power Quality Success

"Studies in Power Quality Success," Brian A. Laan, CEC

"Valuing Plant Power Quality by Modeling and Simulation of Productivity Impacts," Michael Howard and Tom Key, EPRI PEAC

"Improving Cooling System Immunity Supply Voltage Sags in Petroleum and Chemical Industries," Douglas S. Dorr, EPRI PEAC Corporation

Efficient Steam Systems – Case Studies

"Steam Conservation & Boiler Plant Efficiency Advancements," Donald P. Fiorino, Texas Instruments

"The Enbridge Consumers Gas ‘Steam Saver’ Program (‘As Found’ Performance and Fuel Saving Projects from Audits of 30 Steam Plants)," Bob Griffin, Enbridge Consumers Gas

Benchmarking of Industrial Operations

"Outlook for Industrial Energy Benchmarking," Zoe Hartley, U.S. Environmental Protection Agency

"Electrical Usage Characterization of Semiconductor Processing Tools," Scott R. Hinson, Radian Electronics Systems
Efficient Equipment Operation

“Relaying and Controls for Generator Applications,” by Gregory W. Massey, Federal Bureau of Prisons .................................................. 258

“Investment-Grade Compressed Air System Audit, Analysis, & Upgrade in a Pulp & Paper Mill,” Paresh S. Parekh, Unicade Inc ............................................. 270

“Foam Cleaning of Steam Turbines,” Charles “Danny” Foster, Ginger C. Curtis, and Jack W. Horvath, HydroChem Industrial Services .................................... 280

Systemwide Approaches to Energy Efficiency

“Cascading Goals and Objectives to Ensure Accountability and Action,” Mohamed Tarifi, Bristol Myers Squibb and Pamela R. Bingham, U.S. Environmental Protection Agency ................................................................. 285

“3M’s Corporate Approach to Energy Management,” Steven C. Schultz, 3M and Pamela R. Bingham, U.S. Environmental Protection Agency ........................................ 290

“Environment and Energy Management from the Ground Up,” Adam Hewey, Essential Foods ............................................................... 293

“Partners for Sustainable Energy and Transportation,” JoAnna Bullock, Business for Social Responsibility ...................................................................(not available at press time)

Combined Heat & Power in the 21st Century

“Environmental Permitting of CHP Systems,” Luis Troche, U.S. Environmental Protection Agency ...........................................................................(not available at press time)

Changes and Opportunities in Energy

"Restructuring, Tight Budgets and Executive Order 13123 Create New Incentives To Reduce Waste In Federal Industrial Facilities", Malcolm Verdict, Alliance to Save Energy........................................................................................................295

“Industrial Energy Procurement Contracts,” Patricia Thompson and Kevin Cooney, E SOURCE Inc.................................................................................................................................298

Industrial Process Improvement

“Process Parameters and Energy Use of Gas and Electric Ovens in Industrial Applications,” Dragoljub Kosanovic and Lawrence Ambs, University of Massachusetts – Amherst..................307

“Reducing Nox Emissions in Fired Heaters and Boilers,” Ashutosh Garg, Furnace Improvements...............................................................................................................................311
