Snow Engineering
Recent Advances and Developments

Edited by
Erik Hjorth-Hansen
Norwegian University of Science and Technology, Trondheim, Norway

Ivar Holand (1924 – 2000)
SINTEF Civil and Environmental Engineering, Trondheim, Norway

Sveinung Løset
Norwegian University of Science and Technology, Trondheim, Norway

Harald Norem
Norwegian University of Science and Technology, Trondheim, Norway

A.A. BALKEMA / ROTTERDAM / BROOKFIELD / 2000
Table of contents

Foreword XI
Postscript XIII

1 Invited paper
Snow loads on roofs in Europe: Research and standardization 3
L Sanpaolesi

2 Snow technology and science
Program Haefeli – Two-dimensional numerical simulation of the creeping deformation and temperature distribution in a phase changing snowpack 13
P.Bartelt, M.Christen & S.Wittwer
Triaxial creep tests on snow and a new microstructure-based snow viscosity law 23
P.Bartelt & M.Von Moos
Detection and analysis of avalanches using wave measurements 33
B.Bessason, G.I.Baldvinsson, Ó.Thórarinsson & G.Eiríksson
The kinetic friction of polyethylen on snow, comparison between laboratory and field measurements 41
D.Buhl, M.Fauve & H.Rhyner
Snow pillows: Use and verification 45
R.V.Engeset, H.K.Sorteberg & H.C.Udnæs
Snow melting system using a conducting pavement and an aquifer penetrating bore-hole 53
T.Fukuhara, L.Goodrich, H.Watanabe & K.Moriyama
Investigations on mechanism of landslide in the snowy regions 59
T.Ito
Drifting snow in complex terrain – Comparison of measured snow distribution and simulated wind field 65
C.Jaedicke, T.Thiis, A.D.Sandvik & Y.Gjessing
The snowdrift pattern around a small hill in the High Arctic 75
C.Jaedicke, T.K.Thiis & B.Bang
Aerial photogrammetry of roof snow depths using three different aircraft
O. Joh, S. Sakurai & T. Shibata

Perspective of earthquake disaster mitigation in snow season – A case study of earthquake at Yuza Town, Yamagata prefecture, Japan
T. Kimura & K. Aoyama

Comparison of dry granulation and wet agglomeration of snow
T. Kobayashi, Y. Nohguchi & K. Izumi

Hardening of snow surface - “natural/artificial”
T. Kobayashi, Y. Endo & Y. Nohguchi

Design criteria for cylindrical masts exposed to snow creep forces
J. O. Larsen

Design criteria for avalanche supporting structures exposed to snow creep forces in maritime climate
J. O. Larsen

Combining snow drift and SNOWPACK models to estimate snow loading in avalanche slopes
M. Lehning, J. Doorschot, N. Raderschall & P. Bartelt

Characterisation of snow structure in a cross-country race ski track
S. Løset & D. A. Moldestad

Factors affecting ski base sliding friction on snow
D. A. Moldestad & S. Løset

Daily observation of snowdrifts around a model cube
S. Oikawa & T. Tomabechi

Estimation of equivalent density of snow accumulation for short period
S. Sakurai, O. Joh & T. Shibata

Snow and snowmelt models in Aomori Prefecture
M. Sasaki & T. Takeuchi

3 Structural engineering

Global and European standardization, ISO and CEN
K. Apeland

Statistics of ground snow loads in Italy
R. Del Corso & P. Formichi

Duration of the snow load on the ground in Italy
R. Del Corso & P. Formichi

Wind tunnel investigation of snow loads on buildings
M. Dufresne de Virel, P. Delpech & C. Sacré

New ground snow loads for a European standard
M. Gränzer

</table>
4 Housing and residential planning

Lessons to be learned from indigenous architecture
H. Bull

Information on building in cold climates – Results from research in Northern Norway
A. Nielsen

Utility of Gangi and new design of public apartment houses in cold and snowy region in Japan
T. Noguchi, O. Itoge & T. Tsukidate

Evaluation of residential areas in harsh climates, Hammerfest, Norway
H. Norem, L. Edvardsen, S. Nistov & A. I. Oterholm

Wind tunnel modeling of roof snow accumulations and drift snow on gable roofs
T. Nozawa, J. Suzuya & Y. Uematsu

Changes in the snowdrift pattern caused by a building extension – Investigations through scale modelling and numerical simulations
T. K. Thiis & C. Jaedicke

The snowdrift pattern around two cubical obstacles with varying distance – Measurements and numerical simulations
T. K. Thiis & C. Jaedicke

Snow drift control in residential areas – Field measurements and numerical simulations
P. A. Sundsbo & B. Bang

A study on the modernization of traditional countermeasures against snow damages in snowy town of Japan
T. Tsukidate & T. Noguchi

5 Transportation

Evaluation of measures for snow avalanche protection of roads
E. Hammersland, H. Norem & A. Hustad

Wind effects on snow drifts around two-dimensional fence
T. Hongo, M. Tsuchiya, T. Tomabechi & H. Ueda

Forecast model of road surface temperature in snowy areas using neural network
M. Horii & T. Fukuda

Pavement snow-melting system utilizing shallow layer geothermal energy
S. Kamimura, K. Kuwabara & T. Umemura

Operation of roads exposed to drifting snow in Northern Europe
H. Norem & S. Thordarson

Optimization of engineering decisions on road protection against snow-banks with snow properties taken into account
Y. Prusenko, A. Dogadailo & I. Kiyashko

A new retrospect of snow and ice, tribology and aircraft performance
N. K. Sinha & A. Norheim
