Fraunhofer Institut Chemische Technologie

5th International Symposium and Exhibition on Sophisticated Car Occupant Safety Systems

Edited by Karl-Friedrich Ziegahn

Karlsruhe, Germany
2000, December 4 - 6

http://www.Airbag2000plus.de
The Proceedings are published at the beginning of the conference and contain the written versions of the oral presentations and posters. Due to the shortage of time, printing had to commence prior to receipt of all contributions. Therefore partly only the abstract had been printed.

INHALTSVERZEICHNIS / TABLE OF CONTENTS

LECTURES

V0
Occupant Safety Towards the Next Decade
Karl-Friedrich Ziegahn
Fraunhofer ICT, Pfinztal, D

V1
Keynote lecture
Vision 2010 – A Holistic Approach to Car Safety
Stefan Nilsson
Volvo Car Corporation, Göteborg, SE

Key Issues of Car Occupant Protection

V2
Worldwide Product Liability – Laws and Trends
Timothy C. Smith
Dillon & Lungershausen, Sindelfingen, D

V3
Stress Limitations of the Human Body – Research Results from Aerospace Investigations
Jürgen Wenzel
DLR, Köln, D

V4
Opportunities and Challenges for Safety in the 21st Century
Ricardo Martinez
Healthcon Web MD, Atlanta, USA

V5
Airbag Industry – Quo Vadis? The Industry’s Structural Changes: Balancing Globalisation, Economy and Technology
Bernd Werner
Autoliv GmbH, Dachau, D
New FMVSS 208 and its Consequences

V6
Overview of NHTSA’s New Advanced Air Bag Regulation

L. Robert Shelton
NHTSA, Washington, USA

V7
Consequences of the New NHTSA Regulations

Jörg Szilagyi, Klaus Pilatus
Autoliv GmbH, Dachau, D

V8
withdrawn

V9
Interpretation and Optimization of an Adaptive Restraint System with Special Consideration for “Out of Position” Situations

Waldemar Medla, Ulrich Rick
Adam Opel AG, Rüsselsheim, D
Martin Nitsche, Holger Maul
Breed Restraint Systems GmbH, D
Boris Steeger
Siemens Restraint Systems GmbH, D

Sensor Concepts and Data Processing

V10
Smart Sensors for Passenger Safety Systems

Michael Rölleke, Armin Köhler
Robert Bosch GmbH, Stuttgart, D

V11
byteflight – A 10 Mbps Communications System to Network Passive Safety Electronic Control Units

Josef Berwanger, Martin Peller, Robert Griessbach
BMW AG, München, D

V12
BST-Deployment and Sensor Bus

Knut Balzer
Robert Bosch GmbH, Stuttgart, D
Christian Zelger
Siemens Automotive AG, Regensburg, D
Thomas Görnig
TEMIC TELEFUNKEN microelectronic GmbH, Ingolstadt, D
V13
The Reactive Bridge: A Novel Solid-State Low Energy Initiator

Thomas A. Baginski
Auburn University, Auburn, USA
Todd Parker, Kevin Haines
LifeSparc Inc., Hollister, USA

V14
Thermal Processes Associated with the Priming of Airbag Initiators

Jean-Rene Duguet
NCS/Autoliv, Survilliers, F

V15
Combination of Belt Load Limiter with Airbag Pressure Control - Field Experiences and Laboratory Test Results

Farid Bendjellal, Gilbert Walfisch, Alain Diboine
Renault, Guyancourt, F
Xavier Trosseille, Jean Yves Foret Bruno
PSA Renault, Nanterre, F

V16
Development of an Environmental Friendly Dual Stage Gas Generator within an European Project

Norbert Eisenreich, Helmut Schmid
Fraunhofer ICT, Pfinztal, D

V17
New Rollover Curtain System

Dan Bentley, Stephen Ridella, Christopher Ruf, Alex G. Meduvsky
TRW, Washington, USA

V18
Robust Angular Rate Sensor for Rollover Detection

DaimlerChrysler AG, München, D
M. Rose, R. Gruenberger
TEMIC, München, D
V19
Vehicle Rollover Events: A Challenge for an Integrated Occupant Safety Systems

Madana Gopal, Chantal Parenteau
Delphi Automotive Systems, Troy, USA
Ed Wallner
Delphi Automotive Systems, Kokomo, USA
Gert Nilson,
Delphi Automotive Systems GmbH, Wuppertal, D

V20
Design of Sideprotection Features – Example: Audi A4

Joachim Scheef, Gerhard Rieger, Rainer Kraus
Audi AG, Ingolstadt, D

V21
Side Airbags: Minimizing Injury Risk to Out-of-Position Occupants

Adrian K. Lund
IIHS, Arlington, USA

V22
Advanced Side Protection Airbags - Bio Adapted Side Bag

Alexander Heilig, Dominique Acker, Jürgen Hirth
TRW ORS GmbH, Alfdorf, D

V23
Growth Opportunity and Challenges in Side Impact Inflatable Curtains

Caroline T. Shibata
DuPont Nylon, Chattanooga, USA
John Barnes (GB), Henry Chang (USA), Gerd Mueschenborn (D), Jialin Sun (CDN)
DuPont de Nemours

V24
Radar Based Precrash Sensing in a Framework of a Sensor Concept for Functional Integration

Rainer Moritz
Robert Bosch GmbH, Stuttgart, D

V25
Advanced Crash Severity Sensor Performance: A Real-World Study

Colm Boran, Canice Boran, Richard Rakes Jr.
Visteon Corporation, Dearborn, USA
Detection and Classification of Potential Collision Candidates in Traffic Scenes

Luigi Brambilla, Joachim Gloger, Markus Hartlieb
DaimlerChrysler AG, D

The Outreach of Collision Avoidance to Airbag Systems

Hans Spies, Martin Spies
Ingenieurbüro Spies, Hohenwart, D

Use and Synthesis of Triazole Derivatives Compounds for Gas Generator Compositions

D. Poullain, S. Besnard, F. Leuret, M.L. Perdrigeat, D. Demattei
C.E.A. Le Ripault, Monts, F

Nitrous Oxide Inflator Technology

Matthew S. Johnson, Karl K. Rink
Autoliv ASP, Ogden, USA

Clean Gas Generation for Automotive Safety Devices

Jörgen Sandström
NEXPLO Bofors AB, Karlskoga, SE
Staffan Calsson
Bofors BEPAB AB, Karlskoga, SE

Advanced Techniques for Characterisation of Surface (AFM, Contact Angle, FTIR, ESCA, TOFSIMS) and Polymeric Bulk Material (MDSC, DMTA, DETA)

Amir Hussain
COMTECH GmbH, München, D

Examination of Airbag Emissions and Module Failure

Julius A. Nickl
GWP, Zorneding, D
A New Copolymer with Load Leveling Properties for Use in Safety Restraints

Reiner Modtler
Honeywell, Longlaville, F

Pyrotechnic Igniter Compositions in Disperse Phase – Production and Application

Dirk Cegiel
Nico-Pyrotechnik, Trittau, D

Robust Marker Tracking by the Use of a Pattern Recognition Method

Ralf Lichtenberger, Herbert Weber
Universität Karlsruhe, Karlsruhe, D

Interior Ballistic Behaviour of a New Gas Generator Fuel for Fire Extinguishing Purpose

Jochen Neutz, Helmut Schmid, Melanie Klemenz
Fraunhofer ICT, Pfinztal, D

Market Progress of Airbags – An International Comparison

Vincet Kapoor
Universität Stuttgart, D
Karl-Friedrich Ziegahn
Fraunhofer ICT, Pfinztal, D

Material Behaviour of Polymeric Materials and Airbag Materials under High Dynamic Demands

Olaf Jedicke, Christof Hübner, Isabel Alvarez Ortega, N. Eisenreich, Albrecht Herzog, Klaus Zilly
Fraunhofer ICT, Pfinztal, D

Measurement of Thermo-Mechanical Properties of Polymeric Materials under High Dynamic Demands

Olaf Jedicke, N. Eisenreich, Albrecht Herzog, Klaus Zilly
Fraunhofer ICT, Pfinztal, D

High Speed Methods for Temperature Measurements in Hot Gases

Volker Weiser, Wilhelm Eckl, Evelin Roth, Norbert Eisenreich, Jochen Neutz
Fraunhofer ICT, Pfinztal, D
P41 (Manuscript not available)
Airbag & Belt Adaptive Systems: Development and Performance in Frontal Impact
Dominique Gillet, Marc Suss, Gilbert Walfisch, Farid Bendjellal
Renault, Guyancourt, F

P42
Total Occupant Recognition System, a System to Fulfil the NHTSA Regulation for a Automatic Suppression System
G. Becker, C. Kaiser, T. Mousel, P. Schockmel, T. Stephany, C. Wendt
IEE, Luxembourg, L

P43
Sensors for Restraint Systems in Surface Micromachining Technology
Klaus Ziemssen
Robert Bosch GmbH, Reutlingen, D

P44
Interior Sensor for Occupant Detection and Proximity Sensing
Hans-Dieter Bothe, Stephan Simon
Robert Bosch GmbH, Hildesheim, D
