PROCEEDINGS
OF THE
8TH EUROPEAN CONFERENCE
ON INFORMATION SYSTEMS

VIENNA UNIVERSITY OF ECONOMICS AND
BUSINESS ADMINISTRATION, AUSTRIA
3RD-5TH JULY 2000

VOLUME 1

EDITORS
Hans Robert Hansen
Martin Bichler
Harald Mahrer
## Table of Contents

### VOLUME 1

**IS Challenges: Research Methodology, Teaching Methods and Practical Relevance**

#### Epistemological Problems

On Some Epistemological Problems of Software Engineering .......................................................... 3  
*P. Schefe*

What's in a Name? Conceptual Issues in Defining Electronic Commerce .............................................. 11  
*L. Wilkins, P. M. C. Swatman, T. Castleman*

Simpler, Better, Faster, Cheaper, Contextual: Requirements Analysis for a Methodological Approach to Interaction Systems Development ................................................................. 17  
*A. Almeida, L. Roque*

#### Basic Questions and Challenges

On Specifying Contract Negotiations ........................................................................................................... 23  
*H. Wedekind*

Explanation in Information Systems: Can Philosophy Help? ................................................................. 31  
*S. R. Haynes*

#### Knowledge as Research Subject

Reclaiming Knowledge: A Case for Evidence-Based Information Systems ................................................ 39  
*C. Atkins, G. Louw*

What is Meant by Tacit Knowledge? Towards a Better Understanding of the Shape of Actions .................. 46  
*T. Hedestrom, E. A. Whitley*

Modelling in the Digital World – An Anti-Realist Perspective ............................................................... 52  
*M. J. Dovey*

#### Empirical Research

Small Slovene Firms and (Strategic) Information Technology Usage ......................................................... 56  
*D. Lesjak, M. L. Lynn*

Authentic Intervention in Information Systems Practice .............................................................................. 64  
*R. A. Stephens, S. K. Probert*

Improving Online Access for People with Disabilities ............................................................................. 71  
*S. Keller, J. Owens, C. Parker*

#### Organizations as Subject of IS Research

Interpretation of Groupware Effect in an Organization using Structuration Theory .................................... 78  
*J. Hassall*

Under Cloud Cover: The 'Processes for Organization Meanings' Model, Dialectics and the Battle of Britain ................................................................. 83  
*B. Robinson, F. Wilson*

Organisational Mission Statements: A Postmodernist Perspective on the Management of the IS/IT Function ................................................................. 90  
*J. Pillay, R. Hackney*

#### Teaching

University Collaboration and ERP Competence Centres – A Golden Era or Golden Handcuffs? (PANEL) .................................................................................................................. 98

Training Students to Intervene in Information Systems Inherently Involves Organizational and Technology Skill Acquisition .................................................................................................................. 99

*M. Marchese, C. Cattani, V. D’Andrea, G. Jacucci*

#### Rigour vs. Relevance

Rigour vs. Relevance in IS Research: Perspectives from IS and the Reference Disciplines (PANEL) .............. 107

Quality and Rigour of Action Research in Information Systems ................................................................ 108

*J. McKay, P. Marshall*
Research Methods

J. M. Carroll, P. A. Swatman

Research Questions Guiding Selection of an Appropriate Research Method ................................................................. 124
P. H. Jarvinen

Piloting Socio-Technical Innovation .................................................. 132
G. Schwabe, H. Krcmar

Education/Rigour vs. Relevance

Balancing Rigor and Relevance in IS Research: Strategies, Tactics, and Recommendations (PANEL) ............................................. 140
I. M. Venter, R. J. Blignaut, D. Stoltz

Tailoring IT Education for Effective IT Professionals in a Third World Setting .......................................................... 141

Case Studies

Developing Teaching Case Studies in Information Systems: Lessons from Experience (PANEL) .................................................. 147
V. M. Whitaker, C. M. Parker

IS Development: Methodologies and Tools

Development Methodologies I

Modeling the Dialogue Aspects of an Information System ........................................................................................................... 159
M. Snoeck, G. Dedene

Design Breakdowns, Scenarios and Rapid Application Development .......................................................................................... 166
P. Beynon-Davies

Identifying and Classifying Processes (Traditional and Soft Factors) that Support COTS Component Selection:
A Case Study ........................................................................................................ 173
D. Kunda, L. Brooks

Development Methodologies II

Object-Process Methodology as a Business-Process Modeling Tool ......................................................................................... 181
D. Dori

An Empirical Study of System Development Method Tailoring in Practice ............................................................................... 187
B. Fitzgerald, N. Russo, T. O’Kane

Melding Information Systems Evaluation with the Information Systems Development Life-Cycle ............................................. 195
P. Beynon-Davies, I. Owens, M. Lloyd-Williams

Software Process Management: An Organizational Learning Perspective .............................................................................. 202
T. Ravichandran, A. Rai

Behavioral Aspects of the Development Process

Adapting to Survive: Lessons Learned from an Investigation into the Effects of Contextual Change on
Information Systems ..................................................................................................................................................... 210
P. Kanellis, E. Kopanaki, R. J. Paul

Systems Development of Organizational Memory: A Literature Survey ................................................................................. 219
D. Te’eni, H. Weinberger

The CESS Method for Guiding Executive Support Systems Design ......................................................................................... 227
S. A. Carlsson

Data Modeling

From Data Capture to Code Generation: Tools for Entity Modelling ......................................................................................... 236
H. Fulford, D. Bowers

Database Engineering Processes with DB-MAIN ...................................................................................................................... 244
D. Roland, J. -L. Hainaut, J. -M. Hick, J. Henrard, V. Englebert

Data Integration by means of Object Identification in Information Systems ........................................................................... 252
M. Neiling, H. -J. Lenz
Decision Support Systems
An Active Environment to Assist Individual and Group Decision-Making Processes .................................................. 259
A. C. B. Garcia, P. M. Maciel, M. A. C. Martins
Enhancing Government Decision Making Through Knowledge Discovery from Data .................................................. 266
H. Viktor, H. Arndt, M. Oberholzer
An Intelligent Interactive Knowledge Model for Decision Support in Real-Time Traffic Management ................................ 274
J. Z. Hernández, J. M. Serrano

IS Development on the Internet
Tool-Supported Evolutionary Web Development: Rethinking Traditional Modeling Principles .................................. 282
C. Bauer, A. Scharl
A Proposed Methodology for Web Development .......................................................... 290
D. Howcroft, J. Carroll
WebQual: An Exploration of Web-Site Quality .................................................. 298
S. Barnes, R. Vidgen
U. Hanani, A. J. Frank

Modeling of Events
Paving the Road to Business Process Automation .................................................. 313
P. Rittgen
Semantic Event Model and its Implication on Situation Detection .................................................. 320
A. Adi, D. Botzer, O. Etzion
Different Pre-Processing Models for Financial Accounts when using Neural Networks for Auditing .................................. 326
E. Koskivaara

Technology: Databases, Internet and Multimedia
Technologies for Electronic Commerce
The Use of the Internet in Procurement: An Empirical Analysis .................................................. 335
K. Eyholzer, D. Hunziker
Efficient Processing of Voluminous EDI Documents .................................................. 343
T. Risse, A. Wombacher, K. Aberer
The Extensible Markup Language - New Opportunities in the Area of EDI .................................................. 351
T. Weitzel, F. Ladner, P. Buxmann

Technologies for Knowledge Management
Maximizing Information Liquidity in Electronic Commerce .................................................. 357
V. Dhar, A. Sundararajan
Rapid Knowledge Deployment in an Organizational-Memory-Based Workflow Environment .................................................. 364
R. Klamma, S. Schlaphof
Metadata-Based Integration of Qualitative and Quantitative Information Resources Approaching Knowledge Management .................................................. 372
B. Rieger, A. Kleber, E. von Maur

Technologies for Document Management
Information Filtering and Automatic Keyword Identification by Artificial Neural Networks .................................................. 379
Z. Boger, T. Kuflik, B. Shapira, T. Shoval
Structuration and Enrichment of HTML Documents in order to Build a Specific Information Warehouse .................................................. 386
J. Mothe, F. Ravat, F. Riahi, G. Zurfluh
Cache-Based Query Processing Framework for the Boolean Retrieval Model .................................................. 396
J. -H. Cheong, S. -G. Lee
Technologies for Virtual Organizations

The Social Web Cockpit ................................................................. 403

W. Prinz, W. Gräther

The Concept of Networkability - How to Make Companies Competitive in Business Networks ........................................ 405

R. Alt, E. Fleisch, O. Werle

A Flexible Enterprise Needs an Adaptable e-Business Architecture in order to Satisfy Naturally Evolving Requirements ................................................................. 412

V. D’Andrea, A. Narduzzo, A. Baskin, G. Jacucci, E. Zaninotto

The Economics of IS

Evaluating IS for Business Contributions

The Roles of Corporate IT Infrastructure and Their Impact on IS Effectiveness ................................................................. 421

M. Sääksjärvi

Building Business-Based Service Levels for IT Outsourcing Contracts: The Measure to Manage (M2P)

Performance Measurement System .................................................. 429

E. Lewis

Evaluating Information Sharing Strategies in Supply Chains ................................................................. 437

J. Li, M. J. Shaw, G. W. Tan

The Economics of Electronic Markets

Effects of Electronic Markets on Negotiation Processes ................................................................. 445

M. Stroebel

Bundling Strategy in Base-Supplemental Goods Markets: The Case of Microsoft ................................................................. 453

S. - Y. T. Lee

Electronic Multidimensional Auctions and the Role of Information Feedback ................................................................. 461

O. R. Koppius, M. Kumar, E. van Heck

Cost/Benefit of Information Products

The Definition of an Assessment Framework for Information Systems Issues for Agile Manufacturing ................................................................. 469

A. E. Coronado, M. Sarhadi, C. Millar

Pricing Digital Information Goods and Services on the Net ................................................................. 476

L. L. Pauwels, P. B. McLeod

Reconsidering Network Effect Theory ................................................................. 484

T. Weitzel, O. Wendt, F. Westarp

Globalisation and Culture

Culture and Technology

Webbing and Embedding a Vision: An Exploratory Study of Culture and Information Technology in a Business Community ................................................................. 495

E. Christiaanse, V. Dirksen

Open Source Movements as a Model for Organizing ................................................................. 501

J. Ljungberg

The Software for Cultures and the Cultures in Software ................................................................. 509

IT in Multinational Organizations

Pan National Corporations: Exploring the Effects of Information Technologies on Control and Coordination Relationships ................................................................. 515

P. Finnegan, S. Ni Longaigh

The Social Shaping of Internet-Based Systems in Global Organizations: An Interpretive Study ................................................................. 523

J. Nandhakumar

Towards a Grounded Theory of Information Systems for the International Firm: Critical Variables and Causal Networks ................................................................. 530

H. Lehmann
Trust and Culture

Differences in Critical Success Factors in ERP Systems Implementation in Australia and China: A Cultural Analysis
G. Shanks, A. Parr, B. Hu, B. Corbitt, T. Thanasankit, P. Seddon

Glocalizing Trust: The Role of IT in a De-Coupling Industrial District
A. Ganzaroli

Virtual Organizations: The Business Design for the Twenty-First Century
C.-L. Sia

Do We Need Culture?
What would you do . . . ? Multicultural IS Cases (PANEL)

Understanding the Effects of the Millennium Data Rollover: Reflections from AIS Region 2
The Y2K Date Rollover: Experiences and Lessons Learned from AIS Region 2 (PANEL)

IS Policy, Strategy, Innovation and the Management of Knowledge

Inter-organizational Systems and the Global Context
A Theory of Industry-Level Activity for Understanding the Adoption of Interorganizational Systems
R. B. Johnston, S. Gregor

Developing an Understanding of Interorganizational Systems: Arguments for Multi-Level Analysis and Structuration Theory
S. Gregor, R. B. Johnston

Challenging the Installed Base: Deploying a Large-Scale IS in a Global Organization
K. H. Rolland

Knowledge Management and Organizational Learning

Linking Knowledge Management and Innovation
J. Swan, S. Newell

Organisational Learning in the UK Construction Industry: A Knowledge Management Approach
G. Orange, A. Burke, J. Boam

Leveraging Professional Intellect in the Virtual Age
D. Fink

Learning from Experience
The Virtual Organisation - Technical or Social Innovation? Lessons from the Film Industry
L. D. Introna, M. Cushman, H. Moore

Knowledge Integration: Learning from the Millennium Bug Experience: A Case Study of NatWest Bank Global Financial Markets
J. C. Huang, S. Newell, S. L. Pan

The Millenium Problem as a Form of Information Systems Failure
P. Beynon-Davies, M. Lloyd-Williams, I. Owens

A Second Look at ERP Systems

Consultants and Enterprise Resource Planning (ERP) Systems
C. Westrup, F. Knight

ERP Systems: Facilitating or Confounding Factors in Corporate Telecommunications Mergers?
D. Truex, O. K. Ngwenyama

Best of Breed IT Strategy: An Alternative to Enterprise Resource Planning Systems
B. Light, C. P. Holland, S. Kelly, K. Wills

Governance, Power and Influence

Chief Information Officer Influence: An Exploratory Study
H. G. Enns, S. L. Huff

Emerging Capabilities of Information Technology Governance: Exploring Stakeholder Perspectives in Financial Services
R. R. Peterson

The Exercise of Power and Information Systems Strategy: The Need for a New Perspective
K. S. Horton
