4th International Design Thinking Research Symposium
on
Design Representation

Massachusetts Institute of Technology
April 23-25, 1999

Co-Chairs
Gabriela Goldschmidt
Technion – Israel Institute of Technology
William Porter
Massachusetts Institute of Technology

Coordinator
Mine Ozkar

Hosts
Massachusetts Institute of Technology
Technion – Israel Institute of Technology

Co-Sponsors
Autodesk Inc.
auto•des•sys, Inc.
Microsoft Corporation
4th International Design Thinking Research Symposium on

Design Representation

Table of Contents

Gabriela Goldschmidt, William L. Porter
Foreword

I

Overview

I.1 Kathryn Henderson
Design Cultures and Automation: The Strictures of Menu-Driven Design Versus the Flexibility of Mixed Practices
I.29 John S. Gero
Constructive Memory in Design Thinking
I.37 Ulrich Flemming & Zeyno Aygen
A Hybrid Representation of Architectural Precedents
I.49 Penny Yates
Distance and Depth
I.75 Linden J. Ball, Nicki J. Lambell, Thomas C. Ormerod, Simon Slavin & John A. Mariani
Representing Design Rationale to Support Innovative Design Re-Use: A Minimalist Approach
I.89 A. McGown, G. Green, & Paul A. Rodgers
Using Concept Sketches to Track Design Progress
I.109 Martin Woolley
The Thoughtful Mark Maker – Representational Design Skills in the Post-Information Age

II

Sketching & Imagery

II.1 Ellen Y-L. Do, Mark D. Gross, & Craig Zimring
Drawing and Design Intentions – An Investigation of Freehand Drawing Conventions in Design
II.11 Jonathan Fish
From Description to Depiction and Back: Uncertainty and the Mental Translation of Representational Type as a Function of Designer’s Sketches
II.23 Jeanette McFadzean, Nigel Cross & Jeff Johnson
Drawing and the Soliloquising of Design Suppositions
Alexander Koutamanis
A Framework for Architectural Sketch Recognition

Stephen R. Scrivener, Winger Tseng & Linden J. Ball
Uncertainty and Sketching Behaviour

Ilse M. Verstijnen, J. Wagemans & A. Heylighen
Sketching, Visual Analogies and Domain-Expertise

Vasilije Kokotovich & Terry Purcell
Mental Synthesis and Creativity in Design – an Experimental Examination

Terry Liddament
Design, Imaging and the Imagination

Heleen Snoek, Henri Christiaans & Paul Hekkert
The Effect of Information Type on Problem Representation

Masaki Suwa, John S. Gero & Terry Purcell
How an Architect Created Design Requirements

Gert Pasman & James Hennessey
Random versus Typological Organization of Precedents in a Design Task

Chi-Shui Chan, Lewis Hill & Carolina Cruz-Neira,
Can Design Be Done in Full-Scale Representation?

Remko Van der Lugt
Developing a Graphic Tool for Creative Problem Solving in Design Groups

Gilbert D. Logan & David F. Radcliffe
Impromptu Prototyping and Artefacting: Representing Design Ideas through Things at Hand, Actions, and Talk

Pieter J. Stappers & James Hennessey
Computer-Supported Tools for the Conceptualization Phase

Michael Gerzso
Executable Drawings as a Representation of Digital Architecture

Ken P. Hew, Takashi Washio, Tetsuo Tomiyama & Y. Umeda

Jeroen Pulles & Wilhelm F. van der Vegte
Utilizing the Life Cycle Tree for Effective Representation of Modeling Entities in the Conceptualization Phase of Industrial Design

Rianne C. Valkenburg & Kees Dorst
Frame Cognition

Simone Stumpf & Janet McDonnell
Relating Argument to Design Problem Framing
Case Studies
II.255 Bennett Neiman, Mark D. Gross & Ellen Y-L. Do
Sketches and Their Functions in Early Design – A Retrospective Analysis of a Pavilion House
II.267 Esra Akcan & Mualla Erkilic
Representation of Counter Memory: Cem Culture
II.281 Norman W.C. Siu & Clive Dilnot
The Challenge of the Codification of Tacit Knowledge in Designing and Making: A Case Study of CAD Systems in the Hong Kong Jewellery Industry
II.293 Jane Hurt
Representation: Thematic Symbolism Applied – as Taught in Basic Design

Guest lecture
II.307 Hiroshi Ishii
Tangible Bits: Designing the Boundary between People, Bits, and Atoms

III
Collaboration
III.1 Yehuda E. Kalay
Enhancing Multidisciplinary Collaboration Through Semantically-Rich Representation
III.17 Petra Badke-Schaub & Eckart Frankenberger
Design Representations in Critical Situations of Product Development
III.27 Craig Zimring, Sabir Khan, David Craig, Saif ul-Haq, & Mark Guzdial
CoOL Studio: Using Simple Tools to Expand the Discursive Space of the Design Studio
III.37 Margot Brereton
Distributed Cognition in Design – Negotiating Between Abstract and Material Representations
III.53 Gerard C. Gabriel & Mary-Lou Maher
Does Computer Mediation Affect Design Representation?
III.63 Claudia Eckert & Martin Stacey
Sources of Inspiration: A Language of Design
III.79 Ming Xi Tang & John Frazer
Representation of Context for Design Collaboration

Representation Theory
III.91 Omer Akin
Spatial Reasoning of Architecture Students with Simple Three-Dimensional Arrangements
III.109  Ayse Senturer & Cihatır Istek
Discourse as Representation of Design Thinking and Beyond: Considering the Tripod(s) of Architecture: Media, Education and Practice

III.123  Susann Vihma
Design Representation in Light of Peircean Semiotics

III.129  Daniel C. Glaser & Humberto E. Cavallin-Calanche
Representations and Meanings: cognitive models for simulations of architectural space

III.145  Sebnem Yalinay
Comportment of Self-Being by/through the Other: The Problematic of Representation

III.157  Elson Szeto & Steven Chong
A Vision of Hybrid-Representation in Wired Reality

III.167  Louis L. Bucciarelli
Design Delta Design: Seeing/Seeing As

History

III.175  Maria G. Bartolini Bussi & M. Alessandra Mariotti
Instruments for Perspective Drawing: Historic, Epistemological and Didactic Issues

III.187  Peter T. Lang
The Metaphysics of Imagination: Perception and Representation in 15th Century Italy

III.197  Frederic Pousin
Unconventional Modes of Representation: What are the Relations to New Ideas in Design?

III.211  Ekaterina Klevitsky & Gabriela Goldschmidt
Stirling’s Museum Projects in Germany: Graphic Series in Architectural Representation

Keynote Address

III.223  Charles Eastman
Representation of Design Processes
