Proceedings of the 1999
Commuter Rail/Rapid Transit Conference
TORONTO, CANADA
MAY 22-27, 1999
Track 1 - Best Practices: Customer Relations

(Papers Presented at the Conference)

Tying Service Quality Improvements To Customer Satisfaction Input ........................................... 1
  Jack Hartman and Darwin Stuart

  Maria E. Bordas

Reducing Sick Customer Delays .................................................................................................... 11
  John G. Gaul

(Papers Not Presented at the Conference)

Rail Rapid Transit Service At A Major Sports Complex: Washington Metro Service At MCI Center ......................................................................................................................... 13
  Kenneth B. Spain

Track 1 - Best Practices: Internet Use

(Papers Presented at the Conference)

Building A Transit Website With Measurable Results ................................................................. 19
  Timothy J. Moore

  Caijun Luo, Shi Xie, and L. David Shen, Ph.D., P.E.

Internet Technology For Public And Internal Information At Go Transit .......................... 36
  Eve Wyatt and Ella Luk
Track 1 - Best Practices: Service Delivery

(Papers Presented at the Conference)

Changing Service Delivery .............................................................................................................. 43
Barry Farr, Franklin D. Beauford, George Turner, Jr., Katrina D. Spivey and Charles A. Harper, III

(Papers Not Presented at the Conference)

Why Can't I Run Four Car Trains? .................................................................................................. 49
Steven D. Bezner, P.E.

Track 1 - Best Practices: Public Benefits

(Papers Presented at the Conference)

Salt Lake City, 2002 And Beyond ..................................................................................................... 53
Michael A. Allegra, P.E.

Amtrak/PVA Model Employee-Developed Multi-Media Training Program For Railroad Personnel ................................................................................................................................. 56
Rosalyn M. Simon, Ph.D., and Maureen McCloskey, Esquire

Transit Benefits Super Bowl And World Series .............................................................................. 62
William C. Lorenz, P.E.

Impact of Rail Transit On Property Values ...................................................................................... 66
Roderick B. Diaz

Track 2 - Funding & Finance: Innovative Financing II

(Papers Presented at the Conference)

Public / Private Sector Alliance: Opportunity Through Innovation At MARTA ......................... 74
Kevin J. Cronin, PE

Funding Rail Transit Through Tax Increment Financing ...................................................................... 78
Donald Schneck and Roderick Diaz

Grand Canyon Transportation System DBOM Through A Long-Term Concession Contract ................. 88
David D. Little and Bradley S. Traver
(Papers Not Presented at the Conference)

Lessons Learned From A Light Rail Start-Up: Start-Up Costs And Programming Experience On The Westside-Hillsboro Light Rail Project ............................................ 92
Jeffrey Allen, AICP and Sandy Bradley

Track 2 - Funding & Finance: Beyond TEA 21

(Papers Presented at the Conference)

How Will TEA-21 Impact Transit Conditions And Performance? ............................ 101
Richard S. Laver

Track 3 - Partnering: Innovative Partnering Concepts

(Papers Presented at the Conference)

Transit Agency Partnering In Supporting Development Around Rail Transit Stations ............................................................. 109
Roderick B. Diaz and Christopher Porter

Why An Ideas Competition? New Partnering Opportunity And New Initiative For Design Competition Of Ideas For Charles/MGH Station: Boston ........................................... 116
Barbara J. Boylan, AIA

Partnering Right Down The Line: The Toronto Transit Commission’s Experience With The Partnering Process On The Sheppard Subway Extension, Toronto............ 121
Andy Bertolo and Susanne Palmer

Track 3 - Partnering: Partnering on a Capital Project

(Papers Presented at the Conference)

The Reconstruction Of The Lenox Avenue Subway Tunnel: How New York City Transit Totally Rebuilt The Invert Of A Subway Tunnel While Revenue Trains Continued To Operate ................................................................. 127
Mysore L. Nagaraja, P.E.
A Different Approach To Partnering................................................................. 133
  J. N. Wall

(Papers Not Presented at the Conference)

Turnkey Design-Build Best Value Procurement: The Branch Avenue Storage Yard ....... 139
  Sabit K. Ghosh

Partnering On A Transit Capital Project: The San Juan Turnkey Experience ............... 143
  Osama A. Tomeh

Track 3 - Partnering: Business & Community Development

(Papers Presented at the Conference)

A Public Transport Strategy For London - Current Issues ...................................... 153
  Elaine Seagriff

The Film Industry And Public Transit: Partners In Chicago .................................. 167
  Bruce C. Nelson

Tampa’s Electric Streetcar: Creating Community Vision Through Partnership .......... 171
  Steven M. Carroll

The Tren Urbano Hybrid Turnkey Approach ..................................................... 179
  Carlos I. Pesquera, Ph.D., P.E.

Track 4 - Policy & Planning: Social Equity & Rail Transit

(Papers Presented at the Conference)

Environmental Justice Tools And Assessment Practices ...................................... 189
  Robert S. De Santo, Ph.D. and William H. Bailey, Ph.D.

Social Equity And Transit In California: Tools And Prospects .............................. 199
  Yonel Grant

(Papers Not Presented at the Conference)

Transit Service Costing As A Planning Tool ..................................................... 207
  Tom W. Hill
Track 4 - Policy & Planning: Livable Cities - What Does It Take?
(Papers Presented at the Conference)

Livable Communities Applications For Rapid Transit ........................................ 212
Ik Pyo Hong

Track 4 - Policy & Planning: Environmental Issues
(Papers Not Presented at the Conference)

Design - Build Contracting And Environmental Permitting ..................................... 219
Chitra Radin and Russell J. Wilder, PG

Track 5 - Safety & Security: Response to Critical Incidents
(Papers Presented at the Conference)

The Use Of Technology In Preparing Subway Systems For Chemical/Biological Terrorism .................................................................................................................................................. 226
Dr. Anthony J. Policastro and Dr. Susanna P. Gordon

Track 5 - Safety & Security: Public Safety & Policing on Rail Transit
(Papers Presented at the Conference)

Quaility Of Life Issues On Public Transit: A Partnership Between Operations And Police Services ........................................................................................................................................ 235
Cameron Beach and Sergeant James Jarosick

Crime Prevention Through Environmental Design (CPTED) ........................................ 239
Rufus Francis, B.E. (Mech); M.A. (HS)

(Papers Not Presented at the Conference)

Control Of Public Space .................................................................................................. 244
Peter Whent
Track 5 - Safety & Security: Fire Safety

(Papers Presented at the Conference)

A User-Friendly Interface For Version 4 Of The SES Computer Program .................... 248
  Daniel M. McKinney and Paul C. Miclea

Fire Safety WMATA Style ............................................................................................... 256
  Fred C. Goodine, Ronald A. Keele, and Michael A. Locksley

(Papers Not Presented at the Conference)

Emergency Response Mapping For Rail Transit Systems .............................................. 261
  Craig L. Maxey

Track 6 - Technology & Innovation: Vehicles & Subsystems

(Papers Presented at the Conference)

Designing RFP Evaluation Criteria That Work ............................................................. 267
  Bill Frandsen

Finally Some Operating Experience With Low Floor Light Rail Vehicles (In North America).............................................................................................................. 274
  Dennis L. Porter, and Thomas Heilig

The New Light Rail Vehicle S-DT 8.10 Of Stuttgarter Strassenbahnen AG .................. 282
  Thomas Moser

(Papers Not Presented at the Conference)

Buy America Regulations: Clearing The Smoke.......................................................... 287
  Dhruv Sharma

Light Rail Vehicle Refurbishment: Cost Effectively Achieving Reliability Increases And Service Life Extensions ................................................................. 291
  Ross Causey and Jeffrey Rankin

Integration Of Transit Vehicle Systems ......................................................................... 299
  Marc Barbarash.
Metro Rail Diagnostics Upgrade: An Investigative Study Of Enhancing Diagnostics For Existing Subsystems
Balaji Krishnamurthy and James Martin

Manless Systems For Urban Transit Applications
Advantages And Specific Features
Richard Jarsaillon and John Marino

Electromagnetic Interference Problems And Solutions In AC Propulsion Systems For Light Rail Vehicles
R. Kapila, M. Cruz, R. Friem, and G. Joós

Track 6 - Technology & Innovation: Communications-Based Train Control (CBTC)
(Papers Presented at the Conference)

Use Of Spread Spectrum For CBTC Datalink
Daniel J. McFadden

New York City Transit’s Canarsie Line Project - A Status Report
Geoffrey P. Hubbs and Alan F. Rumsey

(Papers Not Presented at the Conference)

Guaranteed Emergency Brake Rate Determination For The New York City Transit Communication Based Train Control Safe Brake Model
Edwin Mortlock and Olga Cataldi

Track 6 - Technology & Innovation: Track & Structure Technology Innovation
(Papers Presented at the Conference)

Computer Application During Inspection Of Baltimore Metro’s Subway Structures
Arun Patel, P.E., Neil Jacobson, AIA, and Mahesh Sharma, P.E.
Light Rail Transit Noise Control: A New Line For Tri-Met ................................................. 356
  Ken Kirse and Lisa Cobb

Ground Penetrating Radar For Railroad Track Substructure Imaging ........................................... 360
  Ram M. Narayanan

Stray Current Control Using The Rail Boot ...................................................................................... 366
  Edwin A. Wetzel, P.E and Hugh Fuller, P.E.

(Papers Not Presented at the Conference)

“Getting As Good As New”: Concrete Tie Replacement At MARTA ............................................. 374
  Harry R. Jordan

Creation And Training Of Structural Maintenance Crew: Bringing Maintenance
  Capabilities In-House At MARTA ................................................................................................. 382
  Philip A. McKenna and Steven M. Threlkeld

How Low Can This Bridge Go? Caruthers Bridge Height Sensitivity Analysis .............................. 386
  Jennifer Ryan, PE

Track 6 - Technology & Innovation: Fare Collection

(Papers Presented at the Conference)

Integrating Fare Collection Into The Open Electronic Payments Infrastructure .......................... 396
  William A. Thaw

Track 6 - Technology & Innovation: Software in Transit

(Papers Presented at the Conference)

Partial State Space And Multi-views In Systematic Safety Analysis For Automatic
  Train Control Systems .................................................................................................................. 402
  Fenggang Shi and Robert Yuen

Software Maintenance: Having A Choice ......................................................................................... 408
  Thomas Colacioppo

New York CIty Transcapital Program Management Software Initiative ........................................ 411
  Joe McDermott
Track 6 - Technology & Innovation: Maintenance & Reliability

(Papers Presented at the Conference)

Going Diagnostic ................................................................. 415
   Robert J. Spadafora and Anthony Di Iorio, P.E.

How Do We Manage All These Embedded Microprocessors? ..................... 419
   Ian B. Pirie

Authority And Carbuilder Partnership In FRACAS To Achieve Reliability Growth:
   The TTC/Bombardier T1 Car Experience .................................. 425
   Dominique Aglot, Jean-François Chénier, and Paul Millett

(Papers Not Presented at the Conference)

Infrared Thermography In Transit Maintenance..................................... 431
   Kenneth McDonald

Track 6 - Technology & Innovation: ITS Applications

(Papers Presented at the Conference)

Maryland MTA’s Smart Mobility Demonstration Project ............................ 441
   Ashok Joshi and Raymond Wright

PATHVISION: The New Internal, LAN-based, Train Tracking And Information
   Broadcast System For PATH, The Primary NY/NJ Commuter Rail System,
   Replacing The Metrovision System ........................................... 448
   Henry Rosen and Bernard Conan Pobiak

Advanced Audio/Visual Passenger Information Systems ............................ 459
   Thomas Powell

Lessons Learned-Getting To Software Conceptual Design Review ................ 466
   Melvyn Rubenstein

(Papers Not Presented at the Conference)

The OC Transpo “Smart Systems” Action Plan ..................................... 470
   Doug Parker and Helen Gault
Track 6 - Technology & Innovation: Standards & Standardization

(Papers Presented at the Conference)

Light Rail Service: Pedestrian And Vehicular Safety
   TCRP Project A-13 ................................................................. 488
   Hans W. Korve, Joaquin T. Siques, and Linda J. Meadow

A New Event Recorder Standard for Passenger Rail Equipment ................................ 493
   Christopher J. Holliday, P.E.

Developing Consensus Standards For Communications-Based Train
   Control Systems ................................................................. 499
   Dr. Alan F. Rumsey

The ASME Standard For Rail Transit Cars .............................................. 5098Stelian Canjea, P.E.
(Papers Not Presented at the Conference)

Standard Specifications, Design Criteria, Standard Drawings And Design Drawings .... 514
   Nadeem Tahir, P.E. and Ali Shakeri, P.E.

Commuter Rail: Commuter Rail Research Issues

(Papers Presented at the Conference)

Commuter Rail Seat Crashworthiness Testing And Analysis ........................................... 520
   Caroline VanIngen-Dunn and Joseph E. Manning
