CONTENTS
Volume 1

Keynote: Market requirements of thermomechanically processed steel for the 21st Century 3
K Nishioka (Nippon Steel Corporation, Japan)

STRUCTURE/PROPERTY RELATIONSHIPS

Keynote: Customer driven steel development, the future for structure/property relationships? 15
RC Cochrane (University of Leeds, UK)

Improved formability and fatigue properties of high strength steels through the microstructure control 29
A De Ro, P Foureuaux, J Defourny, JC Herman (CRM Gent, Belgium)

Effect of Mn content on mechanical properties of hot-rolled Ti-bearing low carbon high strength steels 39
T Nakahara, Y Funakawa, T Inazumi, Y Hosoya (NKK Corporation, Japan)

POSTERS

*Structure and properties of some fire resistant steels
BK Panigrahi, S Jha, BD Tripathi, M Ghosh (Steel Authority of India Ltd, India)

The effects of tungsten addition on the microstructure and mechanical properties of 9Cr-Mo steels 51
S-G Hong, W-B Lee, CG Park (Pohang University of Science & Technology, Korea)
K-B Kang (POSCO, Korea)

New hot rolled deep drawing qualities 60
RP Underhill (Corus Group plc, UK) PM Hekker (Corus Group, The Netherlands)
A DePaepe (CRM, Belgium) E Annelli (CSM, Italy) S Geisler (RWTH, Germany)

*Carbide formation after torsion simulation of thermomechanical processing of UHC
AF Vicente (CENIM, Spain)

The influence of vanadium in microalloyed steels on the properties and microstructure of the intercritically reheated coarse grained heat affected zone 69
Y Li, TN Baker (University of Strathclyde, UK) MJW Green, DN Crowther (Corus Group plc, UK) PS Mitchell (Vanitec, UK)

*Thermomechanical processing of 34CrNiMo6 steel
Z Nový, J Džugan, P Šolic (ŠKODA VÝZKUM s.r.o, Czech Republic)
D Jandová (University of West Bohemia, Czech Republic)

Improving strength and fracture toughness of microalloyed medium carbon steel - An example of microstructural design 79
JD Boyd, P Zhao (Queen's University, Canada)

PHYSICAL METALLURGY OF HOT DEFORMATION

Keynote: The hot strip mill as an experimental tool 93
JJ Jonas (McGill University, Canada)
Recrystallization characteristics, flow stress behaviour and modelling of microstructure evolution in chromium alloyed steels
M Rynemark-Bergman, T Siwecki, S Pettersson (Swedish Institute for Metal Research, Sweden)

Seeds, sandwiches and stones: Complex precipitation in microalloyed steels
EJ Palmiere, RM Pothis, RL Higginson (University of Sheffield, UK)

Thermal and microstructural finite - Element analysis of multipass rolling
PA Cornelius, RW Evans (University of Wales-Swansea, UK)
NT Rudkins (Corus Group plc, UK)

Effects of strain rate changes and strain path on flow stress and recrystallisation kinetics in a Nb bearing microalloy steels
LP Karjalainen, MC Somani (University of Oulu, Finland)
P Peura, DA Porter (Rautaruukki Oyj, Finland)

POSTERS

The influence of Ti on the hot ductility of steels and to the problem of transverse cracking
B Mintz, C Spradbery (City University, UK)

Study of grain growth during reheating of microalloy steels
AJ Rose, K Randerson, WT Cook (Corus Group plc, UK)

The effect of controlled rolling on carbonitride precipitation, steel structure and properties
LM Panfilova, LA Smirnov (Ural Institute of Metals, Russia)
AA Filippenkov (FAN Production and Marketing Company, Russia)

Carbide precipitation and high temperature strength in the hot rolled HSLA steels containing Nb-CR and Nb-Mo
W-B Lee, S-G Hong, CG Park (Pohang University of Science & Technology, Korea)
K H Kim, S-H Park (POSCO, Korea)

Microstructure, hardness and texture evolution during the hot rolling of duplex stainless steel
L Duprez, BC De Cooman (University of Ghent, Belgium) N Akdut (OCAS NV, Belgium)

Precipitation behaviour of Nb(C,N) in a model austenite during thermomechanical processing
MP Black, WM Rainforth, EJ Palmiere (University of Sheffield, UK)

Cellular automata modelling of austenite grain coarsening during reheating
W Yu, SP Banks, EJ Palmiere (University of Sheffield, UK)

Dissolution kinetics in high strength low alloy (HSLA) steels
AJ Couch, RC Cochrane (University of Leeds, UK)

Study of the interaction between precipitation and recrystallisation in Ti-microalloyed steels after reheating at very high temperature
A Fernandez, P Uranga, B López, JM Rodríguez-Ibabe (CEIT and ESII, Spain)

Influence of Ti and N contents on precipitate and austenite grain size at high temperatures in structural steels
SF Medina, M Chapa, MI Vega (CENIM-CSIC, Spain)
Effects of Mn and Cr on the hot deformation behavior in microalloyed steels
S-J Kim, C-G Lee (Korea Institute of Machinery and Materials, Korea)

The characterization of thermomechanical processing during the hot strip rolling of Nb microalloyed, Cr-Mo and plain C-Mn steels
F Siciliano Jr, JJ Jonas (McGill University, Canada)

Mechanical and microstructural effect of the strain reversal on a microalloyed steel
R Bartolomé, JI Astiazaran, A Iza-Mendia, I Gutierrez (CEIT and ESI, Spain)

PHYSICAL METALLURGY OF COOLING

Keynote: Microstructure development during cooling of hot rolled steels
WB Hutchinson (Swedish Institute of Metals Research, Sweden)

Mathematical modelling of transformation and cooling behaviours of high carbon steels on run-out table of hot strip mill
JK Lee, HN Han, HB Lee (POSCO, Korea)

Effect of process variables on the transformation kinetics of a low-carbon Nb-microalloyed steel
E Cotrina, R Bengochea, A Argüelles, B López, I Guitérrez (CEIT and ESI, Spain)

Optimisation of hot strip mill processing conditions for niobium HSLA steels
JK Patel, B Wilshire (University of Wales-Swansea, UK)
PJ Evans (Corus Group plc, UK)

Effect of boron on the γ to α transformation at grain boundaries in low alloy steel
S Yoshida (Nippon Steel Corporation, Japan) J Agren (Royal Institute of Technology, Sweden)

POSTERS

Ferrite-pearlite transformation in hot-worked austenite
EV Konopleva, HJ McQueen (Concordia University, Canada)
VM Khlestov (Priazovsky State Technical University, Ukraine)

Influence of Ti and N contents on critical rolling temperatures (T₀,A₀,A₁) in low carbon steel
MI Vega, SF Medina, M Chapa (CENIM-CSIC, Spain)

Experimental measurement of Mo levels at transformation interfaces in Fe-C-Mo alloys
HA Fletcher, GDW Smith (Oxford University, UK) AJ Garratt-Reed (MIT, USA)
HJ Aaronson (Carnegie Mellon University, USA) WT Reynolds (Virginia Polytechnic Institute & State University, USA) GR Purdy (McMaster University, Canada)

Strain ageing of drawn pearlitic steel wire during post drawing heat treatments
CE Hinchliffe, GDW Smith (Oxford University, UK)
THROUGH PROCESS – PRODUCT MODELLING

Keynote: Metallurgical basis for the thermomechanical processing of microalloyed steels
AJ DeArdo (University of Pittsburgh, USA) 309

Complete model for niobium-microalloyed steels deformed under hot working conditions
J Majta (University of Mining & Metallurgy, Poland) 322

MetModel - Microstructural evolution model for hot rolling and prediction of final product properties
AJ Trowsdale, K Randerson, PF Morris, Z Husain, DN Crowther (Corus Group plc, UK) 332

Physical prediction of the tensile strength for ferrito-perlitic steels in the hot strip mill
O Bouaziz, T Lung (IRSID, USINOR R&D Centre, France) G Herman, M Piette, C Perdrix (CRDM, USINOR R&D Centre, France) 342

Microstructure engineering in hot strip mills
M Militzer, IV Samarasekera (University of British Columbia, Canada) 352

POSTERS

Nucleation of {III} <hkl> in cold rolled and annealed Al-killed and IF steels quality steels
BJ Duggan, GL Liu, H Ning, YY Tse (University of Hong Kong, Hong Kong) 365

Carbide formation during torsion simulation of thermomechanical processing of an ultrahigh carbon steel
M Carsi, A Fernández-Vincente, OA Ruano (CENIM, Spain) F Peñalba (INASMET, Spain) F Peñalba (Fundación INASMET, Spain) 372

Prediction of microstructural evolution and mechanical properties in forging of hot working die steel
JR Cho (Korea Maritime University, Korea) J Zhu, I Pillinger, P Hartley (University of Birmingham, UK) —

Finite element modelling of coil cooling to aid improvements in product consistency
PJ Evans, NT Rudkins (Corus R, D &T, UK) I Guitiérrez (CEIT, Spain) 382

Experimental planning and FEM simulation of thermomechanical processing of steels
G Kodjaspirov, E Gulikhandanov (St. Petersburg State Technical University, Russia) I Kim (Kum Oh National University of Technology, Korea) 392

New modelling of static recrystallization kinetics in low alloy and microalloyed steels
SF Medina (CENIM, Spain) A Quispe (Universidad Nacional Jorge Basadre, Perú) 399
