International RILEM Workshop
on Historic Mortars:
Characteristics and Tests

Paisley, Scotland

12th-14th May 1999

Organised by
Advanced Concrete and Masonry Centre
University of Paisley, Scotland

Edited by P. Bartos, C. Groot and J. J. Hughes

RILEM Publications S.A.R.L.
The Publishing Company of RILEM
### Contents

Preface XI  
RILEM Technical Committee TC 167-COM Members XIV  
Organising Committee XV  

**PART ONE: INTRODUCTION**  
1. The use of lime mortars in the context of dry stone build  
   I. Maxwell  

**PART TWO: SAMPLING AND ASSESSMENT OF DAMAGE**  
2. Practical sampling of historic mortars  
   J. J. Hughes and K. Callebaut  
3. Damage diagnosis and compatible repair mortars  
   R. P. J. van Hees  
4. Examination of hydraulic lime mortars of medieval churches in Denmark  
   H. D. Andersen, H. D. Zimmermann, H. Friis and U. Schnell  
5. Salt damage to the medieval plaster on a vault in Fanefjord Church  
   P. K. Larsen  

**PART THREE: MORTAR CHARACTERISATION SCHEMES**  
6. Chemical-mineralogical and physical-mechanical investigations of old mortars  
   B. Middendorf, G. Baronio, K. Callebaut and J. J. Hughes  
7. Procedure for a mortar type identification: a proposal  
   K. van Balen, E.-E. Toumbakari, M.-T. Blanco-Varela, J. Aguilera,  
   F. Puertas, C. Sabbioni, G. Zappia, C. Riontino and G. Gobbi  
   E. Goins  
9. Proposal for a useful methodology for the study of ancient mortars  
   G. Martinet and B. Quenee  

**PART FOUR: CHEMICAL AND MINERALOGICAL CHARACTERISATION**  
10. Hydraulicity in lime mortars revisited  
    A. E. Charola and F. M. A. Henrique
11. Analysis of mortars containing pozzolanas
C. Bläuer Böhm

12. Petrographical, mineralogical and chemical characterisation of lime mortars in the Saint Michael's church (Leuven, Belgium)
K. Callebaut, W. Viaene, K. van Balen and R. Ottenburgs

13. Historical and scientific study of hydraulic mortars from the 19th Century
K. Callebaut, J. Elsen, K. van Balen and W. Viaene

14. Analysis of mortars (to include historic mortars) by differential thermal analysis
P. R. Ellis

15. Environmental effects of SO2 on hydraulic mortars

PART FIVE: PHYSICAL CHARACTERISATION AND TESTING

16. Plasticity, water retention, soundness and sand carrying capacity: What a mortar needs
M. L. Thomson

17. A relationship between hydraulicity and permeability of hydraulic lime
P. F. G. Banfill and A. M. Forster

18. Portable probe gas permeametry in the testing of historic masonry and mortars
J. Valek, J. J. Hughes and P. J. M. Bartos

19. Effects of aging on lime putty
E. F. Hansen, A. Tagle, E. Erder, S. Baron, S. Connell, C. Rodriguez-Navarro and K. van Balen

20. X-ray diffraction and environmental electron microscopy of hydrated limes

21. Thermal strains in repointed masonry: preliminary investigations using ESPI
A. T. Vermeltfoort, C. J. W. P. Groot and E. Wijen

22. Experimental study on the mechanical role of thick mortar joints in reproduced Byzantine masonry
L. Binda, G. Baronio and C. Tedeschi

</tbody>
</table>
35. Methodology for the design of injection grouts for consolidation of ancient masonry
   E.-E. Toumbakari, D. van Gemert and T. P. Tassios

36. Dispersed hydrated lime: development and production, techniques and applications
   R. Strotmann

PART SEVEN: CASE STUDIES

37. A mortar’s study for the Cantaber’s house of Conimbriga, Portugal
   A. Cardoso

38. A case study: Mortar analysis at Pigeon Island National Landmark
    and Morne Fortune, St. Lucia, West Indies, interim report
    S. Sass

39. Study of the traditional method of lime slaking and lime products making in Beijing, China
    C. Liu

PART EIGHT: CONCLUDING SUMMARY

40. Historic mortars: characteristics and tests - Concluding summary and state-of-the-art
    C. J. W. P. Groot, P. J. M. Bartos and J. J. Hughes
