Fifth RILEM Symposium on Fibre-Reinforced Concretes (FRC)

Lyon, France

13-15 September 2000

Co-sponsored by
LCPC, Paris, France
ENTPE, Lyon, France
BEFIM - Projet National : Bétons de Fibres Métalliques
DRAST / Plan Génie Civil

Edited by
P. Rossi
LCPC
and G. Chanvillard
ENTPE

RILEM Publications S.A.R.L.
The Publishing Company of RILEM
Contents

Preface XIV

INVITED LECTURES 1

1. FRC for sustainable infrastructure regeneration and rehabilitation
   R N. Swamy 3

2. BEFIM: the French national project for the industrial development
   of metal fibre reinforced concrete
   R. Lacroix and P. Rossi 19

3. Characterisation of fibre reinforced concrete mechanical properties: a review
   G. Chanvillard 29

4. Design method for steel fiber reinforced concrete proposed
   by RILEM TC 162-TDF
   L. Vandewalle 51

5. Fiber reinforcements for concrete: looking back, looking ahead
   A. E. Naaman 65

6. Ultra-high performance fibre reinforced concretes (UHPFRC): an overview
   P. Rossi 87

PART ONE: MIX DESIGN AND PLACING 101

7. Mix design analysis on steel fiber reinforced concrete
   A. D. de Figueiredo, N. L. Nunes and J. Tanesi 103

8. Mix design for SFRC bridge deck construction
   B. Massicotte, G. Degrange and N. Dzeletovic 119

9. Mix design of very high strength steel fiber reinforced concrete (VHS SFRC)
   for tunnel liner
   C. Hu, P. Casanova and F. Delalande 129

10. Hybrid fibers in high performances extruded cement composites
    A. Peled, M. Cyr and S. P. Shah 139
11. Rebound reduction in steel fiber reinforced dry-mix shotcrete through matrix modifications
   V. Bindiganavile and N. Banthia

12. Methods for assessment of uniformity in carbon fibre dispersions in cementitious materials
   P. Stroeven, Z. Shui and Y. Cheng

PART TWO: STRUCTURAL APPLICATIONS

13. Tunnel precast segments: an SFRC alternative?
   F. Toutlemonde, M. Quiertant, S. Dubroca, P. Rossi, F. Petit and S. Bernard

14. Panneaux préfabriqués de façades en béton de sable renforcé de fibre de fonte amorphe
   G. Chanvillard, G. Giraudon et O. Roque

15. Fibre reinforced concrete: a structural perspective
   B. Massicotte and P. H. Bischoff

16. Plaques de tirants d'ancrage en BPR pour terre armée
   D. Tournette, J. L. Pégon, A. Stefanni et J. Dugat

17. Effect of steel macro fibers on cracking of thin concrete repairs
   O. Laurence, B. Bissonnette, M. Pigeon et P. Rossi

18. FRC piles earthquake behaviour
   F. Buyle-Bodin and M. Madhkhan

19. FRHPC precast roof elements: from constitutive to structural behaviour in bending
   M. di Prisco, R. Felicetti and F. Iorio

20. Flexural behavior of high performance fiber reinforced prestressed concrete beams
   G. Rosati and G. L. Guerrini

21. Design criteria for structural use of fibre-reinforced concrete in prestressed precast roof elements
   C. Failla, L. Astori, G. Toniolo and L. Ferrara

22. Analysis and design of SFRC bridge decks
   B. Massicotte, A. Bélanger and K. Moffatt

23. Innovation: Steel fibre concrete for jointless rail tracks
   H. Falkner and V. Henke
24. Investigation of fibre-reinforced thin repairs of concrete slabs or road pavements
   A. M. Brandt, J. L. Granju, A. Wysokowski, M. A. Glinicki, A. Turatsinze, A. Zyrawicka and A. Toumi

25. Structural application of steel fibre as principal reinforcing:
   conditions-design-examples
   X. Destrée

PART THREE: DESIGN METHODS AND MODELLING

26. Design of steel fibre reinforced concrete slabs on grade
   J. Silfwerbrand

27. A fracture mechanics based design approach to FRC
   H. Stang and J. F. Olesen

28. Calcul des contraintes de retrait gêné par frottement dans les dallages :
   influence des fibres vis à vis des risques de fissuration
   C. Feron et G. Chanvillard

29. Designing FRC slabs on grade for temperature and shrinkage induced cracks
   J. F. Olesen and H. Stang

30. Torsional behaviour of fiber-reinforced concrete beams
   R. Cerioni, D. Ferretti and I. Iori

31. Non-local damage analysis of three-point bending tests on SFRC notched beams
   L. Ferrara and R. Gettu

32. Deformational properties of fiber reinforced concrete under uniaxial tension and shear
   T. Tsubaki, S. Sumitro and T. Arai

33. Mechanisms of microreinforcement in cementitious materials
   P. Pierre, R. Pleau and M. Pigeon

34. Testing and modelling pan FRC plates damaged by impact loads
   E. Cartapati and N. Nisticò

35. Post-peak fatigue behavior of fiber-reinforced concrete
   S. Cangiano, G. A. Plizzari and P. Colosio

36. Behavior of FRC under uniaxial tension
   S. Marfia, E. Sacco and H. Stang
37. Modelling of fibre dispersions in cementitious systems
   P. Stroeven

PART FOUR: MECHANICAL PROPERTIES

38. Uniaxial stress-strain relationship of cementitious composites - A review
   X. Hu and R. Day

39. A comparative study of the toughness of steel fiber reinforced concrete in
tension, flexure and shear
   B. Barragán, R. Gettu, R. F. Zalochi, M. A. Martín and L. Agulló

40. Flexural-shear interaction in high strength fibre reinforced concrete beams
   G. Campione, L. La Mendola and G. Zingone

41. Monotonic and cyclic flexural behaviour of medium and high strength
fibre reinforced concrete
   G. Campione, S. Mindess and N. Banthia

42. Development and application of high performance hybrid fiber
reinforced concrete
   N. Banthia, C. Yan and V. Bindiganavile

43. Experimental investigation on lightweight fibre reinforced concrete with
hooked steel fibres
   G. Campione, N. Miraglia and M. Papia

44. Fracture properties and acoustic emission response of hybrid polypropylene-steel
fibre reinforced concrete
   C. Qian, P. Stroeven, D. H. Dalhuisen and A. Moczko

45. Concrete reinforced by low volume content of short glass fibers
   Y. Cheng, P. Stroeven, X. Peng and R. Gao

46. Delayed behaviour of cracked SFRC beams
   J. L. Granju, P. Rossi, G. Chanvillard, B. Mesureur, A. Turatsinze, H. Farhat,
   C. Boulay, J. J. Serrano, P. Fakhri, O. Roque and P. Rivillon

47. Mechanical behavior of fibre reinforced high performance concrete after
exposure to high temperatures
   S. Y. N. Chan, X. Luo and W. Sun

48. Fracture of fibre reinforced concrete notched beams under impact loading
   P. Sukontasukkul, S. Mindess and N. Banthia
49. Creep and shrinkage of steel fibre reinforced concrete
   J. Krátký, K. Trtík, J. Vodicka, D. Spura and M. Abramowicz

50. Cracking behaviour of steel microfibres reinforced cement pastes
   M. Shink, R. Pleau, M. Pigeon and R. Gagné

51. Cementitious materials under uniaxial loads
   L. Biolzi, A. Meda, G. Rosati and G. L. Guerrini

52. Bond and splitting in high performance fiber reinforced concrete
   S. Cattaneo and G. Rosati

53. Experimental behaviour of high strength fiber concrete beams under cyclic
    and alternated loadings
   L. Daniel, A. Loukili and J. Lamirault

54. Tensile stress distribution model for cement composites reinforced by
    short fiber
   K. Yamada and H. Mihashi

55. Influence of fracture toughness of matrix on the ductility of fiber reinforced
    cementitious composites
   H. Mihashi, A. Kawamata, Y. Kaneko and K. Kirikoshi

56. Influence of polypropylene fibres on the homogeneity of results of properties
    of fibre reinforced concrete
   K. Trtík

57. Tests on composite material reinforced by steel wool or steel straw fibres
   C. E. de S. Tango

58. Ageing effect on post-crack behavior of SFRC
   J. Šustersic, V. Ukrainczyk, A. Zajc and A. Šajna

59. Comparison of tension stiffening for plain and steel fibre reinforced concrete
   P. H. Bischoff

60. Properties of FRC with modified cellulose fibres
   W. Pichór, M. Petri and J. Deja

PART FIVE: DURABILITY

61. Durability of sisal fibre reinforced mortar composites
   R. D. Tolêdo Filho, K. Ghavami, G. L. England and K. Scrivener
62. Influence of carbon fibres on corrosion risks of steel bars in concrete  
   Z. Shui and P. Stroeven
   665

63. Permeability study of fibers shotcrete  
   E. Ferrier and P. Hamelin
   671

64. Permeability of cracked high performance fiber reinforced cement based composites  
   C.-M. Aldea, A. Peled and S. P. Shah
   681

65. Size effect of reinforcement on corrosion initiation  
   P. S. Mangat and B. T. Molloy
   691

PART SIX: PHYSICAL AND CHEMICAL PROPERTIES

66. Effect of the incorporation of fibers on the plastic shrinkage of concrete  
   J. Mora, R. Gettu, C. Olazábal, M. A. Martín and A. Aguado
   703

67. Recent developments in glass fibre reinforced cement  
   D. Muller and I. J. Morrison
   705

68. Non destructive test for young age characterization of projected fibers concrete  
   E. Ferrier, G. Lagarde and P. Hamelin
   715

69. Microstructure and mechanical properties of composite made of well embedded AR glass fiber  
   D. Bonen and T. D. Tonyan
   725

PART SEVEN: HIGH AND ULTRA-HIGH PERFORMANCE FRC

70. Mechanical behaviour of HPC and UHPC in direct tension at high temperature and after cooling  
   R. Felicetti, P. G. Gambarova, M. P. Nathali Sora and G. A. Khoury
   749

71. Flexural behaviour of ultra high-performance mortars reinforced with different types of steel fibres  
   D. Boulet, R. Pleau, P. Rougeaud and R. Bodet
   759

72. Etude du comportement à la fatigue du BPR fibré  
   D. Mouquet, G. Bernier et M. Behloul
   769

73. Ductal: new ultra high performance concretes. Damage resistance and micromechanical analysis  
   G. Orange, J. Dugat and P. Acker
   781
74. Mechanical characteristics of multi-modal fiber reinforced cement based composites
   Y. Sato, J. G. M. van Mier and J. C. Walraven 791

75. Matrix-fiber coherence of SFRHPC
   L. Ay 801
