The reduction of the environmental impact by the glass industry in compliance with the IPPC/BAT European Directive

A special thank is due to the following companies for their kind contribution to the organization of the Conference:

- Nikolaus Sorg GmbH & Co KG
  P.O. Box 1520
  97805 Lohr am Main/ Germany

- Interprojekt GmbH
  Katernberger Straße 135
  46327 Essen Germany
CONTENTS

Session 1: General Survey

• What difference has IPPC made to the European Flat Glass Industry?
  
  Derek Norman (Accolade Communication - United Kingdom)
  Presented by Allen Norris (Pilkington - United Kingdom)  
  pg. 1

• The Italian glass industry and the environment: how to comply with the European Directive 96/61/EC.
  
  Bianca Maria Scalet (Stazione Sperimentale del Vetro - Italy)  
  pg. 9

• Advantages of the emission reduction of glass melting furnaces in the last 25 years - a survey.
  
  Ulrich Kircher (HVG - Germany)  
  pg. 18

Session 2: Dusts

• Influence of glass furnace operational conditions on the evaporation from soda-lime-silica and borosilicate glass melts.
  
  Ruud G.C. Beerkens (Eindhoven University of Technology - NL)
  Hans van Limpt (TNO - Institute of Applied Research - NL)  
  pg. 19

• Simultaneous segregation of dust and acid pollutants from the waste gases of glass melting furnaces with full recycling of the residues.
  
  Thomas Riepe (Intensiv Filter - Germany)  
  pg. 35

• According to the principles of IPPC/BAT: application of systems for dust and acid pollutants removal flue gases of glass-works.
  
  Cristiano de Candia (Procedair Italia - Italy)  
  pg. 44
Session 3: NOX

- New technologies for oxygen use in glass container production and new services for the glass maker: a technical and economical overview.  
  Sergio de Sanctis (Sapio - Italy)  
  pg. 55

- Flameless oxydation: a cleaner high temperature combustion.  
  M. Caocci (Cimatec - Italy), J.G. Wünning (WS - Germany), A. Milani (CSM - Italy)  
  pg. 63

- Sorg® second generation Cascade Heating System for reducing NOX including additional primary measures. Report and operating results.  
  Jürgen Becher and Manfred Wagner (Nikolaus Sorg - Germany)  
  pg. 70

- Long term experiences with the SNCR-Process on a recuperator type of furnace.  
  Daniel Böni (Vetropack - Switzerland)  
  pg. 76

  M. Joshi, H. Borders, O.Charon (Air Liquide - U.S.A.)  
  T. Legiret (Air Liquide - France) and P. Zucchelli (Air Liquide - Italy)  
  pg. 81

Session 4: SOX, F⁻, Cl⁻

- Waste gas treatment of melting furnaces for the production of soda lime glass. Experiences with Neutrec® technology and technical-economic comparison with other cleaning technologies.  
  Nadim Kahalé (Solvay Chimica - Italy)  
  pg. 93

- The use of Ca(OH)₂ with special characteristics in glass furnace flue glass treatment with recovery of the residues into the vitrifiable mixture.  
  Luigi Cariboni (Icico - Italy), Franco Mereu (Unicalce - Italy)  
  pg. 105
