6th International Conference

SEMI-SOLID PROCESSING OF ALLOYS AND COMPOSITES

editors: G.L. Chiarmetta – M. Rosso
PROGRAM

ORAL SESSIONS

SSM: some thoughts on past milestones and on the path ahead
M. Flemings

INDUSTRIAL APPLICATIONS

Why Thixo?
G.L. Chiarmetta

Detailed processing and cost considerations for new rheocasting of light metal alloys
K. Hall, H. Kaufmann, A. Mundl

Thixoformed space-frames for series vehicles. Study, development and applications
P. Giordano, F. Boero, G.L. Chiarmetta

Recycling of semi-solid-processing residues

Diecasting systems for semiliquid & semisolid metalcasting-applications
P. Eisen, K. Young

A roadmap for semi-solid processing
D. Apelian

The thixotec research project
G. Hirt

Twin-screw rheomoulding - A new semi-solid processing technology
Z. Fan, S. Ji, M.J. Bevis

Gating of semi-solid aluminium castings
S.P. Midson, R.B. Minkler, H.G. Brucher

Semi-solid forming applications: high volume automotive products
W.L. Winterbottom

Manufacture of aluminum automotive piston by semi-solid forming with a statistical approach
J.C. Choi, Y.H. Kim, J.H. Park, T.H. Kwon

Magnesium new rheocasting - A novel approach to high quality Magnesium-castings
R. Potzinger, H. Kaufmann, P.J. Uggowitzer

Advances in forming machine control by introducing non-switching adaptive control structures
H.M. Ritt, H. Rake

SSM (semi-solid metal) technological alternatives for different applications
K. Young, P. Eisen

Serial production of net shaped and weldable structural components by processing Thixalloy®
B. Wendinger

Thixomolding® - Technology opportunities and practical uses
D. Walukas, S. LeBeau, N. Prewitt, R. Decker

Research and applications of SSP in China
Z. Kui, X. Jun, S. Likai, C. Daijin, Z. Yuxin

A new integrated production concept for semi-solid processing of high quality Al-products
K. Steinhoff, G.C. Gullo, R. Kopp, P.J. Uggowitzer

RHEOLOGY

Key problems in rheology of semi-solid alloys
M. Suery, A. Zavaliangos
Numerical simulation of semi-solid casting of an automotive component
F. Bonollo, G.L. Chiarmetta, N. Gramegna, P. Parona

Rheology and microstructure of continuously cooled semisolid materials
C. Journeau, M. Ramacciotti, G. Cognet

The semisolid shear properties and casting behaviour of AlSi7Mg0.35 alloys produced by low-temperature pouring
H. Wang, C.J. Davidson, D.H. StJohn

Influence of liquid flow through the solid skeleton on the overall deformation of metallic alloys in semi-solid state

Rheology of semi-solid suspensions: current understanding and future challenges
A.N. Alexandrou, G.R. Burgos, V.N. Entov

Microstructural and rheological aspects of the extrusion and deposition of a partially remelted Pb-Sn alloy during solid freeform fabrication
S. Finke, M. Suery, C.L. Martin, W. Wei

Semi-solid shear behaviour of A356 Al alloys at the onset of breakage
K. Mahjoub, A. Mortensen, M. Rappaz

Simulation of microstructure and rheology of semi-solid alloys
M. Perez, J.C. Barbé, Z. Neda, Y. Bréchet, M. Papoular, L. Salvo

PROCESSING

State of the art of thixocasting
M. Garat, L. Maenner, Ch. Sztur

Advanced hot work tool steels for modern die casting and semi solid moulding application
J. Mayerhofer

Induction heating of SSM billets: processing issues
J. Keist, D. Apelian

Liquid hot isostatic pressing process to improve properties of thixoformed parts
M. Rosso, C. Mus, G.L. Chiarmetta

Thixosystems
T. Leng

Semi-solid strip casting of aluminum alloy using a melt drag twin roll caster equipped with a cooling slope
T. Haga, S. Suzuki

Semi-solid metal processing: a cost-competitive approach for high integrity aluminum components
J.L. Jorstad

Application of mushy/semi-solid joining
M. Kiuchi, J. Yanagimoto, S. Sugiyama

Silicon networks in aluminium-high silicon alloys and their effect on semi-solid processing
S.C. Hogg, P. Kapranos, H.V. Atkinson

Ultrasonic techniques for monitoring of semi-solid metal processing

Effect of process variables on A356 SSM castings
K.C. Sharma, J.H. Ferreira, G. Govender, O. Damm

Experiences using a band-coil and a new acoustic sensor system for inductive heating of aluminium-alloys
R. Sebus, G. Henneberger

Thixoforming of steel
B. Nohn, U. Morjan, D. Hartmann

Novel rheocasting processes to achieve remarkable grain refinement
K. Ichikawa, M. Katoh, F. Asuke, Y. Kinoshita

Semi-solid extrusion forming process of stainless steel
K. Miwa, S. Kawamura

Thixoforming of steels inductive reheating and basic investigations
S. Abdelfattah, M. Robelet, A. Rassili, M. Bobadilla
### MICROSTRUCTURE AND MECHANICAL PROPERTIES

The optimized tensile and fatigue properties of electromagnetically stirred and thermally transformed semi-solid 357 and modified 319 aluminium alloys  
S.C. Bergsma, M.E. Kassner, E. Evangelista, E. Cerri

Study of the influence of heat treatment cycles on properties of thixoformed automotive parts  
M. Rosso, P. Giordano, G.L. Chiarmetta

Fracture toughness of aluminium rheocast alloys: an experimental comparison of test methods  
D. Brabazon, D.J. Browne, A.J. Carr

Fatigue and fracture toughness of semi-solid processed Al-Si and Al-Cu aluminium alloys  
C. Caiado Ferreira, J. Pames Teixeira

Mechanical properties of an heat treated particle reinforced thixocast composite  
E. Cerri, E. Evangelista, P. Cavaliere

Fatigue properties of a semisolid cast Al-7Si-0.3Mg-T6 alloy  
M. Badiali, C.J. Davidson, J.R. Griffiths, A. Zanada

The effect of thermomechanical treatments on the microstructure, texture and deformation behaviour of two aluminium-copper alloys  
M. Ferrante, E. de Freitas, M. Bonilha

Semi-solid deformation of aluminium alloy ingots with ultimately refined nondendritic structure  
G.I. Eskin, V.N. Serebryany

Microstructural changes during reheating of semi-solid alloy AA6082, modified with barium  
G.C. Gullo, K. Steinhoff, P.J. Uggowitzer

Continuous casting of Al alloy 7075 for semi-solid forming  
G. Lu, J. Cui, J. Dong, K. Xia

Microstructure evolution during re-heating of 357 aluminium alloy and its effect on the flow properties in a semi-solid metal casting operation  
A. Kopper, D. Apelian

Strain localization in semisolid alloys  
A. Zavaliangos, C.L. Martin

Modelling microstructural development during semi-solid metal forming  
A.M. Mullis

Yield stress of Al alloys in the semi-solid state  
Q.Y. Pan, D. Apelian

Mechanical behaviour of semi-solid materials  
C. Rouff, R. Bigot, V. Favier, M. Robelet

Melting and solidification studies by advanced thermal analysis  
L. Battezzati, M. Baricco, F. Marongiu

Tensile behaviour of a semi-solid AA5182 aluminium alloy  
W.M. Van Haaften, W.H. Kool, L. Katgerman

Experimental investigation by EBSD and X-ray tomography of the agglomeration of the solid phase after deformation in the semi-solid state of a 357 aluminium alloy  

On the formation of eutectic phase in magnesium alloys during cooling from the semi-solid state  
P.J. Uggowitzer, A. Wahlen
Correlation of mechanical properties and type of fillers in Al matrix composites fabricated by means of powder metallurgy
M. Vukcevic, K. Delijic, D. Vuksanovic

RAW MATERIALS

Alloy development for thixoforming
H.V. Atkinson, P. Kapranos, D.H. Kirkwood

Manufacturing of feedstock for semi-solid processing by chemical grain refinement
S. Brusethaug, J. Voje

Casting of light metal wrought alloys by new rheocasting
H. Kaufmann, H. Wabusseg, P. J. Uggowitzer

Microstructure and rheology of two new aluminum alloys for semisolid processing
A. Zavaliangos, J.C. Lin, M. Yin

New material concepts for thixocasting
H. Müller-Späth, D. Bernhard, P.R. Sahm

Viscosity of semi-solid A357 alloy in the transient high shear rate regime
A.M. de Figueredo, A. Kato, M.C. Flemings

Alloy development for automotive applications
S. Engler, D. Hartmann, I. Niedick

Assessment of aluminium feedstock materials for use in thixoforming
G. Tausig

Development and industrial production of Thixalloy® - Thixalloy® as a system solution
A. Kraly

Dievar a new high performance die steel for aluminium and magnesium die casting, squeeze casting and thixoforming
H. Lindow, B. Klarenfjord

MODELLING

A new mathematical model to simulate flow of mushy/semi-solid alloys
M. Kiuchi, J. Yanagimoto, H. Yokobayashi

Mould optimisation of the thixoforming process by numerical modelling
Th. Imwinkelried, Th. Schnorf, J.R. Gabsathuler, J. Lagemann, H. Schelling

Simulation and experimental investigations of microstructure coarsening of aluminium-alloys
A. Prikhodovsky, I. Hurtado, D. Neuschütz, H. Gorgeneck, W. Bleck

Rheological characteristics of semi-solid grani® composite alloy
L. Azzi, F. Ajersch, T.F. Stephenson

Semi solid metal casting of aluminum alloys: the influence of shear rate on viscosity
X. Yang, S. Xie, T. Altan

A mixture approach to the numerical modelling of thixocasting
B. Binet, F. Pineau

An initial assessment of the flow-3D thixotropic model

Modeling thixotropy and its effects on semisolid casting
A.N. Alexandrou, G.R. Burgos, V.M. Entov

Simulation of adequate inductive heating parameters and the magneto-thermal coupling involved in the SSM processing of steels
A. Rassili, C. Geurine, W. Legros, M. Bobadilla, A. Cucatto, M. Robelet, S. Abdel fattah, J. Dohmann, C. Hornradt

Modeling the thixotropic flow behaviour of semi-solid aluminum alloys
A. Wahlen

Theoretical modeling and experimental verification of induction heating process of semi-solid billets

571
INDUSTRIAL APPLICATIONS

Transition from prototyping to production and maturity of thixocomponents 581
F. Boero, G.L. Chiarmetta, P. Giordano

Material-concepts for dies for SSM-forming of steel 587
E. Lugscheider, Th. Hornig, D. Neuschiitz, O. Krylyov, R. Prange, R. Telle, R. Schmidt

Corrosion resistant die coatings for semi-solid processing 593
I. Hurtado, O. Krylyov, R. Prange, D. Neuschiitz

Thixoforming of steel-experiments with a vacuum chamber based tool concept 599
R. Kopp, J. Kallweit, Th. Möeller

Comparison of rheological measurement methods for semi-solid alloys 605
M. Modigell, J. Koke, R. Kopp, D. Neudemberger, P.R. Sahm, O. Klaassen

RHEOLOGY

Rheology, deformation behaviour and microstructural evolution of the commercial AA2024 aluminium alloy 611
M. Ferrante, E.R. de Freitas

Mechanical behaviour of rheo-casted and rheo-forged Al-Si and Al-Cu aluminium alloys 617
C. Caia do Ferreira, J. Pampies Tietzeira

A study on the die filling behaviour with semi-solid fluids 623
J. Koke, M. Modigell, M. Hufschmidt, A. Alexandrou

Visualization of the thixotropic fluid 629
J.C. Lee, H.K. Seok, H.I. Lee

Segregation and wall slip in semi-solid alloys: measurement, modelling and simulation 635
J. Koke, M. Hufschmidt, M. Modigell, C. Heine, S. Hann, S. Stapf, J. Petera

PROCESSING

The semi-solid metal (SSM) casting process 641
B. Niedermann

Semi-solid processing of aluminium 7075 649
S. Chayong, P. Kapranos, H. V. Atkinson

Thixocasting: “new methods for the characterization of the flow lengths and the mold filling behaviour of semi-solid alloys” 655
M. Fehlbier, O. Klaassen, P.R. Sahm

The influence of processing factors on the formation of a fine grained, equiaxed primary phase in A356.2 661
F. Cooper, J.H. Ferreira, O. Damm

Controlled inductive heating for thixotropic materials into the semi-solid state 667
T. Gräf, R. Jürgens, J. Gies

Improving the wear behaviour of tools for SSM-forming by use of PVD-hardcoatings 675
E. Lugscheider, K. Bobzin, St. Baerwulf, Th. Hornig

A drop forge viscometer for semisolid alloys 681
J.A. Yurkó, A.M. de Figueredo, M.C. Flemings

Comparison of thixocasting and thixoforging using a unique demonstrator part 687
R. Kopp, G. Winning, J. Kallweit, H. Knissel, J.P. Gabathuler, R. Quast

SSM aluminium alloys produced by electromagnetic stirring: the Brazilian way 693
M. Paes, S. Herrig, E.J. Zoqui

MICROSTRUCTURE AND PROPERTIES

Microstructures after castings and reheating in a continuously cast aluminium alloy 7075 701
J. Cui, G. Lu, J. Dong, K. Xia

Study on mechanical properties of an A356 aluminum alloy with thixotropic properties 705
S.H. Juang, S-M. Wu, C-Y. Ma, H. Peng

Mechanical properties and microstructure investigations on a MMC Thixoforming brake drum 711
M. Rosso, M. Cordoni, P. Giordano
Formability of semi-solid-formed A356 alloys with dendritic and non-dendritic structures
Y.S. Yang, C-Y.A. Tsao

Microstructural evolution of semi-solid Sn-15wt%Pb alloys under high shear rate and high intensity of turbulence
S. Ji, Z. Fan

Influence of the intermetallic Mg17Al12 on the young's modulus of AZ91HP automotive casting parts casted by thixomag process
S. Suk, B. Lisiecki B., J. Collot

RAW MATERIALS

Production of aluminium alloy ingots for thixo-forming by the semi-solid casting using a cooling slope
T. Haga, S. Suzuki

Development of hypereutectic aluminium alloys for thixoforming based on the A390 composition

Assessing thixoformability by rapid compression testing
T.Y. Liu, P. Kapranos, H.V. Atkinson

Grain refining Optimisation of A356 alloy by Mn- addition

Semi-solid processing of a near-liquidus cast Al-5%mg base alloy for anodizing applications
X.P. Niu, B.H. Hu, L. Pinwill

Deformation behaviour of Al-6.6%Si alloy in the semi-solid state
S. Xie, Z. Ding, J. Guo, S. Huang, X. Yang

3D characterisation by X-ray tomography of semi-solid aluminium alloys

Adaption of Aluminium-foundry for new rheocasting
H. Wabusseg, H. Kaufmann, P.J. Uggowitzer

Observation of microstructure in Al-Cu Rheocast Alloys by Transmission Electron Microscopy
B. Niroumand, H.J. Koh, G. Tausig, K. Xia

MODELLING

An investigation to determination the influence of geometric parameters on semi-solid metal flow
X. Yang, S. Xie, M. Teller, T. Altan

Use of simulation tools for optimization of the thixoforming process
B. Nohn, D. Hartmann

Automatic mesh generation and remeshing for finite element simulation of semi-solid forming process
C.G. Kang, N.S. Kim, H.K. Jung

Research activities of ERC/NSDM on the semi-solid material processing and their application
C.G. Kang, Y.H. Moon, J.C. Choi, J.S. Lee

Original numerical simulation of heat and mass transfer in a coacasting technology
F. Kavicka, J. Stetina, K. Stransky, J. Dobrovska, V. Dobrovska, B. Velicka, L. Klubanov

Theoretical study on the evolution of grain morphology under high shear rate
R.S. Qin, Z. Fan

Thixoform: a special-purpose FE software for thixoforming process simulations
A. Wahlen, L. Tong

Mechanical behaviour of metallic alloys in semi-solid state: mathematical modelling by an upscaling technique
C. Geindreau, J.L. Auriault

Experimental investigation of the stability of particulate dispersoid suspensions in aluminium and magnesium melts
V. Kevorkijian

The experiment on multi stage compression for liquid segregation control of semi-solid material and its data base construction
K.D. Jung, C.G. Kang
