Consolidation of Technical Advances in the Protective & Marine Coatings Industry

The Proceedings of the PCE 2001 Conference and Exhibition

Antwerp, Belgium
27-29 March, 2001
Table of Contents

PLENARY SESSION —
PROTECTIVE & MARINE COATINGS ON THE WORLD WIDE WEB

E-Commerce and its Impact on the High Performance Coatings Industry.................................1
Linda E. Marquez, Sigma Coatings, The Netherlands

Anti-Corrosion Net — Computers Against Corrosion.................................................................13
Tim Davison, Alocit, UK

PROTECTING INFRASTRUCTURE

Session I-1: Coating Work in Plants

Repainting of a Hydroelectric Power Plant in Sweden...............................................................23
Roger Carlson, Vattenfall Kraft & Industriservice and
Märit Forssander, Swedish Corrosion Institute, Sweden

Corrosion Protection of Steel in Norway's Hydro Power Plants..................................................29
Arild Rinvoll, CORROSION CONSULTING As, Corcon, Norway

Ultra-High Pressure Surface Preparation at a Sewage Plant......................................................41
Sabine Wiandt and Andreas Fellman, falch gmbh, Germany

A New Technology for Environmentally Friendly .................................................................45
UV-Resistant Water-borne Anti-Corrosion Paints
F. Decocq, M. Slinckx and Dr. C. Nootens,
Resolution Research Belgium S.A., Belgium

Session I-2: Coating Technologies for Protecting Infrastructure

Development of Coatings for Modern Railway Infrastructure .....................................................55
Dr. Bill Allen, W & J Leigh + Co., UK

Overcoating Lead-Based Paint: Outstanding Issues.................................................................71
Amy Forsgren, Swedish Corrosion Institute, Sweden

New Flexibilized, Highly Crosslinked 100% Solids Epoxy Linings .............................................77
for Industrial and Marine Applications
Raymond J. Jaworowski and A. Wesley Langeland, Duromar Inc.;
and Bruce N. Woodruff, Florida Power Corporation, USA

Developments in SRET for Coating Performance Evaluation.....................................................89
J. Christopher O'Shea, PhD, B.Eng., DIS, ARSM, UK
Session I-3: Protecting Bridges, Highways, and Railways

Corrosion Protection of Metal Engineering Structures in Flanders.................................109
Ir. Edmond Baillien, Ministry of the Flemish Region, Belgium

Some Aspects of Anticorrosion Protection of Steel Bridges .............................................113
Agnieszka Królikowska, Road and Bridge Research Institute, Poland

The Quality Assurance System of Finnish Steel Bridges....................................................119
Eva Häkkä-Rönnholm, VTT Building Technology, Finland

Developments in the Design and Use of Coating Thickness Gauges...............................129
J F Fletcher, Elcometer Instruments Ltd, UK

PROTECTING CHEMICAL AND PETROCHEMICAL PLANTS

Session C-1: The Importance and Methods for Quality Painting Programs in Chemical and
Petrochemical Plants

Why Painting? .....................................................................................................................139
R. Haegeman, Coatings Research Institute - CoRI, Belgium

Advances in Quality and Efficiency Arising from Changes in New Paint Specifications
Massimo Cornago, ENI S.p.A. — Agip Division, Italy

Quality and New Products .................................................................................................155
Jean-Charles Maxes, Bouygues Offshore, France

Accelerated Testing: Correlation Between Four Accelerated Tests and Five Years Offshore Field Test
Ole O. Knudsen, Unni Steinsmo, Marit Bjordal and Sarbijoyt Nijjer,
SINTEF Materials Technology, Norway

How to Maximise our Coatings Businesses of Steel .........................................................167
Protection Against Corrosion
P. Cherfils, OHGPI, Office d'Homologation des Garanties de Peintures Industrielles, France
Session C-2: Developments in Coating Systems for Use in the Chemical & Petrochemical Industry

Coating Technologies Born in the Sixties Behind the Millenium
Dr. Ahmad Ismail Jomha, Saudi Industrial Paint Company Ltd., Saudi Arabia; Jorn Suhr, AB Jorn Surh Consultants Surface Protection, Sweden; and Bjorn Enocson, Ex. Senior Corrosion Engineer, Sweden

Heat Resistant Epoxy Coatings for Severe Corrosion Protection in the Chemical and Petrochemical Industry
Thorsten Landau and Dr. Thomas Burkhart, SGL Acotec GmbH, Germany

Inorganic Hybrid Coatings — Their Position, Importance, and Future
Mike Mitchell & Adrian Andrews, Akzo Nobel International Protective Coatings, UK

Session M-1: Coatings Work on Ships and in Shipyards

GOYA: Teleoperated System for Blasting Applied to Ships Maintenance
J.P. Molina and J.A. Carrión, Construcciones Navales IZAR; and F.J. Ortiz, A. Iborra, B. Álvarez, and J.M. Fernández, Universidad Politécnica de Cartagena, Spain

The Quality of Protecting Coatings on Newbuilding Projects from Shipyards in Europe and the Far East
Stig Magnus Bjørsvik, Jo Tankers, Norway

How New (μ) Technology Allows Shipyards and Their Subcontractors to Meet Safety, Health, Environmental, and Surface Quality Standards for Responsible Owners at Competitive Prices
Peter L. Madonna, Muhlhan Surface Protection International GmbH, Germany

Dehumidification While Repairing Tanks in Service — Why
Charles H. Wyatt, Enviro-Air Control Corporation; and Johnny Eliasson, Stolt-Nielsen Transportation Group Ltd., USA

Session M-2: Marine Coatings Technology

Corrosion Prevention of Water Ballast Tanks
Helge Vold, Det Norske Veritas (DNV), Norway

Differentiating Between Ballast Tank Coatings — A Technical and Economic Review
Drs Jane Lomas and Les Callow, Amtec Consultants Ltd.; and Trevor Parry, STS Ltd., UK
Foul Release Systems and Drag ................................................................. 273
  M. Candries and M. Atlar, University of Newcastle-upon-Tyne;
  and C.D. Anderson, International Coatings, UK

Development of a Remote Monitoring System for the .......................... 287
Evaluation and Documentation of Ballast Tank Coatings
Integrity for U.S. Navy Hulls
  K.E. Lucas, E.D. Thomas, P.F. Slebodnick, E.A. Hogan,
  E.J. Lemieux, and A.I. Kaznoff, Naval Research Laboratory, USA

Session M-3: Making Antifoulants Environmentally Safe and Compliant

Antifouling Through the Ages ................................................................. 303
  Len Townsend, Coating Consultants Ltd., UK

Antifouling Coatings for Reduction of Copper Emissions ....................... 323
  Dr. Alexis I. Kaznoff, Mark W. Ingle, P.E., and Joseph G. Grovhoug, U.S.
  Department of the Navy, USA

Experience with TBT-Free Antifouling Paint ....................................... 343
  Christer Nygren, Wallenius Lines, Sweden

Catemines as New Non-Toxic Additives in Marine Paint Formulations ......... 355
  Mia Dahlström Dept. of Cell and Molecular Biology, Göteborg University;
  Lena Mårtensson, Dept. of Zoology and Zoophysiology, Göteborg University; Per
  Jonsson, Dept. of Marine Ecology, Tjärnö Marine Biological Laboratory; Krister
  Holmberg, Dept. of Surface Chemistry, Chalmers University of Technology; and
  Hans Elwing, Dept. of Cell and Molecular Biology, Göteborg University, Sweden
