Proceedings of the
Third International Symposium on Highway Capacity

Volume 1

Rikke Rysgaard
Editor

Road Directorate
Ministry of Transport - Denmark

TRB
Transportation Research Board
## CONTENTS

### VOLUME 1

**Preface**  
5

**Foreword**  
6

**Contents**  
7

**Signal Coordination and Arterial Capacity in Oversaturated Conditions**  
Ghassan Abu-Lebdeh and Rahim F. Benekohal  
15

**A Comparison of Three Delay Models for Signalized Controlled Intersections**  
Rahmi Akcelik, Bente Christensen and Edward Chung  
35

**Level of Service Considerations in Connection with Capacity Adjustment by ITS Systems**  
Claus Lund Andersen and Peder Jensen  
57

**Simulation of Traffic Flow on a Special Lane for Intelligent Vehicles**  
Bart van Arem, Alexander de Vos and Henk Schuurman  
71

**Delay-Based Truck Equivalencies at Signalized Intersections: Results and Field Data**  
Rahim Benekohal and Weixiong Zhao  
85

**Generalized Uniform Delay Models for Signalized Intersections for Excellent and Poor Progression**  
Rahim F. Benekohal and Yoassry M. El-Zohairy  
101

**2+1 Roads with Cable Barrier for Improved Traffic Safety**  
Torsten Bergh  
123

---

Third International Symposium on Highway Capacity  
7
Heavy Vehicle Traffic in the Design Hour
Christo Bester and Wayne Duff-Riddell

Capacity and Level of Service Analysis of Freeway Systems
Loren Bloomberg, Stephen Cohen, Brian Eads, Fred Hall, Adolf D. May,
Ajay Rathi, Nagui Rouphail and Thomas Urbanik.

Effect of Road Lighting on Capacity of Freeways
Hein Botma, Cees D. van Goeverden and Piet H.L. Bovy

Capacity and Speed-Flow Relationships on Rural Two-Lane Highways
in Germany
Werner Brilon and Frank Weiser

Arterial Delays Caused by Unsignalized Minor Streams
Henry Brown and Andrzej Tarko

Functioning and Operation of Bus Terminals - A Virtual Reality
Simulation Study
Arto Brummer, Matti Pursula and Jyrki Brotherus

Traffic Performance and Passenger Car Equivalents for Road Links and
Township Roads in the PRC
Karl-L Bång, Zhou Ronggui and Xing Huichen

Capacity Maximization at Three-Arm Junctions: An Extension of
Webster's Method
Giulio Erberto Cantarella

A Macro Speed-Flow Model for Multi-lane Roads
Arne Carlsson and Hans-Åke Cedersund

Optimisation of Traffic Signal Timings for User Equilibrium Flow
Suh-Wen Chiou
Effect of Narrow Lanes on the Capacity of Motorways: A Trial in the Paris Region
Simon Cohen

Development of Transit Capacity and Quality of Service Manual
Alan Danaher and Paul Ryus

Capacity Improvements at Signalised Intersections Using Advanced UTC
Fredrik Davidsson and Ilkka Kosonen

Contribution to Level of Service Definition of Highways and Intersections
Tihomir Djordjevic, Ljubisa Kuzovic and Vladan Tubic

Capacity and Traffic Flow Characteristics at a Freeway Work Zone in Finland
Åsa Enberg and Mohammed Shafiqul Mannan

Fatalities of Heterogeneous Traffic in Large South Asian Cities
Joseph Fazio, MD. Mazharul Hoque and Geetam Tiwari

Capacity Models for American Roundabouts
Aimee Flannery and Lily Elefteriadou

Research on Capacity and Traffic Conditions at Unsignalized Urban Intersections
Stanislaw Gaca, Janusz Chodur and Stanislaw Gondek

Estimation of Critical Gaps in Two Major Streams
Ola Hagring

A Review and Evaluation of Aspects of the Operation of Rural Single Carriageway Roads in Great Britain
John Hunt and Othman Che Puan
Estimation of Fundamental Flow Relationships Using Stationary and Homogeneous Observations
Satu Innamaa and Matti Pursula

Microscopic Simulation of Freeway Traffic - Problems in Widening the Use of Simulation Program
Satu Innamaa and Matti Pursula

Investigating the Applicability of Commonly Used Saturation Flow Models for Brazilian Cities: A Case Study
Maria Alice P. Jacques, Raphael M. M. Gualberto and André P. da Nobrega

On the Speed-Flow Relationships in Road Traffic: A Model of Driver Behaviour
Michael Jepsen
