Proceedings of the
Third International Symposium on Highway Capacity

Volume 2

Rikke Rysgaard
Editor
Research on the Capacity of Small Roundabouts in the Czech Republic
Petr Jirava

Utility Analysis of the HCM Method from 1994 for the Bus Berths
Capacity Calculations
Jadranka Jovic and Maja Popovic

Pedestrians' and Cyclists' Effect on Capacity of the Right-turn Movement at Signalized Intersections: An Empirical Pilot Study
Niels O. Jørgensen, Pierre Aagaard, Rikke Rysgaard and Henning Sørensen

A Theory of Congested Traffic Flow
Boris S. Kerner

Prediction of Gap Acceptance Behaviour at Traffic Circles - Recent Findings
Christoff Krogscheepers and Christopher Roebuck

Ljubisa Kuzovic, Tihomir Djordjevic and Vladan Tubic

Characteristics of New Models for Capacity Analysis of Two-Way Stop-Controlled (TWSC) Intersections
Michael Kyte and Zongzhong Tian

Effects of Bus Stops on the Efficiency of City Streets
Uwe Köhler

Intersection Delay Measurement using Video Detection Systems
B. Kent Lall, Stanislaw Berka, Ali G. Eghtedari and Julia Fowler
Performance Measures and Level of Service Beyond the HCM2000
Adolf D. May

Instrumented Vehicle Studies of Traffic Flow Models
Michael McDonald, Mark Brackstone, and Beshr Sultan

Impact of Passing Lanes on the Quality of Service on Two-Lane Highways
John Morrall

Background Paper on Road Safety Situation in Uganda
Erie Nat Okello

Safety Considerations in Capacity Analysis
Bhagwant Persaud and Thu Nguyen

Delay and Queue Length for Congested Arterials
Nagui Routhail and Daniel B. Fambro

Pedestrian and Bicycle Impacts on Signalized Intersection Operation: The U.S. Experience
Nagui Routhail, Joseph E. Hummer and Reuben Goldblatt

Merging Contra Give Way When Entering a Motorway
Rikke Rysgaard and Michael Aakjer Nielsen

Modifications to the Transit Provision in the HCM2000
Paul Ryus and Alan Danaher

Estimation of Truck Equivalents for Upgrades on Two-Lane Rural Roads in Brazil
José Reynaldo A. Setti and Eloy F. Machado Neto
Evaluation of Weaving on Freeways with Sub-standard Geometric Characteristics
Hein Stander and Colin Tichauer

Saturation Flow Rates at Signalised Intersections in Local Conditions - Case Study of Belgrade
Branimir Stanic and Miroslav Osoba

Developments in Poland on a Method of Traffic Capacity Estimation and Evaluation of Traffic Conditions on Out-of-Town Roads
Tomasz Szczuraszek

Influence of Type Structure of Vehicles on Road Capacity and Traffic Conditions
Tomasz Szczuraszek

Determining Passenger Car Equivalents for Freeways
Henning Sørensen

Estimating Meeting and Overtaking Rates on Low Volume Roads
Dannford Taneka and Rod Troutbeck

Effect of Traffic Metering, Splitting, and Merging on Control Delays in Signalized Networks
Andrzej Tarko and Gopalakrishnan Rajaraman

Relationships Between Traffic Operations and Safety at Signalized Intersections
Darren Torbic, John Borkowski, Lily Elefteriadou and John McFadden

Studies of the Relationships Between Level of Noise and Level of Service Measures at At-Grade Intersections
Marian Tracz and Janusz Bofatkiewicz
New Dutch Capacity Standards for Freeway Weaving Sections Based on Micro Simulation
Raymond Vermijs

Research Issues Modeling Pedestrian Travel Time
Mark R. Virkler

Effect of Highway Geometry on Freeway Queuing at Merge Sections
Dirk Westland

Estimation of Queue Lengths and Their Percentiles at Signalized Intersections
Ning Wu

Impedance Effects for Streams of Higher Ranks at Unsignalised Intersections
Ning Wu

Contact addresses
