HVDC II *(paper)*

Sponsored by: Transmission and Distribution Committee
Chair: R. Adapa, EPRI

Papers and Authors
A Co-ordinated Recovery Strategy of Multi-Infeed HVDC Systems .......................................................... 956
W. Yang, Z. Xu, Z. Han, Zhejiang University
Control of Capacitor Commutated Converters in Long Cable HVDC-Transmission .......................................... 962
M. Meisingset, A. Gole, University of Manitoba
A New Approach to the Capacitor-Commutated Converter for HVDC - A Combined
Commutation-Capacitor of Active and Passive Capacitors ............................................................................. 968
T. Tanaka, M. Nakazato, S. Funabiki, Shimane University

VOLUME III

Sessions with Multiple or Miscellaneous Tracks

Computation and Control Aspects of Distributed Renewable Technologies *(paper)*

Sponsored by: Energy Development and Power Generation Committee
Chair: W. Jewell, Wichita State University

Papers and Authors
Using Neural Networks to Estimate Wind Turbine Power Generation, *(PE-009EC (10-2000)* ......................... 977
S. Li, D. Wunsch, E. O’Hair, M. Glesselmann, Texas Technical University
Steady State Performance of a Grid Connected Rooftop Hybrid Wind-Photovoltaic Power System with
Battery Storage *(PE-078EC (07-2000)* ........................................................................................................... 978
F. Giraud, Z. Salameh, University of Massachusetts
Performance Implications of Rapid Load Changes in Carbonate Fuel Cell Systems ............................................. 979
Random Fluctuations on Dynamic Stability of a Grid-Connected Photovoltaic Array ......................................... 985
L. Wang, Y. Lin, National Cheng Kung University

Power System Stability Control Meeting with Imbedded Paper Session *(Combination)*

Sponsored by: Power System Dynamic Performance Committee
Chair: C. Taylor, BPA

Papers and Authors
Time Dependence of Controls to Avoid Voltage Collapse *(PE-006PRS (08-2000)* ................................. 990
L. Vargas, Universidad de Chile; C. Canizares, University of Waterloo
A Corrective Control for Angle and Voltage Stability Enhancement on the Transient Time-Scale
*(PE-002PRS (06-2000)* .................................................................................................................................. 991
E. De Tuglie, M. Dicorato, M. La Scala, Politecnico Di Bari, P. Scarpellini, ENEL-SPA
The Use of Relative Gain Array for Optimal Placement of PSSs ................................................................. 992
J. Milanovic, A. Duque, UMIST
Experimental Evaluation on Fuzzy Logic Switching Control of Electrical Double-Layer Energy Capacitor
System for Stability Enhancement .................................................................................................................... 997
T. Hiyama, D. Ueno, Kumamoto University; S. Yamashiro, Kitami Institute of Technology;
Harmonics II (paper)

Sponsored by: Transmission and Distribution Committee
Chair: A. Imece, Power Serv, LLC

Papers and Authors
Failure Analysis of Dielectric of Low Voltage Power Capacitors Due to Related Harmonic Resonance Effects ................................................................. 1003
C. Boonseng, C. Chompoo-inwai, V. Kinnarees, King Mongkut's Institute of Technology Ladkrabang; K. Nakawiwat and P. Apiratikul, Rajarmmgala Institute of Technology
Analysis of Harmonic for 12-Pulse Converter under Unbalance Voltage Operation Due to Lightning Related Voltage Sags and Short Interruption ................................................................. 1009
C. Boonseng, V. Kinnarees, King Mongkut's Institute of Technology Ladkrabang
An Object-Oriented Approach to Analyse the Capability of Industrial Electrical Components in Presence of Harmonics ............................................................................ 1015
G. Carpinelli, A. La Vitola, Universita Degli Studi Di Cassino, A. Russo, P. Verde, University of Cassino

Distribution Analysis II (paper)

Sponsored by: Transmission and Distribution Committee
Chair: D. Durbak, Power Technologies, Inc.

Papers and Authors
The Control and Analysis of Zero Sequence Components in DVR System ................................................................. 1021
I. Chung, S. Park, S. Moon, Seoul National University; S. Hur, LGIS Co. Ltd.
Structures and Control of a Dynamic Voltage Regulator (DVR) .............................................................................. 1027
A. Ghosh, Indian Institute of Technology, G. Ledwich, Queensland University of Technology
Software Phase-Locked Loop Applied to Dynamic Voltage Restorer (DVR) ................................................................. 1033
C. Zhan, C. Fitzer, V. Ramachandaramurthy, A. Arulampalam, M. Barnes, N. Jenkins, UMIST
Universal Custom Power Conditioner (UCPC) with Integrated Control Method ................................................................. 1039
C. Zhan, V. Ramachandaramurthy, A. Arulampalam, C. Fitzer, M. Barnes, N. Jenkins, UMIST
Novel Voltage Space Vector PWM Algorithm of 3-Phase 4-Wire Power Conditioner ................................................................. 1045
C. Zhan, A. Arulampalam, V. Ramachandaramurthy, C. Fitzer, M. Barnes, N. Jenkins, UMIST

Power System Stability Subcommittee and Power System Dynamic Modeling Subcommittee (with Imbedded Technical Presentations) (Combination)

Sponsored by: Power System Dynamic Performance Committee
Co-Chair: J. Paserba, Mitsubishi Electric; W. Price, GE Power Systems

Presentations and Panelists
Recommended Modeling of Power System Governing Response .............................................................................. 1051
Integral Square Generator Angle Index for Stability Assessment .............................................................................. 1052
S. Rovnyak, Louisiana Tech University
System Operating Economics Issues (paper)

Sponsored by: Power System Operations Committee
Chair: M. El-Hawary, ABB

Papers and Authors
Rule Based Economic Dispatch for Planning of Thermal Units Operation ........................................... 1055  
T. Hiyama, S. Koga, Kumamoto University
A Multi-Criteria Optimization of Ancillary Services in a Competitive Energy Market .................. 1061  
A. Schmitt, J. Verstege, University of Wuppertal
Embedding the Priority List into Tabu Search for Unit Commitment ............................................. 1067  
H. Mori, O. Matsuzaki, Meiji University

HVDC1 (paper)

Sponsored by: Transmission and Distribution Committee
Chair: J. Reeve, John Reeve Consultants

Papers and Authors
Islanded System Mode Test of Kii-Channel HVDC Link and Tachibana-Bay Unit #1 ......................... 1073  
Y. Shimura, Electric Power Development Company; S. Hara, The Kansai Electric Power Co., Inc.;  
N. Uehara, Shikoku Electric Power Co., Inc.
Simultaneous Inter-Area Decoupling and Local Area Damping by Voltage-Source HVDC .................. 1079  
W. Lu, B. Ooi, McGill University
Steady-State Model for VSC Based HVDC and Its Controller Design ............................................. 1085  
G. Zhang, Z. Xu, Zhejiang University
Multi-Terminal DC Transmission System for Wind-Farms .............................................................. 1091  
W. Lu, B. Ooi, McGill University

FACTS (paper)

Sponsored by: Transmission and Distribution Committee
Chair: K. Clark, General Electric

Papers and Authors
Harmonic Resonance Phenomena in STATCOM and Relationship to Parameters Selection of Passive  
Components, (PE-074PRD (05-2000) ................................................................. 1097  
S. Dong, W. Zhonghong, Tsinghua University; J. Chen, Y. Song, Brunel University
Static Synchronous Compensator Using Thyristor PWM Current Source Inverter,  
(PE-076PRD (05-2000) ................................................................. 1098  
B. Han, Myongji University, S. Moon, J. Park, Seoul National University, G. Karady,  
Arizona State University
State Space Simulation and Accurate Determination of Fundamental Impedance  
Characteristics of a TCSC .................................................................................. 1099  
A. Ghosh, A. Joshi, M. Mishra, Indian Institute of Technology
Per Unit Model of UPFC and Its Optimal Control ........................................................................... 1105  
W. Shao, Z. Xu, Zhejiang University
The VELCO STATCOM-Based Transmission System Project ...................................................... 1109  
G. Reed, J. Paserba, T. Croasdaile, Mitsubishi Electric Power Products; M. Takeda, Y. Hamasaki,  
Robust Control of SSSC to Improve Torsional Damping ................................................................. 1115  
G. Pillai, A. Ghosh, A. Joshi, Indian Institute of Technology
Lightning and Insulators  (paper)

Sponsored by:  Transmission and Distribution Committee
Chair:  W. Chisholm, Ontario Power Technologies

Papers and Authors
  T. Wakai, N. Itamoto, T. Sakai, Hokuriku Electric Power. M. Ishii, University of Tokyo
Series Graded Gapped Arrester Provides Reliable Overvoltage Protection in Distribution Systems ..........1122
  G. Goedde, L. Kojovic, M. Marz, J. Woodworth, Cooper Power Systems
Novel Method for Analyzing the Transient Behavior of Grounding Systems based on the Finite-Difference
  Time-Domain Method ..................................................................................................................1128
  K. Tanabe, Central Research Institute of Electric Power Industry
Statistical Evaluation of Lightning Overvoltages on Overhead Distribution Lines using Neural Networks....1133
  J. Martinez, F. Gonzalez-Molina, Universitat Politècnica De Catalunya
An Artificial Contamination Method for Composite Insulators (PE-105PRD (09-1999) .........................1139
  G. Besztercey, G. Karady , Arizona State University
Testing, Modeling and Simulation of the Long Arc in Still Air ....................................................1140
  T. Terzija, H. Koglin, Saarland University

Aspects of Power System Stability  (paper)

Sponsored by:  Power System Dynamic Performance Committee
Chair:  M. Patel, Allegheny Power

Papers and Authors
Voltage Stability Analysis: V-Q Power Flow Simulation versus Dynamic Simulation,  
  (PE-098PRS (06-2000 .................................................................1146
  B. Chowdury, University of Missouri-Rolla. C. Taylor, Bonneville Power Administration
The Brazilian Interconnected System: A Study on Transfer Limits, Reactive Compensation and
  Voltage Collapse .........................................................................................................................1147
Simultaneous Partial Pole Placement for Power System Oscillation Damping Control ..................1154
  J. Ferraz, CEPEL, COPPE/UFRJ; N. Martins, CEPEL, G. Taranto, COPPE/UFRJ
Damping Algorithm based on Phasor Estimation ............................................................................1160
  L. Angquist, ABB Power Systems AB, C. Gama, ONS
Internet Based Power System Frequency Monitoring Network (FNET) ........................................1166
  B. Qiu, L. Chen, V. Centeno, X. Dong, Y. Liu, Virginia Tech
Estimation of Electro-Mechanical Mode Parameters using Frequency Measurements ..................1172
  M. Hemmingsson, O. Samuelsson, Lund Institute of Technology; K. Pedersen, A. Nielsen,
  Technical University of Denmark

Poster Sessions

Energy Development and Power Generation (poster)

Sponsored by:  Energy Development and Power Generation Committee
Chair:  D. Sawyer, Ontario Power

Papers and Authors
Multi-Generation Enhanced Power Quality Design for Semiconductor Manufacturing Facilities ..........1181
  D. Walsh, P. LeGoy, Industrial Design Corporation
Estimation of Generator Excitation-System Parameters by Tabu Search ........................................1185
  X. Yao, G. Karaday, R. Farmer, Arizona State Univeristy; B. Agrawal, Arizona Public Service
A Free Model Based Power System Stabilization.................................................................1191
  H. Kim, Cheju National University, K. Lee, H. Ko, Pennsylvania State University, J. Lee, Y. Park,
  Seoul National University

Design of a Robust UPFC Controller for Enhancing the Small Signal Stability in the
Multi-Machine Power Systems.........................................................................................1197
  J. Seo, S. Moon, LG Industrial Systems Co.; J. Park, J. Choe, Seoul National University

Application of Genetic Algorithm in Extraction of Fuzzy Rules for a Boiler System Identifier........1203
  H. Ghezelayagh, K. Lee, Pennsylvania State University

Overall Control of Fossil-Fuel Power Plants. R. Garduno-Ramirez........................................1209
  R. Garduno-Ramirez, Electrical Research Institute; K. Lee, Pennsylvania State University

Transmission Pricing and Congestion (poster)
Sponsored by: Power System Analysis, Computing and Economics Committee
Chair: R. Baldick, The University of Texas at Austin

Papers and Authors
Allocation of Transmission Loss Cost using Cooperative Game Theory in the Context of Open
Transmission Access.....................................................................................................1215
  X. Tan, T. Lie, Nanyang Technological University

Allocation of Tie-Line Costs in Power Exchange Scheduling Using a Multi-Agent Approach........1220
  P. Wei, The University of Hong Kong; Y. Yan, Depaul University; Y. Ni, The University of Hong Kong;
  J. Yen, Chinese University of Hong Kong; F. Wu, The University of Hong Kong

Modified Distributed Slack Bus Load Flow Algorithm for Determining Economic Dispatch in
Deregulated Power Systems.........................................................................................1226
  P. Yan, Tennessee Technological University

Consideration of the Reliability Benefits in Pricing Transmission Services ..................................1232
  H. Kim, C. Singh, Texas A&M University

A Quick & Practicable Power Flow Tracing Method on Electric Energy Market Part I:
Theoretic Fundament.....................................................................................................1238
  F. Liu, Y. Li, G. Tang, Southeast University, China

A Quick & Practicable Power Flow Tracing Method on Electric Energy Market Part II:
A New Practicable Method..........................................................................................1244
  F. Liu, Y. Li, G. Tang, Southeast University, China

Transmission Pricing Using Improved Sensitivity Indices..................................................1250
  S. Phicaisawat, Y. Song, Brunel University

Kirchhoff Vs. Competitive Electricity Markets: A Few Examples............................................1256
  C. Murillo-Sánchez, R. Zimmerman, R. Thomas, Cornell University

Congestion Management for Generation Scheduling in a Deregulated Chinese Power System ........1262
  J. Lei, Y. Deng, Tsinghua University; R. Zhang, Y. Wu, Electric Power Bureau of
  Liaoning Province, China

Network Congestion Assessment for Short-Term Transmission Planning Under
Deregulated Environment..............................................................................................1266
  K. Lee, S. Manuspiya, Pennsylvania State University; M. Choi, Myongji University;
  M. Shin, Sungkyunkwan University
PSDP Session  (poster)

Sponsored by:  Power System Dynamic Performance Committee
Chair:  B. Chowdhury, University of Missouri - Rolla

Papers and Authors
Computation of Turbine-Generator Subsynchronous Torsional Modes from Measured Data using the Eigensystem Realization Algorithm ................................................................. 1272
J. Sanchez-Gasca, GE Power Systems Energy Consulting
Consideration of Dc Capacitor and Line Inductance in the Design of UPFC to Improve Transient Stability ................................................................. 1277
Y. Kang, G. Shrestha, T. Lie, Nanyang Technological University
Design of a Robust SSSC Supplementary Controller to Suppress the SSR in the Series-Compensated System ................................................................. 1283
J. Seo, LG Industrial Systems Co.; S. Moon, J. Park, Seoul National University;
J. Choe, LG Industrial Systems Co.
Fuzzy Logic Based Extended Integral Control for Load Frequency Control ................................................................. 1289
Y. Moon, H. Ryu, B. Kim, Yonsei University; S. Kim, KERI; S. Park, ROK Naval Academy
Adaptive Neural Network Identifiers for Effective Control of Turbogenerators in A Multimachine Power System ................................................................. 1294
G. Venayagamoorthy, ML Sultan Technikon; R. Harley, Georgia Institute of Technology;
D. Wunsch, University of Missouri-Rolla
Quasi-Steady State Analysis by Using Continuation Method ................................................................. 1300
Q. Wang, V. Aljarapu, Iowa State University
Modal Analysis Applied to s-Domain Models of AC Networks ................................................................. 1305
S. Gomes, CEPEL, COPPE/UFRJ; N. Martins, CEPEL; C. Porteloa, COPPE/UFRJ
The Steady State Characteristics of an SSSC Integrated with Energy Storage ................................................................. 1311
L. Zhang, M. Crow, Z. Yang, C. Shen, University of Missouri-Rolla
New Initialization Method for Controls in Transient Analysis ................................................................. 1317
P. Lacasse, IREQ/Hydro-Quebec; L. Gerin-Lajoie, D. McNabb, TransEnergie/Hydro-Quebec;
P. Lagace, ETS; J. Mahseredjian, IREQ/Hydro-Quebec
Nonlinear Disturbance Attenuation Control for STATCOM ................................................................. 1323
Q. Lu, F. Liu, S. Mei, Tsinghua University; M. Goto, Hitachi LTD Power & Industrial Systems
Proposal of Remote Signal Input PSS for Improving Power Transfer Capability Considering Damping
and Synchronizing Torque ................................................................. 1329
K. Yoshimura, N. Uchida, CRIEPI

PSOC Session  (poster)

Sponsored by:  Power System Operations Committee
Chair:  A. Bose, ABB

Papers and Authors
An Efficient Graph Partition Method for Fault Section Estimation in Large-Scale Power Network ................. 1335
T. Bi, Y. Ni, C. Shen, F. Wu, The University of Hong Kong
Ancillary Services - Reactive and Voltage Control ................................................................................. 1341
N. Trehan, U.S. Nuclear Regulatory Commission
Fast On-Line Voltage Security Monitoring Using Synchronized Phasor Measurements and Decision Trees ................................................................................. 1347
R. Nuqui, A. Phadke, Virginia Tech.; R. Schultz, N. Bhatt, American Electric Power Service Corporation
A Technical Review of the Power Outage on July 29, 1999 in Taiwan ................................................................. 1353
C. Lee, S. Hsieh, I-Shou University
A Multi-Agent System for Power System Restoration ................................................................. 1359
T. Nagata, Hiroshima Institute of Technology; H. Sasaki, Hiroshima University

xxx
EMC Session (Poster)

Sponsored by: Electric Machinery Committee
Chair: G. Klempner, Ontario Power Generation Inc.

Papers and Authors

Derating of Induction Motors Operating with a Combination of Unbalanced Voltages and Over- or Undervoltages .......................................................... P. Pillay, Clarkson University, P. Hofmann, Con Ed of New York

Flux Weakening Operation of Switched Reluctance Motors ........................................... T. Humiston, P. Pillay, Clarkson University

Equivalent Circuit of Single Phase Permanent Magnet Synchronous Motor ................................ B. Chaudhari, B. Fernandes, IIT

Near Unity Input Displacement Factor for Voltage Source PWM Drives ................................... A. Maswood, S. Wei, Z. Jianquo, Nanyang Technological University

Dynamic Eigenvalue Analysis of a Self-Excited Induction Generator Feeding an Induction Motor .......................................................... S. Kuo, L. Wang, National Cheng Kung University

Performance Analyses of a Three-Phase Induction Generator Connected to a Utility Grid ................. C. Tsao, L. Wang, National Cheng Kung University

Excitation Capacitance Required for an Isolated Three-Phase Induction Generator under Single-Phasing Mode of Operation .................................................. C. Cheng, L. Wang, National Cheng Kung University

Additional Losses in Massive Copper Conductor Due to Eddy-Currents .................................. G. Pavkov, Electrodistribution Company of Novi Sad; S. Milovancev, University of Novi Sad

Global Speed Control of Separately Excited DC Motor ................................................... J. Zhou, Y. Wang, R. Zhou, Nanyang Technological University

Fast Periodic Steady State Solution of a Synchronous Machine Model in Phase Coordinates Incorporating the Effects of Magnetic Saturation and Hysteresis .................................................. O. Rodriguez, A. Medina, Universidad Michoacana De San Niclaos De Hidalgo

PSACE CAMS Session (poster)

Sponsored by: Power System Analysis, Computing and Economics Committee
Chair: E. Liu, Nexant, Inc.

Papers and Authors

Optimal Real Time Control in Unbalanced Transmission Power Systems ................................... A. Fratkin, Utility Consulting International

Accurate Modeling and Simulation of Transmission Line Transients using Frequency Dependent Modal Transformations .................................................. A. Abur, O. Ozgun, Texas A&M University; F. Magnano, PCA Corporation

Direct Control of Residential Water Heater Loads to Reduce Power System Distribution Losses .......................................................... H. Salehfar, A. Wehbe, University of North Dakota
Distribution Expansion Problem: Formulation and Practicality for a Multistage
Globally Optimal Solution .......................................................... 1461
M. Vaziri, K. Tomsovic, A. Bose, Washington State University; T. Gonen, California State University
Enhancing Power Engineering Education through the Use of Power System Simulator .................. 1467
C. Lee, S. Hsu, T. Lin, M. Kang, G. Huang, I-Shou University
Applicability of Multi-Protocol Label Switching Technology to Electric Power Utility Backbone Networks ... 1473
F. Fujikawa, Central Research Institute of Electric Power Industry
Tracing the Path of Electric Power Flow – A Study for Deregulated Power Systems .......................... 1479
Integrated Volt/Var Control in Distribution Systems ........................................................................ 1485
An Aggregation Method for Improving Lagrangian Relaxation-Based Auction Implementation
and Generation Scheduling ........................................................................... 1491
E. Ni, P. Luh, University of Connecticut; X. Guan, Xian Jiaotong University
A Software Architectural Style for Deregulated Power Markets......................................................... 1497
Q. Zhao, G. Huang, Texas A&M University; X. Luo, ISO NE, Inc.; X. Wu, Fujitsu Network Communications

System Economics (poster)

Sponsored by: Power System Analysis, Computing and Economics Committee
Chair: R. Baldick, The University of Texas at Austin

Papers and Authors
Multiobjective Optimization Techniques Applied to Modern Power Systems ..................................... 1503
A. Berizzi, C. Bovo, Politecnico Di Milano; M. Innorta, CESI SpA; P. Marannino, Universita Di Pavia
Making Unit Commitment Decisions when Electricity is Traded at Spot Market Prices .................... 1509
J. Valenzuela, Auburn University; M. Mazumdar, University of Pittsburgh
Cost Evaluation for Capacitive Reactive Power under the Deregulation Environment ...................... 1513
Y. Moon, J. Park, C. Jung, Yonsei University; H. Kook, Hyundai Heavy Industries Co., Ltd.;
Forecasting Power Market Clearing Price and Its Discrete PDF using a Bayesian-Based
Classification Method ............................................................................. 1518
E. Ni, P. Luh, The University of Connecticut
Sequential Timestep Commitment .................................................................................. 1524
T. Larsen, Norwegian University of Science and Technology; I. Wangensteen, SINTEF Energy Research;
T. Gjengedal, Statkraft SF
Fuel-Dependent Pricing of IPP's Electricity under Limitation of CO2 Emission in
Electric Power Industry of Japan ............................................................................. 1530
T. Kato, D. Hamada, Y. Yokomizu, T. Okamoto, Y. Suzuki, Nagoya University
Analysis on the Energy Pricing Strategy with CO2 and Its Effect on Mitigation of CO2 Emission
in Total Energy Systems ............................................................................... 1536
H. Aki, T. Oyama, Yokohama National University; K. Tsuji, Osaka University
