# TABLE OF CONTENTS

**TUTORIALS:**

**TUTORIAL I: IS HIGH FREQUENCY AC A VIABLE ALTERNATIVE?**
Robert Watson

| T.1.1 | "High-Frequency AC Distributed Power Systems, Part I: Conceptual Overview and Topology Considerations," Robert Watson and Fred C. Lee | 1 |
| T.1.3 | "High-Frequency AC Distributed Power Systems, Part III: DC and AC Distributed Power System Comparison," Robert Watson and Fred Lee | 27 |

**TUTORIAL II: MAGNETIC DEVICE MEASUREMENT AND SIMULATION ISSUES**
Glenn Skutt

| T.2.1 | "Characterization of Dimensional Effects Ferrite-Core Magnetic Devices," Glenn R. Skutt and Fred C. Lee | 35 |
| T.2.2 | "Finite Element Method for Ferrite Coreloss Calculation," Ping Han, Glenn Skutt, Ju Zhang, and Fred C. Lee | 41 |

**TUTORIAL III: SINGLE-STAGE POWER FACTOR CORRECTION TECHNIQUES**
Jindong Zhang

| T.3.1 | "General Studies on Single-Stage Power-Factor-Correction Techniques," Jindong Zhang, Alex Uan-Zo-li, Fred C. Lee, and Milan M. Jovanović | 47 |
| T.3.2 | "Single-Stage Input-Current-Shaping Technique with Voltage-Doubler-Rectifier Front End," Jindong Zhang, Laszlo Huber, Milan M. Jovanović, and Fred C. Lee | 54 |

**INVITED PAPERS:**

**SESSION I:**

| I.2 | "Electric Drives Technology-Part Way to Where?," Thomas A. Lipo, University of Wisconsin at Madison | 71 |
SESSION II:

1.4 "Packaged Electronics," E. Rymaszewski, Rensselaer Polytechnic Institute

1.5 "Recent Advances in High-Voltage SiC Power Devices," T. P. Chow, N. Ramungul, and M. Ghezzo, Rensselaer Polytechnic Institute

1.6 "An Interior PM Starter/Alternator for Automotive Applications," E. C. Lovelace, T. M. Jahns, J. L. Kirtley Jr., and J. H. Lang, University of Wisconsin at Madison

TECHNICAL SESSIONS:

SESSION 1: DC/DC CONVERTERS

1.3 "An Equivalent Circuit Model of Radial Vibration Mode Piezoelectric Transformers," Ray L. Lin, Pit-Leong Wong, and Fred C. Lee

1.4 "A Zero Voltage and Zero Current Switching Three Level DC/DC Converter," Francisco Canales, Peter M. Barbosa, and Fred C. Lee

SESSION 2: SOFT-SWITCHING TECHNIQUES

2.1 "Efficiency Considerations of Load Side Soft-Switching Inverters for Electric Vehicle Applications," Wei Dong, Jae-Young Choi, Yong Li, Huijie Yu, Jason Lai, Dushan Boroyevich, and Fred C. Lee

2.2 "A Comparative Study of a Family of Zero-Current-Transition (ZCT) Schemes for Three-Phase Inverter Applications," Yong Li and Fred C. Lee

SESSION 3: RECTIFIERS AND POWER FACTOR CORRECTION

3.1 "A Self-oscillating Drive for Single-Stage Charge-Pump Power-Factor-Correction Electronic Ballast," Fengfeng Tao, Fred C. Lee, and Naoki Onishi

3.2 "A Novel Integrated Current Doubler Rectifier," Peng Xu, Qiaoqiao Wu, Pit-Leong Wong, and Fred C. Lee

3.3 "Design Aspects of Paralleled Three-Phase DCM Boost Rectifiers," Peter M. Barbosa, Francisco Canales, and Fred C. Lee
SESSION 4: DEVICES AND PACKAGING

4.1 "Comparison of the State-of-the-art High Power IGBTs, GCTs and ETOs," Kevin Motto, Yuxin Li, and Alex Q. Huang

4.2 "Multilayer Integration Technology for Packaging of IPEM," Zhenxian Liang, Guo-Quan Lu, Dushan Boroyevich, and Fred C. Lee

4.3 "Electrical Modeling of Power Electronic Building Blocks," Kalyan Siddabattula, Zhou Chen, and Dushan Boroyevich

DIALOGUE SESSION:

D-1 "A Novel Control Method for BOOST PFC Converter in CCM Condition," Kaiwei Yao, Jianwen Shao, and Fred C. Lee

D-4 "System Stability Analysis Based On Three-Dimensional Forbidden Region," Yuhui Chen, Xiaogang Feng, and Fred C. Lee

D-6 "Characterization of Piezoelectric Transformers," Ray L. Lin, Fred C. Lee, and Eric Baker

D-7 "Study and Analysis of a High-Frequency Current-Source Single-Stage Power-Factor-Correction Converter," Jindong Zhang, Fred C. Lee, and Milan M. Jovanovic

D-8 "Leading-edge Modulation Voltage-mode Control with Flux Unbalance Correction for Push-pull Converter," Xingsheng Zhou, Dan Chen, and Clifford Jamerson

D-11 "Mixed-Mode EMI Noise and Its Implications for Filter Design in Offline Switching Power Supplies," Song Qu and Dan Y. Chen

D-12 "A Novel Soft-Switching Inverter for Switched Reluctance Motor Drives," Naveen Yadlapalli, Byeong-Mun Song, and Jason Lai

D-13 "Low-Speed Performance Comparison of Model Reference Controller Based Induction Motor Sensorless Control Methods," Rui Zhou and Jih-sheng Lai

D-16 “Evaluation of DC Link Current in Space Vector Modulated Inverters,” Wei Dong, Yong Li, and Fred C. Lee

D-20 “A Soft-Switched Multilevel Converter Using Coupled Inductors For High Voltage Applications,” Byeong-Mun Song and Jason Lai

D-21 “A Novel ZVT Three-Phase Inverter with Coupled Inductors,” Jae-Young Choi, Dushan Boroyevich, and Fred C. Lee

D-22 “A New SVM Strategy and Evaluations of ZVT Three-Phase Inverter on Electric Vehicle Driving Systems,” Jae-Young Choi, Dushan Boroyevich, and Fred C. Lee

D-23 “Experimental Demonstration of the MOS Controlled Diode (MCD),” Zhenxue Xu, Bo Zhang, and Alex Q. Huang

D-24 “The Emitter Turn-Off Thyristor (ETO) Based High Voltage, High Frequency Converter System,” Kevin Motto, Yuxin Li, and Alex Q. Huang

D-25 “Evaluation of a Cool MOS and IGBTs for 30kW (PNGV) Inverter for Hybrid Electric Vehicle Applications,” Xiukuan Jing and Dushan Boroyevich

D-26 “Feasibility of a 1 kW, 100 kHz, Monolithically Integrated Power Electronics Module,” Xuening Li and Alex Q. Huang

D-27 “A Physics-based High Voltage Diode Model for Circuit Simulation,” Yuming Bai and Alex Q. Huang

D-29 “A Thermo-Mechanical Study of Power Modules Using 3D Finite Element Modeling,” Sihua Wen and Guo-Quan Lu

D-30 “Characterization of Interfacial Thermal Resistance by Acoustic Micrography Imaging,” Shatil Haque, Guo-Quan Lu, John Goings, and Joel Sigmund

D-31 “Comparison of Common-Mode EMI for 3D SVM Schemes,” Changrong Liu, Richard Zhang, Jason Lai, Fred C. Lee, and Dan Chen

D-33  "Large Scale Stability Analysis of Power Electronics System Based on IO Stability Theory," Rui Zhou and Changrong Liu

D-35  "The Design and Implementation of a New Integrated Gate Drive Board for Future Generation PEBBs," Ivan Celanovic, Ivana Milosavljevic, and Dushan Boroyevich

D-36  "A Fast Space Vector Modulation Algorithm for Multilevel Three-Phase Converters," Nikola Celanovic and Dushan Boroyevich

D-37  "A Novel Three-Phase Four-Leg Converter with Active Common-Mode Filter Function," Zhihong Ye, Dushan Boroyevich, Kun Xing, Fred C. Lee, and Changrong Liu

D-38  "Control of Circulating Current in Parallel Three-Phase Space-Vector Modulated PWM Boost Rectifiers," Zhihong Ye, Dushan Boroyevich, Jae-Young Choi, and Fred C. Lee

D-39  "Individual Load Impedance Specification for a Stable DC Distributed Power System," Xiaogang Feng, Zhihong Ye, Kun Xing, Fred C. Lee, and Dushan Boroyevich

D-40  "Monitoring the Stability of DC Distributed Power Systems," Xiaogang Feng, Changrong Liu, Zhihong Ye, Fred C. Lee, and Dushan Boroyevich

D-41  "Fault Detection in Distributed Power System Based on Small-signal I/O Property of Modules," Xiaogang Feng, Zhihong Ye, Changrong Liu, Fred C. Lee, and Dushan Boroyevich

D-43  "A Novel Zero-Switching-Loss Transition Voltage Source Inverter/Rectifier," Xiukuan Jing and Dushan Boroyevich
