CONTENTS

VOLUME I—PROCESSING
EXTRUSION DIVISION

M2—Interactive Presentations

*New Manufacturing Method for Light Guide of PMMA (607) .................................................. 3302
S. J. Park, Bestner, Inc.
K. H. Yoon, Dankook University
C. Park, Fineoptics, Inc.

*Status of Research on Design for Mechanical Reliability of Injection Molded Plastics Products (611) . . . 3304
R. Koster, Delft University

*Rheological Characterization of the Molecular Weight and Molecular Weight Distribution of Linear Polyethylenes (56) .......................................................... 3309
M. Grehlinger, C. L. Rohn, J. Suwardie, Rheometric Scientific, Inc.
S. K. Sikka, Eastman Chemical Co.

*Effects of Chain Extension/Branching on the Viscoelastic Behavior of Styrene-Maleic Anhydride/Polylol Blends (105) .......................................................... 3314
G. Bayram, U. Yilmazer, Middle East Technical University
M. Xanthos, New Jersey Institute of Technology

*Effect of Crosslinking on Swelling, Transitions and Mechanical Properties of Poly(N-isopropylacrylamide) Responsive Hydrogels (220) .................................................. 3319
A. Zlatanić, Z. S. Petrović, Pittsburg State University

*Application of Liquid Gas-Assisted Injection Molding to the X-Arm of a Chair (747) ......................... 3324
D.-H. Kim, Soonchunhyang University
K. Oh, Cheil Industries Inc.

*Model-Based Predictive Control of a DC Motor for Screw Rotation (396) ........................................ 3328
R. Dubay, B. Pramujati, University of New Brunswick

*Accuracy of Desktop Injection Molding Simulation for Part Design (669) ........................................ 3332
L. G. Reifschneider, Illinois State University

*Simulation, Implementation and Evaluation of the Production of a Gas-Assisted Long Part (23) ........... 3337
N. G. Pantelelis, A. Malikopoulos, A. Kanarachos, National Technical University of Athens
N. Efentakis, Technika Plastika SA

*Morphology Distribution of Injection Molded Polypropylene (651) ............................................ 3342
P. W. Zhu, G. Edward, Monash University

*Development of a Notebook PC Housing by Using MMSH (Momentary Mold Surface Heating) Process (411) .......................................................... 3347
D.-H. Kim, Soonchunhyang University
M.-H. Kang, NADA Innovation
Y. H. Chun, Kumho Chemical Inc.

*Predictive Control of Cavity Pressure during Injection Filling (397) ............................................... 3351
R. Dubay, University of New Brunswick

*Documenting Flow Segregation in Geometrically Balanced Runners (670) .................................... 3356
L. G. Reifschneider, Illinois State University

*Plastic Media as a Mold/Screw Cleaning Alternative (399) .......................................................... 3361
J. M. Todd, Maxi-Blast, Inc.

*Integrated CAE Analysis for Powder Injection Molding: Filling, Packing and Cooling Stages (608) ........ 3365

*Present in a joint session.
*Measurement of Microstructural Variation in Blown Films (606) .......................................................... 3369
S. Cherukupalli, R. Jelen, A. A. Ogale, Clemson University

*The Effect of TiO₂ Pigment Particle Size and Masterbatch Rheology on the Dispersion Performance of TiO₂ Pigment within the Polyethylene Blown Film Process (412) .................................................. 3374
G. P. Milligan, M. Leatham, Steve Orr Ltd.
G. M. McNally, W. R. Murphy, The Queen's University of Belfast

*Mass Transfer between a Slender Bubble and a Variable Diffusion Coefficient Liquid in an Extensional Flow (41) ................................................................. 3379
M. Favelukis, C. Lin, P. Y. Yeo, National University of Singapore

*Modeling the Melting Process of Polymer Pellets Caused by Friction (91) .................................................. 3383
K. L. Yung, Y. Xu, F. Lau, Polytechnic University of Hong Kong

*Study of Color Change Kinetics during RPVC Extrusion (217) ................................................................. 3391
G. K. Ivanov, Panduit Corporation

*Valve Screw Design—A New Concept on Screw Design Optimization (12) ................................................... 3396
P. N. Wang, A-plus Design

M3—TAPPI Exchange

Polylactide, a New Thermoplastic for Extrusion Coating (1024) ................................................................. 2
M. Hartmann, N. Whitman, Cargill Dow, LLC

A TrisEC and 3DTRF Approach to Polymer Blend Design (1025) ................................................................. 7
W. W. Yau, D. Gillespie, Chevron Chemical Company LLC

The Use of Encapsulation Dies for Processing Linear Polyolefin Resins in Extrusion Coating (1026) ............... 19

The Case against Oxidation as a Primary Factor for Bonding Acid Copolymers to Foil (1027) ....................... 25
N. Suzuki, Mitsui-DuPont Polychemicals Co., Ltd.

A New mLLDPE for Extrusion Coating Applications (1029) ................................................................. 36
R. W. Halle, ExxonMobil Chemical Company
K. M. Cable, Blue Ridge Paper Products

M23—Die Modeling

The Effect of Layer Stretching on the Onset of ‘Wave’ Interfacial Instabilities in Coextrusion Flows (652) ....... 44
M. Zatloukal, P. Saha, Brno University of Technology
J. Vlcek, Comuplast International, Inc.
C. Tzoganakis, University of Waterloo

The Effect of Wall Slip on the Performance of Flat Extrusion Dies (130) ..................................................... 49
W. A. Gifford, Dieflow

Streamline Die Design for Complex Geometries (454) ................................................................. 54
D. Beaumier, P. G. Lafleur, C. A. Thibodeau, École Polytechnique de Montréal

Flow Balancing of Profile Extrusion Dies (31) ................................................................. 59
J. M. Nóbrega, O. S. Carneiro, Universidade do Minho
F. T. Pinho, Universidade do Porto
P. J. Oliveira, Universidade da Beira Interior

A New Concept in Coextrusion Dies (520) ................................................................. 64
R. J. Castillo, Dual Spiral Systems, Inc.

Three-Dimensional Non-Isothermal Numerical Analysis of Multi-Layer Coextrusion (732) ......................... 69
R.-Y. Chang, C.-S. Ke, W.-H. Yang, National Tsing-Hua University
W.-L. Yang, D. C. Hsu, CoreTech System Co., Ltd.

Predicting the Cooling Conditions at Blown Film Extrusion Lines by Modeling the Cooling Air Stream (342) ........................................................................................................................................... 74
F. Ohlendorf, J. Hauck, W. Michaeli, Institut für Kunststoffverarbeitung (IKV)

New Technique to Reduce Wall Thickness Tolerances in Pipes (204) ..................................................... 79
H. G. Gross, Heinz Gross Kunststoff-Verfahrenstechnik

M24—Film

Numerical Calculation of Stresses in Film Blowing (507) ........................................................................... 86
V. Sidiropoulos, Z. Wahab, J. VLachopoulos, McMaster University

Structure Development during Film Blowing (381) ..................................................................................... 92
M. D. Bullwinkel, G. A. Campbell, D. H. Rasmussen, C. J. Brancewitz, Clarkson University

*Present in a joint session.
Comparison of the Mechanical Performance of Extruded Blown and Cast Polyolefin Thin Film (446) .................. 96
M. Billham, A. H. Clarke, G. Garrett, G. M. McNally, W. R. Murphy, *The Queen’s University of Belfast*

Bridging the Modulus Gap between LLDPE and HDPE (259) .................. 101
K. L. Williams, *Equistar Chemicals, LP*

The Use of Maleic Anhydride-Containing Concentrates to Effect Adhesion between Polyethylene and Ethylene-Vinyl Alcohol (685) .................. 106
G. W. Kamykowski, *Rohm & Haas Company*

Structure-Property Relationships in HMW-HDPE Blown Films (296) .................. 111
R. K. Krishnaswamy, *Chevron Phillips Chemical Company, LP*

Predictive Model Helps Develop New High-Performance HDPE for Barrier Film Application (580) .................. 116
W. G. Todd, W. R. Podborny, *Equistar Chemicals, LP*

**T1—Twin Screw Melting**

Plastic Energy Dissipation (PED) A Major Contributor to Melting of Polymers in Polymer Compounding Equipment (832) .................. 124
B. Qian, C. G. Gogos, *Polymer Processing Institute*

The Effect of Three-Lobe, Off-Set Kneading Blocks on the Dispersion of Calcium Carbonate in Polystyrene Resin (311) .................. 129
M. J. Rogers, K. W. Koelling, *The Ohio State University*

A Predictive Melting Model for Polymer Particulates in Co-Rotating Twin Screw Extruders (825) .................. 134
C. G. Gogos, B. Qian, *Polymer Processing Institute*

Comparative Melting Trials in ZSK Extruders (180) .................. 139

Melting Phenomena and Mechanism in Co-Rotating Twin Screw Extruder (671) .................. 145
M. H. Kim, *LG Chemical Ltd.*

**T2—Single Screw Modeling**

Temperature Rise in a Single Screw Pump-Extruder (380) .................. 152
G. A. Campbell, H. Cheng, C. Wang, M. Bullwinkel,
M. A. te-Riele, *Clarkson University*

Flow Analysis in Single Screw Extruders (177) .................. 157
A. Lawal, *Stevens Institute of Technology*

Modeling of Fluted Mixing Elements (109) .................. 162
P. Samsonkova, *Brno Technical University*

“Turbo-Screw™”, New Screw Design for Foam Extrusion (104) .................. 167

Three-Dimensional Numerical Analysis of the Single Screw Plasticating Extrusion Process (735) .................. 173
R.-Y. Chang, C.-W. Hsu, W.-H. Yang, *National Tsing-Hua University*

**T21—Solids Conveying and Grooved Feed**

The Effect of a Worn Feed Casing on Plasticating Extrusion (327) .................. 180
M. A. Spalding, K. R. Hughes, J. L. Sugden, P. A. Wagner,
K. S. Hyun, *The Dow Chemical Company*

Simulation and Analyses of the Polymer-Pellet-Flow into the First Section of a Single Screw (276) .................. 185
H. Potente, T. C. Pohl, *University of Paderborn*

Barrier Screws in Helically Grooved Barrels: Operating Characteristics and Implications for Simulation Models (151) .................. 195
D. Schläfl, Y. Zweifel, *NEXTROM Technologies*

Solid Conveying Model for Determining the Throughput for Ultra-Short Single Screw Extruders with Spiral-Groove Cylinder (530) .................. 200
H. Potente, F. Reckert, *University of Paderborn*
## W1—Twin Screw

### Scaleup of Melt Conveying Parameters in Counter-Rotating Non-Intermeshing Twin Screw Extruders (366) 206
C. G. Hagberg, E. R. Uhl, *NFM Welding Engineers*

### In-Line Compounding: Effect of Screw Design on Control Pressure Stability (474) 215
G. S. Donoian, J. P. Christiano, *Davis-Standard Corporation*

### Dispersive and Distributive Mixing Characterization in Extrusion Equipment (30) 220
W. Wang, I. M. Zloczower, *Case Western Reserve University*

### An Adjustable Pressure Barrel for Counter-Rotating Non-Intermeshing (CRNI) Twin Screw Extruders (367) 225
E. R. Uhl, C. G. Hagberg, B. H. Algayer, *NFM Welding Engineers*

### Impact Modification of Nylon 6,6—An Experimental Study (193) 237
P. Elkouss, R. Mudalalame, Y. Huang, K. Broadwater, D. Bigio, *University of Maryland at College Park*

## W2—Single Screw

### Dynamic Torque of a Single Screw Extruder (113) 244
S. J. Derezinski, *Eastman Kodak Company*

### Screw Cooling Effects in Single Screw Extruders (542) 257

### An Experimental Comparison of the Improved Mixing Obtained from a New Barrier Screw Design (526) 262
K. R. Slusarz, M. R. Thompson, J. P. Christiano, *Davis-Standard Corporation*

### Mechanical Mixing in Pin Screw Extruders: Experimental and Numerical Analysis (762) 267
Th. Avalosse, Y. Rubin, *POLYFLOW s.a.*
L. Epinat, E. Slachmuylders, *Manufacture Francaise des Pneumatiques MICHELIN*

## W16—Student

### Computer Simulation of Small Molecules Permeation through Polymer Membranes (1008) 278
J. G. Kopchick, J. E. Choffel, *Pennsylvania State University at Erie, The Behrend College*

### The Effects of Directional Molecular Orientation on Tensile Stress and Elongation of Polypropylene Film (982) 282
L. W. Mellinger, *Pennsylvania College of Technology*

### Optimization of the Pultrusion Process Using Thermodynamic Analysis (988) 286
M. J. Heidecker, *Pennsylvania State University at Erie, The Behrend College*

### Nanocomposite Polymer Film Technology (1057) 292
S. Bonner, *Elizabeth City State University*
D. Sabandith, *University of Louisiana at Lafayette*
C. Swannack, *Clemson University*
W. Zhou, *SC Governor’s School for Science and Mathematics*

## W21—Twin Screw and Reactive Extrusion

### Free Radical Grafting of Maleic Anhydride on Polypropylene in the Presence of Supercritical Carbon Dioxide (926) 298
B. Dorsch, *Polycon Industries*
C. Tzoganakis, *University of Waterloo*

### Chain Extension of PA-6 and PA-6/66 Copolymer via Reactive Extrusion with Triscaprolactamyl Phosphite (TCP) (475) 303
M. K. Akkapeddi, C. Brown, B. Vanbuskirk, *Honeywell*

### Viscosity Regulation for Polymer Extruders (190) 308
G. C. Walsh, D. Bigio, J. Gao, P. Elkouss, *University of Maryland*

### The Influence of Screw Design on the Stability of a Reactive Twin-Screw Extrusion Process (53) 313
M. J. H. Bulters, P. H. M. Elemans, *DSM Research*

### A Physics Based Approach to Determining Filled Volumes within a Corotating Twin Screw Extruder (168) 318
P. Elkouss, D. Bigio, G. Walsh, *University of Maryland*
A Physical-Mathematical Model for the Description of the Process Behavior of Mixing Elements (144) .............................................. 323
H. Potente, K. Kretschmer, University of Paderborn
J. Flecke, Bayer AG

Mixing Behavior of a Model Miscible Binary Polymer System Having Extremely Low Viscosity Ratio (775) .............................. 328
P. T. Shea, R. D. Pietruski, C.-K. Shih, D. A. Denelsbeck,
E. I. du Pont de Nemours & Co., Inc.

Powerful Gearboxes for Plastics Extrusion Especially in the US Market—A Market Study (1048) ................................. 333
R. Doeberreiner, F.-M. Funk, Thyssen Henschel Power Transmission Technology

TH1—General Extrusion

Non-Newtonian Flow and Debris Deposition in an Extrusion Filter Medium (179) .................................................. 340
B. Seyfzadeh, D. A. Zumbrunnen, Clemson University
R. A. Ross, The DuPont Company

Process Fingerprints for Compounding of Polymer Blends—An Industrial Prospective (636) ................................. 345

Cooling of Coated Cable (188) ........................................... 349
L. Placek, Brno Technical University
J. Vlcek, Comuplast International, a.s.

Microporous Polyolefin Film for Battery Separator (810) .... 354
J.-H. Oh, University of Pittsburgh

Statistical Process Control Applied to the Extrusion Process (248) .......................................................... 359
P. D. Coates, R. M. Rose, M. A. Barghash, University of Bradford

A Study on the Processability of Polycarbonate in Solids Conveying Zone (501) ........................................... 364
Y.-C. Ahn, H.-J. Kim, Kyungnam University

Design of Extrusion Screws Using an Optimisation Approach (34) .................................................. 369
A. Gaspar-Cunha, J. A. Covas, University of Minho

Physical Modeling of Elastomer Extrusion Using the Viscoplasticity Method (813) .................................................. 376
D. C. Angstadt, W. Z. Misiolek, Lehigh University

Effect of Die Geometry on the Orientation of the Velocity Field during Bi-Layer Extrusion with a Conical Extruder (55) .................. 381
D. Schlaffli, Nextrom S.A.

An Experimental Study of the Flow of an Encapsulated Polymer Melt through a Unique Blown Film Die (1023) .................. 386
J. Dooley, S. Jenkins, J. Naumovitz, The Dow Chemical Company

Extrusion of Polymer Melts under Intensive Shear-Thinning Inducing Lower Pressure and Temperature Requirements (481) .......... 391
J. P. Ibar, EKNET Research

Rheology of Polytetrafluoroethylene as Related to Paste Extrusion (57) .................................................. 396
A. B. Ariawan, S. G. Hatzikiriakos, University of British Columbia
S. Ebnesajjad, E. I. du Pont de Nemours & Co., Inc.

Polyethylene Die Deposit—Measurement, Formation Mechanism and Routes to Reduction (37) ........................................ 401
C. K. Chai, BP Chemicals s.n.c.
G. Adams, J. Frame, BP Chemicals

INJECTION MOLDING DIVISION

M2—Interactive Presentations

•New Manufacturing Method for Light Guide of PMMA (607) .................. 3302
S. J. Park, Bestner, Inc.
K. H. Yoon, Dankook University
C. Park, Fineoptics, Inc.

*Present in a joint session.
**Status of Research on Design for Mechanical Reliability of Injection Molded Plastics Products (611)**
R. Koster, Delft University

**Rheological Characterization of the Molecular Weight and Molecular Weight Distribution of Linear Polyethylenes (56)**
M. Grehlinger, C. L. Rohn, J. Suwardie, Rheometric Scientific, Inc.
S. K. Sikka, Eastman Chemical Co.

**Effects of Chain Extension/Branching on the Viscoelastic Behavior of Styrene-Maleic Anhydride/Polyol Blends (105)**
G. Bayram, U. Yilmazer, Middle East Technical University
M. Xanthos, New Jersey Institute of Technology

**Effect of Crosslinking on Swelling, Transitions and Mechanical Properties of Poly(N-isopropylacrylamide) Responsive Hydrogels (220)**
A. Zlatanić, Z. S. Petrović, Pittsburg State University

**Application of Liquid Gas-Assisted Injection Molding to the X-Arm of a Chair (747)**
D.-H. Kim, Soonchunhyang University
K. Oh, Cheil Industries Inc.

**Model-Based Predictive Control of a DC Motor for Screw Rotation (396)**
R. Dubay, B. Pramujati, University of New Brunswick

**Accuracy of Desktop Injection Molding Simulation for Part Design (669)**
L. G. Reifschneider, Illinois State University

**Simulation, Implementation and Evaluation of the Production of a Gas-Assisted Long Part (23)**
N. G. Pantelelis, A. Malikopoulos, A. Kanarachos, National Technical University of Athens
N. Efentakis, Technika Plastika SA

**Morphology Distribution of Injection Molded Polypropylene (651)**
P. W. Zhu, G. Edward, Monash University

**Development of a Notebook PC Housing by Using MMSH (Momentary Mold Surface Heating) Process (411)**
D.-H. Kim, Soonchunhyang University
M.-H. Kang, NADA Innovation
Y. H. Chun, Kumho Chemical Inc.

**Predictive Control of Cavity Pressure during Injection Filling (397)**
R. Dubay, University of New Brunswick

**Documenting Flow Segregation in Geometrically Balanced Runners (670)**
L. G. Reifschneider, Illinois State University

**Plastic Media as a Mold/Screw Cleaning Alternative (399)**
J. M. Todd, Maxi-Blast, Inc.

**Integrated CAE Analysis for Powder Injection Molding: Filling, Packing and Cooling Stages (608)**

**Measurement of Microstructural Variation in Blown Films (606)**
S. Cherukupalli, R. Jelen, A. A. Ogale, Clemson University

**The Effect of TiO₂ Pigment Particle Size and Masterbatch Rheology on the Dispersion Performance of TiO₂ Pigment within the Polyethylene Blown Film Process (412)**
G. P. Milligan, M. Leathem, Steve Orr Ltd.
G. M. McNally, W. R. Murphy, The Queen's University of Belfast

**Mass Transfer between a Slender Bubble and a Variable Diffusion Coefficient Liquid in an Extensional Flow (41)**
M. Favelukis, C. Lin, P. Y. Yeo, National University of Singapore

**Modeling the Melting Process of Polymer Pellets Caused by Friction (91)**
K. L. Yung, Y. Xu, F. Lau, Polytechnic University of Hong Kong

**Study of Color Change Kinetics during RPVC Extrusion (217)**
G. K. Ivanov, Panduit Corporation

**Valve Screw Design—A New Concept on Screw Design Optimization (12)**
P. N. Wang, A-plus Design

---

**M4—General 1**

**Large Part Injection Molding Product Optimization (721)**
T. J. Schwab, D. L. Wise, J. D. Goudelock, Equistar Chemicals
B. J. Hughes, University of Cincinnati

---

*Present in a joint session.

W.-L. Yang, D. C. Hsu, CoreTech System Co., Ltd.

Numerical Simulation of Co-Injection Molding (369) 746
J. Wang, Pou Chen Group/Pou Yuen Technology

Optimization of Process Conditions in Gas-Assisted Injection Molding (666) 754
M. Chen, D. Yao, B. Kim, University of Massachusetts, Amherst

The Effect of Liquid Cooling of Gas Channel in the Gas-Assisted Injection Molding Process: Overview (169) 759
J. S. Lee, S. Cha, F. Lai, University of Massachusetts, Lowell

Gas Assisted Injection Moulding: 3D Finite Element Modelling Using a Pseudo Concentration Method and Experimental Studies (245) 764
L. Johnson, P. Olley, P. D. Coates, University of Bradford

Gas-Assisted Rubber Injection Molding (338) 769
H. Wehr, E. Haberstroh, Institut für Kunststoffverarbeitung (IKV)

Injection Molding Unfilled and Filled Polymers with Titanates and Zirconates—2001 (733) 774
S. J. Monte, Kenrich Petrochemicals, Inc.

Effects of Material and Process Parameters on the Degree of Groove Replication in DVD Disks (153) 780
W. C. Bushko, I. Dris, A. Avagliano, GE Corporate Research and Development

Experimental and Numerical Analysis of Thin-Wall Injection Molding with Micro-Features (718) 785
L. Yu, C. G. Koh, K. W. Koelling, L. J. Lee, M. J. Madou, The Ohio State University

Controlling Injection Phase/Packing Phase Switchover Using an Ultrasonic Sensor (949) 790
R. Edwards, C. L. Thomas, University of Utah
R. Peterson, 3M

Estimation of Elongational Viscosity of Polymers for Accurate Prediction of Juncture Losses in Injection Molding (711) 794
M. Gupta, Michigan Technological University

The Effect of Injection Moulding Processing Conditions and α-Olefin Co-Monomer Type on the Performance of Metallocene Catalysed Polyethylenes (682) 799
S. Walker, G. M. McNally, P. J. Martin, M. Murphy, The Queen’s University of Belfast

Non-Conventional Processing of Short Fibre Reinforced Composites (198) 804
R. A. Sousa, R. L. Reis, A. M. Cunha, University of Minho
M. J. Bevis, Brunel University

Modelling of the Effect of Slip in Plug-Assisted Thermoforming (94) 810
D. Laroche, National Research Council of Canada
P. Collins, P. Martin, The Queen’s University of Belfast

Robust Simulation for the Heating Stage in Thermoforming (114) 815
A. Yousefi, A. Bendada, R. DiRaddo, National Research Council of Canada

Experimental Investigation of Slip in Plug-Assisted Thermoforming (630) 820
P. Collins, P. Martin, E. Harkin-Jones, The Queen’s University of Belfast
D. Laroche, National Research Council of Canada
**MOLD MAKING/MOLD DESIGN DIVISION**

**T10—Advancements in Mold Design**

New Software Applications Bring Power and Compatibility to the Toolmaking Process (772) .......................... 918
D. Marinac, Cimatron Technologies

Integrated Design Environment Enhancing Concurrent Engineering Approach in Plastic Injection Molds Design (167) ........................................... 922
A. Pipino, E. Indino, CRF
A. Franz, M. Thornagel, IKV
R. Curado, Distrim2

Prediction of Ejection Forces in Tubular Moldings in Amorphous Polymers (26) ................................. 927
A. J. Pontes, R. Pantani, G. Titomanlio, Universidade do Minho
A. S. Pouzada, Università di Salerno

Controlling Balanced Molding through New Hot Runner Manifold Designs (901) .................. 932
J. P. Beaumont, K. Boell, Beaumont Runner Technologies, Inc./Pennsylvania State University at Erie, The Behrend College

Automatic Design for Parting Line on Injection Mold (428) ................................................. 937
