

**PROCEEDINGS OF THE THIRTY-FIFTH ANNUAL
CONFERENCE
ON
INFORMATION SCIENCES AND SYSTEMS**

March 21 – 23, 2001

VOLUME II

Program Directors

John I. Goutsias and Pablo A. Iglesias

Department of Electrical and Computer Engineering
The Johns Hopkins University
Baltimore, Maryland 21218

UB/TIB Hannover 89
122 139 682

Dynamic Market Driven Provisioning of Network Resources Using Genetic Algorithms in a Competitive Electronic Commerce Marketplace <i>Jian Ye and Symeon Papavassiliou, New Jersey Institute of Technology</i>	519
Greedy Algorithms for Demodulation of Full-Surface Data <i>William Weeks IV, University of Missouri, Rolla</i>	525
Discrete Optimization Via SPSA <i>Laszlo Gerencser, Hungarian Academy of Sciences, Stacy D. Hill, The Johns Hopkins University, Applied Physics Laboratory, and Zsuzsanna Vago, Hungarian Academy of Sciences</i>	529
Global Random Optimization by Simultaneous Perturbation Stochastic Approximation <i>John L. Maryak and Daniel C. Chin, The Johns Hopkins University, Applied Physics Laboratory</i>	530

VOLUME II

Session TP1:

Detection and Equalization

*Co-Chairmen: Maja Bystron, Drexel University
Tommy Guess, University of Virginia*

Detection of Aperiodically Embedded Synchronization Patterns in Rayleigh Fading <i>Arkady Kopansky and Maja Bystrom, Drexel University</i>	531
Distributed Detection Using Parley with Soft Decisions <i>Robert E. Van Dyck, National Institute of Standards and Technology</i>	537
Data Fusion and Hierarchical Models – A Bayesian Sampling Approach to Distributed Detection <i>Biao Chen, Syracuse University</i>	543
Joint Signal Design and Power Control for CDMA with Decision-Feedback Receivers and Asymmetric QoS Constraints <i>Tommy Guess, University of Virginia</i>	549
Almost Coherent Demodulation of M-ary FSK Over Slow Rayleigh Fading Channels <i>Vikrant Lal and Evaggelos Geraniotis, University of Maryland, College Park</i>	555
Timing Recovery Based on Dispersion Minimization <i>W. Chung and J. Balakrishnan, Cornell University; W. A. Sethares, University of Wisconsin, Madison; C. R. Johnson Jr., Cornell University</i>	558

Session TP2:**Communication Systems I**

Co-Chairmen: *Tabish Almas, The Johns Hopkins University*
Ian Donn, The Johns Hopkins University

Optimal Least Weight Routing Algorithm for Guaranteed Bandwidth Flows <i>Jiang Jun and Symeon Papavassiliou, New Jersey Institute of Technology</i>	564
Computing Delay and Survivability Constrained Paths in WDM Optical Networks <i>Howon Suh, Hongsik Cho,i and Hyeong-Ah Choi, The George Washington University</i>	570
Packet Loss in Bipartite Concentrators <i>Rahul Ratan and A. Yavuz Oruc, University of Maryland, College Park</i>	575
A Repeating GPS System for Geolocation <i>Yongguang Chen and Hisashi Kobayashi, Princeton University</i>	580
DTV Channel Characterization <i>I. M. Garrison and R. K. Martin, Cornell University; W. A. Sethares, University of Wisconsin, Madison; B. Hart, Australian National University; W. Chung and J. Balakrishnan, Cornell University; R. Casas and T. Endres, NxtWave Communications; M. Larimore, Applied Signal Technology; P. Schniter and C. R. Johnson Jr., Cornell University</i>	584
Mitigation of NLOS Effect in TOA Positioning <i>Yihong Qi and Hisashi Kobayashi, Princeton University</i>	590

Session TP3:**Computer Networks**

Co-Chairmen: *Bernd-Peter Paris, George Mason University*
Saeid Taheri, The University of New Mexico

Importance Sampling for Measuring the Size of the Internet <i>Song Xing and Bernd-Peter Paris, George Mason University</i>	593
Efficient Algorithms for Locating Web Proxies <i>Li-Chuan Chen, Mitre Corporation, and Hyeong-Ah Choi, The George Washington University</i>	598
The Effect of TCP on the Self-Similarity of Network Traffic <i>Biplab Sikdar and Kenneth S. Vastola, Rensselaer Polytechnic Institute</i>	604
Enhanced Freeze-TCP and its Challenges in Mobile Environments <i>Saeid Taheri and Mo Jamshidi, The University of New Mexico</i>	610
Flow Control for Multiple-Access Queues <i>Razvan Cristescu and Sergio D. Servetto, Ecole Polytechnique Federale de Lausanne</i>	616
Active Congestion Control on TCP Variants <i>Gi-Hyun Choi, Kyung-Su Jang and Dong-Ryeol Shin, Sungkyunkwan University</i>	622

Session TP4:**Signal Processing**

*Co-Chairmen: Mark Fowler, State University of New York at Binghamton
Jun Wang, The Pennsylvania State University*

Pulse Extraction for Radar Emitter Location

Mark L. Fowler, Zhen Zhou, and Anupama Shivaprasad, State University of New York at Binghamton

623

Non-linear Processor Control for Echo Suppression after Echo Cancellation

Milos Doroslovacki, The George Washington University

629

Analysis of Autocorrelation Pursuit via Non-parametric Iterative Extrapolation

Alejandro E. Brito and Sergio D. Cabrera, The University of Texas at El Paso

633

A New Performance Measure and Weight Optimization in Parallel Generalized Projection Algorithm

Jun Wang and John F. Doherty, The Pennsylvania State University

639

Fractions in the Canonical-Signed-Digit Number System

Jeffrey O. Coleman, Naval Research Laboratory, and Arda Yurdakul, Kadir Has University

645

Parametric Temporal Coherence Estimation Through a Subspace Technique and its Application to Epileptic Seizure Propagation

David L. Sherman, Chirag B. Patel, Ning Zhang, Nitish V. Thakor, and Marek Mirski, The Johns Hopkins University

647

On a Scale-Modulation Transform

Joel M. Morris, University of Maryland, Baltimore County, and Sanjay M. Joshi, Lucent Technologies

648

Session TP5:**Space-Time Coding**

Chairman: Hesham El Gamal, Ohio State University

Performance Evaluation of Parallel Concatenated Turbo-Code with Antenna Diversity

Dongzhe Cui and Alexander M. Haimovich, New Jersey Institute of Technology

649

New Algebraic Space-Time Codes for BPSK and QPSK Modulation

Hesham El Gamal, Ohio State University, and A. Roger Hammons Jr., Corvis Corporation

654

Robustifying OFDM Against Time-Selective Effects Using Space-Time Block Coding

Xiaoli Ma and Georgios B. Giannakis, University of Minnesota

660

Robust Space-Time Trellis Codes Based on Bit-Interleaved Coded Modulation

Zhihong Hong and Brian L. Hughes, North Carolina State University

665

Improved Criterion for STTC and Performance Comparison of STTC Over Con. STTC in Rayleigh Fading

Jian Cheng, Southeast University, Haifeng Wang, Nokia Mobile Phones; Ming Chen and Shixin Cheng, Southeast University

671

Designing Space-Time Codes for a Large Number of Receiving Antennas <i>Ezio Biglieri, Politecnico di Torino, and Antonia Tulino, Universita del Sannio</i>	675
Capacity Aspects of Bit-Interleaved Space-Time Coded Modulation <i>Nishant Jacob, Zhihong Hong, and Brian L. Hughes, North Carolina State University</i>	676
A Novel Low-rate Multi-dimensional Space-Time Codes for Wireless Communications <i>W. Gang, C. Ming, and C. Shixin, Southeast University</i>	678

Session TP6:

Control II

Chairman: Zongli Lin, University of Virginia

The Information Matrix in Control: Computation and Some Applications <i>James C. Spall, The Johns Hopkins University, Applied Physics Laboratory</i>	679
Adaptive Actuator Failure Compensation: Nonlinear Dynamics <i>Xidong Tang and Gang Tao, University of Virginia; Suresh M. Joshi, NASA Langley Research Center</i>	685
Stochastic Adaptive Control Using Multiple Models for Improved Performance in the Presence of Random Disturbances <i>Kumpati S. Narendra and Osvaldo A. Driollet, Yale University</i>	691
Blind Identification of Convolutional MIMO System with 3 Sources and 2 Sensors <i>Binning Chen and Athina P. Petropulu, Drexel University; Lieven De Lathauwer, ETIS, France</i>	697
Performance Comparison of Nonlinear Estimators in Chaotic Synchronization Applications <i>Javid Amirazodi and Edwin E. Yaz, University of Arkansas; Asad Azemi, Penn State University, Delaware County Campus</i>	702
Explicit Construction of H_∞ Controllers for a Rigid Rotor on Magnetic Bearings <i>Zongli Lin, Hai Zhang and Paul Allaire, University of Virginia; Robert Bartlett and Edward Zorzi, American Flywheel Systems</i>	708

Session TP7:

Optical Signal Processing (Invited Session)

Chairman: Mikhail Vorontsov, U. S. Army Research Laboratory

CMOS Fabrication and Implementation of Fabry-Perot <i>Shahrokh Ahmadi and Mona Zaghoul, The George Washington University</i>	714
Analysis of a High-Resolution Optical Wave-Front Control System <i>Eric W. Justh and P. S. Krishnaprasad, University of Maryland, College Park</i>	718

Session FA1:**Modulation and Demodulation**

*Co-Chairmen: Hamid Sadjadpour, AT&T Shannon Laboratory
Ranjan Sonalkar, AT&T Shannon Laboratory*

Construction of OFDM M-QAM Sequences with Low Peak to Average Power Ratio

Beeta Tarokh, Northeastern University, and Hamid R. Sadjadpour, AT&T Shannon Research Labs

724

Joint Probability in Demodulation and Decoding

Ali S. Khayrallah and Gregory E. Bottomley, Ericsson

730

Interleaver Design and Multi-Pass Demodulation

Ali S. Khayrallah and Tracy Fulghum, Ericsson

736

Optimal Placement of Training for Unknown Channels

Srihari Adireddy and Lang Tong, Cornell University; Harish Viswanathan, Bell Labs, Lucent Technologies

742

An Analytic Technique to Assess the Impact of Frequency Dependent Non-linearities on the Error Probability of OFDM/M-PSK and OFDM/M-QAM Signals

M. R. D. Rodrigues and J. J. O'Reilly, University College London

748

Frequency Division Duplex Versus Frequency Overlapped Duplex Operation of DMT-Based DSL Modems

Ranjan V. Sonalkar, AT&T Shannon Laboratory

753

Session FA2:**Communication Systems II**

*Co-Chairmen: Radha Poovendran, University of Washington
A. Brinton Cooper III, US Army Research Laboratory*

Interference Suppression in Ultra-Wideband Communications

Li Zhao and Alexander M. Haimovich, New Jersey Institute of Technology

759

Bandwidth Efficiency in Fast Frequency Hopping Multiple Access

*Helene Tayong, Antoinette Beasley, and Arlene Cole-Rhodes, Morgan State University;
A. B. Brinton Cooper III, U.S. Army Research Laboratory; Gonzalo Arce, University of Delaware*

764

Blind Separation of Communication Signals Using Pearson System Based Method

Juha Karvanen and Visa Koivunen, Helsinki University of Technology

768

Optimization of Key Storage for Secure Multicast

Mingyan Li and Radha Poovendran, University of Washington; C. Berenstein, University of Maryland, College Park

771

Group Key Agreement Using Divide-and-Conquer Strategies

*Wade Trappe, University of Maryland, College Park, Yuke Wang, University of Texas at Dallas,
and K. J. Ray Liu, University of Maryland, College Park*

775

Blind Separation Using Characteristic Function Based Criterion <i>Jan Eriksson and Visa Koivunen, Helsinki University of Technology</i>	781
---	-----

Session FA3:

Packet Networks and Congestion Control

Chairman: Su Rong, University of Toronto

Supervisor Reduction for Discrete-Event Systems <i>R. Su and W. M. Wonham, University of Toronto</i>	786
Fairness in Stateless Fair Queueing Algorithms <i>Roberto Barnes, Nokia Research Center, R. Srikant, University of Illinois at Urbana-Champaign; J. Mysore and Narayanan Venkitaraman, Motorola Labs</i>	792
T²MPS: Architecture of a Terabit Multicast Packet Switch Emulating an OQ Switch <i>Jie Yang, New Jersey Institute of Technology, Necdet Uzun, AuroraNetics, and Symeon Papavassiliou, New Jersey Institute of Technology</i>	798
Convergence of Distributed Congestion Control Schemes in Networks with Multicast and Unicast Sessions <i>Supratim Deb and R. Srikant, University of Illinois at Urbana-Champaign</i>	804
Pipelined and Pritorized Round Robin Scheduling in an Input Queueing Switch <i>Sang-Ho Lee, Kyung-Su Jang and Dong-Ryeol Shin, Sungkyunkwan University</i>	810

Session FA4:

Signal Processing for Communications

*Co-Chairmen: Assedine Touzni, Nxtwave Communications
Jaiganesh Balakrishnan, Cornell University*

Phase Recovery Based on Minimization of Single-Axis Constant Modulus Criterion: Performance Analysis <i>A. Touzni, R. A. Casas, T. J. Endres, C. H. Strolle, and S. Hulyalkar, Nxtwave Communications</i>	811
MAP Sequence Estimation for Fading ISI Channels <i>Hai Chen, Richard Perry, and Kevin Buckley, Villanova University</i>	817
Exploiting Sparsity in Adaptive Filters <i>Richard K. Martin, Cornell University, William A. Sethares, University of Wisconsin, Madison, C. Richard Johnson Jr., Cornell University, and Robert C. Williamson, Australian National University</i>	822
Approximate Channel Identification via δ-Signed Correlation <i>Jaiganesh Balakrishnan, Cornell University, William A. Sethares, University of Wisconsin, Madison, and C. Richard Johnson Jr., Cornell University</i>	828
Constrained CRBs for Channel and Signal Estimation of MIMO Systems <i>Brian M. Sadler, Army Research Laboratory, Richard J. Kozick, Bucknell University, and Terrence Moor, Army Research Laboratory</i>	834

A Hybrid Particle Filter for Joint Synchronization and Channel Estimation <i>Ronald Iltis, University of California, Santa Barbara</i>	840
--	-----

Session FA5:

Space Diversity

*Co-Chairmen: Christina Fragouli, AT&T Research Labs
Daniel Perez Palomar, Universitat Politecnica de Catalunya*

Prefiltered Space-Time M-BCJR Equalizer for Frequency-Selective Channels <i>C. Fragouli, N. Al-Dhahir, S. N. Diggavi, and W. Turin, AT&T Research Labs</i>	841
Performance Evaluation of Indoor Wireless Video System Using BLAST Testbed <i>Haitao Zheng and Dragan Samarzija, Lucent Technologies</i>	846
Multiple-Symbol Differential Detection with Interference Suppression <i>Debang Lao and Alexander M. Haimovich, New Jersey Institute of Technology</i>	850
Capacity of Spatially Flattened Frequency-Selective MIMO Channels Using Linear Processing Techniques in Transmission <i>Daniel Perez Palomar and Miguel Angel Lagunas, Universitat Politecnica de Catalunya</i>	856
Impact of Hybrid ARQ on BLAST Performance <i>Haitao Zheng, Lucent Technologies</i>	862
A New Approach to Multiple Antenna Systems <i>Dimitrie C. Popescu and Christopher Rose, Rutgers University</i>	868

Session FA6:

Wavelets (Invited Session)

Chairman: Trac D. Tran, The Johns Hopkins University

An Optimal Transceiver Filterbank Design for ISI Channel <i>Y.-J. Alan Zhang and X.-G. Xia, University of Delaware</i>	872
Translation Invariant Wavelet Denoising of Poisson Data <i>J. Liu and P. Moulin, University of Illinois at Urbana-Champaign</i>	878
The Nonuniform Modulated Complex Lapped Transform and its Application to Audio Coding <i>Z. Xiong, Texas A&M University</i>	884
Lapped Transform via Time-Domain Pre- and Post-Processing <i>Trac D. Tran, The Johns Hopkins University</i>	890
Regular Biorthogonal Linear-Phase Filter Banks: Theory, Structure and Application in Image Coding <i>S. Orantara, The University of Texas at Arlington, and T. Q. Nguyen, Boston University</i>	896
The Characterization and Design of Hilbert Transform Pairs of Wavelet Bases <i>Ivan W. Selesnick, Polytechnic University</i>	902
