Proceedings of the
2001 SPRING TECHNICAL CONFERENCE OF
THE ASME INTERNAL COMBUSTION ENGINE DIVISION

IN-CYLINDER PROCESSES:
FUEL SPRAY, FLOW,
IGNITION, COMBUSTION,
AND EMISSION FORMATION

VOLUME 2

presented at
THE 2001 SPRING TECHNICAL CONFERENCE OF
THE ASME INTERNAL COMBUSTION ENGINE DIVISION
PHILADELPHIA, PENNSYLVANIA
APRIL 29–MAY 2, 2001

sponsored by
THE INTERNAL COMBUSTION ENGINE DIVISION, ASME

edited by
VICTOR W. WONG
MASSACHUSETTS INSTITUTE OF TECHNOLOGY

THE AMERICAN SOCIETY OF MECHANICAL ENGINEERS
Three Park Avenue / New York, N.Y. 10016
CONTENTS

Modeling the Initial Growth of the Plasma and Flame Kernel in S.I. Engines
   Hilde Willems and Roger Sierens ................................................................. 1

Properties of Homogeneous Charge Compression Ignition (HCCI) Engine With n-Butane Fuel
   Minoru Iida, Motoaki Hayashi, David E. Foster, and Jay K. Martin .................. 9

Transient Fuel Spray Structure for Simulated Injection Strategies in Direct Injection, Spark Ignition Engines
   P. A. Hutchinson and R. B. Wicker ............................................................ 19

A Study on the Breakdown Voltage Analysis of the Spark Plug Gap for Extraction of the Information About the Pressure in Cylinder
   Jaekeun Park and Jaewoo Chae ...................................................................... 27

Applying the Representative Interactive Flamelet Model to Evaluate the Potential Effect of Wall Heat Transfer on Soot Emissions in a Small-Bore DI Diesel Engine
   Carl Hergart and Norbert Peters ............................................................... 33

The Effects of Tumble and Swirl Flows on the Turbulence Scale Near the TDC in a 4-Valve S.I. Engine
   Ki Hyung Lee, Chang Sik Lee, Hyun Jong Park, and Dae Sik Kim ....................... 45

Theoretical Investigation on the Influence of Physical Parameters on Soot and NOx Engine Emissions
   Arturo de Risi, Teresa Donateo, and Domenico Laforgia ................................ 53

A Non-Equilibrium Turbulence Dissipation Correction and Its Influence on Pollution Predictions for DI Diesel Engines
   Franz X. Tanner, Guang-Sheng Zhu, and Rolf D. Reitz .................................. 65

The Effect of Subgrid Modeling on the In-Cylinder Unsteady Mixing Process in a Direct Injection Engine
   Kazuo Sone and Suresh Menon .................................................................... 75

DNS of Non-Premixed Combustion in a Compressible Mixing Layer, Using Simple Chemistry
   R. J. M. Bastiaans, L. M. T. Somers, and H. C. de Lange ................................ 85

   Gustavo Fontana, Enzo Galloni, and Elio Jannelli ........................................ 93

Laser Based Measurements of Instantaneous Characteristics in High Pressure Fuel Injection and Swirl Spray
   Murad M. Ismailov ..................................................................................... 109

Effects of Diesel / Water Emulsion on Heat Flow and Thermal Loading in a Precombustion Chamber Diesel Engine
   M. Y. E Selim and S. M. S. Elfeky ............................................................. 117

Experimental and Theoretical Optimization of Combustion Chamber and Fuel Distribution for the Low Emission DI Diesel Engine
   Yoshiyuki Kidoguchi, Michiko Sanda, and Kei Miwa .................................... 131

Author Index ................................................................................................. 139
