PROCEEDINGS

of

The International MEMS Workshop 2001

iMEMS

Dr. Francis Tay Eng Hock

Chair & Editor

4 – 6 July 2001
National University of Singapore, Singapore

Organised by:

Exhibitors:

Coventor, Inc
Applied Microengineering Ltd
EV Group E Tahlner GmbH
Semitool
Surface Technology Systems Pte Ltd

Supported by:

National Science & Technology Board of Singapore
Yamatake Corporation
ASME Singapore Section
Institute of Engineers, Singapore
U.S. Air Force Office of Scientific Research

National University of Singapore
Future Techno Designs Pte Ltd
Institute of Materials Research and Engineering
### TABLE OF CONTENTS

| xi | Workshop Committee |
| xiii | Message from the Workshop Committee |

### KEYNOTE PAPERS:

1. **Micro- and Nano-Scale Motion in the Cell**  
   Gerald H. Pollack and Frederick B. Reitz, Department of Bioengineering, University of Washington (USA).

15. **The I-STAT System: Biomedical Application of Microsensor Technology**  
   Paul G. Glavina, i-STAT Corporation (Canada).

21. **Vibrating RF MEMS For Low Power Wireless Communications**  
   Clark T.-C. Nguyen, Center for Integrated Wireless Microsystems, Department of Electrical and Computer Science, University of Michigan, Ann Arbor (USA).

35. **MEMS - A Wireless Vision**  
   Hector J. De Los Santos, COVENTOR, Inc. (USA).

43. **Future MEMS: Expectation from Industry**  
   Takaaki Taki Kuroiwa, Yamatake Corporation (Japan).

### INVITED PAPERS:

50. **Microsystems: Can They be a Financial Success?**  
   Gregory J. Galvin, Calient Optical Components, Inc., (USA)

54. **Development of Integrated Microfluidic Devices for DNA Analysis**  

62. **Fabrication and Application of LIGA Microstructures**  
   Jost Goettler, G. Aigeldinger, Y. Desta, L. Jian, K. Kelly, K. Lian, Z. Ling, and M. Murphy, Center for Advanced Microstructures and Devices (CAMD), and Department of Mechanical Engineering, Louisiana State University (USA).

73. **Micromachined Sensors and Their Industrial Implementation**  
   Mitsuhiko Nagata, Takashi Masuda, Shigeo Kimura, Yoshiyuki Ishikura, and Masaru Soeda, Research and Development Headquarters, Yamatake Corporation (Japan).

83. **Scheduling of MEMS Manufacturing**  
   Lee Loo Hay, Francis Tay Eng Hock, and Wang Lixin, Department of Industrial and Systems Engineering, and Department of Mechanical Engineering, National University of Singapore (Singapore).

94. **Design of Non-Membrane MEMS Pressure Transducers**  
   Rudra Pratap, Department of Mechanical Engineering, Indian Institute of Science (India).

### BIOMEMS & MICROFLUIDICS

100. **An Investigation on Field-Effect Flow Control for Microfabricated Fluidic Networks**  
    Sebastian Bohm, Richard Schasfoort, and Albert van den Berg, Coventor B. V., and MESA+ Research Center, University of Twente (The Netherlands).

106. **Fabrication of Micro-Fluidic Devices Using PCB Technology**  
    Stefan Richter, Ansgar Wego, and Lienhard Pagel, Department of Electrical Engineering and Information Technology, University of Rostock (Germany).
115 Highly Parallel and Accurate Nanoliter Dispenser for High-Throughput-Synthesis of Chemical Compounds
P. Koltay, G. Birkle, R. Steger, H. Kuhn, H. Sandmaier, and R. Zengerle, IMTEK, University of Freiburg, HSG-IMIT, and Morphochem AG (Germany).

125 A 96 Channel Printhead for Production of Microarrays
B. de Heij, S. Bekesi, M. Lohr, G. Kattinger, H. Sandmaier, and R. Zengerle, IMTEK, University of Freiburg, and HSG-IMIT (Germany).

132 Turbulence Modeling of Flows in Micro Tubes
D. Xu, T. Y. Ng, L. S. Pan, and K. Y. Lam, Institute of High Performance Computing (Singapore).

142 Analysis of Liquid Flow in Rectangular Microchannels by Electroosmotic Pumping
Chun Yang and Xiaoyang Huang, School of Mechanical and Production Engineering, Nanyang Technological University (Singapore).

151 Finite Element Simulation of Piezoelectric MEMS Droplet Ejector for DNA Microarrays
L. L. Ngiam, Francis E. H. Tay, F. S. Chau & N. T. Nguyen, Department of Mechanical Engineering, National University of Singapore, and School of Mechanical and Production Engineering, Nanyang Technological University (Singapore).

ACTUATORS

160 A Micromachined Planar Moving Stage Optimised for a Decoupled XY Motion
Ho Nam Kwon, Kyoung Ryoon Bae, Puchong Chen, Kang Yun Kim, Sung Jin Jung, Jong Hyun Lee, Jung Hoon Choi, and Jong Bu, Department of Mechatronics, Kwangju Institute of Science and Technology (K-JIST), and LG Elite (Korea).

168 Tactical Grade MEMS Gyroscope Fabricated by the SBM Process
Sangjun Park, Sangwoo Lee, Jongpal Kim, Sangchul Lee, and Dongil “Dan” Cho, Automation and Systems Research Institute (ASRI), Inter-University Semiconductor Research Center(ISRC), School of Electrical Engineering and Computer Engineering, Seoul National University, and MEMS Laboratory, Samsung Advanced Institute of Technology (Korea).

178 Ambient Stable Thermal Bimorph Actuator
Quanbo Zou, Uppili Sridhar, Janak Singh, Ranganathan Nagarajan, Qingxin Zhang, Wenjiang Zeng, Xuexuan Qu, and Hanhua Feng, Institute of Microelectronics (Singapore).

187 MEMS-IDT Based Inertial Grade Accelerometer and Gyroscope
V. K. Varadan and V. V. Varadan, Center for the Engineering of Electronic and Acoustic Materials, Pennsylvania State University (USA).

195 Novel Suspension Structure for Improving the Stability and Enhancing the Stable Travel Range of Comb-Drive Actuators
Guangya Zhou and Philip Dowd, Division of Microelectronics, School of Electrical & Electronic Engineering, Nanyang Technological University (Singapore).

202 Thermal Effect on Resonance Frequency of Coated Microcantilevers

210 Design Considerations of Broadband Resonant Microbeam Devices

220 Effects of Different Parameters on the Resonant Frequency Stability of a Parallel-Plate Type Electrostatic Micro Resonator
Hua Chen, Olivier Francois, Olivier Robert, Gilles Amendola, Olivier Gigan, and Olivier Vancauwenberge, ELMI Laboratory, ESIEE (France).

BIOMEMS & MICROFLUIDIC & MEMS/MST SENSOR APPLICATIONS

230 A Micromechanical Sensor Based on Tuning Fork Technology for Liquid Density Detection
Design and Realization of a Novel Capacitive Differential Pressure/Flow Sensor for Drug Delivery Systems
Liu H., Francis E. H. Tay, Zhang X. X., and Xu Y., Department of Mechanical Engineering, National University of Singapore, and Nano and Micro System Lab, Institute of Materials Research and Engineering (Singapore).

A Microfluidic MEMS Characterization Toolbox
Steve Wereley, Carl D. Meinhart, Shannon Stone, Vince Hohreiter, and Jacob Chung, School of Mechanical Engineering, Purdue University, West Lafayette, Department of Mechanical & Environmental Engineering, University of California, Santa Barbara, and Mechanical Engineering Department, University of Florida (USA).

Molecular Dynamics Simulation of Micro Channel Flow
Pan Xijun, Nhan Phan-Thien, Xu Diao, and Ng Teng Yong, Institute of High Performance Computing, and Department of Mechanical Engineering, National University of Singapore (Singapore).

Gaseous Flow and Heat Transfer in Micro Couette Flow
S. K. Chou, L. Xie, and H. Xue, Department of Mechanical Engineering, National University of Singapore (Singapore), and Mechanical Engineering Department, California State Polytechnic University (USA).

A New Type of Flow Meter Using Micro Air Turbine on a Silicon Chip
V. K. Jain and C. R. Jalwania, Solid State Physics Laboratory (India).

SILICON MICROMACHINING

Oxidation Process-Optimization for Large Area Silicon Fusion Bonded Devices and MEMS Structures
K. N. Bhat, N. DasGupta, A. DasGupta, P. R. S. Rao, and R. Navin Kumar, Microelectronics Laboratory, Department of Electrical Engineering, Indian Institute of Technology (India).

Role of Oxygen in Etching of High-Aspect-Ratio Deep Trenches for MEMS Application
Say Yong Koh, Kitt Wai Kok, Chow Sern Lee, Won Jong Yoo, and K. Suriakumar, Department of Electrical and Computer Engineering, National University of Singapore, and TEMIC Automotive Singapore Pte Ltd. (Singapore).

An Extended Double-SBM Process for Vertical Actuation and Sensing Using One Single-Crystal Silicon Wafer
Jongpal Kim, Sangjun Park, and Dong-il "Dan" Cho, Automation and Systems Research Institute (ASRI), Inter-University Semiconductor Research Center (ISRC), School of Electrical Engineering and Computer Science, Seoul National University (Korea).

New Design for Thermopile Infrared Detector
Sun Tietun and Miao Jianmin, MML, School of Mechanical and Production Engineering, Nanyang Technological University (Singapore).

WIRELESS MEMS/RF MEMS

RF MEMS Switch

A Novel Capacitive RF MEMS Switch with a Silicon/Metal/Dielectric Membrane
Yufeng Jin, Jinwen Zhang, Weibin Zheng, Yilong Hao, Dacheng Zhang, and Guoying Wu, Institute of Microelectronics, Peking University, and Department of Electronic Engineering, Southeast University (China).

Development of Micromachined RF Silicon Inductors
Guangyu Wang, Jianmin Miao, Tietun Sun, and Lihui Guo, Micromachines Laboratory, School of Mechanical and Production Engineering, Nanyang Technological University, and Deep Submicron Integrated Circuit (DSIC), Institute of Microelectronics (Singapore).

DATA STORAGES AND OPTICAL MEMS

Read/Write Head-Driven MEMS Actuator with Single-Crystal-Silicon in Hard Disc Drives
Lu Yi, Mou Jianqiang, and Chen Shixin, Data Storage Institute (Singapore).
Design and Servo Control of a Piezoelectric Microactuator for Hard Disk Drives
Ma Jianxu, Marcelo H. Ang Jr., Guo Guoxiao, He Zhimin, Qian Hua, and Lee Hwee Khoon,
Department of Mechanical Engineering, National University of Singapore, and Data Storage Institute
(Singapore).

In-Situ Cleaving of Optical Fiber for Optical MEMS and Sensor Application
A. Leong, F. Chollet, He LM., A. Asundi, and B. Ngoi, School of Mechanical and Production
Engineering, Nanyang Technological University (Singapore).

Development of MEMS-Based Optical Switching Devices – An Overview
Shan Xue Chuan, Wang Zhenfeng, Wang Zhiping, Zeng Xianting, Lim Siak Piang, Lee Kwok Hong,
and N. F. de Rooij, Gintic Institute of Manufacturing Technology, National University of Singapore,
(Singapore), and Institute of Microtechnology, University of Neuchatel (Switzerland).

New Materials for Thin Film Filament Micro Heater
Paul Muralt, Nicolas Ledermann, Jacek J. Baborowski, and Arnaud Pollien, Ceramics Laboratory,
Department of Material Science, Swiss Federal Institute of Technology Lausanne (EPFL)
(Switzerland).

Novel Thin Films Deposition Method for Re-Entry Coverage and Materials Properties Tailoring

InGaP/Polyimide Membrane-Like Bridges Fully Compatible with InGaP/InGaAs/GaAs Based
HFETs
T. Lalinsky, L. Matay, E. Burian, Z. Mozolova, S. Hascik, I. Kostic, and M. Drezik, Institute of
Electrical Engineering of the Slovak Academy of Sciences, Institute of Informatics of the Slovak
Academy of Sciences, and Institute of Construction and Architecture of the Slovak Academy of
Sciences (Slovakia).

A Novel Bulk Micromachining Method for Fabricating Released Structures in (001) GaAs
Jongpal Kim, Setae Kim, Sangjun Park, Seung-Joon Paik, Chiwan Ku, Seung-Ki Lee and Dong-il
“Dan” Cho, Automation and Systems Research Institute (ASRI), Inter-University Semiconductor
Research Center (ISRC), School of Electrical Engineering and Computer Science, Seoul National
University, and Department of Electrical Engineering, Dohankook University (Korea).

Uncooled Infrared Image Sensor of Dielectric Bolometer Mode Using Ferroelectric BST Thin
Film Prepared by MOD
Hong Zhu, Jianmin Miao, Minoru Noda, Huaping Xu, Takao Nakamura, and Masanori Okuyama,
Micromachine Laboratory, School of Mechanical and Production Engineering, Nanyang
Technological University, (Singapore), and Area of Material and Device Physics, Department of
Physical Science, Graduate School of Engineering Science, Osaka University (Japan).

Characterization and Shape Memory Effect of Magnetron Sputtered TiNiCu Thin Film
Yongqing Fu, Hejun Du, and Xu Huang, School of Mechanical and Production Engineering, Nanyang
Technological University (Singapore).

PZT Thin Film Acoustic Sensor with Partially Unclamped Membranes
Nicolas Ledermann, Jacek Baborowski, Sandrine Gentil, and Paul Muralt, Swiss Federal Institute of
Technology Lausanne (EPFL) (Switzerland).

Micromachining of Piezoelectric MEMS
Jacek J. Baborowski, Nicolas Ledermann, Sandrine Gentil, and Paul Muralt, Ceramics Laboratory,
Department of Material Science, Swiss Federal Institute of Technology Lausanne (EPFL)
(Switzerland).

Deep X-Ray Lithography for MEMS - Photoelectron Exposure of the Upper and Bottom Resist
Layers
Vladimir Kudryashov and Paul Lee, Natural Science NIE/ EEE Nanyang Technological University
(Singapore).
414 Characterisation of a Positive Tone Chemically Amplified Resist for Micromachining Using X-Ray Lithography
T. L. Tan, V. A. Kudryashov, S. Lee, B. L. Tan, G. H. Teo, and P. Lee, Natural Sciences Academic Group, Nanyang Technological University, National Institute of Education, and Chartered Semiconductor Manufacturing Ltd. (Singapore).

421 Patterned EUV Grating Structure by Scanning Probe Lithography

428 MEMS and LIGA Technique at NSRL
Xinyi Zhang, Yangchao Tian, and Gang Liu, National Synchrotron Radiation Laboratory, University of Science and Technology of China (P. R. China).

432 Microfabrication on Spherical Surfaces
Whye-Kei Lye and Michael Reed, Department of Electrical and Computer Engineering, University of Virginia (USA).

438 Design and Development of Microchannel System for Compact Power Generation Using Hydrogen Stored Carbon Nano Tubes

447 Micro Stereo Lithography for Fabrication of 3D MEMS
V. K. Varadan and V. V. Varadan, Center for the Engineering of Electronic and Acoustic Materials and Devices, Pennsylvania State University (USA).

457 Photolithography on Micromachined 3D Surfaces Using Spray Coating Technology of Photoresist
Arief Suriadi, Vineet Sharma, and Thomas Luxbacher, InkJet Supplies Manufacturing Singapore, Technology Advancement Group (TAG), Hewlett Packard (Singapore), and Electronics Vision Group (Austria).

DESIGN, MODELLING AND SIMULATION

467 Molecular Block DSMC Model for the Flows at Low Mach Number in MEMS
L. S. Pan, T. Y. Ng, D. Xu, and K. Y. Lam, Institute of High Performance Computing (Singapore).

477 A Modal Decomposition Technique for Fast Harmonic and Transient Simulation of MEMS
Fouad Bennini, Jan Mehner, and Wolfram Dotzel, Department of Microsystems and Precision Engineering, Chemnitz University of Technology (Germany).

485 Modified Reynolds Equation for Gas Lubrication in Transition Regime Using SDR Slip Model
E. Y-K. Ng and N. Y. Liu, School of Mechanical & Production Engineering, Nanyang Technological University (Singapore).

493 Backpropagation-Based Generation of Dynamic Macromodels for Transient MEMS Devices Analysis
Francis E. H. Tay, Andojo Ongkodjojo Ong, and Yung C. Liang, Department of Mechanical Engineering, Department of Electrical and Computer Engineering, National University of Singapore, and Micro- & Nano-Systems Laboratories, Institute of Materials Research and Engineering (Singapore).

503 Web-Based Knowledge Intensive Collaborative Design Framework for MEMS
X. F. Zha and H. Du, School of Mechanical and Production Engineering, Nanyang Technological University (Singapore).

514 Modelling and Simulation of a Vibratory Wheel Gyroscope
Low Li San and Francis E. H. Tay, Department of Mechanical Engineering, National University of Singapore (Singapore).

TESTING & CHARACTERISATION AND STRUCTURAL STRESS

519 Nanometer Resolution of Three-Dimensional Motion Using Mirau Interferometric
Salil P. Desai and Dennis M. Freeman, Research Laboratory of Electronics, Massachusetts Institute of Technology (USA).
527 Residual Stress of EN Film and Its Relationship with Structural Properties for MEMS Applications
Seung Hwan Yi, Seong Jeon Kim, and Eun Sok Kim, Department of Electrical Engineering, University of Hawaii at Manoa (USA), Department of Electrical Engineering, Kyung Nam University (Korea), and Department of EE-Electrophysics, University of Southern California (USA).

534 A Novel Method Determining Uniform Residual Stress and Gradient Residual Stress in Micromachined Beams by Measuring Pull-In Voltage
Cong-Shun Wang, Sheng Chang, and Jing Fang, Department of Mechanics and Engineering Science, Peking University (P. R. China).

MEMS EDUCATION

541 MST-Decreasing of the Dimensions; Education and Training - Increasing of the Knowledge
Gordana Popovic, Werner Brenner, and Helmut Detter, Institut fur Mikro- und Feinwerktechnik, Technische Universitat Wien (TU Wien) and Austrian Society for Microsystem Technologies (OGMS) (Austria).

549 Student Education in Microsystems
Miroslav Husak, Department of Microelectronics, Czech Technical University in Prague (Czech Republic).

559 Continuous Education in Microsystems
Philippe Fischer, Marcel Ecabert, and Michel Berger, Swiss Foundation for Research in Microtechnology, and Mib-Genie Logiciel (Switzerland).

PACKAGING

565 A Method for Singulation of Silicon Based MEMS Devices Using Deep Trench Etching Process
Ranganathan Nagarajan and C. S. Premachandran, Institute of Microelectronics (Singapore).

570 Anodic Bonding: A Wafer Scale Packaging Technique for MEMS Devices
Tony Rogers and Jan Kowal, Applied Microengineering Ltd. (UK).

577 The Study of a Novel Vacuum Packaging for Microgyroscope
Yufeng Jin, Jinwen Zhang, Rong Zhang, Yilong Hao and Guoying Wu, National Key Laboratory for Nano/Micro Fabrication Technology, Institute of Microelectronics, Peking University, and Department of Precision Instrument, Tsinghua University (China).

582 Anisotropically Etched Si Multi-Chip-Carrier and Die with Backside Interconnect
Frank Berauer, Vineet Sharma, Arief Suriadi, Alfred Pan, and Hubert Vanderplas, Technology Advancement Group, Hewlett-Packard (Singapore), and HP Labs (USA).

MICRO-ROBOTS

587 A Semi-Automatic, Modular Microassembly Station Assisted by Image Processing
Elias Chatzitheodoridis, Dragan Petrovic, Ana Almansa, Oscar Del Medico, Gordana Popovic, and Helmut Detter, Institut fuer Mikro- und Feinwerktechnik, Technical University of Wien (Austria).

595 Handling and Assembly in MST - Results of the European HAFAM Network

603 Si-NiTi Shape Memory Alloy Tweezers

612 High Precision Identification of Microrobot Inverse Kinematics Using Iterative Learning Approach
Jian-Xin Xu, Tong Heng Lee, Heng-Wei Zhang, and H. Hashimoto, Department of Electrical and Computer Engineering, National University of Singapore (Singapore), and University of Tokyo (Japan).

619 Modelling Contact of Microparts with Fixed Fences Subjected to External Vibration
D. -A. Wang, Department of Mechanical Engineering, University of Michigan, Ann Arbor (USA).

626 The Study on Intelligent Control of Traveling End-Velocity for Flexible Mechanical Arms
M. Z. Liu and C. X. Liu, Research Institute of Mechatronic, Xidian University (P. R. China).
ASIC

633 Pressure Microsensor for Wireless Measurement
Miroslav Husak, Department of Microelectronics, Czech Technical University in Prague (Czech Republic).

643 Oscillator Based on MEMS Resonator Using an Automatic Gain Controllable Transimpedance Amplifier
Robert Olivier, Amendola Gilles, Chen Hua, Francois Olivier, and Gigan Olivier, ELMI Laboratory of Group ESEIE (France).

653 Integrated FPGA Based ASIC Design on Error Code Correction Counter for Optical Data Storage MEMS

POSTER PAPERS:

662 Multiple Architecture Modeling Design Method for Mixed Signal and Multi Domain System Simulation - First Solutions
Michael Schlegel, Goran Herrmann, and Dietmar Muller, Faculty of Electrical Engineering and Information Technology, Chemnitz University of Technology (Germany).

668 Sub-Debye-Length Resolved C-V Profiling of the n+ - n – n' Microstructures Using Inverse Modelling
Michail F. Kokorev, Nikolai A. Maleev, and Dmitriy V. Pakhnin, Radioengineering and Electronics Department, State Electrotechnical University of Saint-Petersburg, and A. F. Ioffe Physico-Technical Institute, Russian Academy of Science (Russia).

673 SiN Beam Resonant Pressure Sensors Using Sacrificial Porous Silicon
Chen Deyong, Cui Dafu, Wang Li, Yu Zhongyao, Cui Zheng, and Xia Shanhong, Institute of Electronics, Chinese Academy of Sciences, State Key Laboratories of Transducer Technology (P. R. China).

678 Package for Uncooled Thin Film IR Detector and Its Readout Electronics
Markus Kohli, Bert Willing, and Peter Ryser, Institute of Production in Microengineering, Swiss Federal Institute of Technology Lausanne (Switzerland).

683 Wide Tuning Ranged MEMS Varactors with Digital Selectable Capacitance
Chun-Hsien Lee, Shu-Hui Tsai, Chung-Hsien Lin, Kuan-Jen Fang, Ju-Mei Lu, Chengkuo Lee, and Weileun Fang, QIC Engineering Corp., and Department of Power Mechanical Engineering, National Tsing Hua University (Taiwan).

689 Fabrication and Characterization of Pyroelectric Infrared Sensor on Si3N4/SiO2 Membrane
Sun Ling Ling, Liu Wei Guo, Tan Ooi Kiang, and Zhu Wei Guang, Microelectronics Center, School of Electrical and Electronic Engineering, Nanyang Technological University (Singapore).

695 A Micromachined Permanent Magnetic Actuator
Mingsheng Zhang, Guangya Zhou, Xiaolin Zhao, and Bingchu Cai, Data Storage Institute, (Singapore), and Information Storage Research Center, Shanghai Jiao Tong University (China).

700 Surface Tension Driven Flow in Micro Channels
Quanbo Zou, Uppili Sridhar, Yu Chen, and Janak Singh, Institute of Microelectronics (Singapore).

706 Design and Fabrication of Surface Micro-Machined Test Chip
Brien Chua Jianwen, Lim Chee Siong, Soon Liling Elaine, and Ravindra S. Kanhere, Temasek Engineering School, Temasek Polytechnic (Singapore).

711 MEMS Design House and Foundry Partnership
Rob Santilli, Applied Microengineering Ltd.(AML) (UK).

715 Development of a Thin Film Cross-Linked, Polymer-Based Capacitive Humidity Sensor and Its Packaging
Tsutomu Ogura, Sachiko Obara, Tetsuya Miyagishi, and Takaaki Kuroiwa, Research & Development Headquarters, Yamatake Corporation (Japan).
Microfluidic Devices Based on PCB-Technology
Nam-Trung Nguyen and Xiaoyang Huang, School of Mechanical and Production Engineering, Nanyang Technological University (Singapore).

DNA Chips for Detection of Waterborne Pathogens – Error Sources and Control in Fabrication and Hybridisation
Rongjing Xie, Environmental Technology Institute, Innovation Centre, Nanyang Technological University (Singapore).

Microloading Effect in High-Aspect-Ratio Etching Process in MEMS Fabrication
Ee Ling Yap, Daniel Chong, Won Jong Yoo, Sreelal Pillai, and Ganesh Samudra, Department of Electrical and Computer Engineering, National University of Singapore (Singapore).

Intelligent Control for a Micromachined Tunnelling Accelerometer
Michael Kraft and Elena Gaura, Microelectronics Centre, University of Southampton, and School of Mathematical and Information Sciences, Coventry University (UK).

Porous Silicon as a Sacrificial Layer in Production of Silicon Diaphragms by Precision Grinding
A. Prochaska, S. J. N. Mitchell, and H. S. Gamble, School of Electrical and Electronic Engineering, The Queen’s University of Belfast (UK).

A Novel Microfabrication Technique of Thin Single-Crystal Silicon Cantilever Beams for Scanning Probe Microscopy Applications
A. Gupta, J. Denton, G. W. Neudeck, and R. Bashir, School of Electrical & Computer Engineering, Department of Biomedical Engineering, Purdue University, West Lafayette (USA).

A Small and High Performance Piezoresistive Pressure Sensor
Masayuki Yoneda, Hirofumi Tojo, Tatsufumi Yano, Yasuhiro Gosyoo, and Takeshi Fukiura, Research & Development Headquarters, Yamatake Corporation (Japan).
