Progress in Thermochemical Biomass Conversion

Volume 1

Edited by

A. V. Bridgwater

Director of the Bio-Energy Research Group in Chemical Engineering and Applied Chemistry
Aston University, Aston Triangle
Birmingham, UK

Contents

Volume 1

Preface xvii
Acknowledgements xviii

Gasification

Progress in biomass gasification: An overview 1
Maniatis K

Steam gasification of wood char and the effect of hydrogen inhibition on the chemical kinetics 32
Barrio M, Gøbel B, Risnes H, Henriksen U, Hustad JE
Sørensen LH

CO₂ gasification of birch char and the effect of CO inhibition on the calculation of chemical kinetics 47
Barrio M, Hustad JE

CO₂ reactivity of chars from wheat, spruce and coal 61
Risnes H, Sørensen LH, Hustad JE

Gasification reactivity of charcoal with CO₂ at elevated conversion levels 73
Struis RPWJ, von Scala C, Stucki S, Prins R

Dynamic modelling of char gasification in a fixed-bed 92
Gøbel B, Henriksen U, Qvale B, Houbak N

Biomass treatment in supercritical water. The way from total oxidation to the gasification 109
Boukis N, Abeln J, Kluth M, Kruse A, Schmieder H, Dinjus E

Characterisation method of biomass ash for gasification 122
Moilanen A, Sørensen LH, Gustafsson TE, Laatikainen-Luntama J, Kurkela E

</table>
Effect of fuel size and process temperature on fuel gas quality from CFB gasification of biomass
van der Drift A, van Doorn J

Biomass ash - bed material interaction leading to agglomeration in fluidised bed combustion and gasification
Visser HJM, Hofmans H, Huijnen H, Kastelein R, Kiel JHA

CASST: A new and advanced process for biomass gasification
den Uil H

Development of a novel, reverse-flow, slagging gasifier
van de Beld B, Assink D, Brammer J, Bridgwater AV

Study of biomass gasifier-engine systems with integrated drying for combined heat and power
Brammer JG, Bridgwater AV

Fuel-bound nitrogen conversion: results from gasification of biomass in two different small scale fluidized beds
Berg M, Vriesman P, Heginuz E, Sjöström K, Espenäs, B-G

Modelling a CFB biomass gasifier. Part I: Model formulation
Corella J, Toledo JM

Influence of the reaction atmosphere on gas production and composition in the catalytic conversion of biomass
Garcia L, Salvador ML, Arauzo J, Bilbao R

The effect of alkali metal on the catalytic gasification of rice straw over nickel catalysts supported on kieselguhr

Hot gas filtration via a novel mobile granular filter
Abatzoglou N, Gagnon M, Chornet E

Design of a moving bed granular filter for biomass gasification
Brown RC, Smeenk J, Wistrom C

Redox process for the production of clean hydrogen from biomass
Biollaz S, Sturzenegger M, Stucki S
Hydrogen production from biomass by low temperature catalytic gasification
Minowa T, Fang Z

Production of substitute natural gas by biomass hydrogasification
Mozaffarian M, Zwart RWR

A study of carbon dioxide mitigation effect by biomass energy plantation for electricity and methanol
Yokoyama S-Y, Tahara K

A small-scale stratified downdraft gasifier coupled to a gas engine for combined heat and power production
Barrio M, Fossum M, Hustad JE

Small scale biomass gasification: Development of a gas cleaning system for power generation
Walker M, Jackson G, Peacocke GVC

Gas mixing in a pilot scale (500 kWth) air blown circulating fluidised bed biomass gasifier
Kersten SRA, Moonen RHW, Prins W, van Swaaij WPM

A demonstration project for biomass gasification and power generation in China
Wu C, Yin X, Zheng S, Huang H, Chen Y

Pressurised gasification of biomass and fossil fuels in fluidised bed gasifiers, hot gas cleanup using ceramic filters and pressurised product gas combustion
de Jong W, Ünal Ö, Hoppestein P, Andries J, Hein KRG

Tri-generation from biomass and residues; options for the co-production of Fischer-Tropsch liquids, electricity, and heat
Daey Ouwens C, den Uil H, Boerrigter H

Concept for a decentralised combined heat and power generation unit for biomass gasification
Biomass power generation: Sugar cane bagasse and trash

Waldheim L, Morris M, Leal MRLV

Ammonia formation and NOx emissions with various biomass and waste fuels at the Värnamo 18 MWth IGCC plant

Tar formation in the 18 MWth biomass IGCC plant in Värnamo and in a 90 kWth pressurised fluidised bed gasifier at Lund University

Padban N, Hansson S, Neergaard M, Ståhl K, Odenbrand I

Final report: Värnamo demonstration programme

Ståhl K, Neergaard M, Nieminen J

Combustion

Examining the thermal behaviour of biomass ash by various analytical techniques

Arvelakis S, Gehrmann H, Beckmann M, Koukios EG

Measuring and modelling the gas residence time distribution in biomass furnaces

Biollaz S, Nussbaumer Th, Onder CH

A general model for the investigation of packed bed combustion with respect to wood

Bruch C, Peters B, Nussbaumer T

Reactor network modeling of a biomass dedicated swirling combustor and a fluidized bed gasifier

El Asri R, Konnov AA, De Ruyck J

New test method to determine efficiency and emissions of slow heat release appliances burning solid fuel

Gaegauf CK, Macquat Y

Prediction of combustion characteristics for woody biomass fuels – heat output

Li J, Gifford K, Senelwa K, Hooper RJ, Clemens A, Gong D
Parametric modeling study of volatile nitrogen conversion to NO and N₂O during biomass combustion

Löffler G, Winter F, Hofbauer H

Profile measurements and modelling studies for optimisation of combustion processes in wood firing systems

Unterberger S, Gaegauf CK, Berger R, Hein KRG

Visualization and analysis of SEM-EDS data of quartz-bed agglomerates

Virtanen ME, Tiainen MS, Pudas M, Laitinen RS

Model and simulation of heat exchangers and drying silo in a new type of a boiler plant

Yrjölä J

Testing & modelling the wood-gas turbo stove

Reed TB, Anselmo E, Kircher K

Effect of GR GRANULE used as bed material to reduce agglomeration in BFB combustion of biomass with high alkali metal content

Daavitsainen JH, Laitinen RS, Nuutinen LH, Ollila HJ, Tiainen MS, Virtanen ME

Elemental gas-particle partitioning in fluidized bed combustion and gasification of a biomass fuel

Pfaff D, Jenkins BM, Turn SQ

Evaluation of a novel granular bed filtration system for high temperature applications

Risnes H, Sönju OK

Combustion processes in a biomass fuel bed – experimental results

Rönnbäck M, Axell M, Gustavsson L, Thunman H, Leckner B

Combustion performance of New Zealand grown biofuels

Senelwa K, Gifford J, Li J, Hooper RJ, Clemens A, Gong D
Operating parameters for the circulating fluidised bed (CFB) combustion of biomass
Smolders K, Honsbein D, Baeyens J

Agglomeration and the content of amorphous material in FB combustion. A full-scale boiler test
Daavitsainen JHA, Nuutinen LH, Tiainen MS, Laitinen RS

Co-combustion of different waste wood species with lignite in an industrial steam boiler with a moving stoker firing system
Grammelis P, Vourliotis P, Kakaras E

Biomass and waste-to-energy conversion in the Netherlands by means of (in)direct co-combustion: status, projects and future applications in the Dutch utility sector
Konings AJA, Meijer R, Rozendaal CM, Ruijgrok WJA, de Vries R

Whole tree energy power plant
Ragland KW, Ostlie LD, Berg DA

Influence of ash composition on slagging and defluidisation in a biomass fired commercial CFB boiler
Tranvik AE, Sanati M, Zethraeus B, Lyberg M

Utilisation of bagasse residues in power production
Beckman D, Solantausta Y

Use of thermo-economic analysis based on exergy concepts to evaluate the cost of electricity from sugar cane bagasse in the Brazilian sugar cane sector
Coelho ST, Moreira JR, Zylbersztajn D

Competitiveness assessment of applications of thermochemical biomass conversion technologies
Lauer M, Pogoreutz M

A comparison of using wood pellets and fast pyrolysis liquid industrially for heat production within Stockholm
Östman A, Lindman EK, Solantausta Y, Beckman D
Development of catalytic wood fired boiler: integrated, deactivation and regeneration of net-based catalysts
Berg M, Hargitai T, Brandin J, Berge N

Combustion of chlorine-containing biomass: V$_2$O$_5$-WO$_3$-TiO$_2$ monoliths for Cl-VOCs abatement in the flue exit gas. Part I
Corella J, Toledo JM, Gutiérrez M

Biomass burner designed to reduce nanoparticle emissions
Gaegauf CK, Wieser U, Unterberger S, Hein KRG

Emission of UHC and CO from a biomass furnace
Griselin N, Bai XS

NO$_x$ reduction of biomass combustion by optimized combustion chamber design and combustion control
Padinger R

Polycyclic aromatic hydrocarbons associated to particle size emitted from biomass fluidised bed combustion

Fuel staging for NO$_x$ reduction in automatic wood furnaces
Salzmann R, Nussbaumer Th

Estimate of the net CO$_2$ reduction by replacing coal and oil with biomass in Japan
Dote Y, Ogi T, Yokoyama S

The importance of bioenergy and its utilization technologies evaluated by a global energy and land use model
Yamamoto H, Fujino J, Yamaji K

Volume 2

Pyrolysis

An overview of fast pyrolysis
Bridgewater AV, Czernik S, Piskorz J
