A special thank is due to the following companies for their kind contribution to the organization of the Conference:

AVA CON S.A.
Industrialdea Pab 3-6, 01400 Llodio - Spain
Phone +34-(0)4/6725736
Fax +34-(0)4/6726108
e-mail: avacon@arrakis.es

HORN GLASS INDUSTRIES AG
Bergstrasse 2, D-95703 Plössberg - Germany
Phone +49-(0)9636/92040
Fax +49-(0)9636/920410
e-mail: info@hornglas.de

JSJ JODEIT GmbH
Am Nasstal 10, D-07751 Jena-Maua - Germany
Phone +49-(0)3641/622920
Fax +49-(0)3641/622940
e-mail:jodeit@jsj.de
CONTENTS

First Session: Electric Forehearths
Chairman: Heiko Hessenkemper (T.U. Bergakademie Freiberg University - Germany)

- Electric Forehearths - Design Features for volatile and other glasses
  Richard A. Stormont (Electroglass Ltd. - United Kingdom) pg. 1

- Conditioning for good gobs
  Vlado Segon (F.I.C. (UK) Ltd. - United Kingdom) pg. 6

Second Session: Conventional heating forehearths
Chairman: Ovidio Dri (Zignago Vetro S.p.A. - Italy)

- The influence of forehearth size and geometry on temperature homogeneity
  Peter Vilk (BH-F (Engineering) Ltd. - United Kingdom) pg. 14

- Optimization of glass conditioning in high-pulled forehearths (> 100 T/d) with a complicated lay-out
  Alessandro Merli (Tarkus Refractories S.r.l. - Italy) pg. 31

- Homogeneity: what does this mean for "Pack to Melt"?
  Rodney Rostron (Parkinson-Spencer Refractories Ltd. - United Kingdom) pg. 33

- Glass conditioning: matching the forehearth and feeder
  Matthew Hyre (Emhart Glass - U.S.A.) pg. 39

- Modern developments in the gas heating systems for working ends and forehearths
  Richard Sims (Nikolaus Sorg GmbH & Co KG - Germany) pg. 48
Third session: New solutions to improve forehearth performance
Chairman: Peter Vilk (BH-F (Engineering) Ltd. - United Kingdom)

- Basic considerations and technical aspects concerning glass conditioning
  Heiko Hessenkemper (T.U. Bergakademie Freiberg University - Germany) pg. 56

- VisControl: stabilising the glass production process by controlling the viscosity
  Zimmermann, H., Merkwitz, M., Strack, A. (SiliTec Ingenieurgesellschaft für Silicattechnik mbH-Germany) pg.62

Fourth session: Advanced systems for forehearth control
Chairman: Richard Sims (Nikolaus Sorg GmbH & Co KG - Germany)

- Trends in modern control technology
  Gunnar Bengtsson (First Control Systems AB - Sweden) pg. 69

- Mathematical models of glass melt flux and channels planning criteria
  Alberto Biavati (Bormioli Rocco & Figlio S.p.A. - Italy)
  Corrado Araldi (Bormioli Rocco & Figlio S.p.A. - Italy) pg. 70

- ProfileExpert - A software package for the control of glass and atmosphere temperature profiles in forehearths by Siemens"
  Stefan Bergold (Siemens AG, A&D - Germany)
  Piet van Santen (IPCOS Technology b.v. - The Netherlands) pg. 84

- Advanced control of the forehearth - Experiences with use of expert system ESII"
  Josef Chmelar*, Erik Muysenberg**, Robert Bodi*, Frantisek Matustik*
  (*Glass Service Inc. - Czech Republic, **Glass Service BV - The Netherlands) pg. 93
