Second Workshop on

Ice Slurries

Of the International Institute of Refrigeration

Edited by

J. GUILPART, L. FOURNAISON
Second Workshop on Ice Slurries of the International Institute of Refrigeration, 25-26 May 2000
Hôtel de l’Industrie- 4 Place Saint Germain des Prés- Paris

CONTENTS

Opening Speech  P. W. Egolf  5

First session (chairman R. List)

Calculation method of thermophysical properties for ammonia water mixtures  R. Lugo, J. Guilpart, L. Fournaison - Cemagref - France  10

A thermodynamic parameter to choose secondary coolant fluid  G. Grazzini, P. Ferraro - Department of Energy Engineering- University of Firenze- Italy  20

Friction losses for flow of concentrated slurries  B. Stutz, P. Reghem, O. Martinez – Laboratoire de Thermodynamique et Énergétique- Université de Pau- France  29

Viscosity of ice slurry  T. Hansen, M. Kauffeld, K. Grosser, R. Zimmermann – DTI - Denmark  38

Second session (chairman Ch. Snoek)

Viscometry applied to the Bingham substance ice slurry  B. Frei, P. W. Egolf – UASCS/Empa – Switzerland  48

Ice nucleation and freezing of water  R. List - Department of Physics- University of Toronto- Canada  61

Visualization of ice slurries and ice slurry flows  O. Sari, D. Vuarnoz, F. Meili, P. W. Egolf – UASWS/EMPA - Switzerland  68

Third session (chairman S. Fukusako)

Microscale analysis of effective additives for inhibiting recrystallization in ice slurries  T. Inada, S. S. Lu, S. Grandum, A. Yabe, X. Zhang- Mechanical Engineering Laboratory- Ibaraki- Japan  84
Experimental and numerical investigations of ice slurry generator performance
M. Kawaji, E. Stamatiou, R. Hong, J.J. Xu, D.Y. Shang, V. Goldstein-
Department of Chemical Engineering and Applied Chemistry- University of
Toronto- Canada

Ice slurry production with a fluidised bed heat exchanger
J.W. Meewisse, C.A. Infante Ferreira- Laboratory of Refrigerating Engineering,
and Indoor Climate Technology- Delft University of Technology- Holland

Fourth session (chairman R. Jans)

Supercooled slurry ice production. First results from a test plant
J.P. Bédécarrats, F. Strub, J.P. Dumas, G. Roset – Laboratoire de
Thermodynamique et Énergétique- Université de Pau- France

Production mechanism of ice slurry on the oscillatory moving cooled wall
S. Fukusako, M. Yamada, H. Kawabe – Division of Mechanical Science-
Hokkaido University- Japan

Development of active control method for supercooling releasing of water
D. Mito, M. Tanino, Y. Kosawa, T. Inada – Takasago Thermal Engineering Co
Ltd- Japan

Thermodynamics of moving and melting ice slurries

List of participants
