# TABLE OF CONTENTS

## CASE HISTORIES I

### A Integration of Well Log, Core, Borehole Seismic and Crosswell Seismic Data: A Powerful Tool to Solve Complex Structural Situations; German Gomez, Carlos Planchart, Yu-Taik Chon (Baker Atlas), Alvaro Di Massimo, Gledys Gonzalez, Edgar Sifontes and Dunia Octavio (PDVSA)

### B Grain Density Correction of the Density Log; A Core-Log Calibration Method for Improved Porosity Prediction in Mineralized Micaceous Sandstone Reservoirs; Trym Elseth, Rune Nicolaysen and David Roberts (Norsk Hydro E&P)

### C Application of Improved Method for Permeability Estimation in Complex Lithology Reservoirs; Mark Skalinski and Michael Sullivan (Chevron)

## CLASTIC EVALUATION

### D Proposed Methodology to Integrate NMR Data and Horizontal Resistivity in a Shaly Sand Model Using Shale Distribution Volumetrics; Rick Mollison (Baker Atlas) and Tommy Ragland (Consultant)

### E The Iterative Use of Clustering and Modeling to Improve Permeability Prediction; Philippe Rabiller, Jean-Pierre Leduc (TotalFinaElf) and Shin-Ju Ye (Halliburton Energy Services)

### F Condensate Liquid Yield Calculations by Combining Open Hole and Pulsed Neutron Logs; Richard Merkel (System Technology Associates) and Michael Uland (iReservoir.com)

### G New Log and Core Analysis Methods for an Enhanced Shaly Sand Saturation, Using a $m^*$ Varying with the Clay Content; Jacques Ventre and Benoît Levallois (TotalFinaElf)

## CARBONATE EVALUATION

### H An Integrated Approach to Characterizing Non-Primary Porosity in a Reefal Reservoir; Hani Elshahawi, Theodore Klimentos, Nouri Bachir and Indrajit Bandyopadhyay (Schlumberger Oilfield Services)

### I Identification of High-Permeability Dolomitized Zones Using Inelastic Magnesium Yield; James Hemingway (Schlumberger), Manabu Doi (Arabian Oil Company) and Nabeel Adani (Schlumberger)
J A Micro-Structural Model for Compressional and Shear Slownesses Interpretation in Carbonates; Alain Brie (Schlumberger)

K The Practical Application of NMR Logging in Carbonates: 3 Case Studies; D.F. Allen, A. Boyd, J. Massey (Schlumberger-Doll Research), E.J.Fordham (Schlumberger Cambridge Research), M.O. Amabeoku (Saudi Aramco), W.E. Kenyon (Consultant) and W.B. Ward (Earthworks LLC)

L Applications of NMR Logging in Synthetic Oil-Base Muds in the Sirikit West Field, Onshore Thailand; Robert Walsh (Thai Shell E&P Company, Ltd), Raghu Ramamoorthy and Azhan Mohamed (Schlumberger Malaysia)

PORE PRESSURE/FLUID SAMPLING/ROCK MECHANICS

M Downhole Determination of GOR on Single-Phase Fluids by Optical Spectroscopy; Oliver Mullins (Schlumberger-Doll Research), Gary F. Beck (BP Deepwater Exploration), Myrt Cribbs (Texaco International Exploration), Toru Terabayashi and Kazuyoshi Kegasawa (Schlumberger K.K.)

N The Downhole NMR Fluid Analyzer; M.G. Prammer, J. Bouton and P. Masak, (NUMAR, Halliburton)

O A Case Study of Rock-Mechanical Property Evaluation and Sanding Analysis in Very Porous Hydrocarbon-Bearing Sands; T. Klimentos (Schlumberger) and S. Hassan (Petrobel)

MULTI-COMPONENT INDUCTION LOGGING

P Fast Modeling of a Tensor Induction Tool Response in a Horizontal Well in Inhomogeneous Anisotropic Formations; Arvidas Cheryauka and Michael Zhdanov (University of Utah)

Q Simultaneous Determination of Relative Angles and Anisotropic Resistivity Using Multicomponent Induction Logging Data; Zhiyi Zhang, Liming Yu, Berthold Kriegshausen and Raghu Chunduru (Baker Atlas)

R Principles of Tensor Induction Well Logging in a Deviated Well in an Anisotropic Medium; Michael Zhdanov (Univ. of Utah), W. David Kennedy (ExxonMobil Upstream Research Co.), Arvidas Cheryauka and Ertan Peksen (Univ. of Utah)

S Improved Shaly Sand Interpretation in Highly Deviated and Horizontal Wells Using Multicomponent Induction Log Data; B.F. Kriegshausen, O.N. Fanini, L. Yu (Baker Atlas), M.v.d. Horst (Shell UK E&P) and J. van Popta (Shell EP Technology)

T Impact of Multicomponent Induction Technology on a Deepwater Turbidite Sand Hydrocarbon Saturation Evaluation; R.A. Mollison, O.N. Fanini, B.F. Kriegshausen, L. Yu (Baker Atlas), G. Ugueto (Shell Exploration and Production) and J. van Popta (Shell EP Technology)
Neural Network Inversion of Array Induction Logging Data for Dipping Beds; L. San Martin, D. Chen, T. Hagiwara (Halliburton Energy Services), R. Strickland, S. Gianzero (Consultants) and M. Hagan (Oklahoma State University)

**PRODUCTION LOGGING/CASED HOLE**

A New Multiphase Holdup Tool for Horizontal Wells; Nicholas Ryan and Derek Hayes (Sondex Ltd. UK)

Field Experience and Results Obtained with an Improved Carbon/Oxygen Logging System for Reservoir Optimization; Jerome Truax, Larry Jacobson, Gary Simpson, Dennis Durbin and Quintilio Vasquez (Halliburton Energy Services)

Advanced Ultrasonic Scanning Tool and Evaluation Methods Improve and Standardize Casing Inspection; Gary Frisch and Batakrishna Mandal (Halliburton Energy Services)

Optimizing Water Injection Performance Using Cased Hole Spectroscopy and Production Monitoring Logs; Hani Elshahawi and Khaled Gad (Schlumberger Oilfield Services)

**POSTERS**

Using the Resistivity and GR Log for Guide Control ± 415 m Slimhole Horwell Section in the 3-5 m Baturaja Limestone Oil-Rim Thickness, Between Gas Cap and Water Zone at Musi-28 Well, Prabumulih, South Sumatera; Untung Budi Santoso, Wahabi (Pertamina Daerah Operasi Hulu Prabumulih) and Kadarusman Sunarto (Schlumberger Geoquest)

Stress-Induced Borehole Elongation Upto 3.6 KM Depth in the Cauvery Basin, India; Rima Chatterjee and Manoj Mukhopadhyay (Indian School of Mines)

Vertical Resistivity Estimation with Toroidal Antennas in Transversely Isotropic Media; Alexandre Karinski and Aleksandr Mousatov (Mexican Petroleum Institute)

Determining Resistivity Anisotropy by Joint Lateral and Induction Logs; Wei Yang (University of Petroleum, Beijing)

Evaluation of Models and Methods for NMR Total Porosity and Permeability Estimation; Gigi Zhang, Songhua Chen, and Sheng Fang (Baker Atlas)

Experimental Study and Theoretical Analyses of Formation Resistivity Under Fresh Water Flooding; Yi-ren Fan, Shao-gui Deng (University of Petroleum, China), Can-can Zhou (Institute of Exploration and Development of Jidong Oil Field, China) and Bing-kai Liu (Shengli Oil Field, China)

Application of NMR Logging for Heavy Oil Identification and Quantification in Oil-Based-Mud Environments; Solon Padilha (Schlumberger Oilfield Services), Pascal Baudot (TotalFinaElf)
Understanding Multicomponent Induction Logs in a 3-D Borehole Environment; Tsili Wang, Liming Yu, Otto Fanini, Berthold Kriegshauser and Gulamabas Merchant (Baker Atlas)

Enhanced Anisotropy from Joint Processing of Multi-Component and Multi-Array Induction Tools; M. Rabinovich and L. Tabarovsky (Baker Atlas)

NMR and Acoustic Signatures in Vuggy Carbonate Aquifers; J.O. Parra, C.L. Hackert (Southwest Research Institute), H.A. Collier (Collier Consulting, Inc.) and M. Bennett (South Florida Water Management District)

High Vertical Resolution Spectral Gamma Ray Logging: A New Tool Development and Field Test Results; D. Goldberg and A. Meltser, (Lamont-Doherty Earth Observatory of Columbia University)

MWD/MUD LOGGING DEVELOPMENTS

Grappling with LWD Resistivity Logs. What are Rt and Rx0?; Tom Schroeder (PathFinder Energy Services, Inc.)

New Discovery with Important Implications for LWD Propagation Resistivity Processing and Interpretation; S. Mark Haugland (PathFinder Energy Services, Inc.)

Shear Acoustic Porosity and Velocity Ratio Analysis Using Sonic LWD in the Dunbar Field (UK North Sea); Paul Boonen, Jon Hill (PathFinder Energy Services), Trevor Coombes and Steve Holehouse (TotalFinaElf Exploration UK plc)

Membrane-Based Gas Sensing for Robust Pay Identification; Dennis Dria, David Stewart (Shell International E&P, Inc.), James Morrison (Shell Exploration & Production Co.) and Aurel Brumboiu (Datalog, Inc.)

SEISMIC/ACOUSTICS

Detecting Thin Gas Beds in Formations Using Stoneley Wave Reflection and High-Resolution Slowness Measurements; X.M. Tang and D. Patterson (Baker Atlas)

Phase Velocity Processing for Acoustic Logging-While-Drilling Full Waveform Data; Marek Kozak (Magnetic Pulse, Inc.), Paul Boonen and Doug Seifert (PathFinder Energy Services)

Dissolved Gas in Brine: Its Impact on Fluid Substitution; Mike McLean and Mark Alberty (BP Exploration)

Seismic Measurement While Drilling: Conventional Borehole Seismics on LWD; Cengiz Esmersoy, William Underhill and Andrew Hawthorn (Schlumberger Sugar Land Product Center)
Introduction of a New Omni-Directional Acoustic System for Improved Real-Time LWD Sonic Logging – Tool Design and Field Test Results; Bob Joyce (Baker Hughes INTEQ), Doug Patterson, Jim Leggett and Vladimir Dubinsky (Baker Hughes)

A New Generation Crossed Dipole Logging Tool: Design and Case Histories; Calvin Kessler (Halliburton Energy Services), Abbas Arian, Georgios Varsamis and Larry Wisniewski (Sensor Wise, Inc.)

GEOLOGICAL APPLICATIONS

Electrofacies and Production Prediction Index Determination in El Tordillo Field, San Jorge Basin, Argentina; L.P. Stinco (Tecpetrol S.A.), R.Y. Elphick and W.R. Moore (Schlumberger H-RT)

Sedimentary Bodies Identification Using the Phase Coefficients of the Wavelet Transform; Frédéric Robail (UMII), Philippe Rabiller and Laurent Schulbaum (TotalFinaElf)

Real-Time Logging-While-Drilling Image: Techniques and Applications; Qiming Li, Ted Bornemann, John Rasmus, Hanming Wang, Kyel Hodenfield and John Lovell (Schlumberger)

Field Test Results of a New Oil-Base Mud Formation Imager Tool; P. Cheung, D. Pittman, A. Hayman, R. Laronga, P. Vessereau, A. Ounadjela, O. Desport, S. Hansen, R. Kear, M. Lamb (Schlumberger), T. Borbas and B. Wendt (Conoco)

The Key to Improving the Vertical Resolution of Multi-Frequency NMR Logging Tools; Ridvan Akkurt and Ron Cherry (NMRPLUS, Inc.)

Assessing Production Potential of Heavy Oil Reservoirs from the Orinoco Belt with NMR Logs; Romulo Carmona (PDVSA) and Eric Decoster (Schlumberger de Venezuela)

Interpretation of Restricted Diffusion and Internal Field Gradients in Rock Data; K-J Dunn (Chevron Petroleum Technology Co.), M. Appel, J.J. Freeman (Shell International Exploration & Production, Inc.), J.S. Gardner (Numar/Halliburton), G.J. Hirasaki (Rice University), J.L. Shafer (Reservoir Management Group, Inc.) and G. Zhang (Rice University)

Wireline and LWD NMR Applications in Undersaturated Oil Sands in Deepwater US Gulf of Mexico; G.G. Donovan (Halliburton Energy Services), G. Ugueto C. (Shell Exploration and Production Co.) and N.M. Pellerin (Sperry-Sun, Halliburton Energy Services)
CASE HISTORIES II

DDD Beyond Water Saturation – Induction Logs as Problem Solving Tools; Christopher Skelt (LASMO Plc.), Peter Elkington (Reeves Technologies) and Rainer Busch (Baker Atlas Geoscience)

EEE Water Saturation Analysis and Interpretation of a Tilted Free-Water Level in the Joanne/Judy Chalk Field, U.K. North Sea; R.G. Harris and P.J. Goldsmith (Phillips Petroleum Company UK Ltd.)

FFF Impact of Array Lateral Logs on Saturation Estimations in Two Exploration Wells from Australia; Michael Frenkel (Baker Hughes Technology Center) and Michael Walker (Baker Atlas Geoscience)

GGG Innovative Reservoir Navigation Techniques Ensure Optimal Wellbore Placement; J. Coghill, A. Poppitt, M. Benefield (Baker Hughes INTEQ) and P. Ware (Kerr McGee North Sea UK, Ltd)
