Connections between Steel and Concrete

Volume One

Stuttgart, Germany

10-12 September 2001

Organised by University of Stuttgart

Co-sponsored by ACI, fib, IABSE

Edited by R. Eligehausen

RILEM Publications S.A.R.L.
The Publishing Company of RILEM
Contents

VOLUME ONE
Preface XXI

PART ONE: KEYNOTE LECTURES
1 Where structural steel and concrete meet 1
   J. W. B. Stark and D. A. Hordijk
2 Fastening technique - Current status and future trends 11
   R. Eligehausen, I. Hofacker and S. Lettow

PART TWO: DESIGN
3 Anchoring to concrete: the new ACI approach 31
   J. E. Breen, E.-M. Eichinger and W. Fuchs (Keynote Lecture)
4 Evolution of fastening design methods in Europe 45
   W. Fuchs (Keynote Lecture)
5 Probabilistic calibration of design methods 61
   R. E. Klingner (Keynote Lecture)
6 Current status of post-installed anchor application in Japan 72
   R. Tanaka (Keynote Lecture)
7 Design method for splitting failure mode of fastenings 80
   J. Asmus and R. Eligehausen
8 Behaviour and design of fastenings of shear lugs in concrete 90
   H. Michler and M. Curbach
9 Safety relevant aspects for torque controlled expansion anchors 102
   H. Gassner and E. Wisser
10 Study on standard test methods for post-installed anchors 108
    Y. Hosokawa, K. Nakano, Y. Oohaga, S. Usami and K. Imai
11 Static behavior of anchors under combinations of tension and shear loading 118
    D. Lotze, R. E. Klingner and H. L. Graves, III

25 Shear anchoring in concrete close to the edge  
N. Randl and M. John  
26 Behavior of tensile anchors in concrete: statistical analysis and design recommendations  
M. Shirvani, R. E. Klingner and H. L. Graves, III  
27 Performance of single anchors near an edge under varying angles of loading  
R. E. Wollmershauser, U. Nestler and V. Smith  
28 The prequalification of anchors in the United States of America: past, present and future  
R. E. Wollmershauser  
29 On the ratio of plate thickness to stud diameter for steel concrete stud shear connectors  
H. D. Wright, A. Elbadawy and R. Cairns  
30 Incorporation of the size effect and other factors in strength design of concrete fastenings, in the context of the CEB Design Guide  
V. I. Yagust and D. Z. Yankelevsky  

PART THREE: DURABILITY/FIRE  
31 Corrosion behavior of materials in fixing applications  
N. Arnold  
32 Behaviour of post-installed anchors in case of fire  
K. Bergmeister and A. Rieder  
33 Durability of galvanized, post-installed fasteners to concrete  
K. Menzel and B. Hagmayer  
34 Durability of stainless steel connections with respect to corrosion  
U. Nürnberger  
35 Fire resistance of steel anchors in concrete  
M. Reick  

PART FOUR: BONDED ANCHORS  
36 Anchoring with bonded fasteners  
R. A. Cook and R. C. Konz (Keynote Lecture)

PART SIX: NUMERICAL SIMULATION

61 Smeared fracture Finite Element analysis of reinforced concrete structures - Theory and examples
J. Ozbolt (Keynote Lecture)

62 Numerical and experimental investigations of the splitting failure mode of fastenings
J. Asmus and J. Ozbolt

63 Three dimensional modeling of an anchorage to concrete using metal anchor bolts
H. Boussa, G. Mounajed, B. Mesureur and J.-V. Heck

64 Influence of bending compressive stresses on the concrete cone capacity
M. Bruckner, R. Eligehausen and J. Ozbolt

65 ATENA - An advanced tool for engineering analysis of connections
V. Červenka, J. Červenka and R. Pukl

66 A computational model for double-head studs
A. Haufe and E. Ramm

67 Behavior and design of fastenings with headed anchors at the edge under arbitrary loading direction
J. Hofmann, J. Ozbolt and R. Eligehausen

68 Evaluation of a bridge deck strengthening with shear connectors: Finite Element analysis and experimental results
A. J. Leite

VOLUME TWO

69 Numerical analysis of group effect in bonded anchors with different bond strengths
Y.-J. Li and R. Eligehausen

70 Simulation of fastening systems utilizing chemical and mechanical anchors
J. Nienstedt, R. Mattner, U. Nestler and C. Song

71 Headed stud anchor - cyclic loading and creep-cracking interaction of concrete
J. Ozbolt, J. Hofmann and R. Eligehausen
72  Numerical investigations of headed studs with inclined shoulder
    P. Pivonka, R. Lackner and H. A. Mang

73  Simulating a response of connections
    R. Pukl, J. Červenka and V. Červenka

PART SEVEN: APPLICATIONS

74  Non-supported crash barriers – Proof of the concrete resistances
    according to the concrete-capacity-method
    J. Buhler

75  Reconstruction of multi-layer-walls
    E. Dereser and J. Buhler

76  Load carrying capacity of fasteners in concrete railway sleepers
    H. Thun, S. Utsi, L. Elfgren, P. Nilsson and B. Paulsson

77  Anchorage with headed bars in exterior beam-column joints
    J. Hegger and W. Roeser

78  Halfen HDB-S bars as shear reinforcement in slabs and beams
    J. Hegger, K. Fröhlich, R. Beutel and W. Roeser

79  Behaviour of fasteners in concrete with coarse recycled concrete and
    masonry aggregates
    D. A. Hordijk and R. van der Pluijm

80  Regarding strength of anchor bolts used for precast concrete curtain
    wall fasteners
    H. Kawamura, T. Otobe and S. Oka

81  New method of reconstruction - Strengthening of old buildings
    M. Marjanishvili, T. Zuzadze, D. Ramishvili and A. Lebanidze

82  Fastening in masonry
    A. Meyer and T. Pregartner

83  Study on design method of joint panels for hybrid railway rigid-frame
    bridges
    H. Nishida, K. Murata and T. Takayama

84  Tension stiffening model based on bond
    M. A. Polak and K. Blackwell
85 Over-cladding of existing concrete buildings using cold formed light steel sections and composite cladding panels
S. O. Popo-Ola, R. M. Lawson and P. J. Sullivan

86 Redundant structures fixed with concrete fasteners
M. Rößle and R. Eligehausen

87 Numerical and experimental analysis of post-installed rebars spliced with cast-in-place rebars
H. A.Spieth, J. Ožbolt, R. Eligehausen and J. Appl

88 Dowel action of titanium bars connecting marble elements
E. Vintzileou and C. Papadopoulos

89 Case study - Application of high strength post-tensioned rods for anchoring aerial tram structures to rock
G. P. Wheatley

PART EIGHT: SPECIAL FASTENERS

90 Behaviour and design of fastenings with concrete screws
J. H. R. Küenzlen and T. M. Sippel

91 Behaviour and design of anchors for lifting and handling in precast concrete elements
D. Lotze

92 Behaviour of plastic anchors in cracked and uncracked concrete
T. Pregartner and R. Eligehausen

PART NINE: BRIDGES

93 Testing of a dowel connection for a bridge with a concrete deck and a sandwich panel truss structure
H. Blontrock, L. Taerwe, A. Nurchi, J. Vantomme, C. De Roover, J. Wastiels and K. Croes

94 A new step forward for composite bridges
The Bras de la Plaine Bridge
E. Barlet, G. Causse and J.-P. Viallon

95 Anchorage of the steel elements to the concrete piers at the specific pipe bridges over a Danube Bay in Budapest
B. Csiki
Behavior and design of steel girder-to-concrete column connection for a cantilever-construction highway bridge
L. Huang, H. Hikosaka, M. Shimozono and K. Akehashi

PART TEN: COMPOSITE STRUCTURES

Recent developments and chances composite structures
U. Kuhlmann (Keynote Lecture)

Design of lying studs with longitudinal shear force
U. Breuninger

Studies on the ductility of shear connectors when using high-strength steel and high-strength concrete
J. Hegger, G. Sedlacek, P. Döinghaus and H. Trumpf

Experimental investigations on the behaviour of strip shear connectors with powder actuated fasteners
M. Fontana, H. Beck and R. Bärtschi

Design concept of nailed shear connections in composite tube columns
G. Hanswille, H. Beck and T. Neubauer

An experimental study on shear characteristics of Perfobond strip and its rational strength equations
Y. Ushijima, T. Hosaka, K. Mitsuki, H. Watanabe, Y. Tachibana and H. Hiragi

Behavior of lying shear studs in reinforced concrete slabs
U. Kuhlmann and K. Kürschner

Composite bridge with compression joint - Connection concrete end slab to steel girder - Finite Element method
M. V. Lammens

Perfo-bond connection and tests
S. Poot

Development and application of saw-tooth connections for composite structures
J. Schlaich

Geometry, behaviour and design of high capacity saw-tooth connections
V. Schmid
PART ELEVEN: FATIGUE

109 The fatigue behaviour of the shear connection in the hogging region of steel and concrete composite continuous beams under realistic loading
H. Bode and A. Leffer

110 Influence of fatigue loads in tension on short cast-in-place anchors in concrete
E. Cadoni

111 A test proposal for fatigue experimental studies on stud shear connectors
N. Gattesco and E. Giuriani

112 Innovative interface systems for steel-girders/concrete-deck connection
M. K. Tadros, S. S. Badie and A. M. Girgis

PART TWELVE: CONNECTIONS

113 Non-linear analysis of steel-concrete composite beams: a Finite Element model
C. Faella, E. Martinelli and E. Nigro

114 Connections between prestressed concrete bridge decks and composite bridge decks – Hybrid construction
D. Jankowski, O. Fischer and M. Matthes

115 Anchorage behavior of 90-degree hooked beam bars in reinforced concrete wall-beam intersections
O. Joh, Y. Goto and A. Kitano

116 Embedded steel bearings instead of concrete nibs
M. R. Kintscher

117 Anchorage zone in a steel-concrete composite slab with unbonded tendons
H. Koukkari

118 Connections for continuous framing in precast concrete structures
G. Krummel
119 Standoff screws as shear connectors for composite trusses: push-out test results and analysis
   J. R. U. Mujagic, W. S. Easterling and T. M. Murray

120 Experimental study on a new joint for prestressed concrete composite bridge with steel truss web
   K. Furuichi, M. Yamamura, H. Nagumo and K. Yoshida

121 Development and application of embedded connection
   M. Sakurada, T. Yoda, K. Ashiduka and T. Ohura

122 Design and construction of a concrete-filled steel tube joint
   S. P. Schneider, D. R. Kramer and D. L. Sarkkinen

123 Friction slipping behavior between concrete steel – Aiming the development of bolted friction-slipping joint
   T. Yoshioka and M. Ohkubo

PART THIRTEEN: EXPERIMENTAL STUDIES

124 An experimental study on the connection joints between steel girder and reinforced concrete column with various types of embedded load transferring plates
   N. Ando, I. Nishimura and K. Kamo

125 Low-cycle fatigue Behaviour of Pull-Push Specimens with Headed Stud Shear Connectors
   S. Erlicher, O. S. Bursi and R. Zandonini

126 Static tests on various types of shear connectors for composite structures
   H. C. Galjaard and J. C. Walraven

127 Structural monitoring of hybrid specimens at early age using fibre optic sensors
   B. Glisic and D. Inaudi

128 Development of innovative composite system - Between steel and concrete members
   K. Kitagawa, H. Watanabe, Y. Tachibana, H. Hiragi and A. Kurita

129 An experimental study on the bond-slip relationship between the concrete and steel with stud
   K. Konno, A. Farghaly and T. Ueda
130  The behavior of beam-to-box column connection of CFT with air cavity

131  Sheet reinforcement
O. Matthaei, H.-P. Andrä and N. V. Tue

PART FOURTEEN: SLIM FLOOR STRUCTURES

132  Composite girders of reduced height
U. Kuhlmann, J. Fries and A. Rieg

133  Innovative development of light steel composites in buildings
R. M. Lawson, S. O. Popo-Ola and D. N. Varley

134  Intentional and unintentional shear connections in shallow floor composite structures
M. V. Leskelä
