Acid-Base Interactions: Relevance to Adhesion Science and Technology

Volume 2

Editor: K.L. Mittal
## CONTENTS

Preface ix

**Part 1: Fundamental Aspects of Acid-Base Interactions**

"Repulsive acid-base interactions": Fantasy or reality  
*W.V. Chang and X. Qin*  
3

Troubleshooting of surface free energy acid-base theory applied to solid surfaces:  
The case of Good, van Oss and Chaudhury theory  
*C. Della Volpe and S. Siboni*  
55

Contact angle measurements and contact angle interpretation: Relevance to the thermodynamics of adhesion  
*D.Y. Kwok and A.W. Neumann*  
91

On the acid/base theory of contact angles  
*R.J. Good*  
167

Acid-base interactions as the driving force for both hydrophobic attraction and hydrophilic repulsion  
*C.J. van Oss*  
173

Irrelevance of the ratio of the electron-accepticity to the electron-donicity of water with respect to the determination of polar surface tension components, interfacial tensions and free energies of interaction of liquids and/or solids  
*C.J. van Oss*  
181

Electronic properties and modifications of acid-base strengths at non-stoichiometric and polar oxide surfaces  
*F. Finocchi and C. Noguera*  
187

Accurate calculations of core-electron binding energies (CEBEs) via density functional theory: Towards an evidencing of acid-base effects at real interfaces via XPS  
*J. Charlier, C. Bureau, D.P. Chong, S. Kranias and G. Lécayon*  
205

Acid-base interactions at the molecular level: Adhesion and friction studies with interfacial force microscopy  
*A.R. Burns, J.E. Houston, R.W. Carpick and T.A. Michalske*  
223
Quantifying the impact of surface complexation on acid-base interactions
M.A. Butkus and D. Grasso 235

Acid-base interactions on surfaces of wet and dry inorganic oxides
C.I. Contescu and J.A. Schwarz 245

Part 2: Characterization of the Acid-Base Properties of Materials

Characterisation of acid-base properties of polymer surfaces by XPS
M.M. Chehimi, M. Delamar, J. Kurdi, F. Arefi-Khonsari, V. Lavaste and J.F. Watts 275

Determination of the acid-base properties of solid surfaces using Inverse Gas Chromatography: Advantages and limitations
H. Balard, E. Brendle and E. Papirer 299

Surface energy and acid-base properties of solids studied by immersion calorimetry
J.-M. Douillard and V. Médout-Marère 317

Comparison of two procedures for assessing the acidity of polymer surfaces graded in acid content
T.B. Lloyd and J.A. Coleman 349

Comparison of acid-base characterization techniques on lignocellulosic surfaces
D.J. Gardner, S.Q. Shi and W.T. Tze 363

Assessment of acid-base character of polymer surfaces from contact angle and other surface chemical data
F.M. Etzler, J. Simmons, N. Ladyzhynsky, V. Thomas and S. Maru 385

Characterization of acid-base properties of surfaces by contact angle titration: Application to the adhesive bonding of silicon carbide
S. Helt, J. Evieux, Y. Baziard, V. Nassiet and J.-A. Petit 399

Thin layer wicking — Methods for the determination of acid-base free energies of interaction
E. Chibowski 419

Determination of the acid-base properties of the human skin surface: Influence of skin lipids
A. Mavon 439

Acid-base characterization of metallic materials and the use of model molecules in the study of adhesion mechanisms
M.-G. Barthes-Labrousse and J.-C. Joud 453

Acid-base characterization of porous silica particles
J. Bäckman, T. Eklund and J.B. Rosenholm 465

Experimental characterization of hydroxyl groups and acid-base properties on flat oxide surfaces
H. Arribart, M.-J. Azzopardi, J.-M. Berquier, V. Coustet, F. Creuzet, Xue-Yun Lin and J. Jupille 481
Part 3: Applications of Acid-Base Interactions

Acid-base characteristics of polymer surfaces: Relevance to bioadhesion
M. Morra and C. Cassinelli 497

Acid-base interactions in microbial adhesion to hexadecane and chloroform
R. Bos, H.J. Busscher, G.I. Geertsema-Doornbusch and H.C. van der Mei 513

Laser surface modification of ultra-high-strength polyethylene fibers:
Correlation between acid-base interactions and adhesion to epoxies
A.N. Netravali and Q. Song 525

Acid-base interaction in adhesion of polymer particles to silanized silica
in water/n-alcohol mixtures
K. Gotoh, J. Tao and M. Tagawa 539

Effects of acid-base interactions on carbon/polycarbonate composite interfacial
adhesion
R.A. Allred and S.P. Wesson 551

Polymer orientation at solid surfaces: Acid-base interaction origins
and some property responses
A. Leppe, J. Lara and H.P. Schreiber 581

Acid-base interactions in the measurements of surface energies of textile fibers
and finish liquids
Y.K. Kamath and C.J. Dansizer 593

Modifying acid-base surface chemistry on E-glass fibers by acid
leaching processes
L.G. Britcher, S. Graser and J.G. Matisons 601

Effect of PMMA coating on the acid-base interactions of carbonate rock
E. Chibowski and L. Hołysz 615
