Computer Applications in the Minerals Industries

Edited by
Heping Xie, Yuehan Wang & Yaodong Jiang
China University of Mining and Technology, Beijing, China
# Table of contents

**Preface**  
XVII

**Organization Committee and Advisory Board**  
XIX

**APCOM International Council**  
XXI

## 1 Geostatistics, resource estimation and ore body modeling

Valuation of recoverable resources by Kriging, direct condition or simulation  
*D.G. Krige & W. Assibey-Bonsu*  
3

A wireline property index  
*P.A. Dowd & E. Pardo-Igúzquiza*  
9

Restricted Kriging as a combination of OK and IK  
*G. Pan & L. E. Allen*  
15

Evolution of computerized resource estimation at Bingham Canyon, Utah  
25

Correlation of material property and quality variables in a gravel deposit  
*D. R. Hack*  
31

A new calculation of mineral reserves and examination of mineral reserves method – SD method  
*Y. Tang & Y. Lan*  
35

The SAMREC Code seen in a global context  
*F. A. Camisani-Calzolari & D. G. Krige*  
39

Maximum profitability with minimum risk and effort  
*A. J. Richmond*  
45

Three dimensional variogram modeling and Kriging  
*K. Erarslan*  
51

Predicting ore grades in cave rock for large scale sublevel caving  
*M. E. Kuchta*  
57

High resolution detecting of the small faults on the thick coal seam face based on electromagnetic wave computerized tomography
J. Cheng & L. Li

Estimation of mining width for a platinum mine
B. Shi, L. M. Bloom & U. A. Mueller

Coal resource evaluation and management information system in underground mines
Y. Wang, Y. Wang, D. Lian & M. Yang

Fuzzy evaluation on geological conditions of coal seam in China
D. Zhang, X. Zhang & X. Yan

Fault recognition based on improved BP neural network
W. L. Han & Y. D. Zhang

Application of GIS to water-filling in Xiaotun coal mine, Fengfeng Mine Bureau, China
D. Dong, Q. Wu, A. Zhang, X. Sun, G. Sun, Z. Qian & H. Yan

Visual MODFLOW and prevention and cure of mine-water
Q. Wu, D. Liu, D. Dong, P. Chen, S. Li, Y. Jin & X. Wu

Development of analytical system of coal quality and coal species

Computerized mine modeling and planning at Jiangxi Copper Company Limited mines
W. L. Cai, X. Gao & J. G. Ren

The computer monitor-control and collection-processing system in UCG
L. Yang, J. Liang & S. Liu

3 Planning and design for surface and underground mine

A Windows program for incorporating slope design in open pit optimisation
P. A. Dowd, R. Khalokakaie & R. J. Fowell

AI-based comprehensive optimization technology for mining systems analysis
Y. D. Zhang, R. X. Zhang, X. C. Li & W. L. Han

Integrating conditional simulation and stochastic programming: An application in production scheduling
M. L. Smith

Genetic algorithm for the determination of development system in mine
Q. X. Yun & K. M. Huang

Establishment of productive blasthole model and its application in open pit
X. Gao, C. S. Zheng, X. Zhang, Y. Huang & W. L. Cai

Design of open-pit phases with consideration of schedule constraints
W. L. Cai

The mathematical model of optimal processing of ore bloc with components structure
B. R. Rakishev, I. V. Lunkin & K. T. Auezova
The optimal dispatch from the faces for stabilization of ore-stream quality
B.R. Rakishev, Zh. R. Imashev & V.N. Kurillo

Two-level mineralogical and technological modeling of deposits for planning of open mining operations
V. Bysov & V. Korobko

Integrating fault uncertainty into longwall design and planning
S. Li & R. Dimitrakopoulos

Suboptimal solutions in practical operations-research applications
M. M. Hajdasinski

Optimization of pit limit designs by the newly developed BPITC approach
C. Dindiwe & K. Sasaki

Optimization of grouped open pits
N. C. Quang & D. N. Trung

Optimizing ultimate open pit limits with quality constraints
F. M. Ferreira & G. De Tomi

Analysis of maximum flow algorithms for ultimate pit contour problems
M. Gamache & G. Auger

Production planning for underground mining operation under uncertainty

Water quality prediction model in open limestone systems
L. McDonald, Q. Sun, J. Skousen & P. Ziembkiewicz

DEM study of the drawing law in longwall top-coal caving mining
Q. Fu & J. Wu

The module of CAD software system in mining and its application
Z. Lin, X. Yan, H. Ren & J. Tang

Decision support system of coal mine exploitation disposition
X. Zuo, X. Zhang, Y. Wang, Y. Xu & W. Tao

A theorem on open-pit planning optimization and its application
Q. Wang & H. Sun

A criteria to optimize mine production rate
C. S. Ji & Y. D. Zhang

Development and application of optimum open-pit limits software for the combined mining of surface and underground
J. Chen, J. Li, Z. Luo & D. Guo

4 Mining systems simulation, computer visualization and virtual reality
System modeling and simulation of processes for visualization
K. Diekmann

</table>
Virtual reality of integrated mechanized top coal caving machine in longwall
Z.Dong, H.Chang, G.Zeng, S.Wang, Y.Yang & Y.Zheng

Research and development in SIMBERG supporting platform
Z.Yin, K.Han, Y.Xu, B.Dai & H.Mahrenholtz

5 Mine transport and equipment

Data mining VIMS data for information on truck condition
T.S.Golosinski, H.Hu & R.Elias

Databases optimization and comparison in mining equipment database development
T.Knežiček

A closed loop control concept for the correction of the conveyor belt position
G.Schulz

Computer-aided determination of dynamic loads in a longwall shearer’s cutting system
M.Dolipski, M.Jaszczuk, P.Cheluszka & P.Sobota

Computer applications in engineering, operation and control of high performance shearer or plow longwall systems
D.Abel & U.Paschedag

Simulation on the starting of belt conveyor
X.Liu, S.Yang & M.Qi

Numerical study on explosive welding for urgent pipe repair

The trend of computer’s application in shearer viewed from usage of FEM in the gear
S.H.Yang & Q.Wang

A computer-integrated system for remote monitoring, management and spatial navigation of machines at the 'Majdan III' open pit
S.Vujić & K.Kasaš

Automation of monitoring of technological process of excavator-dragline
L.D.Pevzner & H.Duan

Full digital computer automatic implement of fault inspection and intelligent monitoring for mine hoist
J.Jiang

The research of Enterprise Information System intelligence structure based on Purvey-chain
S.Xia & X.Qian

The computer system of monitoring parameters of coal mine substation
M.Zhou & M.Zhou

6 Mineral processing application

Bubble column measurement and control using electrical tomography
M.Wang, X.Jia, M.Bennet & R.A.Williams
The application of CAD to AI software’s exploitation in dry coal plant
Y.Zhao, C.Peng & Y.He
Research on making formed coke with old lignite in general temperature
J.Xie
Ion exchange resins in the gold beneficiation
C.H. Sampaio, R.M. Kautzmann, R.Gliese & J.L. Cortina
The detection and computer identification of moving speed of working face of UCG
L.Yang, J.Liang & Z.Liu
Online measurement technologies for the rapid quality determination of coal
T.Sauer
Predicting the performance of coal flotation by using the features of froth image
Z.Wang, M.Lu & W.Liu
Geological data analysis for mineral processing: Dragging metallurgy into the twenty-first century
D.L. Taylor & K.A. Altman
Study on quality management performance assessment of coal preparation plant
D.Gong & S.Xu
Prediction of reflectance spectrum for kaolin ores
P.N. Conceicao, S. Sabedot & C.O. Petter
Flotation optimizing control system in Huabei Coal Preparation Plant
D.Xu, X.Yang, C.Wu & S.Feng
Criterion for efficacy of separation of a pourable material into N components
M.Barisky & E.Barisky
Algorithms for optimization of classification of a pourable material into N components
M.Barisky & E.Barisky
The mechanism for selecting mining-metallurgical waste refining investment projects
N.I. Fedunets & I.E. Teimenson
Research on CAPP system of coal preparation plant
X.Guo & J.Cheng
Automatic control of flotation based on the multi-stream measurement
X.Yang, D.Xu, C.Wu, S.Feng, R.Wang & D.Zhu
An optimizing control system for coal slurry floatation based on ash on-line measurement
C.Wu, S.Feng, X.Yang & D.Xu

7 Ventilation and safety
An application of classification technique to heart rates of miners in escapeways
E.Baffi & R. Feng
Real-time information acquisition and communication technology during mine rescue
D.Wang, J.Wang & F.Zhou
Computer simulation on flow reversal during ascensionally ventilated fire  
Y.Zhou, X.S.Wang & Q.Meng

Selection of fan or fan location in ventilation of long drivages  
S.Sarac & M.Onder

Fire damp drainage optimization using geotechnical and CFD modelling techniques  
T.X.Ren, J.S.Edwards, D.Whittles & D.J.Reddish

Study of the economic head-on velocity of shell-tube-air-cooler for mine  
G.Xiao, P.Zhang & B.Chen

Productivity and occupational safety in the Greek lignite mining  
I.E.Tsolas & A.L.Petrakis

Computer simulation of spontaneous combustion process of crushed coals around the tailgate close to gob at fully mechanized LTCC faces  
J.Xu & J.Deng

Numerical analysis on rules of dynamic gas emission during boring process  
K.Wang, Q.X.Yu, C.L.Jiang & Y.Q.Wu

Research on the KJ52 multimedia safety monitoring system in coal mine  
F.Liu, H.Yu, J.Qian, H.Wang & D.Chen

GIS-based study on mine safety decision support system  
H.Liu, H.Liu, X.Cui, Y.Liu & X.Zhang

8 Computer applications in rock mechanics, ground control and slope stability

Modern features of the DEM software system – BLOCK  
Y.Wang, W.Song & H.Wang

Discrete element modeling of geomechanical properties of oil sands  
D.D.Tannant & X.Shen

Changes of the state of stress around the connection of dog headings in relation to in situ measurements  
T.Majcherczyk & P.Malkowski

Computer application to geothermal resources in Tianjin City  
M.He, N.Xu, X.Wang, S.Zhao, C.Li & Y.Han

Estimation of in-situ stress in the Latrobe Valley Coal mines with special reference to Loy Yang Mine, Australia  
D.K.Nag

Analysis of optimum extraction sequence for 4180N rib pillar  
Y.Jiang

A numerical study of methane production from multi-layered coal seams  
B.Göktas & T.Ertekin

Support of soft rock tunnel at great depth designed by numerical modeling – A case study  
H.Zhou, Y.Ju, H.Xie, G.Ma, Z.Dong & C.Shao
A new model and back analysis of initial geostress
Z. Pang & D. Zhang 623

Numerical simulation on grouting material injection into soil
M. Koga, T. Sasaoka, H. Shimada, S. Kubota & K. Matsui 627

The measurement of in-situ stress with cores from directional well
M. Chen, L. N. Yang, Y. Jin & X. D. Zhang 631

Stochastic FEM analysis of grouting in fractured rock mass
M. Yang, M. Chen & Y. He 635

Chaotic features simulation for rock block slip process by DEM
Y. Tan, L. Shi & X. Han 639

Analysis of seepage behavior of the grout into roadway floor
T. Sasaoka, M. Koga, H. Shimada, S. Kubota & K. Matsui 643

Progress on 3D triangular boundary element method for Hot Dry Rock geothermal reservoir
H. Li, Y. Mizuta & K. Kuriyama 647

Prediction of the stability and supporting decision in underground engineering based on non-linear rock intelligence system thinking
X. Lai, Y. Wu, P. Shi & M. Cai 651

Numerical modelling and microseismic monitoring to improve strata behaviour
T. X. Ren, D. J. Reddish & P. Styles 655

Numerical simulation of mining subsidence used large deformation theory
X. Cui & X. Miao 661

Numerical analysis of burst of soft rock and the rate criterion
W. Q. Liu, X. Miao & A. W. Wang 665

Numerical simulation of truss-bolt reinforcing jointed rock and its application
B. Liu, L. Tao, L. Tao & X. Li 669

Numerical simulation of destressing maintenance for a tailentry along gob area
F. He, Q. Qu, X. Zou & J. Chen 673

Mechanical analysis of the rheological fracture extension in rock
Y. Chen, T. Liu & J. Sun 677

Risk evaluation of rock burst by use of a numerical simulation method
L. M. Dou & B. Wang 681

Automatic image-processing system of directional broken with dynamic caustic

Quantitative analysis between infrared temperature field and photoelastic stress field
L. An & D. Zhang 689

Determination of in-situ stresses by Kaiser Effect under confining pressures
G. Zhang, M. Chen, Y. Jin & X. Zhang 693

Computer numeric simulation of soft rock in China
M. He, Q. Duan & X. Sun 697
Neural network application to prediction for borehole stability before drilling
Y.Jin, M.Chen & X.Zhang

Some nonlinear numerical models to simulate the coal and coal-methane outburst
H.Liu, G.J.Zhao & X.Y.Bi

Quick assessment method for the slope stability factor of waste deposit dams
M.Lazar & I.Andras

9 Environmental engineering, mine closure and restoration

The role of landscape metrics in environmental planning and management of mining activities
A.Botequilha Leitão & F.Muge

Integral system research of prediction of mining subsidence
Y.Wang, K.Wu & K.Deng

Computer simulation of mining subsidence by using fractal interpolation
H.Sun, H.Xie & G.Yu

A packet of programs for the evaluation of the atmospheric air quality in the areas of coal power plants
L.Ya.Kizilshtein, Yu.I.Kholodkov & S.V.Levchenko

A new method for mining influence based on fine geologic model
L.Wu, E.Hou, B.Niu, J.Han, Y.Yin, G.Huang, J.Li, Z.Yin & Z.Deng

Identification algorithms of world countries mineral resources production and consumption dynamics models
L.A.Bahvalov & Y.E.Teimenson

The prediction of mining induced subsidence profile by MAP3D – A case study
Y.D.Jiang

HgEx: Assessing the risk of mercury pollution from artisanal gold mines
A.J.Gunson, M.M.Veiga & J.Meech

Theory and method of predicting the residual surface subsidence
X.Yu & Y.Yao

10 Project management, economic analysis and other aspects (such as AI, IT, GPS) of computer applications

Improving safety of off-highway trucks through GPS
K.Dagdelen & A.Nieto-Vega

Data mining uses in mining
T.S.Golosinski

Mineral education delivery via the Internet
