CONTRIBUTED PAPERS
(Volume II)

Editor
S.K. Aggarwal

Organised by
Indian Society for Mass Spectrometry (ISMAS)

Co-sponsored by
Board of Research in Nuclear Sciences (BRNS)
Council of Scientific and Industrial Research (CSIR)
Department of Bio Technology (DBT)
Department of Ocean Development (DOD)
Department of Science and Technology (DST)
Contributed Papers
(Volume II)

Atomic and Molecular Physics (AMP)

2. Resonance Ionisation Mass Spectrometry of Europium ............... 503
   P.V. Kiran Kumar and M.V. Suryanarayana

3. Adsorbate Geometry Studied by Ion/Surface Reactive Scattering .......................................................... 508
   T. Pradeep, C. Evans, J. Shen and R.G. Cooks

Biological and Environmental Sciences (BES)

4. Characterization of PAH and their Methylated Derivatives in Ambient Air of Nagpur City by GC-MS Technique ................. 512
   V.V. Khaparde, K.M. Phadke, S.D. Wachasunder and M.Z. Hasan

5. Analysis of Chemical Neutralisation Products of Phosphonothiolates by Gas Chromatography-Mass Spectrometry (GC-MS) .......................................................... 516

6. Confirmation of Structure of Perfluoroisobutylene and its Derivative by GC/Tandem Mass Spectrometry ....................... 520
   M. Palit, S. K. Raza, P. S. Bhadury and D. K. Jaiswal

7. Gas Chromatography Mass Spectrometry for Detection of Pollutants .......................................................... 523
   S.D. Wachasunder

8. Monitoring of Intermediates in ETP Systems for Nitroaromatics Using GC-MS .......................................................... 527
   A. Qureshi, S. D. Wachasunder and H.J. Purohit

   M.V.S. Suryanarayana, U.V.R.V. Saradhi, S. Prakash, K. Ganesan and R.C. Malhotra

   S.K. Aggarwal, R. Fitzgerald and D.A. Herold

11. LA-ICP-MS Analysis of Platinum in Environmental Soil Samples Following Micro-Fire Assay Technique

   N.S. Siddaiah, A. Masuda and T. Hirata

12. Electrospray LC-MS and the Use of Controlled Isotope ($^{12}$C : $^{14}$C) Dosing for the Structural Elucidation of Soil Metabolites of a Cereal Herbicide

   D. Ghosh and R. Jackson

13. A Rapid Solid Phase Extraction, GC-MS Method for the Determination of a Pyrethroid Insecticide Lambda Cyhalothrin in Oil and Fat Samples

   A. Ramesh

14. Comparison of GC and GC/MS Analyses for PCBs in Samples with Matrix Interferences

   Yi-Hua Lin, R. Singhvi and S. Burchette

Earth and Planetary Sciences (EPS)

15. Noble Gases in Dar al Gani 476- the New Martian Meteorite from Sahara

   R.K. Mohapatra and S.V.S. Murty

16. Origin of Diamonds in Ureilites: Implications from Nitrogen Isotopic Composition

   V.K. Rai and S.V.S. Murty

17. Recycled Component in the Mantle-Derived Materials: A Nitrogen and Noble Gas Perspective

   R.K. Mohapatra and S.V.S. Murty
18. Continental Evidences of the Strongest Monsoonal Intensity at 4 Ma .................................................. 564

19. Mg and K Isotopic Compositions and Refractory Trace Element Abundances in Early Solar System Solids .......... 567
   K.K. Marhas, A.M. Davis and J.N. Goswami

20. $^{40}$Ar - $^{39}$Ar Dating of Volcanics of Indus Suture Zone, Ladakh: Implication for Pre-, Syn- and Post-Collision Tectonic Activity ................................................................. 571
   R. Bhutani, K. Pande and T.R. Venkatesan

21. $^{40}$Ar - $^{39}$Ar Ages of the Sylhet Traps: Evidence for Coeval Rajmahal Sylhet Volcanism ........................................ 574
   K. Pande and J.S. Ray

22. Isotopic Dating of Granodiorites from Krol Belt, near Nainital .......................................................... 576
   A.R. Vijan, M. Bansal, S.S. Rathore, B.N. Prabhu and K.N. Misra

23. Geochronological Studies on the Basement Rocks of Cauvery Basin, East Coast of India ................................ 581

24. Re-Os Isotope Measurements in Black Shales of the Lesser Himalaya: Their Chronology and Influence on Oceanic Os Isotope Budget ......................................................... 585
   S.K. Singh, J.R. Trivedi and S. Krishnaswami

25. Re Abundances in the Yamuna Source Waters: Sources, Fluxes and Implications to Blackshale Dating .................. 588
   T.K. Dalai, J.R. Trivedi and S. Krishnaswami

27. Recrystallization of Zircon and its Effect on U-Pb Dating ......... 595
   J.G. Ghosh
28. Rb-Sr Geochronology of the Late Archaean - Early Proterozoic Basement Granites Adjoining the Southwestern Margin of the Cuddapah Basin ................................................................. 600

29. Sulphur Isotope Study on Pyrites from Various Lithologies around Kerpura Area and its Bearing on the Source of Sulphur and Uranium Mineralisation in Albitite-Pyroxenite-Microcline Belt of Northern Rajasthan ................................. 605

30. Stable Carbon and Oxygen Isotope Studies on Carbonatites from Sung Valley, Meghalaya and Ambadongar and Siriwasan, Gujarat ................................................................. 608
   V. Krishna, D.D. Pande, K. Asha, P. Krishnamurthy and T. Chabria

31. A Multiproxy Paleoclimatic Record of Late Quaternary from the Eastern Arabian Sea ................................................................. 611

32. AMS Exposure Dating: A Case Study from Himalaya and Tibet and its Application Potentials in Earth Science Studies in India .................................................................................. 614
   K.K. Sharma

33. Multiple Isotopic Studies of Calcite Growth in Concrete Structures .......................................................................................... 620
   R.V. Krishnamurthy, D. Schmitt, E. Atekwana and M.M. Baskaran

34. Carbon, Oxygen and Strontium Isotope Systematics of Carbonate Rocks of the Kaladgi Supergroup, Southern India .......... 624
   S.D. Sharma, A.M. Dayal, B. Kumar and V.S. Kale

35. Carbon and Oxygen Isotope Studies on Limestones from the Eastern Ghats Granulite Belt: Inference on the Depositional Environment ................................................................. 627
   V.D. Rao, D.J. Patil, N.N. Murthy and B. Kumar
36. The Role of Carbon Cycle in the Evolution of Atmosphere, Hydrosphere and Biosphere during the Paleoproterozoic ............630
    B. Sreenivas and S.D. Sharma

37. Evolution of Neodymium Isotopes in the Northeast Indian Ocean During the Last ~30,000 Years ........................................633
    S.M. Ahmad, A.M. Dayal and V.M. Padmakumari

38. Sr, Nd Isotopic Studies of Clastic Sediments in the Northeast Indian Ocean – New Results from ODP Site 758A .................635
    V.M. Padmakumari and S.M. Ahmad

39. Rb-Sr Isochron Ages on Granites from Basement of Bhima Basin, Gulbarga Dist., Karnataka ........................................638
    D.V.L.N. Sastry, V. Krishna, U.P. Sharma, G. Bhatt, J.K. Patnaik, M.K. Kumar and T. Chabria

40. A Note on the Genesis of Hydrogen Sulphide in Bassein Field, Bombay Offshore Basin, India ........................................642

41. Late Archaean Mantle Metasomatism below Eastern Indian Craton : Evidence from Trace Elements, REE Geochemistry and Sr – Nd isotope Systematics of Ultramafic Dykes ..........647
    A. Roy, A. Sarkar, S. Jeyakumar, S.K. Aggarwal and M. Ebihara

42. Mid-Proterozoic Plume Related Thermal Event in Eastern Indian Craton: Evidence from Trace Elements, REE Geochemistry and Sr – Nd Isotope Systematics of Mafic-Ultramafic Intrusives from Dalma Volcanic Belt .....................648
    A. Roy, A. Sarkar, S. Jeyakumar, M. Ebihara and S.K. Aggarwal

44. Application of Environmental Stable Isotopes in Mine Hydrology: A Field Example
K.M. Kulkarni, U.P. Kulkarni and S. Sharma
652

45. Study of Groundwater Salinity in an Inland Basin, Central India Using Environmental $^2$H and $^{18}$O
S. Sharma, K.M. Kulkarni, U.P. Kulkarni, T.B. Joseph and A. Deodhar
656

46. Application of Environmental Isotopes $^2$H and $^{18}$O in Identifying the Source of Seepage in Some Parts of Jodhpur City, Rajasthan
659

47. Stable Isotope as a Tracer to Find Out Origin of Seepages Occuring at Chaskaman Dam Site Near Pune, Maharashtra
U.P. Kulkarni, S. Sharma and K.M. Kulkarni
663

48. Mass Spectrometric Characterisation of Olefinic Impurities in Heavy Alkyl Benzenes
Basant Kumar, R. B. Gupta and Pradeep Kumar
667

Isotopic Composition and Concentration Measurements (ICC)

49. Analysis of High Purity Water, Hydrochloric and Nitric Acids for Trace Element Impurities by ICP-MS
671

50. Investigation of the Effect of Xenon During the Isotopic Analysis of Oxygen with a Stable Isotope Ratio Mass Spectrometer
S. Chakraborty and M. Thiemens
675

51. Determination of $^3$He / $^4$He Ratio using Double Focusing Mass Spectrometer
K.A. Jadhav, N. Padma, K.K.B. Nair and V.V.K. Rama Rao
678

**Inorganic Chemistry and Thermodynamics (ICT)**

| 60.  | Vaporisation Studies on TeO$_2$ (s)                                  | T.S. Lakshmi Narasimhan, M. Sai Baba and R. Viswanathan |
61. Association Equilibrium \((\mathrm{TeO})_2(g) = 2 \mathrm{TeO}(g)\): 
A Knudsen Effusion Mass Spectrometric Study .................... 716

   T.S. Lakshmi Narasimhan, M. Sai Baba and R. Viswanathan

62. Mass Spectrometric Studies on Mn-Te-O System ................... 719

   T.S. Lakshmi Narasimhan, M. Sai Baba and R. Viswanathan

63. Determination of Sulphur by Vacuum Combustion Extraction - Quadrupole Mass Spectrometry (VCE - QMS) ............ 722

   Y.S. Sayi, G.C. Chhapru, P.S. Shankaran, C.S. Yadav, K.L. Ramakumar and V. Venugopal

64. Vacuum Decomposition Pattern of Ferrous Ammonium Sulphate -A Quadrupole Mass Spectrometric Study ..................... 726

   Y.S. Sayi, P.S. Shankaran, C.S. Yadav, G.C. Chhapru and K.L. Ramakumar

65. Trace Element Analysis in Organics and Petrochemicals Using Inductively Couple Plasma Mass Spectrometry (ICP-MS) .................................................. 729

   S.J. Kumar, M.A. Reddy, N.N. Meeravali

**Instrumentation (INS)**

66. Laser Microprobe for the Analysis of Noble Gases and Nitrogen in a Single Grain .................................................. 733

   R.R. Mahajan, M.K. Prasad and S.V.S. Murty

67. Use of a Quadrupole Mass Spectrometer to Determine the Flow Ratio of an Orifice Flow High Vacuum Standard ............ 737

   P. Mohan and A.C. Gupta

68. Experience of Using Needle Valve in Sample Introduction Systems for D/H Analysis ................................................. 741

   H.K. Saini, N.V. Rao and V.C. Sahni

69. Hexapole and Octupole Resonances in a Combined Trap .......... 745

   A. Banerjee, S. Sevugarajan and V. Natarajan
70. Performance Checking of an Indigenously Fabricated TIMS: Sudden Disappearance of Mass Peaks

71. Variable Width Precision Slit Assembly for High Resolution Mass Spectrometers
P. Raju, V.V. Katke, S.R. Halbe and V.V.K. Rama Rao

72. Effect of Misalignment of Filament Assembly and Focusing Electrodes on Ion Transmission in a Thermal Ionization Source
N. Padma, V.V.K. Rama Rao and V.C. Sahni

73. Thermal Ionisation Mass Spectrometer for the Isotopic Analysis of Lithium and Boron

74. ICP-MS - Improvements in Detection Limits
V.Nataraju, D.Ramanathan, V.C. Sahni, V.V.K.RamaRao, P.Raju and S.R.Halbe

75. Study of Gas Feed System of Aditya Tokamak Using Quadrupole Mass Analyzer
K.V.A.N.P.S. Kumar and S.B. Bhatt

76. A New Approach to Partial Pressure Analysis
D.C. Reddy, S.B. Bhatt, B.K. Das and G.C. Sethia

77. Variation of Axial Frequency Shifts with Mass and Position in Non-linear Paul Trap Mass Spectrometers
S. Sevugarajan, S.R. Prasad and A.G. Menon

78. Recent Developments in ICP- Multicollector Mass Spectrometry
J. Cantle

79. Potential Distribution in an Electric Octopole
V.V.K. Rama Rao, N. Padma and A. Bhutani
80. **An Improved Data Acquisition System for Isotopic Ratio Mass Spectrometers** ................................................................. 793
   
   T.K. Saha, B. Reddy, C.K. Nazare and V.K. Handu

81. **Data System for Organic Sample Analysis on Double Focusing Mass Spectrometer** .................................................. 797
   
   R.B. Ingole, N. Padma, K.A. Jadhav, V.K. Handu and V.V.K. Rama Rao

82. **Design Aspect of Data Acquisition System for Time of Flight Mass Spectrometer and its Proposed Design** .................. 801
   
   K. Joshi and V. K. Handu

83. **Improvements in Thermal Ionisation Mass Spectrometer Instrumentation** ................................................................. 806
   

84. **Performance Checking of an Indigenously Fabricated TIMS: Evaluation of Internal Precision** ............................... 810
   
   D.K. Das, A.S. Kanekar, V.R. Sonar and V.K. Bhargava

   
   D. Alamelu, C.S. Subbanna and S.K. Aggarwal

86. **LC-MS Instrumentation from PE-Biosystems** ............................... 818
   
   Thomas Fechner and Andre Schreiber

87. **Some Instrumental Developments Leading from the Employment of Orthogonal Acceleration Time-of-Flight Mass Spectrometry** ............................... 819
   
   R.H. Bateman, K. Giles, M.R. Green, J. Hoyes and J.W. Letcher

88. **Recent Developments in Ion Trap Mass Spectrometry for LC/MS/MS** ................................................................. 821
   
   P.J.F. Watkins, M.E. Harrison, J. Cuniff and P.R. Tiller

xx
89. The Use of Multi-Collector ICP-MS for the Measurement of Isotope Ratios in Geological and Nuclear Applications.........825
   Z. Palacz, S. Meffan-Main, R.C. Haines, P.J. Turner

90. LC/MS Analysis of Aflatoxins in Food Samples Using an Ion Trap.................................................................838
   A. Ingendoh and A. Schneider

**Nuclear Technology (NT)**

91. Thermal Ionisation Mass Spectrometric Studies on Fission Product Neodymium from a Spent MAPS Fuel Solution ..........844
   R. Balasubramanian, S. Nalini, N. Sivaraman and M. Sai Baba

92. Thermal Ionization Mass Spectrometric Study of U-Pu-O System ........................................................................847
   D.D. Albert Raj, S. Nalini, R. Viswanathan and R. Balasubramanian

93. Mass Spectrometric Study of U-Pu Mixed Carbide Spent Fuel Solution.................................................................851
   S. Nalini, R. Balasubramanian, M. Sai Baba, D. Darwin Albert Raj and R. Viswanathan

94. Large Size Dry (LSD) Spike Isotope Dilution Mass Spectrometry (IDMS) for Input Accounting of U & Pu in Fuel Reprocessing : A Field Experience.........................................................854

95. Correlations for Isotopic Composition of Plutonium using Thermal Ionization Mass Spectrometry (TIMS).....................857
   S.K. Aggarwal, D. Alamelu and P.M. Shah

96. Isotope Dilution - Thermal Ionization Mass Spectrometry (ID-TIMS) for Determination of Trace Constituent Uranium in Zircaloy.............................................................................................861
   P.M. Shah, V.A. Raman and S.K. Aggarwal
Isotope Ratio Measurements for Plutonium in Isotopic Reference Materials by Thermal Ionisation Mass Spectrometry (TIMS) using Total Evaporation Technique

S.K. Aggarwal, R. Fiedler and S. Deron

Precise and Accurate Determination of Half-life of $^{242}$Pu

S.K. Aggarwal, W. Raab, R. Fiedler and S. Deron

Organic Chemistry (OC)

Mass Spectrometer as a Probe in the Synthesis of 2-Substituted-3-Phenyl-4(3H)-Quinazolinones

D.V. Ramana and T.E. Yuvaraj

Generation and Characterization of Cations, Anions and Neutrals of $[\text{HNC(S)S}]^{+/-0}$ and $[\text{HNC(S)SH}]^{+/-0}$ by Neutralization-Reionization Mass Spectrometry

S. Vivekananda and R. Srinivas

Generation and Characterization of Ionic and Neutral $(\text{CH}_3\text{OBH})^{+/-}$ and Methyl $(\text{CH}_3\text{BOH})^{+/-}$ in the Gas Phase by Neutralization-Reionization Mass Spectrometry

Mass Spectral Fragmentation Patterns of 1-Aroyl-3-(Substituted Phenyl)-5-(2,4-Dichloro-5-Fluoro)Phenyl -5-Hydroxy Pyrazolines

B.S. Holla, B.S. Rao, P.M. Akber Ali and K. Shridhara

Electron Impact Studies of Mono and Bis-Unsaturated Oxo Sulfones and Bissulfones

Electron Impact Studies of Pyrazolines and Isoxazolines

V. Padmavathi, R.P. Sumathi, A. Padmaja and D.B. Reddy
105. Mass Spectral Fragmentation Patterns of Some Fluorine Containing Arylfurylpropenones, Arylfurylpyrazolines and N-Acetylpyrazolines ................................................................. 897
   B.S. Holla and M.K. Shivananda

106. Mass Spectral Studies of Some Fluorine Containing Arylfurylvinylinzazolinones ............................................................. 902
   B.S. Holla and M.K. Shivananda

107. Mass Spectral Studies on Diastereomeric Oxathiolanes : A Configurational Study ................................................................. 906
   E.H. Khan, S. Shafi, S. Hussain, J. Firoz and Shaflullah

108. EI Mass Spectral Studies of 2-Substituted-1,2,3,4-Tetrahydro-1,3,2-Benzodiazaphosphorine 2-Oxides ........................................ 909
   L.N. Rao and C.D. Reddy

109. EI-Mass Spectral Fragmentation of 2-(Alkylcarbamato) -2,3-Dihydro-5-(Propyloxo)-1H-1,3,2-Benzodiazaphosphole 2-Oxides ................................................................. 912
   M. Venugopal and C.D. Reddy

110. EI-Mass Spectral Fragmentation of 2-Alkylcarbamato -2,3-Dihydro-5-Propylthio-1H-1,3,2-Benzodiazaphosphole 2-Oxides ................................................................. 915
   D. Srinivasulu, C.D. Reddy and C.V.N. Rao

111. EI Mass Spectral Studies of 2-Substituted 6-Chloro-4-Trichloro-methyl-4H-1,3,2-Benzodioxaphosphorin 2-Sulphides ................................................................. 918
   C.N. Raju, C.D. Reddy and P.M. Reddy

   K. Suma and M. Vairamani

113. Determination of Gas-Phase Basicities of Some Amino Acid Methyl Esters and Their Deuterated Derivatives by Kinetic Method ................................................................. 924
   P. Krishna, S. Prabhakar, N.S. Swamy and M. Vairamani

xxiii
   P. Krishna, S. Prabhakar, M. Manoharan, E. D. Jemmis and M. Vairamani

115. El-Mass Spectra of Bis-1,1'-Binaphthyl-2,2'-Hydroxyethylether and 2,2'-Di-(2-Hydroxyethoxy)-1,1'-Binaphthyl Methane ................................................................. 932
   K.A. Kumar and C.S. Reddy

116. El Mass Spectral Studies of 8-Alkyl Carbamato-16H-Dinaphtho[2,1-d:1'-2'-g][1,3,2] Dioxaphosphocin 8-Oxides ......................................................................................... 934
   M.F.S. Babu, C.S. Reddy

   S. Prabhakar, M. S. Parveen, A. Kundu, S. Roy and M. Vairamani

118. Collision Induced Dissociation Fourier Transform Ion Cyclotron Resonance Mass Spectrometry of Porphyrins .................. 941
   M. Ahmad, I.G. Dance, K.J. Fisher and G.D. Willett
