10th International Symposium on Corrosion in the Pulp and Paper Industry (10th ISCPPI) Volume 1

Marina Congress Center, Helsinki, Finland
August 21–24, 2001

Edited by
Tero Hakkarainen
VTT Manufacturing Technology

Organised by
VTT Manufacturing Technology
Finnish Paper Engineers' Association
Contents

Preface 3

Contents of Volume 1

Inspection

New tools for the rapid assessment and reduction of safety risks in newly acquired mill equipment
W. B. A. Sharp, A. Alavi, Westvaco Corporation, Alfred H. Nissan Technical Center & M. A. Lunn, Westvaco Corporation, Evadale Mill, USA 9

Recovery Boilers-Lower Furnace

Corrosion as a cause for recovery boiler damages
F. Bruno, ÅF-IPK AB, Sweden 27

Composition and drying behaviour of recovery boiler waterwash solutions
H. Tran, B. Habibi, S. H. Khochesfahani, University of Toronto & F. Piroozmand, Irving Pulp and Paper Ltd., Canada 45

Influence of composition on the formation of melt near the floor tubing of kraft recovery boilers
R. Backman, M. Hupa, B. Södergård, Åbo Akademi University, M. Pulliainen, Savcor Group Ltd Oy & C. Svensson, Savcor Process Oy, Finland 57

Corrosion testing of high-nickel alloy composite tube materials in simulated recovery boiler lower furnace conditions
M. Mäkipää, M. Oksa & P. Pohjanne, VTT Manufacturing Technology, Finland 73
Characterization of primary air port cracking in black liquor recovery boilers
J. R. Keiser, D. L. Singbeil, K. A. Choudhury, G. B. Sarma, C. R. Hubbard,
T. M. Ely, J. R. Kish, P. M. Singh, E. A. Kenik & L. M. Hall, Oak Ridge
National Laboratory, USA, 1Pulp and Paper Research Institute of Canada,
Canada, 2Institute of Paper Science and Technology, USA

Cracking of recovery boiler composite tubes – thermal fatigue or
stress corrosion cracking?
H. Hanninen, P. Pohjanne, P. Saarinen & T. Kiesi, Helsinki University of
Technology, 1VTT Manufacturing Technology, Finland

Boilers-Fluidized Bed

How to control superheater tube corrosion in FB boilers which use wood
and wood waste as fuel
M. Orjala, R. Ingalsuo, K. Paakkinen, J. Hämäläinen, VTT Energy, Finland,
M. Mäkipää, M. Oksa, VTT Manufacturing Technology, Finland, T. Malkow,
R. J. Fordham & D. Baxter, European Commission, Institute of Advanced
Materials, JRC Petten, The Netherlands

Recovery Boilers-Superheaters

Influence of partially molten alkali deposits on superheater corrosion
in black liquor recovery boilers
R. Backman, M. Hupa, Åbo Akademi University, Finland,
J. Lagerbom & T. Lepistö, Tampere University of Technology, Finland

Superheater tube corrosion in recovery boilers
M. Mäkipää, E. Kauppinen, T. Lind, J. Pyykönen, J. Jokiniemi,
P. McKeough, M. Oksa, Th. Malkow, R. J. Fordham, D. Baxter,
L. Koivisto, K. Saviharju & E. Vakkilainen, VTT Manufacturing
Technology, Finland, 1VTT Aerosol Technology Group, Finland,
2VTT Energy, Finland, 3JRC Petten, The Netherlands, 4Andritz-Alhstrom
Corporation, Finland

Control of superheater corrosion in black liquor recovery boilers
J. Tuiremo & K. Salmenoja, Kvaerner Pulping Oy, Finland
Gasifiers

Performance of selected materials in molten alkali salts  
R. A. Peascoe, J. R. Keiser, C. R. Hubbard, M. P. Brady, Oak Ridge National Laboratory, USA & J. P. Gorog, Weyerhaeuser Company, USA

Materials & Methods

Duplex stainless steels for tanks in the pulp & paper industry  
J.-P. Audouard, Usinor Industeel, France, S. Clarke, Paprican, Canada & F. Munro, Domtar, Canada

Cleaning, passivation and localized corrosion inhibition of AISI 316L stainless steel pulp drying machine  
D. K. Tanaka, University of Sao Paulo, A. A. Marques, Logos Quimica Ltda. & F. C. Freire, Cenibra - Celulose Nipo Brasileira S/A, Brazil

Monitoring

Preliminary evaluation of corrosion in a kraft digester using electrochemical noise  
S. J. Pawel, D. W. Townley¹, D. F. Wilson, M. E. Gorog² & N. J. Stead³, Oak Ridge National Laboratory, USA, ¹M. J. Schiff and Associates, Inc., USA, ²Weyerhaeuser Company, USA, ³Pulp and Paper Research Institute of Canada, Canada

On-line monitoring of a sloped floor kraft recovery boiler  
C. Svensson, Savcor Process Oy, Finland, C. Thompson, Mead Publishing Paper, USA, M. Pulliainen, Savcor Group Ltd Oy, Finland & J. Willis, Mead Central Research, USA

The use of multivariate data analysis methods in corrosion monitoring data interpretation  
Materials Machines

New HIPed powder metallurgy super duplex stainless steel suction roll shells with excellent corrosion and fatigue properties for paper machine applications

M. Korhonen, H. Hänninen, A. Laitinen\textsuperscript{1}, E. Hämäläinen, J. Heikkinen\textsuperscript{2} & J. Liimatainen\textsuperscript{1}, Helsinki University of Technology, \textsuperscript{1}Metso Powdermet Oy, \textsuperscript{2}Metso Paper Oy, Finland

Unexpected corrosion problems in mill white water systems: Can we avoid them?

T. Laitinen, Metso Paper, Service, Finland, C. Thompson, Pulp and Paper Research Institute of Canada, Canada & S. Clarke, Kvaerner Chemetics, Canada

Bleaching

Crevice corrosion of stainless steels in chlorine dioxide bleach plants

G. Bäck & P. M. Singh, Institute of Paper Science and Technology, USA

Transpassive corrosion mechanism of austenitic stainless steels in simulated bleaching solutions

I. Betova, M. Bojinov, T. Laitinen, K. Mäkelä, P. Pohjanne & T. Saario, VTT Manufacturing Technology, Finland

Stress corrosion failure of FRP structures used for chlorine-dioxide-containing environments in pulp mills

G. Bergman, Swedish Corrosion Institute, Sweden

ECTFE/FRP dual laminate boosts ClO2 bleaching temperature

D. L. Keeler, Viatec, Inc. & L. Magdzinski, Ausimont, USA

Appendix A: Author index
