IASS 2001
Extended Abstracts

International Symposium on
Theory, Design and Realization
of
Shell and Spatial Structures
October 9-13, 2001, NAGOYA, JAPAN

Edited by H. Kunieda

International Association for Shell and Spatial Structures
Architectural Institute of Japan
CONTENTS

Keynote Lectures

SP1 Engineering in the 21st Century ............................................................................. 2
   Levy, M.

SP2 Spirit of Concrete Shells. State of Art and Actuality ........................................... 4
   Mihaiulescu, M. and Rus, I.

SP3 Design and Construction of Timber Space Structures ....................................... 6
   Natterer, J. and Natterer, J.K.

SP4 On Some Recent Lightweight Structures .......................................................... 8
   Schlaich, J.

SP5 Environmentally Compatible Shell and Spatial Structures and
   Structural Materials (ECS) ~ Activities of IASS Working Group 18 ~ ....................... 10
   Végh, L.

Technical Papers

General View

TP001 Structural Engineering and Structures from Antiquity to the Present .............. 14
   Mungan, I.

TP002 Survey of Special Structures Education in North American Schools of Architecture ... 16
   Tripeny, P. and Shaeffer, R.E.

TP003 Environmental Aspects of Widespan Tensile Membrane Structures ............... 18
   Devulder, T., Chilton, J.C. and Wilson, R.

TP004 Bridge Avenues over the Water and Urban Transportation Systems ................ 20
   Burt, M.

TP005 Glass and Steel Structures ............................................................................... 22
   Brodniansky, J. and Ároch, R.

TP006 Spatial Structure Bringing Out the Best in Primary Character and
   Primary Form of Material ..................................................................................... 24
   Imagawa, N.

TP007 Reciprocal Ring Structure of the Chapter House Roof, Lincoln Cathedral .......... 26
   Chilton, J.C. and Devulder, T.

TP008 Architectural-Structural Survey of Hagia Sophia (1) ~ Deformation of
   Supporting Structures and Dome Base ~ ............................................................ 28
   Sato, T., Hidaka, K., Hanazato, T. and Kawabe, Y.

TP009 Architectural-Structural Survey of Hagia Sophia (2) ~ Photogrammetric Survey of
   the Main Dome ~ ........................................................................................... 30

TP010 An Investigation on Connection Types of Traditional Turkish Timber Structures .... 32
   Ergönül, S., Özkan, E. and Şahin, M.

TP011 Dynamic Analysis of Edirnekapi Mihrimah Sultan Mosque, In Istanbul ............. 34
   Timur, T. and Polat, Z.
CONTENTS

Theory: Loads
TP012 Determining Disadvantageous Combinations of Loads in Analysis of
Linearly Deformable Systems ......................................................... 38
   Dzhur, Y., Gordeyev, V. and Shimanovsky, A.
TP013 Wind Action on a Homeostatic Shell Roof ................................. 40
   Natalini, M.B., Canavesio, O.F. and André, O.A.
TP014 Wind-Induced Dynamic Response and Its Load Estimation of an Elliptic Dome ........ 42
   Uematsu, Y., Sone, T., Kuribara, O. and Yamada, M.
TP015 Theoretical and Experiment Research on Dynamic Behavior of Guyed Masts
   under Stochastic Wind Load ....................................................... 44
   Ma, X., Wang, Z.G., Deng, H.Z. and Wang, Z.M.
TP016 Dynamic Response of Steel Roof to Wind and Earthquake Excitation .......................... 46
   Chen, G.D., Guo, Y.L. and Liu, Y.Q.
TP017 Integrating Theory Based Design and Realization of Large Span Structures ................ 48
   Kmet, S., Kanocz, J. and Holicková, L.

Theory: Shells
TP018 An Effective Algorithm for Solving of Nonlinear Problems of Shell Stability .......... 52
   Yakushev, V.L.
TP019 Theoretical Analysis of Three-Dimensional Elastic Bending Problem of
   Cylindrical Shells ........................................................................ 54
   Yamada, K., Matsuoka, O. and Matsui, T.
TP020 Vibration of a Spherical Shell in the Circumferential Direction ............................... 56
   Morooka, S. and Kunieda, H.
TP021 A Study on the Nonlinear Response of RC Spherical Shells under Seismic Loading ... 58
   Muto, A., Kato, S. and Matsuoka, O.
TP022 Dynamic Properties of Steel Bunkers ............................................ 60
   Kazakevitch, M.I. and Bannikov, D.O.
TP023 Shell Element with Six DOF per Node for Large Deflection Analysis ....................... 62
   Semenov, P.Y. and Semenov, V.A.
TP024 Non-Linear Analysis of Shell Structures Subjected to Pressure Load by
   Finite Element Method ................................................................. 64
   Jang, M.H., Kim, J.Y. and Kwun, T.J.
TP025 Numerical Analysis of Anisotropic Laminated Shells with Shear Deformation .......... 66
   Kwun, I.N. and Kwun, T.J.
TP026 Seismic Hydroelastcity of Fixed Cylindrical Shells in Ice-Covered Seas .................. 68
   Hamamoto, T. and Nojima, T.
TP027 Three-Dimensional Numerical Computation for Aerodynamic
   Characteristics of a Cylindrical Structure .................................... 70
   Kondo, N. and Nishimura, T.S.
TP028 Ultimate Strength of Carbon Fiber Chip Reinforced Concrete Shells with Openings ... 72
   Mashita, K.
CONTENTS

TP029 Finite Element Analysis of a Reinforced Concrete Cooling Tower under Cyclic Loading – Application of Constitutive Equation Based on Ring Typed-Lattice Model – ..........74  
Kato, S., Ohya, M. and Hara, T.

TP030 The Effect of Shell Shape on Failure Behavior of Reinforced Concrete Shell with Square Plan .................................................................................................................76  
Takayama, M. and Hayashi, N.

TP031 Behavior of R/C Cooling Tower under Alternating Cyclic Load ........................................78  
Hara, T., Kato, S. and Ohya, M.

TP032 Comparative Ultimate Strength Analysis of RC Shallow Shells of Positive and Negative Gaussian Curvature with Local Failure under Concentrated Loading ..........80  
Shugaev, V.V.

TP033 Numerical Stress Analysis of the Fredericton Water Tower Collapse according to a Proposed Modified Reference Length in the ECCS Rules for Liquid-Filled Conical Shells .........................................................82  
Belis, J., van Impe, R., Lagae, G. and Buffel, P.

TP034 Buckling of Internally Pressurized Stiffened Spherical Shells Subjected to Partial External Load ..................................................................................................................84  
Sakurai, H. and Yamada, M.

TP035 Postbuckling Dynamic Analysis for Shallow Spherical Shells Using a Mixed Finite Element Method ................................................................................................................86  
Uchiyama, M. and Yamada, S.

TP036 Nonlinear Buckling Behaviour of Fibre Reinforced Polymeric Cylinders under Compression ..................................................................................................................88  
Yamada, S., Yano, K. and Croll, J.G.A.

TP037 Experiment and Application of CFRP Sandwich Panel ........................................................................90  
Tateishi, Y., Sugizaki, K., Fujisaki, T., Kanemitsu, T. and Yonemaru, K.

Theory: Membrane Structures

TP038 The Versatile Canopies .........................................................................................................................94  
Sanchez, J. and Escrig, F.

TP039 Flexible Thin Membrane PV Modules for Membrane Structures ..................................................96  
Yoshinaka, S., Tsubota, H., Kubota, J., Fujita, M., Fujii, H. and Imanaka, J.

TP040 The Study on Designing and Construction Method of the Tent-Type Tension-Net Structure with Some Sheets Curved Surface .........................................................98  
Ozawa, Y. and Imagawa, N.

TP041 Theoretical Analysis of Membrane Structures Considering Sliding between Cable and Membrane Element .........................................................100  
Ishida, M., Tsubota, H., Seto, Y. and Kusaka, A.

TP042 Formfinding and Static Analysis of Tents ..........................................................................................102  
Gaspar, Z. and Hincz, K.

TP043 A Finite Element Concept for Wrinkling Membranes ........................................................................104  
Dinkler, D. and Wiedemann, B.

CONTENTS

TP060 Dynamic Analysis and Frequency Response of Two-Dimension Synchronism Deployable Antenna ............................................................................................................. 142

TP061 A Study on Large Span Applications of Non-Contiguous Strut Tensegrity Grids ...... 144
Wang, B.B.

Theory: Space Frames

TP062 The Fundamentals of Beam Theory and How They Can Be Applied to Frames .......... 148
Renton, J.D.

TP063 An Improved Element Stiffness Matrix of Prismatic Thin-Walled Beam ................. 150
Nie, G.J. and Qian, R.J.

TP064 Asymptotic Derivation of a Non-Linear Model for Thin-Walled Rods ..................... 152
Grillet, L. and Hamdouni, A.

TP065 Interactions of a Penny-Shaped Crack in Piezoelectric Space with Stress and Charge Loads ................................................................................................. 154
Hou, P.F., Guan, F.L. and Hu, Q.B.

TP066 Evaluation of Nonlinear Solution Techniques' Efficiency for Space Truss ............... 156

TP067 Problems to Establish an Expert System for Predicting Buckling Behaviors of Steel Single Layered Reticular Domes ..................................................................... 158
Takashima, H.

TP068 On Problems Related to Semitangential and Quasitangential Moments .................. 160
Yang, Y.B.

TP069 Beam Element for Truss Girder Involving Member’s Elastoplastic Buckling Behavior .................................................................................................................... 162
Motoyui, S. and Ohtsuka, T.

TP070 Beam Element for H-Section Steel Member with Local Buckling .............................. 164
Ohtsuka, T. and Motoyui, S.

TP071 Experiments on the Connection Collapse of Pultruded Fiber Reinforced Polymeric Composites ................................................................................................. 166
Yamada, S, Nakazawa, H., Fukatsu, N. and Komiya, I.

TP072 An Experimental Research on Wave Propagation Behavior in Planar Lattice Structures .................................................................................................................... 168
Nishida, A., Liu, P. and Kawaguchi, K.

TP073 Thermomechanical Response of Lattice Circular Plate under Transversal Vibrating Load ............................................................................................................... 170
Sumec, J. and Jendzelovsky, N.

TP074 A Study on the Damping of Vibrations in Space Structures ........................................ 172
Tatemichi, I.

TP075 Vibration Characteristics of Unique Shaped Single Layer Lattice Shell .................... 174
Koyama, T., Tomatsu, H., Oda, Y. and Fuchigami, K.
CONTENTS

TP076 Nonlinear Dynamic Analysis System for Large-Scale Space Frame Structures under Multiple Loadings ............................................................... 176
   Murata, M. and Hirata, M.

TP077 Seismic Design Method to Reduce the Responses of Single Layer Reticular Domes by Means of Yielding of Substructure under Severe Earthquake Motions .......... 178
   Kato, S. and Nakazawa, S.

TP078 Study on Dynamical Behavior of Wooden Single-Layer Latticed Dome Subjected to Vertical Earthquake Motions ........................................... 180
   Matsuno, K., Aoki, S. and Endo, T.

TP079 Study on Nonlinear Vibration and Deformation of Simple Reticulated Dome ........ 182
   Hagiwara, N., Ohmori, H. and Matsui, T.

TP080 A Study on the Static Seismic Force for the Design of the Arch ....................... 184
   Jung, C.W., Shinohara, Y. and Yamada, M.

TP081 Pushover Analysis of a Double Layer Latticed Dome .................................... 186
   Cheong, M.C., Kato, S., Han, S.E. and Kim, J.W.

TP082 Estimation Method of Collapse Acceleration of Double Layer Latticed Wall and Roof Structures Subjected to Earthquake Motion ................................. 188
   Ishikawa, K., Okubo, S., Hiyama, Y. and Atağ, T.

TP083 Static and Dynamic Behavior of the TH-H Mesh Double-Layer Braced Dome .......... 190
   Saka, T., Taniguchi, Y. and Ichibo, C.

TP084 Wind-Induced Dynamic Response of a Single-Layer Latticed Dome .................... 192
   Uematsu, Y., Kuribara, O., Yamada, M. and Hongo, T.

TP085 Discuss on Bifurcation Problems of Some Reticulated Shells .......................... 194
   Li, Y.Q. and Dong, S.L.

TP086 The Elasto-Plastic Buckling Analysis of Ball-Jointed Single Layer Latticed Domes Considering Characteristics of the Connector .................................. 196
   Han, S.E., Cheong, M.C., Lee, J.S. and Kwon, H.J.

TP087 Estimation of the Effects of the Intermediate Loads along Members to the Ultimate Strength of Single Layer Lattice Domes ................................. 198
   Kato, S. and Kim, J.M.

TP088 Buckling Design Method of Single Layer Two-Way Grid Shell with Diagonal Tension Rod Members – Spherical Dome and Cylindrical Roof – .............. 200
   Fujimoto, M., Imai, K., Kushima, S., Kinoshita, R. and Morita, T.

TP089 The Effect of Shock Motion on Dynamic Buckling Behavior of Rigidly Jointed Single Layer Lattice Domes ......................................................... 202
   Ogawa, T., Kumagai, T. and Takekota, Y.

TP090 Buckling Analysis of Rigidly Jointed Single Layer HP Lattice Shells ................... 204
   Ogawa, T., Kato, S., Hagihara, M. and Tateishi, R.

TP091 Elastic Buckling Characteristics of Two-Way Grid Shells and Application in Design to Evaluation of Nonlinear Behavior and Ultimate Strength .................. 206
   Yamashita, T. and Kato, S.
TP092 Structural Design of Hybrid Single-Layer Lattice Shell Using Supplementary Parts....208
Kanayama, T., Fukumoto, S., Fujii, A., Wada, Y. and Kawaguchi, K.

TP093 Study on Load Deformation Characteristics of Single Layer Two-Way Grid HP Shell with Diagonal Members under Centrally Concentrated Loading............................................................................210
Fujimoto, M., Imai, K., Kushima, S., Okamoto, K, Kinoshita, R. and Morita, T.

TP094 Investigation into the Experimental Behaviour of Dynamic Propagation of Local Snap-Through in Single-Layer Braced Domes .................................................................212
Abedi, K. and Parke, G.A.R.

TP095 High Structural Performance of Twisted Wide Flange Members Applied to Node Connections for Single Layer Lattice Shells – H Diamond Shell –.........................214
Kuroiwa, Y., Masaoka , N., Ueki, T., Ogawa, T. and Kato, S.

TP096 A New Node Connection System with Twisted Wide Flange Members for Single Layer Lattice Shells – H Diamond Shell –.............................................................................216
Masaoka, N., Kuroiwa, Y, Ueki, T., Kato, S. and Ogawa, T.

TP097 Elasto-Plastic Analysis of a System Truss by Spatial Beam-Column FEM .........................................................218
Nishimura, T.K. and Morisako, K.

TP098 Collapse Behaviour of Double Layer Space Trusses........................................220
Sheidaii, M.R., Abedi, K. and Behravesh, A.

TP099 Effect of Membrane Arrangement on Member Buckling of Spatial Structures 222
Taniguchi, Y., Saka, T. and Maehata, T.

TP100 Member Design and Elastic Buckling Strength of the TH-H Mesh Double-Layer Braced Domes ....................................................................................................................224
Saka, T., Taniguchi, Y. and Konishi, T.

TP101 Load Capacity and Plastic Deformable Ability of Aluminum Alloy Double Layer Latticed Wall Subjected to Plane Load .........................................................226

TP102 The Limit Load and Deformability of Space Truss Subjected to the Uniform Temperature Field ......................................................................................................................228
Karczewski, J. and Donten, K.

Theory: Morphogenesis and Optimization

TP103 On Mechanical Behaviour of Space Bar Structures Built of Elements Having Golden Proportions ..............................................................................................................232
Obrzębski, J.B.

TP104 Filtering Method for Topology Optimization Analysis Using Optimality Criteria Method .........................................................................................................................234
Fujii, D., Suzuki, K. and Ohtsubo, H.

TP105 Structural Creation of Frameworks by Genetic Algorithm with Fundamental Stable Elements .....................................................................................................................236
Kawanura, H., Osada, S. and Ohmori, H.

TP106 Structural Form Creation by Extended ESO Method ........................................238
Ohmori, H., Cui, C.Y. and Miyachi, H.
CONTENTS

TP107 Autonomous Generation and Optimization of Structural Systems ........................................ 240
Mitsui, K. and Tosaka, N.

TP108 Truss Structure Design Based on Concept of Cellular Automata ........................................ 242
Kita, E. and Toyoda, T.

TP109 Size and Shape Discrete Optimization of Space Trusses Using Improved Genetic Algorithms ........................................ 244
Park, C.W., Gil, S.S., Jo, I.G. and Kang, M.M.

TP110 A Study on Multiobjective Fuzzy Optimization of Space Frame ........................................ 246
Mu, Z.G., Chen, Y.Z., He, K.Z. and Kang, M.M.

TP111 A Study on the Shape Control of Space Structures by Using Initial Stresses in Geometrically Non-Linear Range ........................................ 248
Nakazawa, S. and Kato, S.

TP112 Solution Form Available to Any Structural Analysis also with Singularity ............................. 250
Tanami, T.

TP113 Space Frame Configurations Generated by a Computer Driven Program Utilizing a Grammar Algorithm ........................................ 252
Tripeny, P.

TP114 Parametric Configuration Processing ........................................ 254
Nooshin, H. and Parke, G.A.R.

Theory: Vibration Control

TP115 How Do We Realize a Super Large Dome under Severest Earthquake? – A Dome with Seismic Isolation System – ........................................ 258
Uchikoshi, M., Kato, S., Nakazawa, S. and Mukaiyama, Y.

TP116 Endeavors to Control the Vibration on Long Span Structure ........................................ 260
Kaneda, K. and Saitoh, M.

TP117 A Study on Base Isolated Shell ........................................ 262
Shingu, K. and Niki, T.

TP118 A Study on the Behavior of a Double Layer Dome with VED Installed in the Braces of the Sub-Structures under Severe Earthquake Motions ........................................ 264
Kato, S. and Konishi, Y.

TP119 Viscoelastic Damper Modeling and Its Application to Dynamic Analysis of Visco-Elastically Damped Space Frames ........................................ 266
Kasai, K., Motoyui, S. and Ooki, Y.

TP120 Response of Seismically Isolated Large Span Domes to Fluctuating Wind Loads ........................................ 268
Matsui, T., Qiao, F., Moribe, Y., Sugiyama, E. and Esaka, Y.

TP121 Vibration Control Devices for Tension Structures Using Visco-Elastic or Viscous Material with Spring ........................................ 270
Takeuchi, T., Kaneda, K., Iwata, M., Wada, A. and Saitoh, M.
A Practical Method on Seismic Response Controlled Double Layer Cylindrical Latticed Shell with Variable Stiffness Members ................................. 272
Zhang, Y.G. and Ren, G.Z.

Vertical Vibration Control for Large Space Arch Subject to Horizontal Earthquake Wave ............................................................ 274
Xue, S.T., Qin, L. and Yamada, M.

Parametric Sensitivity of Optimal Arch-Type Frames Subjected to Spatially Varying Seismic Motions .................................................. 278
Ohsaki, M.

Evaluation of the Effects of Soil-Structure Interaction on the Seismic Response of Large Span Structures Considering the Irregularity of Soil Layers .................................................. 280
Kato, S., Su, L. and Nakazawa, S.

Earthquake Response of Cylindrical Shell Structures on Elastic Ground Supported at Corners .................................................. 282
Fukusumi, T. and Nozoe, H.

The Dynamic Response in Higher Modes of Single-Layer Latticed Spherical Shells Subjected to Seismic Motion .................................. 284
Yamada, M., Jung, C.W. and Ishikawa, B.

Botanic Shell Structures ................................................................. 288
Balz, Mi. and Gühring, J.

Polyhedral Patterns ................................................................. 290
Huybers, P. and van der Ende, G.

Great Space Curved Structures with Rigid Joints ......................................... 292
Escrig, F. and Sanchez, J.

Basic Principles of Creation of Natural Spatial Structures and Their Use in Building ................................................................. 294
Tetior, A.

The Proposal Study on Spatial Structure and Bionic Engineering .................. 296
Gao, F.J. and Liu, X.L.

Origami in Structural Engineering .................................................. 298
Tarnai, T.

Quasi-Crystalline Geometry for Architectural Structures .......................... 300
Weinzierl, B. and Wester, T.

Unified Steel-Reinforced Concrete Elements for Prefabricated Full-Assembled Large Span Buildings .................................................. 302
Abovskaya, S.N. and Sergunicheva, E.M.
TP153 On Characteristics of Several Movable Structures

Okutsu, S.

Realization: New Concept
TP154 Structural Design of Sendai Mediatheque

Sasaki, M., Ikeda, M. and Suzuki, A.

TP155 Structural Design of Yamaguchi Dome

Hitomi, Y., Osawa, K., Nakagawa, S. and Saitoh, M.

TP156 Experimental Study and Construction of Tension Membrane Strut System – The Membrane Roof Structure of Yamaguchi

Goda, T., Saitoh, M. and Kuroki, F.

TP157 Further Development of the KT-Wood Space Truss System

Imai, K., Fujita, Y., Wakiyama, K., Tsujioka, S., Fujimoto, Inada, M. and Morita, T.

TP158 Development of Space Frame and Monocoque Roof with CF Large-Span Structures

Sugizaki, K.

TP159 Study on Glass Supporting System Pinched at Corner – Structural Characteristics and Structural Design Method –

Saitoh, M., Okada, A. and Imamura, R.

TP160 Construction by ‘Jack-Up & Down Method’ of Tensegric Truss Study and Construction of Roof Structure of Yamaguchi Dor

Saitoh, M., Hosozawa, O., Kawazoe, T. and Yamashita, T

Realization: Construction
TP161 Glass Structures of German EXPO 2000 Pavilion

Burmeister, A., Ramm, E. and Reitinger, R.

TP162 Design and Realization of a Large-Scale Coal Storage Facility and the Structural Design –

Une, H., Shimizu, H., Matsui, E., Kawaguchi, M. and Abe

TP163 Design and Realization of a Large-Scale Coal Storage Facility the Structure During the Pushing Up Work –

Araki, T., Masuda, Y., Mukai, H., Kawaguchi, M. and Abe

TP164 The Study, Design and Construction of Suspen-Dome

Yin, Y., Han, Q.H., Chen, Z.H., Liu, X.L. and Mu, G.

TP165 Design of Construction Method of a Cable Girder Supportin

Nakakawaji, I., Yamakawa, K., Okada, A. and Saitoh, M.

TP166 Erection Methods of Spatial Structures Used Recently in Japan

Koto, T. and Saitoh, M.

TP167 Odate Dome, Japan

Tanno, Y., Kozuka, H. and Nakai, M.
CONTENTS

TP153 On Characteristics of Several Movable Structures .................................................. 340
   Okutsu, S.

Realization: New Concept

TP154 Structural Design of Sendai Mediatheque .......................................................... 344
   Sasaki, M., Ikeda, M. and Suzuki, A.

TP155 Structural Design of Yamaguchi Dome .............................................................. 346
   Hitomi, Y., Osawa, K., Nakagawa, S. and Saitoh, M.

TP156 Experimental Study and Construction of Tension Membrane Dome with Spring
   Strut System – The Membrane Roof Structure of Yamaguchi Dome – ......................... 348
   Goda, T., Saitoh, M. and Kuroki, F.

TP157 Further Development of the KT-Wood Space Truss System ................................ 350
   Imai, K., Fujita, Y., Wakiyama, K., Tsujiioka, S., Fujimoto, M., Watanabe, H.,
   Inada, M. and Morita, T.

TP158 Development of Space Frame and Monocoque Roof with CFRP for
   Large-Span Structures ............................................................................................... 352
   Sugizaki, K.

TP159 Study on Glass Supporting System Pinched at Corner
   – Structural Characteristics and Structural Design Method – .................................. 354
   Saitoh, M., Okada, A. and Inamura, R.

TP160 Construction by 'Jack-Up & Down Method' of Tensegic Truss Dome – Experimental
   Study and Construction of Roof Structure of Yamaguchi Dome – ............................ 356
   Saitoh, M., Hosozawa, O., Kawazoe, T. and Yamashita, T.

Realization: Construction

TP161 Glass Structures of German EXPO 2000 Pavilion ................................................. 360
   Burmeister, A., Ramm, E. and Reitinger, R.

TP162 Design and Realization of a Large-Scale Coal Storage Facility – Part 1 Outline of
   the Facility and the Structural Design – .................................................................. 362
   Une, H., Shimizu, H., Matsui, E., Kawaguchi, M. and Abe, M.

TP163 Design and Realization of a Large-Scale Coal Storage Facility – Part 2 the Analysis of
   the Structure During the Pushing Up Work – ......................................................... 364
   Araki, T., Masuda, Y., Mukai, H., Kawaguchi, M. and Abe, M.

TP164 The Study, Design and Construction of Suspen-Dome ......................................... 366
   Yin, Y., Han, Q.H., Chen, Z.H., Liu, X.L. and Mu, G.

TP165 Design of Construction Method of a Cable Girder Supporting a Glass Facade ....... 368
   Nakakawaji, I., Yamakawa, K., Okada, A. and Saitoh, M.

TP166 Erection Methods of Spatial Structures Used Recently in Japan .......................... 370
   Koto, T. and Saitoh, M.

TP167 Odate Dome, Japan .............................................................................................. 372
   Tanno, Y., Kozuka, H. and Nakai, M.
CONTENTS

TP168 Sapporo Dome, Japan ................................................................. 374
  Sasaki, M., Tanno, Y., Hosozawa, O. and Nakai, M.

TP169 Designing and Construction of the Yokkaichi Dome ......................... 376
  Nakamura, H., Takayama, H. and Saitoh, M.

TP170 A Holistic Design of Soccer Stadium
  Watanabe, T, Aizawa, M., Kaneda, K. and Saitoh, M.

TP171 The Structural Design and Structural Work for the Saitama Super Arena .......... 380
  Kobori, T, Harada, H., Hosozawa, O. and Saitoh, M.

TP172 On Design and Construction of the Roof Structure of the Swimming Stadium for
  National Athletic Meet in Kochi ...................................................... 382
  Taniguchi, H., Hirose, K., Watanabe, Y., Gouda, H. and Saitoh, M.

TP173 Construction Sequence Analysis of Unique Shaped RC Tension Ring ................ 384
  Tomatsuri, H., Fuchigami, K. and Miura, Y.

TP174 Structural Behaviour of the Unique Shaped RC Member under Complex Stresses .... 386
  Fuchigami, K., Tomatsuri, H. and Miura, Y.

TP175 Salle Omnisport Shell Design and Construction ..................................... 388
  Gomes, M.

TP176 Roofs of Beam String Structure Supported by Independent Cylindrical Cantilever
  Columns – Design and Construction of Gymnasium and Indoor Swimming Pool
  Buildings in Urayasu, Chiba Prefecture – ........................................... 390
  Saitoh, M., Kaneda, K., Hosozawa, O. and Shimamura, K.

TP177 Cable Suspension Frame Design and Construction Methods
  – The Construction of Toyota Stadium – ............................................ 392
  Hosozawa, O., Shibata, I. and Itaya, T.

TP178 The Japan Pavilion for the Hanover Expo 2000 ..................................... 394
  Dickson, M., Hardie, G., Leiblein, K., Rogers, P. and Westbury, P.

TP179 2002 FIFA World Cup Stadiums in Korea ......................................... 396
  Kwun, T.J.

TP180 Structural Design for Ulsan Soccer Stadium ....................................... 398
  Watanabe, K.

TP181 Structural Design of Cable Stayed Truss of 2002 Chonju World Cup Stadium ........ 400
  Kim, J.S.

TP182 Structural Design and Construction of a Stadium with Prestressed
  Suspension Roofs ................................................................................. 402
  Ukai, K., Hara, K. and Ikago, K.

TP183 Design and Construction of Single-Layer Reticular Structure of
  Shimonoseki Aquarium ....................................................................... 404
  Fujita, M., Lei, X., Oda, Y., Ninakawa, T. and Konomi, S.

TP184 Design and Construction of Gondola Tower by a Systematized Space Truss ........ 406
  Saitoh, M. and Kobayashi, T.
CONTENTS

TP185 Behavior and Realization of a Holed Single Layer Spherical Dome with Large Height-Span Ratio .................................................................408
  Han, Q.H., Xie, L.L. and Liu, X.L.

TP186 A Design and Construction of Suspension-Arch ........................................410
  Kusukawa, K., Yamashita, T. and Tanaka, T.

TP187 Re-Challenge to 20-M Span Ice Dome ....................................................412
  Kokawa, T., Itoh, O. and Watanabe, T.

TP188 Analysis and Realization of Composite Roof Shells ..................................414
  Öiger, K.

TP189 An Integrated Design for Ring Road in the Urban City, Nagoya ......................416
  Sumi, M., Takenouchi, K., Imagawa, N. and Yano, M.

TP190 The Diagnostics and Forecasting of Reliability of Tanks ............................418
  Popovsky, B. and Dzhur, Y.

TP191 Using a Postfailure Stress-Displacement Material Model for SFRC Shells
  – Evaluation through Testing of Shell Specimens – ........................................420
  Domingo, A., Lázaro, C. and Serna, P.

Realization: Innovations

TP192 Advances in Research and Engineering Practice of Spatial Structures in China ....424
  Lan, T.T.

TP193 Long-Span Spatial Structures Presently in China .......................................426
  Liu, X.L.

TP194 The Roles of Cables in Space Structure – Recent Designs and Construction
  Examples in Japan – .........................................................................................428
  Saitoh, M., Okada, A. and Tagawa, H.

TP195 Introduction of Recent Long Span Structures Using Beam String Structure ....430
  Kobayashi, S., Kaneda, K. and Saitoh, M.

TP196 Bridging the Gap .........................................................................................432
  Levy, M.

TP197 Structural Applications of Advanced Composite Materials for Bridges and Buildings .............................................................434
  Keller, T. and Castro, J.

TP198 Construction of JChypar, a Steel Fiber Reinforced Concrete Thin Shell Structure ....436
  Domingo, A., Lázaro, C. and Serna, P.

TP199 Are All Membrane Structures Similar? .....................................................438
  Balz, Ma.
