THE FIFTH INTERNATIONAL SYMPOSIUM ON DIAGNOSTICS AND MODELING OF COMBUSTION IN INTERNAL COMBUSTION ENGINES

COMODIA 2001

July 1-4, 2001
Nagoya, Japan

Sponsored by
The Japan Society of Mechanical Engineers
Co-sponsored by
The society of Automotive Engineers of Japan

Participated by
Combustion Society of Japan, Gas turbin Society of Japan,
The Institute of Liquid Atomization and Spray Systems Japan,
The Japan Institute of Energy, Japan Internal Combustion Engine Federation,
The Marine Engineering Society in Japan, The Visualization Society of Japan
Contents

Keynote Papers

Chairperson: M. Shioji
(KA-1) The Concept for Compression Ignition Engines Using Premixed Mixture
Kinji Tsujimura
Department of Mechanical Engineering, Chiba Institute of Technology
Yuzo Aoyagi
Research Department, New ACE
Hisashi Akagawa
Research Department, Nissan Diesel Motor Co. LTD
Yoshinaka Takeda
Engine Research Department, Mitsubishi Motors Corporation LTD

Chairperson: J. Senda
(KA-2) Diagnostics for the Measurement of Particulate Matter Emissions from Reciprocating Engines
Peter O. Witze
Sandia National Laboratories

Chairperson: N. Iida
(KA-3) Trends in Future Fuels for Mobile Applications
Rudolf R. Maly and Winfried Degen
DaimlerChrysler AG

Chairperson: T. Chikahisa
(KA-4) Optical Diagnostics in Engines
Felice E. Corcione
Istituto Motori - CNR

Diesel Engine Combustion

(DE-1) Diesel Engine Combustion I-Combustion and Emission Control
Chairpersons: M. Hori and K. Nishida

(1-01) Evaluation of the Potential of Passenger Car Common Rail Injection by Simultaneous Application of In-Cylinder Fuel and Flame Detection
C. Fettes, C. Heimgartner and A. Leupertz
Univ. of Erlangen-Nurnberg

(1-02) Visual Study on Combustion of Low-Grade Fuel Water Emulsion
Hiroshi Tajima, Koji Takasaki, Masayoshi Nakashima, Kenichiro Kawano, Makoto Ohishi, Jun Yanagi and Shin-nosuke Osafune
Kyushu Univ.
(1-03) Study on Stratified Injection System
Shin-nosuke Osafune, Tatsuo Takaishi and Koji Takasaki and Masayoshi Nakashima
Hiroyuki Ishida
Mitsubishi Heavy Industries Ltd.
Kazuhiko Iwamoto
Petroleum Energy Center (PEC)

(DE-2) Diesel Engine Combustion 2-Combustion and Emission Control
Chairpersons: T. Seko and K. Yamane

(1-04) Direct Particulate Sampling Study in a DI Diesel Combustion Chamber
Satoshi Kato, Junya Yoshizawa and Hideaki Tanabe
G.Takeshi Sato
Kanazawa Institute of Technology

(1-05) Application of a New Selective Non-Catalytic NO Reduction System to Diesel
Exhaust
Yasufumi Nakanishi, Joon dugs Gk Gore, Yoshinobu Yoshihara and Kazuie Nishiwaki
Ritsumeikan Univ.

(1-06) Real-time On-board Measurement of Mass Emissions of NOx, THC and
Particulate Matters from Diesel Vehicles
Nobutaka Kihara and Tokihiro Tsukamoto
Horiba Ltd.

(DE-3) Diesel Engine Combustion 3-Modeling
Chairpersons: Y. Yoshihara and M. Zolver

(1-07) Prediction of Ignition Processes in Fuel Sprays Including Turbulent Mixing and
Reduced Chemical Reaction Models
Takuji Ishiyama, Masahiro Shioji and Tadayoshi Ihara
Kyoto Univ.

(1-08) Numerical Study of n-Heptane Spray Auto-Ignition at Different Levels of
Pre-Ignition Turbulence
T. Rente, V. I. Golovitchev, and I. Denbratt
Chalmers Univ. of Technology

(1-09) Application of Complex Chemistry to Investigate the Combustion Zone Structure
of DI Diesel Sprays under Engine-Like Conditions
Feng Tao, Valeri I. Golovitchev and Jerzy Chomiak
Chalmers Univ. of Technology

(DE-4) Diesel Engine Combustion 4-Modeling
Chairpersons: T. Itoh and J. Kusaka

(1-10) Prediction of Combustion and In-Cylinder Emissions in a Direct Injection Diesel
Engine Using Multi-Process Models
Pramod S. Mehta and Tamma Bhaskar
Indian Institute of Technology Madras
(1-11) Reduction Mechanism of NOx in Rich and High Turbulence Diesel Combustion
Yoshiyuki Kidoguchi, Kei Miwa and Ali Mohammadi
Tokushima Univ.

(1-12) Temporal and Spatial Evolution of Radical Species in the Experimental and Numerical Characterisation of Diesel Auto-Ignition
F.E. Corcione, B.M. Vaglieco, S. Consales, M. Costa, G. Formisano and S.S. Merola
Istituto Motori

(1-13) Heat Transfer in Diesel Engines: A CFD Evaluation Study
c K. B. Binder
Imperial College of Science Daimler Chrysler AG

(1-14) CFD and Combustion in Engines with an Unstructured Parallel Solver Based on KIVA
Zolver M., Torres A. and Klahr D.
IFP

Chairpersons: M. Ishida and K. Nishiwaki

(3-26) Measuring Transient Wall Heat Flux under Diesel Engine Conditions
Ulrich Meingast, Lars Reichelt and Ulrich Renz
Lehrstuhl für Wärmeübertragung und Klimatechnik, RWTH Aachen

(3-27) Vortex Promotion in a DI Diesel Engine Combustion Chamber with Bluff Bodies
Hideaki Tanabe
Gunma Univ.
Satoshi Kato, Tetsuro Hirai, Ryoichi Shimooka and G. Takeshi Sato
Kanazawa Institute of Technology

(3-28) Measurement and Modeling of Large-Scale Flow Structures and Turbulence in a High-Speed Direct-Injection Diesel Engine
Paul Miles
Sandia National Labs.
Marcus Megerle and Volker Sick
Univ. of Michigan
Keith Richards, Zac Nagel and Rolf Reitz
Univ. of Wisconsin

S. I. Engine Combustion

(SI-1) S. I. Engine Combustion 1-Direct Injection Engines
Chairpersons: W. Ipp and E. Tomita

(2-01) Effect of Compression Pressure on the Spray Morphology of GDI Pressure-Swirl Injectors
G. Wigley and S. Rogers
Loughborough Univ.
B. Schneider
Swiss Federal Institute of Technology
G. Pitcher and D. Law
Lotus Engineering
(2-02) Numerical Analysis of Mixture Formation of a Direct Injection Gasoline Engine
Terutoshi Tomoda, Masato Kubota and Ryo Yoshihiro Nomura
Shimizu Toyota Motor Co.

(2-03) A Study on Direct Injection Gasoline Combustion Using Constant Volume Combustion Vessel
Naoki Shiraishi, Takayoshi Takano and Syoji Nagasaka
Hiroshi Sami
Toyota Technological Institute
Kazuhito Sakai
Toyota Motor Co.

(SI-2) S. I. Engine Combustion 2-Direct Injection Engines
Chairpersons: Y. Moriyoshi and G. Wigley

(2-04) Useful Combustion in Cylinder during Exhaust Stroke and in Exhaust Port with Gasoline Direct Injection
S. Yamamoto, D. Tanaka, K. Kuwahara and H. Ando
Mitsubishi Motors

(2-05) The Lean Boost System
Tim Lake, John Stokes and Richard Osborne
Ricardo

(2-06) A New Concept on the Conflict of Combustion & Emission in the SI-Stratified-GDI and CI-Pre-Mixed-DI Engines
Shin Matsuoka
Science Univ. of Tokyo

(SI-3) S. I. Engine Combustion 3-Flow and Combustion
Chairpersons: K. M. Chun and Y. Daisho

(2-07) Analysis of Fractal Characteristics of Tumbling Flow in a Spark Ignition Engine Using Wavelet Transform
Zhong Zhang
Industrial Tech. Center of Okayama Prefecture
Hiroaki Kawabata
Okayama Prefectural Univ.

(2-08) Effects of Swirl Turbulent Flow Field and Inhomogeneous Concentration Field on Combustion of Fuel-Air Mixture in a Constant Volume Vessel
Nobuyuki Kawahara, Eiji Tomita, Sadami Yoshihama and Atsushi Nishiyama
Okayama Univ.

(2-09) Analysis of Turbulent Combustion in Idealized Stratified Charge Conditions
Yasuo Moriyoshi, Eiji Komatsu and Hideaki Morikawa
Chiba Univ.
(SI-4) S. I. Engine Combustion 4-Flame Propagation
Chairpersons: O. Colin and M. Tsue

(2-10) Towards Evaluation of Turbulent Flame Speed
Andrei N. Lipatnikov and Jerzy Chomiak
Chalmers Univ. of Technology

(2-11) An Experimental Study on the Local Configuration of Premixed Turbulent Flame
Hiroyuki Kido, Kenshiro Nakashima, Masaya Nakahara and Jun Hashimoto
Kyushu Univ.

(2-12) A Study on Turbulent Combustion Properties of Spherically Propagating Methane Flames
Kimitoshi Tanoue, Fumio Shimada and Hiroyuki Kido
Takeshi Ai
Kyusyu Univ.

(2-13) Laminar Flame Propagation Through a Step-Stratified Charge
Youngchul Ra and Wai K. Cheng
Massachusetts Institute of Technology

(2-14) Combustion of Stratified Mixture Formed by Gas Fuel Jet
Toshiaki Kitagawa, Hiroyuki Kido, Kyu Sung Kim, Tomotaka Deguchi and Junya Yamashita
Kyushu Univ.

(SI-5) S. I. Engine Combustion 5-In-Cylinder A/F and Temperatures
Chairpersons: D. Misul and E. Murase

(2-15) Analysis of Cycle-by-Cycle Variation in a Direct-Injection Gasoline Engine using Laser-Induced Fluorescence Technique
Taketoshi Fujikawa, Yoshihiro Nomura and Tatsuo Kobayashi and Mutsumi Kanda
Toyota CRDL

(2-16) Two-Dimensional Mapping and Quantification of the In-Cylinder Air/Fuel-Ratio in a GDI Engine by Means of LIF
Wolfgang Ipp, Jan Egermann, Volker Wagner, Ingo Schmitz and Alfred Leipertz
Univ. of Erlangen-Nürnberg

(2-17) Studies of Temperature Elevation Due to the Pre-Flame Reaction in a Spark-Ignition Engine with CARS Temperature Measurements Using Fuels of Various Octane Numbers
Inyong Choi, Kwang Min Chun, Chul-Woung Park and Jae Won Hahn
Yonsei Univ.

(SI-6) S. I. Engine Combustion 6-Modeling
Chairpersons: W. K. Cheng and T. Kawai
A Refined Two-Zone Heat Release Model for Combustion Analysis in SI Engines
A.E. Catania, D. Misul, A. Mittica and E. Spessa
Politecnico di Torino

Real-Time Engine Control Using a Combustion Model for Lean Boost Engines
Yoshishige Ohyama
Hitachi Car Engineering Co. Ltd.

Numerical Analysis of the Combustion Process in a Spark-Ignition Engine
Holger Peters, Ralph Worret and Ulrich Spicher
Universitat Karlsruhe (TH)

S. I. Engine Combustion 7-Modeling
Chairpersons: A. E. Catania and T. Wakisaka

Oxidation of Unburned Hydrocarbons from Crevices in Spark-Ignition Engine
Hoimyung Choi, Sejun Kim and Kyoungdoug Min
Seoul National Univ.

Numerical Analysis of the Interaction between Thermo-Fluid Dynamics and Auto-Ignition Reaction in Spark Ignition Engines
Katsuya Saijyo, Kazuie Nishiwaki and Yoshinobu Yoshihara
Ritsumeikan Univ.

Multi Dimensional Modeling Combined with a Detailed Kinetics
Jin Kusaka and Yasuhiro Daisho
Waseda Univ.

Numerical Simulation of Composite Spark Ignition Process in a Methane-Air Mixture
Takao Yuasa, Shinichi Kadota, Mitsuhiro Hiroshi Nomura and Yasushige Ujiie
Tsue and Michikata Kono
Univ. of Tokyo

Arc and Kernel Tracking Ignition Model for 3D Spark-Ignition Engine Calculations
J-M. Duclos and O. Colin
IFP

Alternative Fuels

Alternative Fuels 1-Gas Engines
Chairpersons: T. Ishiyama and E. Spessa
(3-01) Study on Ignition Method for Lean-Mixture to Improve Thermal Efficiency of Gas Engine
Satoru Goto, Sadao Nakayama, Yoshifumi Nishi and Yoshiharu Ono
Niigata Engineering Co., Ltd

(3-02) A Fundamental Study on a MPI LPG Engine for Heavy-Duty Vehicles
Kern Yong Kang, Daeyup Lee, SeungMook Oh and ChangUp Kim
Korea Institute of Machinery and Materials (KIMM)

(3-03) Feasibility of CNG DI Stratified Combustion Using a Spark-Ignited Rapid Combustion Machine
Zuohua. Huang
Xi’an Jiaotong Univ.
Gunma Univ.
Takamasa. Ueda and Nobuhisa. Jingu
Nissan Motor Co., Ltd.
Mitsuhiro. Tsue and Michikata. Kono
Univ. of Tokyo

(AF-2) Alternative Fuels 2-Gas Engines
Chairpersons: K. Min and S. Shiga

(3-04) Development of the Lean Burn Miller Cycle Gas Engine
Hiroyuki Endo, Kengo Tanaka and Yoshitaka Kakuhama
Mitsubishi Heavy Industries, Ltd.
Yasunori Goda, Takao Fujiwaka and Masashi Nishigaki
Osaka Gas Co., Ltd.

(3-05) Effect of EGR and Preheating on Natural Gas Combustion Assisted with Gas-Oil in a Diesel Engine
Masahiro Ishida, Norimichi Amimoto, Tetsuya Tagai and Daisaku Sakaguchi
Nagasaki Univ.

(3-06) Smokeless and Low NOx Combustion in a Dual-Fuel Diesel Engine with Induced Natural Gas as the Main Fuel
Hideyuki Ogawa, Noboru Miyamoto, Chenyu Li, Satoshi Nakazawa, and Keiichi Akao
Hokkaido Univ.

(AF-3) Alternative Fuels 3-Biomass Fuels and Fuel Design
Chairpersons: M. Odaka and H. Ogawa

(3-07) Fuel Design Concept Research for Low Exhaust Emissions by Use of Mixing Fuels
Jiro Senda, Daisuke Kawano, Kazuya Kawakami, Atsushi Shimada and Hajime Fujiyama
Gen Shibata
Doshisha Univ.
Matsuo Odaka, Yuichi Goto and Hisakazu Suzuki
Safety and Nuisance Research Institute
(3-08) Influence of Physical and Chemical Properties of Biodiesel Fuel on Injection, Combustion and Exhaust Emission Characteristics in a DI-CI Engine
Koji Yamane, Atsushi Ueta and Yuzuru Shimamoto
The Univ. of Shiga Prefecture

(3-09) Combustion Characteristics of Diesel Engines with Waste Vegetable Oil Methyl Ester
Kazunori Hamasaki, Eiji Kinoshita and Hiroshi Tajima and Koji Takasaki
Daizo Morita
Kyushu Univ.
Kagoshima Univ.

Novel Combustion Systems

(NCS-1) Novel Combustion Systems 1-Homogeneous Charge, Premixed Charge Compression Ignition Engines
Chairpersons: A. Lipatnikov and Y. Matsui

Yudai Yamasaki and Norimasa Iida
Keio Univ.

(1-16) Numerical Prediction of Mixture Formation and Combustion Processes in Premixed Compression Ignition Engines

Tomoyuki Wakisaka
Osaka City Univ.
Nobusato Kato
Kyoto Univ.
Thanh Tung Nguyen
Industrial Power Alliance Ltd.
Keiichi Okude
Mitsubishi Motors Corp.
Shin-ichi Takeuchi
MMC Computer Research Ltd.
Yoshihiro Issiki
Setsunan Univ.

(1-17) Visualized Analysis of a Pre-Mixed Diesel Combustion under the High Boosting Engine Condition
Yuzo Aoyagi, Yasuaki Asaumi, Eiji Kunishima
and Akira Harada
New A.C.E. Institute Co. Ltd.
Akiyoshi Morita and Toshiyuki Seko
Japan Automobile Research Institute

(NCS-2) Novel Combustion Systems 2-Homogeneous Charge, Premixed Charge Compression Ignition Engines
Chairpersons: M. Arai and P. C. Miles

(1-18) Study on Homogenous Charge Compression Ignition Gasoline Engine
Makoto Kaneko, Koji Morikawa, Jin Itoh and Youhei Saishu
SUBARU Research Center Ltd.

(1-19) Ignition Timing Control of Compression Ignition Premixed Charge Engine
E. Murase, K. Hanada and T. Takayama
Kyusyu Univ.
H. Endo
Mitsubishi Heavy Industries, Ltd.
(1-20) A Study on the Control of Ignition and Combustion of Dimethyl Ether in Homogeneous Charge Compression Ignition Engine
Kyoung-Oh Kim, Akihiko Azetsu and Chikashi Oikawa
The Univ. of Tokyo

(NCS-3) Novel Combustion Systems 3-Homogeneous Charge, Premixed Charge Compression Ignition Engines
Chairpersons: A. Azetsu and F. Corcione

(2-26) Chemical Species Histories up to Ignition in Premixed-Compression-Ignition Natural-Gas Engine
Masahiro Furutani, Masaaki Kono, Mitsutaka Kojima, Masakazu Nose and Yasuhiro Ohta
Nagoya Institute of Technology

(2-27) A New Concept of I.C. Engine with Homogeneous Combustion in a Porous Medium
Franz Durst
Univ. of Erlangen-Nürnberg
Miroslaw Weclas
Invent GmbH

(2-28) Zero Emission Engine - A Novel Steam Engine for Automotive Applications
Stephan Mößbauer, Franz Durst and Tobias Haas
Dimosthenis Trimitis
IAV GmbH

Fuel Sprays

(3-10) Spray Characteristics of Slit Nozzle for DI Gasoline Engines
Kiyomi Kawamura and Akinori Saito
Toyota CRDL
Mutsumi Kanda, Toshimi Kashiwagura and Yasuhiro Yamamoto
Toyota Motor Co.

(3-11) Techniques for Analyzing Swirl Injectors of Direct-Injection Gasoline Engines and Its Application
Masaaki Kubo, Akihiro Sakakida and Akihiro Iiyama
Nissan Motor Co., Ltd.

(3-12) Relationship between Fuel Injection Rate and Spray Characteristics of the Swirl Nozzle for Gasoline Engine
Tsuneaki Ishima, Ryoichi Sukena, Chuanli Liu and Tomio Obokata
Gunma Univ.
Katsuyoshi Kawachi and Kazumitsu Kobyashi
Unisia Jecs Co.

(3-13) Measurement of Ambient Air Motion of D.I. Gasoline Spray by LIF-PIV
Masahisa Yamakawa, Seiji Isshiki, Takuo Yoshizaki and Keiya Nishida
Hiroshima Univ. and Nippon Institute of Technology
Numerical Simulations of Spray Formation Process in High and Low Ambient Pressures Using a Swirl-Type Injector
Masahide Takagi and Yasuo Moriyoshi
Chiba Univ.

(FS-2) Fuel Sprays 2-Diesel sprays
Chairpersons: T. Feng and K. Naito

Cylinder to Cylinder Deviations in Fuel Spray and Exhaust Emissions at Idling in High Pressure DI Diesel Engines
Hideyuki Tsunemoto, Hiromi Ishitani, Rhaman MD. Montajir, Takeshi Hayashi and Naoto Kitayama
Kitami Institute of Technology

Characterization of Droplets and Vapor Concentration Distributions in Split-Injection Diesel Sprays by Processing UV and Visible Images
Yuyin Zhang and Keiya Nishida
Hiroshima Univ.
Takuo Yoshizaki
Nippon Institute of Technology

A Study of the Formation and Break-Up of a Diesel Spray for HSDI Diesel Engine Combustion Systems
R. Morgan, M. Gold, J. Wray and S. Whelan
Ricardo Consulting Engineers Ltd.

Effect of Recessed-wall on an Impingement Diesel Spray
Kyungnam Ko, Kenji Amagai and Masataka Arai
Gunma Univ.

Entropy Analysis of Microscopic Diffusion Phenomena in Diesel Sprays
Ryo Yuyama, Takemi Chikahisa, Kazushige Kikuta and Yukio Hishinuma
Hokkaido Univ.

(FS-3) Fuel Sprays 3-Modeling
Chairpersons: T. Dan and O. Gulder

A Spray Wall Impingement Model Based upon Conservation Principles
Ronald O. Grover, Jr. and Dennis N. Assanis
Univ. of Michigan

Droplet Impingement on Hot and Cold Walls Analyzed with Cyto-Fluid Dynamic Theory
Ken Naitoh and Yoshitsune Morita
Yamagata Univ.

A Numerical simulation of Diesel Fuel Spray by LES
Shin Kimura, Hidenori Kosaka, Ryutaro Himeno and Yukio Matsui
Tokyo Institute of Technology

Diagnostics
(D-1) **Diagnostics 1-LIF**
Chairpersons: Y. Ikeda and G. Josefsson

J. Nygren, M. Richter, J. Hult and M. Alden C. F. Kaminski
Lund Institute of Technology Unv. of Cambridge

(3-16) Applicability of Different Exciplex Tracers and Model Fuels for Investigation of Mixture Formation in Direct Injection Gasoline Engines

C. Kornmesser, T. Müller and V. Beushausen P. Andresen
Laser-Laboratorium Goettingen e. V. Unv. of Bielefeld
W. Hentschel
Volkswagen AG, Forschung & Entwicklung

(3-17) A Correction Method for Laser Absorption in LIF Measurements inside Engine Cylinders

Masayuki Tamura, Teruhiro Sakurai and Hideo Tai
Tokyo Gas Co., Ltd.

(D-2) **Diagnostics 2-LII**
Chairpersons: G. Bruneaux and H. Kosaka

(3-18) Qualitative Laser-Induced Incandescence Measurements of Soot Emissions During Transient Operation of a Port Fuel-Injected Engine

Peter O. Witze
Sandia National Laboratories

(3-19) Laser-Induced Incandescence Soot Analyzer (LI²SA) for Soot Mass Concentration and Primary Particle Size Measurement in Engine Exhaust Gases

C. Heimgärtner, S. Schraml, S. Will, A. Leipertz, A. Kaste and N. D’Alfonso
Univ. of Erlangen-Nuremberg

(3-20) Laser-Induced Incandescence Measurements of Particulate Matter Emissions in the Exhaust of a Diesel Engine

Guilder Artium Technologies
National Research Council Canada

(D-3) **Diagnostics 3-Applications and Advanced Technology**
Chairpersons: C. Heimgaertner and T. Kadota

(3-21) A Study of Soot Cloud Structure in High Pressure Single Hole Common Rail Diesel Injection Using Multi-Layered Laser-Induced Incandescence

G. Bruneaux
IFP
(3-22) Two-Dimensional Imaging of Reaction Zone Structure in Diesel Spray Flame by LIF Technique
Hidenori Kosaka, Tetsuya Aizawa and Yukio Matsui
Tokyo Institute of Technology

(3-23) Detail Spectrum Analysis of Chemiluminescent Radicals at Flame Front in an SI Engine
Yuji Ikeda, Hiroyasu Nishihara and Tsuyoshi Nakajima
Kobe Univ.

(3-24) Application of Improved Interferometric Laser Imaging Droplet Sizing (ILIDS) System to Hollow-Cone Sprays
Tatsuya Kawaguchi, Toshihiro Kobayashi, Xiao Hu, Hiroyuki Hayama and Yasuo Moriyoshi
Keio Univ. and Chiba Univ.

(3-25) Length Scale Measurements in an Engine Using PIV and Comparison with LDV
Göran Josefsson, Jürgen Fischer and Ingemar Magnusson
Volvo Technological Development
