Machine tool vibration

Investigation of Instability Problem in High Speed Separators
Yatao Zhang ................................................................................................................. 1795

Elimination of Whip with a Mid-Span Gas Seal
John J. Yu, Paul Goldman, Donald E. Bentley, John S. Jacob .................................................. 1803

A Study on the Dynamic Behaviour of an Automatic Washing Machine
Sung Hoon Hwang, Jun Young Lee, Seitcho Suzuki, Woon Gu Hur ......................................... 1811

Chaotic Signal Characteristics and Classification for a Rub-Impacting Rotor system
Hui Ren ......................................................................................................................... 1819

Computational Investigation on the Dynamic Characteristics of Rotating Non-homogeneous Structural Systems
Yau-Pin Chyou, Tsang-Dong Chung .................................................................................. 1825

Control of Synchronous Vibration of a Rotor System with Active Gas Bearings
Jinhao Qiu, Junji Tani, Taekyu Kwon .............................................................................. 1833

Vibration Control for an Overhung Rotor System Considering the Stiffness of Control Device Mount
Kazuki Mizutani, Yui, Ryojun Ikeura ................................................................................ 1841

Runout Identification and Precision Control of Integrated Motor-Bearing System
Woo-Sup Han, Chong-Won Lee ...................................................................................... 1849

The Information Integration and Optimization in Flexible Rotor Balancing
Bingang Xu, Liangsheng Qu, Xiaoming Tao ....................................................................... 1857

Study on Chaotic Prediction of Vibration Series for Turbogenerator Unit
Zhi-Hua Ge, Chang-Fu Ding, Zhong-He Han .................................................................... 1863

Acoustical Vibration of A Submerged Motor-Driven Cryogenic Pump
Chun Hyong .................................................................................................................. 1869

Toeplitz Matrices and Cutting State Identification
B. Berger, C. Belai, D. Anand ......................................................................................... 1877

Complex Approach to Vibration Based Cutting Tool Diagnostics
Andrzej Sokolowski, Jan Kosmol .................................................................................. 1885

The Modelling of Chatter in Grinding
Dianne C. Hesterman, Brain Stone .................................................................................. 1893

Towards a Better Environmental Impact by Single Cylinder Diesel Engines for Agricultural and Gardening Appliance
Eleonora Carletti, G. Miccoli ......................................................................................... 1901

VOLUME 4

Modal analysis

The Use of Overlapped Cavities for Calculation Acoustic Modes of Irregular Shaped Cavities with an Integro-modal Approach
L. Cheng, E. Anyunzoghe .............................................................................................. 1909
Acoustical Modal Analysis of Coupled Enclosures  
*Serafettinoglu Hakan, Caliskan Mehmet* ................................. 1917

Three-Dimensional Natural Vibration Analysis of Piezoelectric Rectangular Plates  
*Piotr Cupial* ................................................................. 1925

A Method for Determination of A Set of Spatial Matrices from Modal Parameters and the Effectiveness  
*Hisayoshi Matsuoka, Masaaki Okuma* ...................................... 1933

Determination of Mode Shapes from the Operational Deflection Shape  
*Bor-Tsuen Wang* .................................................................. 1941

Model Updating of Damped Structures using Frequency Response  
*Philip D. Cha, Joshua P. Switkes* ........................................... 1949

Vibration Reduction by Structure Modification  
*Leping Feng* ....................................................................... 1957

Modal Testing of Mechanical Structures Subject to Operational Excitation Forces  
*Svend Gade, NiB. Moller, Henrik Herlufsen, Rune Brincker, Palle Andersen* ......................................................... 1965

Statistical Mobility for Multiple Point Excited Structures  
*A. T. Moorhouse, Su J. X.* .................................................... 1973

Modal Analysis of Sound Resonance for the Parallel Cylindrical Shells in Boilers  

Eigen Analysis of Cylindrical Transducer Array Structure  
*O. R. Nandagopan, Nixon Bivera* ........................................... 1989

Non-destructive testing  

*Venkatachalam Rajendran, N. Palanivelu, B. K. Chaudhuri, K. Goswamy* ................................................................. 1997

Parameter Identification of Beam Using Image Processing 4th Report, Improvement in Identification Accuracy and Calculation Time  
*Tadao Kawai, Masami Ito, Shinichi Takahashi, Naoto Ikeda* .................................................................................. 2005

Analytical Modelling of Magnetostrictive Transducers Used for Non-Destructive Evaluation  
*Michel Brissaud, Jean Christian Aime, L. Laguerre* ..................... 2013

Laser Technique for Determination of Ultrasonic Velocity  
*S Jayakumar* ..................................................................... 2021

Nonlinear acoustics and vibration  

Harmonic Balance Analysis of Squeeze Film Damper Rotor Dynamic Systems using Receptances  
*Philip Bonello, Michael J. Brennan, Roy Holmes* .......................... 2027

Analysis of the Non Linear Orbital Motions of Immersed Rotors Using a Spectral/Galerkin Approach  
*Miguel Moreira, Jose Antunes, Heitor Pina* .................................. 2035

Analysis of Periodic Response of Rotor Dynamic System with Nonlinear Supports  
*Wenhu Huang, Liguang Wang, Chao Hu* ..................................... 2043
Nonlinear Dynamical Behavior of a Rigid Rotor with Elliptical Journal Bearings System

Wenhu Huang, Xinjiang Zhang, Xinhua Wu, Songbo Xia, Wanjing Han .......................... 2051

Non-linear Vibration Effects due to Spline Couplings

Ningsheng Feng, Eric J. Hahn ................................................................. 2059

Moderately Large Vibrations of Slightly Curved Inelastic Sandwich Beams

Christoph Adam .................................................................................. 2067

Non-Linenar Vibration of an Heated Orthotropic Annular Plate with a Centric Rigid Mass

Shi-rong Li, X. Song, Zhao-Chun Teng .............................................. 2075

Modal Interactions in a Coupled Non-Linear Slowly Varying System

Stefan Kaczmarczyk............................................................................ 2083

The Contribution of Solitary Wave to Acoustics Noise

Woon-Seng Gan .................................................................................. 2091

Application of Kohonen Networks for Failure Diagnostics of Vibroacoustic Systems

N. Baranov Sergey, Lev S. Kuravsky ................................................ 2097

Pulse-echo Measurement of Non Linear B/A Parameter

D. Kourtiche, L. Allies, A. Chitinalah, M. Nadi .................................. 2105

A Dynamical State Estimation Method for Incomplete Observation with Amplitude Limitation in Environmental Acoustics

Seijiro Hiromitsu, Mitsuo Ohta, Kazutatsu Hatakeyama .......................... 2113

Optimization

Optimization of Acoustic Response with Numerical and Experimental Comparison

Mats Tinnsten, Peter Carlsson ............................................................ 2121

Mid-Range Optimization in Sound Reduction: Theory

P. H. L. Kessels, G. Verbeek, J. W. Verheij .................................. 2129

Mid-Range Optimization in Sound Reduction: Application to MRI Scanners

P. H. L. Kessels, G. Verbeek, J. W. Verheij .................................. 2137

Enhanced Genetic Algorithm for Fast and Accurate Global and Local Optimization Search

Young-Chan Kim, Seong-Pil Choi, Bo-Suk Yang, Soo-Jong Lee ............. 2143

Phased Array Measurements of Trailing Edge Noise from a Flat Plate

Sandro Guidati, Jasmin Ostertag, Gianfranco Guidati, Siegfried Wagner ........................................ 2151

Shape Design Sensitivity Analysis of an Acoustic Noise from Thin Body

Jeawon Lee, Semyung Wang ............................................................... 2159

Sound Reduction of Rotary Compressor Using Topology Optimization

S. Wang, J. Park .................................................................................. 2167

Sound Quality Equivalent Modeling for Virtual Car Sound Synthesis

Marleen Adams, Patrick Van de Ponseele, Filip Deblauwe ..................... 2175
