Co-participants:

TMS
The Minerals, Metals, and Materials Society

Society of Exploration Geophysicists

American Geophysical Union

The Women's Aquatic Network

The Coasts, Oceans, Ports and Rivers Institute

The American Meteorological Society

The Oceanography Society
Field Test Data Distribution on CD-ROM Using World Wide Web Technology ................................................. 2306 Michele E. D'Anna-Decker, Ian M. Courtney, Jeffrey L. Hanson, Larry H. White, and Kwadwo A. Yeboah, The Johns Hopkins University, Applied Physics Laboratory, Laurel, MD

Information Technology for Marine Data Management ...................................................................................... 2311 A.Vorontsov and N.Mikhailov, Russian Research Institute of Hydrometeorological Information - World Data Center, National Oceanographic Data Center of Russia, Kaluga Reg., Russia

A Climate Data Portal .......................................................................................................................... 2315 Nancy N. Soreide, NOAA/OAR/PMEL, Seattle, WA; Charles L. Sun, NOAA/NODC, Silver Spring, MD; Bernard J. Kilonsky, University of Hawaii, Honolulu, HI; Donald W. Denbo and Willa H. Zhu, Joint Institute for the Study of the Atmosphere and Ocean, University of Washington, Seattle, WA; John R. Osborne, Java OceanAtlas Software, Inc.

Distributed Data Servers and Web Interface in the Climate Data Portal ......................................................... 2318 Willa H. Zhu, Joint Institute for the Study of the Atmosphere and Ocean, University of Washington, Seattle, WA

Data Telemetry for Ocean Bottom Instrumentation .......................................................................................... 2322 Peter A. Koski, Jonathan Ware, and Daniel Frye, Woods Hole Oceanographic Institution, Woods Hole, MA; S. Craig Cumbee, Naval Oceanographic Office, Stennis Space Center, MS

The Long-Term Marine Data Set Collected by the National Data Buoy Center ........................................ 2328 J. Michael Hemsley, Chief, Engineering Branch National Data Buoy Center, Stennis Space Center, MS

Session 58
Electronic Chart Display and Information Systems
Session Chair .................................................. Nick Perugini Chief of the Marine Chart Division, Office of Coast Survey in NOAA's National Ocean Service

Session Co-Chair ............................................. Harry M. Strong Director, Oceanic, Atmospheric and Space Systems Programs, Mitretek Systems, Inc., McLean, VA

NOAA's Integrated Suite of Navigational Products and Services ................................................................ 2336 Captain Nicholas E. Perugini, NOAA Office of Coast Survey; Captain Maureen R. Kenny, NOAA Center for Operational Oceanographic Products and Services; Captain Jonathan W. Bailey, NOAA National Geodetic Survey National Ocean Service, Silver Spring, MD

Inland Electronic Navigational Charts in the U. S. Army Corps of Engineers ........................................... 2342 Robert G. Mann, Ph.D., U.S. Army Engineer Research and Development Center, Topographic Engineering Center, Alexandria, VA

Multifunction ECDIS for the Emergence Condition like a Breakdown of Navigational Equipments ............................... 2348 J. Lee, D. Lee, D. Kim, I. Jung, T. Sim, S. Lee, and J. Bae, Technical Research Institute, Daeyang Electric Co., Ltd., Pusan, South Korea; J. Chun, Scientific Computing Laboratory, Department of EECS, Korea Advanced Institute of Science and Technology, Taejon, South Korea
### Session 59  
**Localization and Tracking**

**Session Chair**

Stan Chamberlain  
OES Technology Committee  
Chairs Coordinator,  
Raytheon Company,  
Tewksbury, MA

The Application of State-of-the-Art Oceanographic and Meteorological Forecasting Products to the Hawaiian Islands .................................................. 2419
Robert C. Bohlin, Matthew C. Barron, and Renwick M. Mohammed, Naval Pacific Meteorology and Oceanography Center/Joint Typhoon Warning Center, Pearl Harbor, HI; James K. Lewis, Scientific Solutions, Inc., Kalaeo, HI

On the Distribution of Small-Scale Roughness at the Edges of Monomolecular Surface Films ................................................................. 2425
Martin Gade and Philipp A. Lange, University of Hamburg, Institute of Oceanography, Hamburg, Germany

Mobile Bay Response to a Strong Autumn Cold Front Passage ......................... 2432
Richard L. Crout and Arne R. Diercks, Naval Meteorology and Oceanography Command Ocean Technologies, Stennis Space Center, MS

Session 62
Coastal Zone Management
Session Chair ..................................... Harry M. Strong
Director, Oceanic, Atmospheric and Space Systems Programs,
Mitretek Systems, Inc., McLean, VA

Adapting An Enhanced Multiple Database Integration and Update Capability to Support Coastal Operations ...................................... 2436
C. R. Nichols, Marine Information Resources Corporation, Ellicott City, MD;
P.T. Brennan and S. J. Cento, Northrop Grumman Corporation, Bethesda, NY;
K. R. Dedrick, Marine Information Resources Corporation, Ellicott City, MD;
G. H. Tuell, University of Florida, Gainesville, FL

The New National Coastal Data Development Center ........................................... 2445
Joe Stinus, NOAA/National Coastal Data Development Center, Stennis Space Center, MS; Fred Klein and Amy Sheridan, Mitretek Systems, McLean, MS

Session 63
Buoy / Mooring Technology
Session Chair ..................................... Walter Paul
Woods Hole Oceanographic Institution,
Woods Hole, MA

Dynamic Analysis of NDBC Shallow-Water Test Mooring ........................................ 2449
Mark Grosenbaugh, Woods Hole Oceanographic Institution, Woods Hole, MA; Chung-Chu Teng, National Data Buoy Center, Stennis Space Center, MS

An Optical Positioning System for Underwater Arrays ..................................... 2454
Richard D. Dittman, Marentec, Dartmouth, Nova Scotia, Canada; Francine Desharnais and Garry J. Heard, Defence Research Establishment Atlantic, Dartmouth, Nova Scotia, Canada

New Trawl-Resistant Bottom Mount to Support Hydrographic Current Measurement Requirements ......................................................... 2459
S. Craig Cumbee, Naval Oceanographic Office Stennis Space Center, MS; Peter Clay, Mooring Systems, Inc., Cataumet, MA

MELBA Mediterranean Lagrangian Buoy Appliance ........................................ 2464
Fiorello Cavallini, Daniele Maffei, and Ramiro dell’Erba, Italian National Agency for New Technology, Energy and Environment (ENEA), Division of Robotics and Information Technology, Rome

Overview of Ocean Based Buoys and Drifters: Present Applications and Future Needs ......................................................... 2470
Nancy N. Soreide, NOAA/PMEL, Seattle, WA; Catherine E. Woody, NOAA/NDBC, Stennis Space Center, MS; Stephen M. Holt, Mitretek Systems, Inc., McLean, VA

Communications and Power to the Seafloor: MBARI’s Ocean Observing System Mooring Concept ......................................................... 2473
Mark Chaffey and Ed Mellinger, MBARI, Moss Landing, CA; Walter Paul, Woods Hole Oceanographic Institution, Woods Hole, MA

MBARI Vertical Profiler ........................................ 2482
Mark Brown, Mike Kelley, and Paul McGill
Monterey Bay Aquarium Research Institute, Moss Landing, CA
Session 64
Metrology and Calibration (Signal Processing)

Session Chair ................................................. Stu Burley
U.S. Navy Pacific Missile Range
Kauai

Array Calibration Based on Inverse Subspace Fitting ........................................2486
C.R. Wan, School of Electrical and Electronic Engineering, Nanyang Technological University, Singapore; J.T. Goh and C.S. Chia, DSO National Laboratories, Singapore

A WOCE CTD Calibration Laboratory Newly Established In China ........................................2492
Houlong Yu and Zhaoji Jia, Institute of Ocean Technology, State Oceanic Administration of China, Tianjin, China

Multibeam Sonar Calibration: Removal of Static Surface Reverberation by Coherent Echo Subtraction ........................................2498
Dezhang Chu, and Kenneth G. Foote, Woods Hole Oceanographic Institution, Woods Hole, MA; Kenneth C. Baldwin and Larry A. Mayer, Center for Ocean Engineering, Chase Ocean Engineering Laboratory, University of New Hampshire, Durham, NH; Yanchao Li, Department of Geodesy and Geomatics Engineering, University of New Brunswick, Fredericton, New Brunswick, Canada; Gary D. Melvin, Marine Fish Division, Department of Fisheries and Oceans, St. Andrews Biological Station, St. Andrews, NB Canada

Calibrating a Narrowband 18-kHz Sonar .................................................2503
Kenneth G. Foote, Woods Hole Oceanographic Institution, Woods Hole, MA

Multibeam Sonar Calibration: Target Localization in Azimuth ........................................2506
Dezhang Chu, and Kenneth G. Foote, Woods Hole Oceanographic Institution, Woods Hole, MA; Kenneth C. Baldwin and Larry A. Mayer, Center for Ocean Engineering, Chase Ocean Engineering Laboratory, University of New Hampshire, Durham, NH; Yanchao Li, Department of Geodesy and Geomatics Engineering, University of New Brunswick, New Brunswick, Canada; Gary D. Melvin, Marine Fish Division, Department of Fisheries and Oceans, St. Andrews Biological Station, St. Andrews, NB, Canada

Session 65
Seafloor Properties/Engineering

Session Chair ................................................. Captain C. W. Green
Fleet Oceanographer, U.S. Navy, Pacific Fleet, Pearl Harbor, Hawaii

Analysis of Small Scale Bedforms with 2D and 3D Image Acquisition Techniques ........................................2518
S. Baglio, Dipartimento Elettrico Elettronico e Sistemistico, University of Catania, Catania, Italy; C. Faraci, E. Foti, and R. Musumeci, Dipartimento di Ingegneria Civile ed Ambientale, University of Catania, Catania, Italy

Small Scale Seafloor Roughness Measurement Using a ROV ........................................2525
N. P. Chotiros, J. N. Piper, J. Moore and D. F. Weigl, Applied Research Laboratories, The University of Texas at Austin, Texas

Session 66
Matched Fields (Acoustics)

Session Chair ................................................. Stan Chamberlain
OES Technology Committee Chairs Coordinator, Raytheon Company, Tewksbury, MA

High-frequency Source Localization in the Strait of Sicily ........................................2530
Cristiano Soares, and S.M. Jesus, Universidade do Algarve, Faro, Portugal; Martin Siderius, Science Applications International Corp., La Jolla, CA

"Real Time" Broadband Adaptive Matched Field Processing ........................................2536
Herbert Freese, David Gever, Richard Evans, Brian Sperry, and Rob Greene, Science Applications International Corporation, McLean VA; D.J. Fabozzi, Maui Supercomputer Center, Kehei, HI
Table of Contents

WWW-based High Performance Computing Support of Acoustic Matched Field Processing ............................................................ 2541
D.H.Gever, Science Applications International Corporation; D.J.Fabozzi, II, Maui High Performance Computing Center, Kehei, HI

Session 67
Non-Acoustic Imaging (Signal and Information)
Session Chair ..................... Dr. Richard H. Nadolink Chief Technology Officer, NUWC, Newport, RI

Identification of Influential Factors for Underwater Laser Imaging ............................................................. 2549
Hsin-Hung Chen, Institute of Undersea Technology National Sun Yat-sen University, Kaohsiung, Taiwan

Underwater Mosaicing and Trajectory Reconstruction Using Global Alignment ......................................................... 2557
Nuno Gracias and Jose Santos-Victor, Instituto Superior T'ecnico & Instituto de Sistemas e Rob'otica, Lisboa Codex, Portugal

Extracting Robust Features and 3-D Reconstruction in Underwater Images ......................................................... 2564
Francois-Xavier Espiau, Patrick Rives, IFREMER Toulon, INRIA Sophia-Antipolis, Icare Project, France

A System to Evaluate the Accuracy of a Visual Mosaicking Methodology ..................................................... 2570
R. Garcia, J. Batlle, and X. Cufi, Computer Vision and Robotics Group, University of Girona, Spain

3-D Mapping of Sea Floor Scenes by Stereo Imaging ......................................................................................... 2577
A. Khamene, H. Madjidi, and S. Negahdaripour, Siemens Corporate Research Underwater Vision Imaging Lab, University of Miami, Coral Gables, FL

Positioning and Photo-Mosaicking with Long Image Sequences; Comparison of Selected Methods ........................................ 2584
S. Negahdaripour and P. Firoozfam, Underwater Vision & Imaging Laboratory, Electrical & Computer Engineering Department, University of Miami, Coral Gables, FL

Utilizing Panoramic Views for Visually Guided Tasks in Underwater Robotics Applications ........................................... 2593
S. Negahdaripour, H. Zhang, P. Firoozfam, and J. Oles, Underwater Vision & Imaging Laboratory, Electrical & Computer Engineering Department, University of Miami, Coral Gables, FL

A New Algorithm to Calculate the Reference Image of Ship Targets for ATR Using ISAR ................................................. 2601
K. Yamamoto and M. Iwamoto, Member, IEEE, T. Kirimoto, Member, IEEE, Mitsubishi Electric Corporation, Japan

Session 68
Acoustic Sediment Characterization
Session Chair .................................. Jon Preston
Quester Tangent Corporation, Sidney, BC, Canada

A Method for the Analysis of Chirp Signals Insonifying Layered Media for Sub-bottom Profiling .................................... 2608

Seabed Classification of Multibeam Sonar Images ..................................................................................... 2616
J.M. Preston, A.C. Christney, S. F. Bloomer, and I.L. Beaudet, Quester Tangent Corporation, Sidney, BC, Canada

Acoustic and Physical Property Correlation of Marine Sediments from the Texas-Louisiana Continental Shelf ..................................................... 2624
Traci L. Stokes, Naval Oceanographic Office, Ocean Analysis Branch, Stennis Space Center, MS; Dean A. Dunn, University of Southern Mississippi, Department of Geology, Hattiesburg, MS

High-Resolution Geophysical Core Logging Data from Marine Sediment Core Samples ......................................... 2634
Carter L. Gehman and Gene V. Kelly, Naval Oceanographic Office, Laboratories Services Branch, Stennis Space Center, MS
Table of Contents

Benthic Habitat Mapping with Acoustic Seabed Classification................................. 2642
James L. Galloway, P. Eng., Canadian Hydrographic Service, Pacific Fisheries and Oceans Canada, Sidney B.C., Canada

STUDENT PAPERS

“This work relates to Department of Navy grant N00014-01-0980 issued by the Office of Naval Research. The United States Government has a royalty-free license throughout the world in all copyrightable material contained herein.”

“Any opinions, findings, and conclusions or recommendations expressed in this material are those of the author(s) and do not necessarily reflect the views of the Office of Naval Research.”

Genetic Algorithm Optimisation of a Supply Ship Propulsion and Navigation Systems ........................................... 2645
Eva Alfaro-Cid, Euan W. McGookin, and David J. Murray-Smith, Centre of Systems and Control & Dept. of Electronics and Electrical Engineering, University of Glasgow, Glasgow, UK

Marine Sediment Classification Using Sidescan Sonar and Geographical Information System Software in Kaneohe Bay, Oahu, Hawaii .................................. 2653
Andreas J. Andersson, School of Ocean and Earth Science and Technology, University of Hawai‘i, Honolulu, HI; Tom B. Reed, IV, Oceanic Imaging Consultants, Inc., Honolulu, HI; Christopher D. Winn, Hawaii Pacific University, Marine Science Program, Honolulu, HI

Effectiveness of Spatial-Temporal Collocated Microwave Scatterometric and Vertical-Horizontal Polarized Radiometric Images in Sea Surface Monitoring ................................................. 2658
Arsen Arakelyan, Faculty of Biochemistry, Yerevan State University, Yerevan, Armenia; A.K. Hambaryan and A.K. Arakelian, ECOSERV Remote Observation Centre Co. Ltd., Yerevan, Armenia

An Hybrid Methodology for RL-based Behavior Coordination in a Target Following Mission with an AUV........................................... 2666
M. Carreras and J. Batlle, Institute of Informatics and Automation University of Girona, Edifici Politécnica II, Campus Montilivi, Spain; J. Yuh, Autonomous Systems Laboratory, University of Hawaii, Honolulu, HI

A Wavelet Packet Approach for Bistatic Buried Target Classification with an AUV-borne Synthetic Aperture Sonar ........................................... 2673
Joseph R. Edwards, Massachusetts Institute of Technology, Department of Ocean Engineering; Monica Montanari, University of Pisa, Department of Information Engineering

Development of Ecological Policy, Assessment and Prediction of the Fate of Chernobyl Radionuclides in Sediments of the Black Sea ........................................... 2677
Alexei E. Kontar, P.P. Shirshov Institute of Oceanology, Russian Academy of Sciences, Moscow, Russia

Highlighting Pipelines Offshore Norway: Visualization and Quantitative Analysis ........................................... 2688
R.E. Loke and J.M.H. du Buf, Vision Laboratory, Dept. of Electronics and Computer Science, University of Algarve, Faro, Portugal

Differences in Olfactory System Between Wild and Cultured Red Sea Bream, Pagrus major (Teleostei) ........................................... 2696
R. R. Mana, G. Kawamura, K. Anraku, T. Matsuoka, and T. Masuda, Laboratory of Fish Ethology, Kagoshima University, Kagoshima, Japan

Ryan Moody, North Carolina State University, Integrated Manufacturing Systems Engineering Institute, Raleigh, NC

Analysis of Non-Coherent Signaling in Surf Zone Acoustic Telemetry Experiments ........................................... 2708
Tetsuro Oishi, Research Associate, Acoustics Research Laboratory, Univ. of Massachusetts Dartmouth, N. Dartmouth, MA; Dale Green, Principle Engineer, Benthos Inc., North Falmouth, MA
