Proceedings

18th Annual National Meeting of the American Society for Surface Mining and Reclamation

Land Reclamation – A Different Approach

Proceedings of a conference held June 3-7, 2001 in Albuquerque, New Mexico

Co-editors
Ecology † Richard Vincent
Forestry – James A. Burger
Geotechnical – Gennaro G. Marino
Hydrology – Greg A. Olyphant
Land Use – Susan C. Wessman
Soils and Overburden – Robert G. Darmody
Tailings – Timothy C. Richmond and Stuart A. Bengson
Wetlands – Jack R. Nawrot

Coordinators
Richard I. Barnhisel, Bruce A. Buchanan, Debi Peterson and John J. Pfeil

Published by
The American Society for Surface Mining and Reclamation

Hydrology Technical Session

Water Quality Improvements Over Time and Longevity of Acid Mine Discharges from Underground Mines in Northern West Virginia .......................................................... 174
Demchak, Skousen and McDonald

Scatterscore Method to Evaluate Changes in Water Quality ........................................... 183
Kim and Cardone

Infiltration Test Plot Study for Mine Rock Piles at Questa Mine, New Mexico .................. 195
Wels, O’Kane, Fortin and Christensen

Overview of Coal-Bed Methane Development and a Discussion of Montana Impacts .......... 210
Wheaton and Olson

Land Use Technical Session

Visualizing the Future: Surface Mining ........................................................................ 220
Ellsworth

SMCRA Bond Release – The Initial Steps at San Juan Mine ............................................. 223
Estrada and Clark

Reclamation Revisited: Minas Gerais, Brazil .................................................................. 232
Toy and Griffith

Poster Presentations

Evaluating Techniques for Establishing a Vegetative Cover on an Acidic Reject Coal Basin .......................................................... 239
Barton, Adriano and Seay

Evaluating Mine Water Treatment Choices (EMWATCH) ................................................. 240
Brown, Barley, Wood and Parker

Soil Ordination: Implications for Post-Mining Disturbance Land-Uses .......................... 241
Burley and Gray

Base Metal and Trace Element Concentrations in Stream Sediments Along the Pecos River, From the Southern Pecos Wilderness to Brantley Dam, North of Carlsbad, Eastern New Mexico ................. 246
Carey, Brandvold and McLemore

Influence of Pisolithus Tinctorius Inoculation on Greenhouse Growth and First-Year Transplant Survival of Conifer Seedlings .......................................................... 255
Harrington, Wagner and Dreesen

The Influence of Seed Source and Stock Size on First-Year Performance of Direct Transplanted Conifer Seedlings ........................................................................ 265
Harrington, Dreesen, Wagner, Murray and Sun

Conceptual Regrading Using Three-Dimensional GIS to Evaluate Mine Reclamation ........ 271
Jordan

Characterization and Resource Recovery Potential of Precipitates Associated with Abandoned Coal Mine Drainage .......................................................... 278
Kairies, Watzlaf, Hedin and Capo

Reclamation of the Retsof Mine and Affected Areas ......................................................... 280
Klugh

The Assessment of a Phosphogypsum Stack in Texas ..................................................... 287
McGuire, duPont and Rubsam

Weathering Characteristics of Spoil Materials at La Plata Mine, Northwestern New Mexico. An Eight Year Study .......................................................... 289
Musslewhite, Brown, Buchanan and Ramsey

Restoring Wetland Form and Function to Everglades Borrow Pits .................................. 290
Norland

Bioremediation of Alkaline Mine Effluent Using Treatment Wetlands .......................... 292
O’Sullivan, Murray and Otte

Characterization of Petroleum Contaminated Soils in Wyoming .................................. 294
Peel, Reddy, Stahl and Rodgers

Modified NP Testing for Lignite Overburden Samples in Texas .................................. 296
Porter and Hosner

Potential for Phytoremediation of Iron Cyanides Using Willow .................................. 298
Reeves, Weinstein, Laurence and King
Soil-Geology Selenium Relationships in Disturbed and Native Ecosystems ......................................................... 300
Skinner and Vance

Microbial Indicators of Minesoil Quality in Southern West Virginia ................................................................. 317
Stephens, Sexstone, Sencindiver, Skousen and Thomas

Treatment of Acid Rock Drainage (ARD) with a Limestone Buffered Organic Substrate (LBOS) in a Vertical Flow Constructed Treatment Wetland ................................................................. 326
Thomas and Romanek

Wyoming Reclamation Ecology Center: A New Research, Education and Outreach Initiative ........................ 328
Vance

Creation of Hydric Soils, Wetlands, and Amphibian Habitat Through Controlled Mine Subsidence: Early Results ................................................................. 329
Wiesbrook, Wilm and Petzing

Rehabilitation and Reclamation Special Session ...................................................................................................... 331

Reclaiming Sodic Soils Following Saltcedar Removal on the Pueblo of Santa Ana, New Mexico ................. 332
Caplan, Musslewhite, Buchanan and Hendrickx

Revegetation of a Petroleum Contaminated Site on New Mexico State Trust Land in the Permian Basin .... 345
Matush and Coss

Wetland Enhancement and Creation on Reclaimed Abandoned Mined Lands in Northeast Wyoming .... 348
McKinstry, Richmond and Anderson

Rehabilitation of a Storm Water Retention Basin and Pump Station ................................................................. 356
Will

Saline/Sodic Special Session ................................................................................................................................. 364

Sodicity: A Reassessment of the Influence of Sodic/Saline Conditions on Mine Land Reclamation .............. 365
Brown, Musslewhite and Buchanan

Soils and Overburden Technical Session .............................................................................................................. 372

Modifying Root-Zone Spoil Sampling Methods Using Vertical and Horizontal Composite Sampling Techniques .................................................................................................................. 373
Applegate, Buchanan and Postle

Threshold Limits for Selenium in the Coal Mining Areas of New Mexico ....................................................... 379
Brown, Woomer, Musslewhite and Ramsey

The Study of Mine Rock Erosion Using Simulated Rainfall at Questa Mine, New Mexico ....................... 391
Christensen, Reeves and Fortin

Effects of Biosolids Loading Rate and Sawdust Additions on Row Crop Yield and Nitrate Leaching Potentials in Virginia Sand and Gravel Mine Reclamation ......................................................... 399
Daniels, Evanylo, Nagle and Schmidt

Contaminant Migration from Acidic-Metalliferous Tailings into an Earthen Cover During a 26 Year Time Period ................................................................................................................................. 407
Dollhopf

Spoil Quality and Herbaceous Yield Relationships on Silty Reclaimed Grasslands ........................................ 414
Kirby, Krabbenhoft and Nilson

Classification of Minesoils: Some Radical Proposals ......................................................................................... 418
Kosse

Plant Responses on Soils Ameliorated with Waste Products........................................................................... 425
Rethman and Truter

Determining Optimal Sawdust/Biosolids Mixtures to Manage Nitrate Leaching in Reclaimed Disturbed Soils ................................................................................................................................. 429
Schmidt, Daniels, Li and McFaden

The Use of Acid-Base Accounting to Predict Post-mining Drainage Quality on West Virginia Surface Mines ................................................................................................................................. 437
Skousen, Simmons and Ziemkiewicz

Chemical Properties of Minesoils on a Mountaintop Removal Mine in Southern West Virginia .............. 448
Thomas, Sencindiver, Skousen and Gorman
Tailings Technical Session

Reclaiming Coarse Taconite Tailings – Are Organic Amendments the Answer? .............................................. 458
   Eger, Johnson and Melchert
Reclamation of U.S. Uranium Mills – Extraordinary Requirements, Extreme Costs ...................................... 472
   Kuhn
Tailing Reclamation = Oasis = Closure ........................................................................................................ 479
   Shetron and Goodman
Reclamation of Copper Mine Tailings Using Biosolids and Green Waste. .................................................. 492
   Thompson, Wald-Hopkins and White
Assessment of Water Storage Cover for Questa Tailings Facility, New Mexico ........................................... 500
   Wels, O’Kane and Fortin
Aquatic Plant Establishment on Water-Covered Nickel Tailings .................................................................. 514
   Wilkinson, Beckett and St-Germain

Wetlands Technical Session

Biotic and Abiotic Iron Oxidation Kinetics in Net Alkaline Mine Drainage .................................................. 524
   Athay, Nairn and Strevett
An Evaluation of Biotic Integrity Associated with Coal Mine Reclamation in the Dry Creek Drainage Basin, Tennessee ................................................................. 529
   Brookens, DeAngelo and Stearns
Sulfate Reduction – Decreases in Substrate Reactivity and the Implication for Long-Term Treatment .......... 542
   Eger and Wagner
Constructed Wetland Research for the Treatment of the Plant Gorgas Coal Pile Runoff ............................. 558
   Garrett, Jr., Bartolucci and Vermace
Influence of Ammoniacal-N on Wetland Plant Species ............................................................................. 569
   Meikle and Waugh
Remediation Challenges and Opportunities at the Tar Creek Superfund Site, Oklahoma ........................... 579
   Nairn, Griffin, Strong and Hatley
Remediation Properties of Materials to Treat Acid Mine Drainage Water at a Gold Mine Operation in Brazil ................................................................. 585
   Pinto, Wildeman and Gusek
Case Study of Pot Ridge Passive Treatment Systems, Cambria County Pennsylvania .............................. 592
   Rose, Alcorn, Phelps and Bower
Evaluating Successes in Passive Treatment at Sequatchie Valley Coal Corporation in East Central Tennessee ........................................................................ 604
   Schmidt and Stearns
Passive, Periodic Flushing Technology for Mine Drainage Treatment Systems ...................................... 611
   Vinci and Schmidt
Modeling of Iron Oxidation in a Passive Treatment System ................................................................. 626
   Watzlaf, Schroeder and Kairies

Author Index ........................................................................................................................................... 639
