CONFERENCES PROCEEDINGS

WPMC '00

The Third International Symposium on
Wireless Personal Multimedia Communications

Volume 2 of 2

November 12-15, 2000
Bangkok, Thailand

Organized by
Asian Institute of Technology, Thailand
Yokosuka Research Park R&D Committee, Japan
Communications Research Laboratory, MPT, Japan

Sponsored by
Yokosuka Research Park R&D Committee, Japan
Communications Research Laboratory, MPT, Japan
# TABLE OF CONTENTS

## VOLUME I

**MONDAY, 13 NOVEMBER 2000 * 10:15 – 12:20 HRS.**

### M 1.1 ANTELLA ARRAY PROCESSING

Session Chair: *Prof. Ryuji Kohno, Yokohama National University, Japan*

**M 1.1.1** RADIATION PATTERNS OF VARIOUS BEAMS FORMED BY CIRCULAR ARRAY EMPLOYED FOR IMT-2000 SMART ANTENNA SYSTEMS ........................... 1

Takashi Inoue*, Sumaru Niida*, Yoshih Takeuchi*, Yoshio Enomoto**, Mikio Kuwahara*** and Motohiro Itoh****

*KDD R&D Laboratories, Inc., Japan; **Hitachi, Ltd. Telecommunications Division, Japan
***Hitachi, Ltd. Central Research Laboratories, Japan; ****Hitachi Cable, Ltd. Takasago Works, Japan

**M 1.1.2** CHARACTERISTICS OF A CONICAL BEAM ANTENNA USING A CIRCULAR ARRAY OF MONOPOLE ON THE GROUND PLANE FOR WIRELESS LAN APPLICATIONS ........................................ 6

Chuwong Phongcharoenpanich*, Phaisan Ngamjanyaporn*, Titipong Lertwiriyaprapa** and Monai Krairiksh*

*King Mongkut’s Institute of Technology Ladkrabang, Thailand
**King Mongkut’s Institute of Technology North Bangkok, Thailand

**M 1.1.3** RECTANGULAR ARRAYS FOR UNIFORM WIDEBAND BEAMFORMING WITH ADJUSTABLE STRUCTURE ................................................................. 12

Mohammad Ghamami and Ryuji Kohno, Yokohama National University, Japan

**M 1.1.4** HYBRID ADAPTIVE ALGORITHM BASED ON TEMPORAL UPDATE AND SPATIAL SPECTRUM ESTIMATION FOR ADAPTIVE ARRAY ANTENNA ................................................................. 16

Kazunori Watanabe and Ryuji Kohno, Yokohama National University, Japan

**M 1.1.5** NULL DEPTH TRADE OFF FOR POWER REDUCTION IN ADAPTIVE ANTENNA ARRAYS ................................................................. 21

Tuan Nguyen* and Mike Faulkner**

* Advanced Communications Technologies Pty Ltd., Australia; ** Victoria University of Technology, Australia

### M 2.1 OFDM I

Session Chair: *Prof. Hideki Imai, The University of Tokyo, Japan*

**M 2.1.1** A REDUCED COMPLEXITY CHANNEL ESTIMATION FOR OFDM SYSTEMS WITH PRECODING AND TRANSMIT DIVERSITY IN MOBILE WIRELESS CHANNELS ................................................................. 27

Hlaing Minn, Dong In Kim and Vijay K. Bhargava, University of Victoria Victoria, Canada

**M 2.1.2** REDUCTION OF PEAK TO AVERAGE POWER RATIO BY LIMITING THE DYNAMIC RANGE OF AN OFDM SIGNAL ................................................................. 33

*Monash University, Clayton, Australia; **Asian Institute of Technology, Thailand

**M 2.1.3** BER PERFORMANCE OF THE OFDM SYSTEM WITH THE POLYNOMIAL CANCELLATION CODING UNDER THE TWO-RAY MULTIPATH CHANNEL ................................................................. 35

Hongku Kang*, Hyunjae Kim**, Wooncheol Hwang*, Yeonmin Yoon* and Kiseon Kim*

*K-JIST, Korea; **ETRI, Korea

**M 2.1.4** PERFORMANCE OF AN OFDM-CDMA SYSTEM WITH LOW PEAK TO AVERAGE POWER RATIO ................................................................. 39

Thilak Ginige, Nandana Rajatheva and K.M. Ahmed, Asian Institute of Technology, Thailand

**M 2.1.5** BIT ERROR RATE EVALUATION OF OFDM-CDMA WIRELESS MOBILE COMMUNICATION SYSTEM UNDER MULTI-PATH FADING CHANNEL ................................................................. 44

Soichi Watanabe, Takuro Sato and Takeo Abe, Niigata Institute of Technology, Japan
### M 3.1 TURBO CODES

**Session Chair:** Prof. Gérard Battail, France

<table>
<thead>
<tr>
<th>Title</th>
<th>Authors</th>
<th>Pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>IMPROVEMENT OF ADAPTIVE CO-CHANNEL INTERFERENCE CANCELING WITH TURBO-CODES</td>
<td>Hiroko Hisata and Jun Horikoshi, Gunma University, Japan</td>
<td>48</td>
</tr>
<tr>
<td>PERFORMANCE OF TURBO CODES WITH MULTILEVEL MODULATION OVER FREQUENCY-SELECTIVE FADING CHANNEL</td>
<td>Chantri Polprasert and R. M. A. P. Rajatheva, <em>Asian Institute of Technology, Thailand</em></td>
<td>54</td>
</tr>
<tr>
<td>IMPROVING SHORT FRAME TURBO DECODING TOWARDS ML DECODING</td>
<td>Arnaud Guéguen and Damien Castelain, <em>Mitsubishi Electric ITE, France</em></td>
<td>60</td>
</tr>
<tr>
<td>PERFORMANCE OF HIGH RATE DATA TRANSMISSION USING TURBO/CONVOLUTIONAL CODING IN REVERSE LINK SITE DIVERSITY FOR W-CDMA MOBILE RADIO</td>
<td>Akihito Morimoto, Kenichi Higuchi, and Mamoru Sawahashi, NTT DoCoMo, Japan</td>
<td>66</td>
</tr>
<tr>
<td>PERFORMANCE BOUND FOR TURBO CODED MODULATION OVER A MULTIPATH FADING CHANNEL</td>
<td>N. D. Doan*, and R. M. A. P. Rajatheva**&lt;sup&gt;**&lt;/sup&gt;</td>
<td>73</td>
</tr>
<tr>

XVI
M 6.1 WIRELESS LAN
Session Chair: Prof. Hiromi Okada, Kansai University, Japan

M 6.1.1 COMPLEMENTING FIXED AND CELLULAR IP ACCESS TOWARDS BROADBAND - PUBLIC WLAN ACCESS ................................................................. 126
Thorsten Lohmar* Ralf Keller* and Martin Johnsson**
* Ericsson Eurolab Deutschland GmbH, Germany; ** Ericsson Business Networks AB

M 6.1.2 CELL PLANNING WITH IEEE 802.11 WIRELESS LANS ........................................ 132
Albert Eikelenboom and Ad Kamerman, Lucent Technologies - WCND, The Netherlands

M 6.1.3 POWER CONTROL SCHEME COMBINED ADAPTIVE ZONE SELECTION IN WIRELESS LAN SYSTEMS ................................. 136
Chalermphol Apichaichalermvongse, Seiichi Sampei and Norihiro Morinaga, Osaka University, Japan

M 6.1.4 156 MBPS ULTRAHIGH-SPEED WIRELESS LAN PROTOTYPE IN MILLIMETER-WAVE BAND ............................ 142
Gang Wu, Masugi Inoue, Homare Murakami and Yoshihiro Hase
Communications Research Laboratory, MPT, Japan

M 6.1.5 TRANSMISSION CHARACTERISTIC AND AREA ESTIMATION OF HIGH SPEED WIRELESS LAN .................. 148
Yuya Tatsuzawa, Ayako Nishizawa and Takeshi Hattori, Sophia University, Japan

MONDAY, 13 NOVEMBER 2000 * 13:30 – 15:35 HRS.

M 1.2 SATELLITE COMMUNICATIONS
Session Chair: Dr. Shingo Ohmori, Communication Research Laboratory, Japan

M 1.2.1 CHANNEL CAPACITY ESTIMATION OF THAICOM 3 SATELLITE FROM RAIN STATISTICS AT KLONG YAI ................................................................. 154
Aditep Chaisang, Samart Singsoda, Supatra Thongkasem, Kamol Phongarm and Narong Hemmakorn
King Mongkut’s Institute of Technology Ladkrabang, Thailand

M 1.2.2 MULTIMEDIA APPLICATIONS OVER SATELLITE PERSONAL COMMUNICATIONS NETWORKS ................................ 158
Antonio Iera*, Antonella Molinaro**, Gianluca Aloi*** and Salvatore Marano***
* University of Reggio Calabria, Italy; ** University of Messina, Italy; *** University of Calabria, Italy

M 1.2.3 KA-BAND BROADBAND AERONAUTICAL SATELLITE COMMUNICATIONS EXPERIMENTS ......................... 164
H. Wakana, A. Miura, N. Obara, H. Saito, M. Ohkawa, and M. Tanaka, Ministry of Posts and Telecommunications, Japan

M 1.2.4 JAPANESE NATIONALWIDE SURVEY OF SATELLITE-BASED COOPERATIVE TELEMEDICAL PROJECTS INVOLVING DEVELOPING NATIONS ..................... (POST-PRINTED PAPER)
Isao Nakajima, Shigemi Morikawa, Michiya Natori*, Masaomi Takizawa**, Noboru Takamura***, Shun-ichi Yamashita*** and Shigekoto Kahiura*
Tokai Medical Institute, Japan; * National Okura Hospital
** Shinshu University Hospital, Japan; *** Nagasaki University, Japan

M 1.2.5 APPLICATIONS OF THE FIGURE-8 SATELLITE .............................................................. 170
Masato Tanaka, Kazuhiro Kimura, Noriaki Obara, and Hiromitsu Wakana, Kashima Space Research Center, Japan

M 2.2 CDMA II
Session Chair: Prof. Vijay K. Bhargava, University of Victoria, Canada

M 2.2.1 IMPROVED PSEUDONOISE SYNCHRONIZATION USING DLL FOR DS/SS SYSTEM WITH MICROCELLS .................... 176
Seksan Laitrakun and Sawasd Tantaratan, Sirindhorn International Institute of Technology, Thailand
M 2.2.2 EFFICIENT VIDEO TRANSMISSION IN GENERALIZED FADING CHANNELS FOR SATELLITE
CDMA SYSTEMS ................................................................. 181
A. Papathanassiou and P. Takis Mathiopoulos*
National Observatory of Athens, Greece; * Also with The University of British Columbia, Canada

M 2.2.3 MULTIRATE DS-CDMA IN FADING ENVIRONMENT ........................................... 187
Hallstein Lervik and Andrew Perakis, The Norwegian University of Science and Technology, Norway

M 2.2.4 JOINT DOWNLINK BEAMFORMING AND DATA RATE ALLOCATION FOR DS-CDMA MOBILE
RADIO WITH MULTIMEDIA SERVICES ......................................... 191
Ying-Chang Liang and Francois P.S. Chin, Singapore Science Park II, Singapore

M 2.2.5 MULTI-PATH TRANSMISSION IN DS-CDMA VARIABLE DATA-MODULATION SYSTEM .................. 197
Kazuaki Tsukakoshi, YRP Mobile Telecommunications Key Technology Research Laboratories Co., Ltd., Japan

M 3.2 SIGNAL PROCESSING I
Session Chair: Prof. Paul G Flikkema, Northern Arizona University, USA

M 3.2.1 IMAGE DE-NOISING USING STOCHASTIC RESONANCE ........................................ 203
Krit Wongrujira* and Shozo Kondo**
* King Mongkut's Institute of Technology Ladkrabang, Thailand; ** Tokai University, Japan

M 3.2.2 BLIND MODULATION ESTIMATION WITH CARRIER FREQUENCY OFFSET BASED ON THE
CONCEPT OF SOFTWARE DEFINED RADIO .................................... 207
Kenta Umebayashi, Satoru Ishii and Ryuji Kohno, Yokohama National University, Japan

M 3.2.3 A COMPARISON OF THE DUAL AUTOCORRELATION TECHNIQUE FOR ADPCM SPEECH
CODING TO THAT OF STANDARD ADPCM SPEECH CODING METHODS .............................. 213
W. Wongsaichua and K. Songwatana, King Mongkut's Institute of Technology Ladkrabang, Thailand

M 3.2.4 DOWNLOADABLE MULTI-MODE AND MULTI-SERVICE SOFTWARE RADIO COMMUNICATION
SYSTEM FOR FUTURE INTELLIGENT TRANSPORT SYSTEMS ......................... 218
Hiroshi Harada and Masayuki Fujise, Ministry of Posts and Telecommunications, Japan

M 3.2.5 UNMIXED VOWELS RECOGNITION IN THAI SPOKEN LANGUAGE USING VOCAL TRACT
TRANSFER FUNCTIONS ON THE BARK SCALE .................................. 224
K. Songwatana and W. Kongkavitool, King Mongkut's Institute of Technology, Thailand

M 4.2 WIRELESS NETWORK I
Session Chair: Prof. Akihiro Kajiwara, Ibaraki University, Japan

M 4.2.1 AD-HOC NODE REPEATER FOR SHADOWING IN WIRELESS HOME LINK .................. 228
Takeo Nasu and Masao Nakagawa, Keio University, Japan

M 4.2.2 ANALYSIS OF A NEW CALL CHANNEL LIMITING TECHNIQUE FOR MOBILE USERS IN
ONE DIMENSIONAL CELLULAR NETWORKS ..................................... 233
Sakchai Thipchaksurat*, Michihiro Inoue*, Ushio Yamamoto*, Yoshikuni Onozato* and
Ruttikorn Varakulsiripunth**
* Gunma University, Japan; ** King Mongkut's Institute of Technology Ladkrabang, Thailand

M 4.2.3 PROPOSAL OF 1394 WIRELESS HOME NETWORK USING MILLIMETER-WAVE TECHNOLOGIES 238
J. Matsuda, W. Domon, K. Ohata, K. Maruhashi, M. Ito and S. Yamazaki, NEC Corporation, Japan

M 4.2.4 UNIFORM GoS IN A HIERARCHICAL CELL STRUCTURE .................................. 244
Shahram Ghaheri Niri and Rahim Tafazolli, University of Surrey, UK

M 4.2.5 PERFORMANCE IMPROVING ON TRANSMISSION TCP'S MESSAGE OVER WIRELESS NETWORKS 252
Narissorn Sangkanong and Ruttikorn Varakulsiripunth, King Mongkut's Institute of Technology Ladkrabang, Thailand

XVIII
M 5.2 CODING
Session Chair: Prof. Bahram Honary, Lancaster University, UK

M 5.2.1 SOFT-DETECTION OF MODIFIED PHASE PRECODING WITH NEW TCM FOR WIRELESS-ISI CHANNELS
Keattisak Sripimanwat, R. M. A. P. Rajatheva and Kazi Ahmed, Asian Institute of Technology, Thailand

M 5.2.2 A CONCATENATED CODE DESIGN WITH HAMMING CODE AND 3/4 RATE 4-STATE MTCM/CPFSK
Seung-Geun Kim*, Sungsoo Choi*, Minkyoung Park*, Ho-Kyoung Lee** and Kiseon Kim*
*KIST, Korea; ** Hongik Univ., Korea

M 5.2.3 ROBUST MULTILEVEL CODES BASED ON CAPACITY RULE FOR AWGN AND RAYLEIGH CHANNELS
Dong-Feng Yuan*, Ai-Fen Sui** and Zuowei Li*
* Shandong University, P.R. China; ** Beijing University of Post and Telecom, P.R. China

M 5.2.4 ADAPTIVE ORTHOGONAL CODES ASSIGNMENT IN CDMA SATELLITE SYSTEMS
Ernestina Cianca*, Roberto Lojacono**, Marina Ruggieri** and Ramjee Prasad*
*Aalborg University, Denmark; ** University of Roma "Tor Vergata", Denmark

M 5.2.5 COORDINATE ORDERING ALGORITHMS FOR A LINEAR BLOCK CODE TO REDUCE THE TRELLIS COMPLEXITY OF THE MINIMAL TRELLIS
Zay Yar Thin and R. M. A. P. Rajatheva, Asian Institute of Technology, Thailand

M 6.2 ANTENNA I
Session Chair: Prof. Yoshihide Yamada, National Defense Academy, Japan

M 6.2.1 ADAPTIVE PRE-SELECTED SECTOR ANTENNA TRANSMITTER DIVERSITY SYSTEM USING TDD TRANSMISSION OF DS/CDMA SIGNALS FOR INDOOR WIRELESS LAN
Kyesan Lee and Masao Nakagawa, Keio University, Japan

M 6.2.2 A CONSIDERATION ON FUTURE HANDSET ANTENNA SYSTEM
Hisashi Morishita*, Yongho Kim* and Kyohei Fujimoto**
* National Defense Academy, Japan; ** University of Tsukuba, Japan

M 6.2.3 RADIATION CHARACTERISTICS OF A DIPOLE ANTENNA MOUNTED IN A CAR
Hiromi Taguchi*, Kenichiro Tabira*, Yoshihide Yamada* and Syo Yuminaga**
* National Defense Academy, Japan; ** OPTOWAVE Laboratory Inc., Japan

M 6.2.4 A SWITCHED BEAM ANTENNA FOR W-CDMA MOBILE COMMUNICATION SYSTEMS
Hak-Lim Ko*, Won-Taek Kim*, Jea-Ho Oh* and Jong-Heon Lee**
* Hoseo University, Korea; ** SK Telecom Central R&D Laboratory, Korea

M 6.2.5 JOINT ESTIMATION OF NOMINAL DOA AND ANGULAR SPREAD VIA EXTENSION OF ARRAY MODE VECTOR
Jung-Sik Jeong, Nor Shahida Mohd Shah, Kei Sakaguchi, Kiyomichi Araki and Jun-ichi Takada
Tokyo Institute of Technology, Japan
M 1.3  ANTELLA II

Session Chair: Prof. Hak-Lim Ko, Hoseo University, Korea

M 1.3.1  PERFORMANCE OF A BI-DIRECTIONAL POLARIZATION DIVERSITY ANTENNA USING TWO-PERPENDICULAR-PROBE EXCITED SQUARE RING FOR PCS BASE STATION ................................................................. 306
Panadda Keowsawat, Komsak Meksamoot and Monai Krairiksh, King Mongkut's Institute of Technology Ladkrabang, Thailand

M 1.3.2  CALIBRATION OF A DBF RECEIVING ARRAY ANTENNA BY USING A REFERENCE SEQUENCE ................................................................. 311
Takashi Nakamura*, Ryu Miura**, Masayuki Oodo** and Tetsushi Ikegami*
* Meiji University, Japan; ** Communications Research Laboratory, MPT, Japan

M 1.3.3  LOW COMPLEXITY ANTENNA SYSTEM FOR INTERFERENCE REDUCTION IN A GSM MOBILE TELEPHONE HANDSET ................................................................. 315
Mikael. B. Knudsen*, Johan Brendum** and Gert. F. Pedersen**
* Siemens Mobile Phones A/S, Denmark; ** Aalborg University, Denmark

M 1.3.4  WIDEBAND SPATIAL PROPAGATION IN THE 3 GHz AND 5 GHz BANDS FOR EVALUATION OF WLL AND RLAN SYSTEMS ................................................................. 320
Peter Karlsson* - **, Christian Bergljung*, Anders Karlsson*, Niclas Löwendahl* and Ralf Schuh*
* Telia Research AB, Sweden; ** University of Bristol, U.K

M 1.3.5  CURVATURE DESIGN OF A DIELECTRIC LENS ANTENNA ................................................................. 326
Yoshihide Yamada, Seigo Sasaki and Akira Fujii, National Defense Academy, Japan

M 2.3  CDMA III

Session Chair: Prof. Takis Mathiopoulos, The University of British Columbia, Canada

M 2.3.1  DATA RATE IMPROVEMENT OF THE BALANCED TREE RECONSTRUCTION METHOD IN DS-CDMA ................................................................. 331
Rujipun Assarut, Milda G. Husada, Ushio Yamamoto and Yoshikuni Oozato, Gunma University, Japan

M 2.3.2  PERFORMANCE ANALYSIS OF MULTI-PROCESSING GAIN HYBRID DS/SFH CDMA FOR MULTITRASE WIRELESS COMMUNICATIONS ................................................................. 336
Prach Dabbang and Ruttikorn Varakulsiripunth, King Mongkut's Institute of Technology Ladkrabang, Thailand

M 2.3.3  ANALYSIS OF CDMA COMMUNICATION SYSTEMS WITH FM-DCSK AS A FRONT-END MODULATION ................................................................. 341
N. Homsup and U. Sethakaset, Kasetsart University, Thailand

M 2.3.4  SPATIAL FILTER ORIENTED ADAPTIVE SPREADING TECHNIQUE: JOINTING CDMA AND SDMA ................................................................. 344
Giuseppe Abreu, Sergio Forcellini and Ryuji Kohno, Yokohama National University, Japan

M 2.3.5  PERFORMANCE OF SLOTTED ALOHA CDMA WITH CAPTURE EFFECT IN LEO SATELLITE SYSTEMS ................................................................. 350
Eko Tjipto Rahardjo, Sri Chusri Haryanti, and Gunawan Wibisono, University of Indonesia, Indonesia

M 3.3  NETWORKING II

Session Chair: Prof. Akira Fukuda, Nara Institute of Science and Technology, Japan

M 3.3.1  DYNAMIC TRANSMISSION CONTROL OVER INTER-VEHICLE COMMUNICATIONS IN ITS ................................................................. 356
Hiroyuki Koike, Satoshi Matsuda and Hiromi Okada, Kansai University, Japan

M 3.3.2  IMPROVEMENT OF GEOMETRIC-COST FUNCTION DYNAMIC CHANNEL ALLOCATION USING AN AGGRESSIVE ALGORITHM FOR TDMA CELLULAR MOBILE TELEPHONE SYSTEM ................................................................. 362
Chalermchai Pruksanubal and Watit Benjapolakul, Chulalongkorn University, Thailand
M 3.3.3 METHOD OF MAKING A FAST STATUS TABLE MANAGEMENT SYSTEM FOR VIRTUAL ORGANIZATION ........................................................................................................................................... 366
Tomonobu Sato, Hitachi NetBusiness, Ltd., Japan

M 3.3.4 ACCESS PRIORITY CONTROL TECHNIQUE FOR RESERVATION TDMA/TDD BASED ADAPTIVE ZONE SELECTION AND ADAPTIVE MODULATION SYSTEMS FOR FAIR WIRELESS CHANNEL ALLOCATION UNDER NON-UNIFORM TRAFFIC CONDITIONS ........................................................................... 371
Chalermphol Apichaichalermwongse, Seiichi Sampei and Norihiko Morinaga, Osaka University, Japan

M 4.3 WIRELESS IP
Session Chair: Prof. Ramjee Prasad, Aalborg University, Denmark

M 4.3.1 AN EVALUATION OF THE PERFORMANCE OF MOBILE IP SCHEME FOR TCP APPLICATIONS ................................................................. 377
Thongchai Vattrasate and Tapio Erke, Asian Institute of Technology, Thailand

M 4.3.2 AUTHENTICATED KEY EXCHANGE IN THE AAA INFRASTRUCTURE FOR MOBILE IP ................................................................. 383
Hakseong Jeon, Suchang Kim, Sunghee Kim, Electronics and Telecommunications Research Institute, Korea

M 4.3.3 EVALUATION OF MACRO AND MICRO MOBILITY EXTENSIONS FOR WIRELESS IP BASED NETWORKS ......................................................... 387
Carl Wijting*, BorisKock* - ** and Ramjee Prasad*
* Aalborg University, Denmark; ** Delft University of Technology, Netherlands

M 4.3.4 POWER MANAGEMENT FOR IP-BASED DATA TRANSMISSION IN WIRELESS CDMA SYSTEMS ......................................................... 392
Ernestina Cianca*, Martijn Kuipers*, Marina Ruggieri** and Ramjee Prasad*
* Aalborg University, Denmark; ** University of Roma "Tor Vergata", Denmark

M 5.3 MULTIUSER DETECTION
Session Chair: Prof. Fumiyuki Adachi, Tohoku University, Japan

M 5.3.1 PARTIAL PARALLEL INTERFERENCE CANCELLATION USING NON-CONSTANT WEIGHTING FACTORS .................................................................................................................. 403
Ta Tri Nghia and R. M. A. P Rajatheva, Asian Institute of Technology, Thailand

M 5.3.2 BER PERFORMANCE OF A SUCCESSIVE INTERFERENCE CANCELLATION (SIC) SCHEME WITH AN OPTIMUM GEOMETRIC POWER DISPARITY (GPD) IN A DS/CDMA SYSTEM ................................................................. 408
Chiho Lee, Gwangzeen Ko and Kiseon Kim, K-JIST, Korea

M 5.3.3 BLIND ADAPTIVE DECORRELATING DECISION-FEEDBACK MULTIUSER DETECTION FOR DS-CDMA SYSTEM ................................................................. 412
Pianporn Linprasert, Somchai Jitapunkul, Voravit Kaweevat and Suwich Kunnaruttanapruk, Chulalongkorn University, Thailand

M 5.3.4 SPACE-TIME MULTIUSER DETECTION IN Rician Fading CHANNELS FOR DS/CDMA COMMUNICATIONS ................................................................. 418
Li Tao and Gao Yuan, The Hong Kong University of Science and Technology, Hong Kong

M 5.3.5 ADAPTIVE MULTISTAGE INTERFERENCE CANCELLATION FOR DS/CDMA SYSTEM ................................................................. 423
Md. Shahidul Islam and Tharek A. Rahman, Universiti Teknologi Malaysia, Malaysia
M 6.3 WIRELESS COMMUNICATIONS I

Session Chair: Prof. Bharoti Sinha, University of Roorkee, India

M 6.3.1 IMPACT OF SHADOW FADING IN A MM-WAVE BAND WIRELESS NETWORK .................................................. 427
Maxime Flament* and Matthias Unbehaun**
* Chalmers University of Technology, Sweden; ** Royal Institute of Technology, Sweden

M 6.3.2 PERFORMANCE OF A FAST FREQUENCY-HOPPED MFSK MULTIPLE ACCESS SYSTEM WITH THE MODIFIED MULTISTAGE DECODING SCHEME (MMDS) OVER A RAYLEIGH FADING CHANNEL .......... 433
Yeomin Yoon and Kiseon Kim, K-JIS, Korea

M 6.3.3 A PHS-BASED MULTIHOP WIRELESS INFRASTRUCTURE FOR LOCAL COMMUNITIES ........................................ 437
Kenichi Mase, Ritsuko Noto, Keisuke Nakano, Naoyuki Karasawa and Masakazu Sengoku
Niigata University, Japan

M 6.3.4 AN EFFICIENT ALGORITHM FOR USER LOCATION PROBABILITY IN WIRELESS CELLULAR COMMUNICATION SYSTEMS .......................................................... 443
Woo-Yong Choi, Hyundai Electronics Industries Co., Ltd., Korea

M 6.3.5 HOS METHOD IN MULTIPATH TIME DELAY ESTIMATION .......................................................... 447
Liu Ying*, Ying-Chang Liang** and Shun-Xun Wang***
* ChangChun Posts and Telecommunications institute, P. R. China
** Center for Wireless Communication, Singapore; *** Jilin University of Technology, P. R. China

TUESDAY, 14 NOVEMBER 2000 * 10:00 – 12:05 HRS.

T 1.1 SIGNAL PROCESSING II

Session Chair: Dr. Kimmo Mäkeläinen, Asian Institute of Technology, Thailand

T 1.1.1 A PROCEDURE FOR THE DESIGN OF DETERMINISTIC SPATIAL CHANNEL MODELS .................. 452
Matthias Patzold, Thomas Jargstorff and Frank Laue, Technical University of Hamburg-Harburg, Germany

T 1.1.2 SIMPLIFIED SIGNAL PROCESSING IN SOFTWARE RADIO RECEIVERS USING A NOVEL HILBERT TRANSFORMER DESIGN METHOD .................................................. 460
A. J. R. M. (Ton) Coenen, Delft University of Technology, The Netherlands

T 1.1.3 WAVELET BASED COMPRESSION FOR IMAGE RETRIEVAL SYSTEMS .................................................. 466
* Ministry of Science, Technology and Environment, Thailand
** Chulachomklao Royal Military Academy, Thailand; *** The University of Texas at Arlington, USA

T 1.1.4 ALGEBRAIC CHANNEL DECOMPOSITION MULTIPLEXING IN SPACE-TIME .................................................. 470
Paul G. Flikkema, Northern Arizona University, USA

T 1.1.5 PR CONDITION FOR A BLOCK FILTER BANK IN TERMS OF DFT .................................................. 475
Hideo Murakami, Kanazawa Institute of Technology, Japan

T 2.1 WIRELESS NETWORK II

Session Chair: Prof. Yoshikuni Onozato, Gunma University, Japan

T 2.1.1 WIRELESS AD-HOC NETWORK WITH BACKUP NODE IN SHADOWING CHANNEL .................. 481
S. Norita and A. Kajiwara, Ibaraki University, Japan

T 2.1.2 AN EFFECTIVE MAC PROTOCOL FOR LAYERED-SELF-ORGANIZING AD-HOC WIRELESS NETWORKS .......................................................... 486
Masanobu Kawahara, Tatsuya Matsukawa, Kentaro Tsudaka and Hiromi Okada, Kansai University, Japan
T 2.1.3  AN ENHANCED WIRELESS NETWORK ARCHITECTURE FOR FUTURE COMMUNICATION
ENVIRONMENTS ........................................................................................................... 491
Taegyu Lee and Chong-Sun Hwang, Korea University, Korea

T 2.1.4  AN IMMEDIATELY RECONFIGURABLE CONTROL FOR LAYERED SELF-ORGANIZING AD-HOC
WIRELESS NETWORKS .................................................................................................. 497
Tomokazu Yuasa, Kentaro Tsudaka and Hiromi Okada, Kansai University, Japan

T 2.1.5  FAST COMPUTER TOOL FOR ANALYSIS AND PREDICTION OF WIRELESS PACKET SWITCHING
NETWORKS ....................................................................................................................... 502
Mohammad Abai*, M. Hossein Hosseini* and Riaz Esmailzadeh**
* Genista Pte. Ltd, Singapore; ** Genista Corporation, Japan

T 3.1  MOBILE RADIO PERFORMANCE
Session Chair: Prof. Tharek Abd. Rahman, University of Technology, Malaysia

T 3.1.1  REALIZATION OF REAL-TIME BEARER SERVICES IN GERAN ................................. 506
Andreas Schieder, Roger Kalden, Hannes Ekström and Henning Wiemann, Ericsson Eurolab Deutschland, Germany

T 3.1.2  PERFORMANCE OF TWO-DIMENSIONAL CODE ACQUISITION IN RADIO ENVIRONMENTS WITH
SPATIALLY COLOURED INTERFERENCE ........................................................................ 512
Marcos Katz* - **, Jari Iinatti* and Savo Glisic*
* University of Oulu, Finland; ** Nokia Networks, Finland

T 3.1.3  SOFTWARE DEFINED RADIO PROTOTYPES FOR MULTIMODE OPERATION .................. 518
Yasuo Suzuki, Kazuhiro Uehara, Masashi Nakatsugawa and Shuji Kubota, NTT Network Innovation Laboratories, Japan

T 3.1.4  A SOLUTION FOR MOBILE RADIO SYSTEM OVERALL PERFORMANCE IMPROVEMENT ............. 524
Zoran Veljovic and Milica Pejanovic Djurisic, University of Montenegro, Yugoslavia

T 3.1.5  FREQUENCY RE-USE FROM HIGH ALTITUDE PLATFORMS ........................................... 527
N. E. Daly, T. C. Tozer, D. Grace and D. A. J. Pearce, The University of York, UK

T 4.1  TURBO CODES/TURBO CODED MULTI-CARRIER
Session Chair: Prof. Jun Horikoshi, Gunma University, Japan

T 4.1.1  AN INVESTIGATION INTO THE PERFORMANCE OF THE TURBO-TRELLIS CODED-MODULATION AND
SERIAL CONCATENATED CONVOLUTIONAL CODE FOR MULTICARRIER-CDMA SYSTEM IN
FREQUENCY SELECTIVE RAYLEIGH FADING CHANNEL .................................................. 532
Myo Tun and R. M. A. P. Rajatheva, Asian Institute of Technology, Thailand

T 4.1.2  THRESHOLD LOGMAP SISO BLOCK FOR FPGA IMPLEMENTATION OF TURBO DECODER .............. 538
S. A. Khodai*, S. H. Jamali*, R. Hoshyat*, M. Fakhrat* and A. S. Bahai**
* University of Tehran, Iran; ** National Semiconductor, Iran

T 4.1.3  MODIFIED TURBO CODES FOR PERFORMANCE IMPROVEMENTS .................................. 543
Bhuwanendra Kumar and Vishwanath Sinha, Indian Institute of Technology Kanpur Kanpur, India

T 4.1.4  FREQUENCY SPREAD CODING AND TURBO CODING FOR MULTICARRIER DS-CDMA .............. 548
Thet Htun Khine, R. M. A. P. Rajatheva and K. M. Ahmed, Asian Institute of Technology, Thailand
T 5.1 PROPAGATION I

Session Chair: Dr. Kazi M. Ahmed, Asian Institute of Technology, Thailand

T 5.1.1 WAVE PROPAGATION EXPERIMENT AT KA-BAND ............................................................... 554
Ekavit Nukfron, Adit Decharat, Tikumporn Boonchank and Narong Hemmakorn, King Mongkut's Institute of Technology Ladkrabang, Thailand

T 5.1.2 CHARACTERISTICS OF S-BAND SCINTILLATION ASSOCIATED WITH MAXIMUM SOLAR CYCLE .......... 558
Khajitpan Makaratat*, Adit Decharat*, Narong Hemmakorn*, Kiyoshi Igarashi** and Hisamitsu Minakoshi**
* King Mongkut's Institute of Technology Ladkrabang, Thailand; ** Communications Research Laboratory, Japan

T 5.1.3 A STUDY ON SEA SURFACE PROPAGATION FOR SEARCH AND RESCUE ............ (POST-PRINTED PAPER)
Hiroshi Juzoji, Isao Nakajima, Masuhisa Ta*, Toshiyuki Ide** and Shin-ichi Hama**
Tokai Medical Institute, Tokai University, Japan; * Tasada Workers Ltd., Japan; ** Communication Research Laboratory, Japan

T 5.1.4 MEASUREMENTS OF PROPAGATION IN A MILLIMETER-WAVE ROF ROAD-VEHICLE COMMUNICATION SYSTEM ............................................................... 564
Katsuyoshi Sato, Fumihide Kojima, Masayuki Fujise, Ministry of Posts & Telecommunications, Japan

T 5.1.5 L BAND EQUATORIAL SCINTILLATION MEASUREMENT ........................................ 569
Adit Decharat*, Khajitpan Makaratat*, Narong Hemmakorn* and Nut Junkrob**
* King Mongkut's Institute of Technology Ladkrabang, Thailand; ** South-East Asia University, Thailand

VOLUME II

T 6.1 ATM/WIRELESS ATM

Session Chair: Dr. Teerapat Sa-nguankotchakorn, Asian Institute of Technology, Thailand

T 6.1.1 CLR PERFORMANCE OF RANDOM TRAFFIC AND ERROR CONTROL IN WIRELESS ATM ACCESS NETWORKS ............................................................... 573
Ha Cheol Lee*, Byung Hwon Kwon* and Byung Seub Lee**
* Yuhan College, Korea; ** Hankuk Aviation University, Korea

T 6.1.2 RESOURCE ALLOCATION DURING HANDOVER WITH DYNAMIC GUARD BANDWIDTH IN WIRELESS ATM ............................................................... 579
Kamolwun Dankhonsakul and Tapio Erke, Asian Institute of Technology, Thailand

T 6.1.3 REROUTING TECHNIQUES AND SIGNALLING FOR HANDOFF IN WIRELESS ATM NETWORKS .......... 587
P. Marichamy, S. Chakrabarti and S. L. Maskara, Indian Institute of Technology, India

T 6.1.4 A STUDY OF HANDOVER PERFORMANCE OF VARIABLE BIT RATE SOURCES IN A WIRELESS ATM NETWORK ............................................................... 593
Chinnasri Suriyadetsakul and Tapio Erke, Asian Institute of Technology, Thailand

T 6.1.5 ATM PERFORMANCE IMPROVEMENT USING OOCs AND 2^5 PRIME SEQUENCE CODE WITH VBR ............................................................... 599
Chutima Neamprem and Bunjong Piyathamrong, King Mongkut's Institute of Technology Ladkrabang, Thailand
T 1.2 SIGNAL PROCESSING III
Session Chair: Prof. Hideo Murakami, Kanazawa Institute of Technology, Japan

T 1.2.1 MODIFIED BINARY TREE FOR CONTOUR CODING AND ITS PERFORMANCE ANALYSIS
M. A. Shamim and J. A. Robinson, Memorial University of Newfoundland, Canada

T 1.2.2 A NOVEL MODELLING APPROACH FOR WIRELESS INFRARED LINKS
Dimitrios Mavrakis and Simon R. Saunders, University of Surrey, UK

T 1.2.3 VHF CMOS BANDPASS FILTER FOR IF APPLICATION
K. Sirivathanant, U. Yodprasit and J. Ngarmnil, Mahanakorn University of Technology, Thailand

T 1.2.4 FUZZY HIT OR MISS FOR AUTOMATICALLY IMAGE THRESHOLDING
Sathit Intajag and Kittipatthawatanakij, King Mongkut's Institute of Technology Ladkrabang, Thailand

T 1.2.5 PREDICTION AND INVESTIGATION OF ANGULAR-FADING IN THE URBAN MOBILE RADIO ENVIRONMENTS FOR 4G SYSTEMS
Houtao Zhu*, Jiye Fu*, Tomonori Kiduki*, Jun-ichi Takada*, Kiyomichi Araki* and Takehiko Kobayashi**
* Tokyo Institute of Technology, Japan
** YRP Mobile Telecommunications Key Technology Research Laboratories Co., Ltd., Japan

T 2.2 WIRELESS COMMUNICATIONS II
Session Chair: Prof. Byung Seuts Lee, Yuhan College, Korea

T 2.2.1 FUZZY BASED ESTIMATION OF UPPERBOUND CELL LOSS RATIO FOR RARE EVENT ANALYSIS IN ATM NETWORKS
Chandramathi. S, and Shanmagavel S., Anna University, Chennai, India

T 2.2.2 PERFORMANCE EVALUATION OF AAL2 WITH CONTINUOUS TIME MARKOV PROCESS
Gwangzeen Ko*, Sungdon Moon*, Changhwan Oh*, Jeewhan Ahn** and Kiseon Kim*
* KJIST, Korea; ** ETRI, Korea

T 2.2.3 FADING CHANNEL MODEL FOR MOBILE STRATOSPHERIC COMMUNICATION SYSTEMS
Do-Seob Ahn*, Bon-Jun Ku*, Moon-Hee You* and Byeong-Gwon Kang**
* ETRI Radio & Broadcasting Technology Laboratory, Korea; ** Soonchunhyang University, Korea

T 2.2.4 A NEW APPROACH FOR MULTIPATH DELAY ESTIMATION IN GPS RECEIVERS
Ridha Hamila, Simona Lohan and Markku Renfors
Tampere University of Technology, Finland

T 2.2.5 INTERACTION OF ELECTROMAGNETIC ENERGY EMITTED BY MOBILE COMMUNICATION HANDSET WITH HUMAN ARM
Bharoti Sinha, University of Roorkee, India

T 3.2 MULTI-CARRIER TECHNIQUES
Session Chair: Prof. Seiichi Sampei, Osaka University, Japan

T 3.2.1 WAVELET BASED MULTICARRIER DS-CDMA SYSTEM FOR BROADBAND MOBILE COMMUNICATIONS
AS Madhukumar, Joo Hong Tan, Francois Chin and Ying-Chang Liang, Singapore Science Park II, Singapore

T 3.2.2 PARTIALLY COHERENT MC-CDMA DOWNLINK PERFORMANCE IN RAYLEIGH FADING CHANNELS
Nam-Soo Kim and Dong-kyun Cho, Chongju University, Korea

T 6.2 IMAGE PROCESSING

Session Chair: Prof. Hiroshi Kondo, Kyushu Institute of Technology, Japan

T 6.2.1 INVARIANT FEATURES FOR TEXTURE IMAGE RETRIEVAL USING STEERABLE PYRAMID ........................................... 724
S. Areepongsa*, D. Park** and K.R. Rao***
* Ministry of Science, Technology and Environment, Thailand; ** Hannam University, South Korea
*** The University of Texas at Arlington, USA

T 6.2.2 TRADEMARK RETRIEVAL SYSTEM USING STRING-MATCHING TECHNIQUE AND CONTENT-BASED IMAGE FEATURES ............................................................................................................................................... 729
Phongsuphap Sukanya, Wimon Sarach, Pornpong Sae-sow and Sirinuch Wongrungarunlart, Mahidol University, Thailand

T 6.2.3 A NEW CLASS OF MIDPOINT TYPE NONLINEAR FILTERS FOR ELIMINATING SHORT AND LONG TAILED NOISE IN IMAGES ............................................................................................................. 735
E. Srinivasan and D. Ebenezer, Anna University, India

T 6.2.4 NEW NONLINEAR FILTERING STRATEGIES FOR ELIMINATING MEDIUM AND LONG TAILED NOISE IN IMAGES WITH EDGE PRESERVATION PROPERTIES ................................................................................................................ 740
E. Srinivasan and D. Ebenezer, Anna University, India

TUESDAY, 14 NOVEMBER 2000 * 15:50 – 17:55 HRS.

T 1.3 EQUALIZATION

Session Chair: Prof. Tetsushi Ikegami, Meiji University, Japan

T 1.3.1 MLSE EQUALIZER IN TIME-DISPERSIVE CHANNELS BASED ON AN ADAPTIVE CHANNEL ESTIMATOR ................................................................................................................................. 746
Lorenzo Rubio, Narcis Cardona, Juan Reig and Alberto González, Universidad Politécnica de Valencia, Spain

T 1.3.2 MODIFIED LEE ALGORITHM WITH SOFT DECISION-FEEDBACK AND BACKWARD RECURSION USING M-ALGORITHM .................................................................................................. 750
Piyapun Kaokitvirach and R. M. A. P. Rajatheva, Asian Institute of Technology, Thailand

T 1.3.3 BI-DIRECTIONAL ADAPTIVE EQUALIZER FOR PRIVATE MOBILE RADIO .................................................................................. 755
Ken Udagawa*, Eimatsu Moriyama* and Hiroshi Suzuki**
* YRP Advanced Mobile Communication Systems Research Laboratories Co., Ltd., Japan
** Tokyo Institute of Technology, Japan

T 1.3.4 PERFORMANCE ASSESSMENT OF SOME ADAPTIVE EQUALIZERS IN MOBILE RADIO ENVIRONMENTS ......................................................................................................................... 761
M. Salim Beg, Tan Su Chuen and Hazemi bin Hamidi, Multimedia University, Malaysia

T 1.3.5 SOFT-OUTPUT SEQUENTIAL ALGORITHM (SOSA) FOR SIGNAL ESTIMATION OVER FREQUENCY SELECTIVE FADING CHANNEL ............................................................................. 767
E. Tungsrisaguan and R. M. A. P. Rajatheva, Asian Institute of Technology, Thailand

T 2.3 HANDOVER

Session Chair: Mr. Tapio Erke, Asian Institute of Technology, Thailand

T 2.3.1 PERFORMANCE ANALYSIS OF HANDOFF ALGORITHM USING BOTH DISTANCE AND RSSI MEASUREMENTS ............................................................................................................ 773
Ken-ichi Itoh, Soichi Watanabe and Takuro Sato, Niigata Institute of Technology, Japan
T 2.3.2 COMPARISON OF SOFT HANDOFF PERFORMANCE BETWEEN IS-95A AND IS-95B
CDMA 2000  ................................................................. 779
Bongkarn Homnan, Vikorn Kunrsiriaksakul and Watit Benjapolakul, Chulalongkorn University, Thailand

T 2.3.3 FUZZY HANDOVER DECISION USING MOVING RATE OF MOBILE STATION, DISTANCE FROM
BASE STATION AND RECEIVED SIGNAL STRENGTH FOR CELLULAR MOBILE
COMMUNICATION SYSTEM .................................................. 783
Watit Benjapolakul, Bongkarn Homnan and Jaturong Sa-ngiamwong, Chulalongkorn University, Thailand

T 2.3.4 BLOCKING PERFORMANCE ANALYSIS OF TRUNK NETWORK FOR CDMA INTER-MSC SOFT
HANDOFFS ................................................................. 787
Woo-Yong Choi, Hyundai Electronics Industries Co., Ltd., Korea

T 2.3.5 THE EFFECTS OF SOFT/SOFTER HANDOVER ON THE SECTORIZATION GAIN IN CDMA
CELLULAR SYSTEMS ...................................................... 793
Xinjie Yang, Shahram Ghaheri-Niri and Rahim Tafazolli, University of Surrey, UK

T 3.3 CODING AND MODULATION
Session Chair: Prof. Hideki Imai, The University of Tokyo, Japan

T 3.3.1 A LAYERED DEMODULATION SCHEME FOR ADAPTIVE MODULATION SYSTEMS WITHOUT
MODULATION INFORMATION TRANSMISSION ......................... 798
Mitsuru Uesugi, Osamu Kato and Koichi Homma, Matsushita Communication Industrial Co., Ltd., Japan

T 3.3.2 ANALYSIS OF BER ON SEQUENCE ESTIMATION FOR DIGITAL FM AND GMSK WITH
LIMITER DISCRIMINATOR DETECTION .................................. 804
Yasunori Iwanami, Nagoya Institute of Technology, Japan

T 3.3.3 A HIGH-SPEED CODED QPSK TRANSMITTER LSI FOR DAVIC-COMPLIANT DIGITAL
COMMUNICATIONS .......................................................... 810
Sungsoo Choi, Youngkou Lee, Seung-Geun Kim and Kiseon Kim, K-JIST, Korea

T 3.3.4 INTRINSIC BLOCK SYNCHRONISATION TECHNIQUE BASED ON ALGEBRAIC DECODING OF
SHORTENED REED SOLOMON CODES .................................... 815
M. I. Samarakoon, D. Lund and B. Honary, HW Communications Limited, UK

T 3.3.5 PERFORMANCE COMPARISON OF SPACE-TIME ARCHITECTURE FOR HIGH CAPACITY WIRELESS
SYSTEMS ................................................................. 819
Anass Benjebbour, Hidekazu Murata and Susumu Yoshida, Kyoto University, Japan

T 3.3.6 PERFORMANCE OF PHASE LOCKED LOOP GFSK DEMODULATOR IN A MULTIPATH CHANNEL .................. 825
S. R. Abdollahi*, S. M. Fakhrat* and M. M. Zakeri**
* University of Tehran, Iran; ** Iran Communication Industries Group (ICI), Iran

T 4.3 OFDM III/MULTI-CARRIER TECHNIQUES
Session Chair: Dr. R. M. A. P. Rajatheva, Asian Institute of Technology, Thailand

T 4.3.1 A JOINT TIME AND FREQUENCY SYNCHRONIZATION AND CHANNEL ESTIMATION FOR OFDM
SYSTEMS USING ONE TRAINING SYMBOL ................................ 830
Hlaing Minn and Vijay K. Bhargava, University of Victoria Victoria, Canada

T 4.3.2 OFDM BIT ERROR RATE PERFORMANCE INVESTIGATION AND OPTIMIZATION IN TUNNEL
ENTRANCE ENVIRONMENT FOR INTELLIGENT TRANSPORT SYSTEMS APPLICATIONS .......................... 836
Alexandre Vieira Batista da Silva and Masao Nakagawa, Keio University, Japan

T 4.3.3 PERFORMANCE OF CHANNEL ESTIMATION USING PILOT SYMBOLS FOR A COHERENT
OFDM SYSTEM ............................................................. 842
Van Duc Nguyen, Christian Hansen and Hans Peter Kuchenbecker, University of Hannover, Germany
T 4.3.4 HIGH-SPEED MC-CDMA BROADBAND PACKET WIRELESS ACCESS IN FORWARD LINK WITH
MULTI-LEVEL MODULATION AND HYBRID ARQ ...................................................... 848
Hiroyuki Atarashi, Sadayuki Abeta and Mamoru Sawahashi, NTT DoCoMo Inc., Japan

T 4.3.5 TRANSMITTER DIVERSITY FOR MULTI-CARRIER CODE DIVISION MULTIPLE ACCESS ......................... 854
M. Sanguanchaiyakit and R. M. A. P. Rajatheva, Asian Institute of Technology, Thailand

T 5.3 NEW TECHNOLOGIES I

Session Chair: Prof. Mike Darnell, Leeds University, UK

T 5.3.1 PEDESTRIAN NAVIGATION SYSTEM ................................................................. 859
Yasufumi Kikuchi*, Koji Kubota*, Hirofumi Kimura** and Shigeishi Tanaka***
* NTT Service Integration Laboratories, Japan; ** NTT Advanced Technology Corporation, Japan
*** NTT Communications Corporation, Japan

T 5.3.2 PROTOTYPING OF CELLULAR PHONE BASED HOME APPLIANCE CONTROL SYSTEM ......................... 865
Tadami Tanabe, Toshiyuki Tanaka and Susumu Kitaguchi, SHARP Corporation, Japan

T 5.3.3 A WIRELESS VIDEO HOME-LINK USING 60GHz BAND ........................................... 871
Kiyoshi Hamaguchi, Yozo Shoji, Hiroyo Ogawa, Hiroya Sato*, Kiyohito Tokuda**, Yasutake Hirachi**, Toshiya
Iwasaki****, Akira Akeyama******, Katsuhiko Ueki******* and Takao Kizawa********
MPT, Japan; * Sharp Corp., Japan; ** Oki Electric Industry Co., Ltd., Japan; *** Fujitsu Quantum Devices Ltd.,
Japan; **** Sanyo Electric Co., Ltd., Japan; ***** NTT Advanced Technology Corp., Japan
******* Hitachi Denshi Co., Ltd., Japan; ******* JRC, Co., Ltd., Japan

T 5.3.4 A PROPOSAL OF MOBILE COMMUNITY COMMUNICATION SYSTEM ........................................... 875
Ken Ohta, Motohiro Machida, Kiyotaka Otsuji and Toshiaki Sugimura, NTT DoCoMo, Japan

T 6.3 IMAGE AND VIDEO PROCESSING

Session Chair: Prof. K. R. Rao, University of Texas at Arlington, USA

T 6.3.1 B-SPLINE CURVE REPRESENTATION OF SEGMENTED OBJECT IN MPEG COMPRESSED DOMAIN ................ 881
Orachat Sukmarsh and K. R. Rao, University of Texas at Arlington, USA

T 6.3.2 DIGITAL IMAGE COMPRESSION USING WAVELET TRANSFORM WITH TRANSITION MATRIX .................. 885
Hiroshi Kondo and Tatsuya Fukushige, Kyushu Institute of Technology, Japan

T 6.3.3 AN INTRODUCTION TO VIDEO PRODUCTION IN COMPRESSED VIDEO ........................................ 891
W. A. C. Fernando, C. N. Canagarajah and D. R. Bull, University of Bristol, UK

T 6.3.4 A SIMPLE PWM GENERATOR .................................................................................. 896
Theerayut Techarat, Surachet Roungprakhon and Paramote Wardkien, King Mounkgut's Institute of Technology
Ladkrabang, Thailand

T 6.3.5 AN OVERVIEW: SCENE CHANGE DETECTION IN VIDEO SEQUENCES ................................. 900
W. A. C. Fernando, C. N. Canagarajah and D. R. Bull, University of Bristol, UK

WEDNESDAY, 15 NOVEMBER 2000 * 10:00 – 12:05 HRS.

W 1.1 THIRD GENERATION

Session Chair: Prof. Fumiyuki Adachi, Tohoku University, Japan

W 1.1.1 W-CDMA FIELD TRIAL IN SINGAPORE ..................................................................... 906
C. Y. Lee, A. Verma, P. S. Chin and Francois, National University Singapore, Singapore
W 1.1.2 WCDMA SINGLE-USER INTERFERENCE CANCELLATION FOR FADING CHANNELS AND DIVERSITY ANTENNAS ...................................................... 912
Jonas Karlsson and Hideki Imai, University of Tokyo, Japan

W 1.1.3 ANALYSIS OF CHARACTERISTICS ON STRATOSPHERIC COMMUNICATION SYSTEM FOR 48/47 GHz, 30/20 GHz AND IMT-2000 FREQUENCY BANDS ...................................................... 916
Bon-Jun Ku and Do-Seob Ahn, ETRI-Radio & Broadcasting Technology Laboratory, Korea

W 1.1.4 AN APPLICATION OF TRANSMIT DIVERSITY IN W-CDMA SYSTEMS ........................................... 921
Masafumi Usuda, Takehiro Nakamura and Seizo Onoe, NTT DoCoMo Inc., Japan

W 2.1 WIRELESS COMMUNICATIONS III
Session Chair: Prof. Kenichi Mase, Niigata University, Japan

W 2.1.1 IMPROVEMENT OF BASE STATION IN AMPS MOBILE TELEPHONE SYSTEM BY LEAST SQUARE METHOD ...................................................... 927
Phichet Moungnoul, Thanate Patanatadapong, Manoon Sukkasem and Tawil Paungma, King Mongkut's Institute of Technology Ladkrabang, Thailand

W 2.1.2 AD-HOC COMMUNICATION IN FDD WIRELESS ACCESS SYSTEM ............................................... 932
Koji Maeda and Masao Nakagawa, Keio University, Japan

W 2.1.3 ON ADAPTIVE DETECTION OF SYMBOL TIMING ................................................................. 937
Feng Lu, Hao Yuan, Takeo Ohseki, Toshiyuki Maeyama and Keiichiro Iwasaki, Kyocera DDI Institute of Future Telecommunications Inc., Japan

W 2.1.4 EVALUATION OF INTERMODULATION DISTORTION FOR ROF-BASED MULTIMODE ROAD-VEHICLE COMMUNICATION SYSTEM .................................................. 943
Fumihide Kojima, Katsuyoshi Sato and Masayuki Fujise, Communications Research Laboratory, MPT, Japan

W 3.1 OPTICAL AND WAVE PROPAGATION
Session Chair: Prof. A. B. Sharma, Asian Institute of Technology Thailand

W 3.1.1 SIMULATION ON DISTRIBUTED POINT FABRY-PEROT LASER DIODE FOR RADIO OVER FIBRE ................. 949
Mohamad Kadim Suaidi, Grace Quak Sek Jade and Sakena Abd. Jabar, Universiti Malaysia Sarawak, Malaysia

W 3.1.2 CONDUCTOR-BACKED COPLANAR WAVEGUIDE HYBRID FOR VARACTOR-TUNED PHASE SHIFTING ........................................ 953
Prayoot Akkaraekthalin, Somrat Nimyen and Vech Vivek, King Mongkut's Institute of Technology North Bangkok, Thailand

W 3.1.3 SENSITIVITY PENALTY IN MULTICHANNEL COHERENT CPFSK SYSTEM USING OPTICAL AMPLIFIER ........................................ 958
M. Nazrul Islam and Shahriar Ahmed Chowdhury, Bangladesh University of Engineering and Technology, Bangladesh

W 3.1.4 DISTRIBUTED CONDUCTOR-BACKED COPLANAR WAVEGUIDE PHASE/FREQUENCY SHIFTER AND ITS APPLICATION ........................................ 963
Prayoot Akkaraekthalin, King Mongkut's Institute of Technology North Bangkok, Thailand

W 3.1.5 DOUBLE KNIFE EDGE DIFFRACTION STUDIES IN WESTERN INDIA ................................................ 968
* National Physical Laboratory, India; ** All India Radio Research Station, India; *** S.V. University, India
W 4.1 NEW TECHNOLOGIES II
Session Chair: Prof. Sawasd Tantaratna, Sirindhorn International Institute of Technology, Thailand

W 4.1.1 STRATOSPHERIC PLATFORM DEPLOYMENT STRATEGY FOR AVOIDING BS SIGNAL BLOCKAGE .............................................. 971
Yoshihiro Hase and Nobuyuki Shibata, Communications Research Laboratory Mitsubishi Electric Corporation, Japan

W 4.1.2 LOCATION SERVICES OR HOW TO ENHANCE PERSONAL SAFETY AND TO STIMULATE LUCRATIVE BUSINESS OPPORTUNITIES .......................................................... 977
Jean-Louis Lavroff, European Commission - Directorate-General Information Society, Belgium

W 4.1.3 STUDY OF PEDESTRIAN NAVIGATION USING A SMALL WIRELESS HANDHELD DISPLAY .................................................. 983
Motohiro Machida*, Minako Izawa** and Toshiaki Sugimura*
* NTT DoCoMo Inc., Japan; ** Nippon Telegraph and Telephone East Corporation, Japan

W 4.1.4 ECSAIWEB: AN ADAPTIVE LEARNING ENVIRONMENT ON THE WEB .......................................................... 989
Charun Sanrach, Equipe Informatique et Formation, France

W 5.1 MULTIMEDIA
Session Chair: Prof. Mitsutoshi Hatori, National Center for Science Information Systems, Japan

W 5.1.1 CIRCUIT-SWITCHED MOBILE MULTIMEDIA TELEPHONY - TERMINAL REQUIREMENTS AND CALL CONTROL ........................................................................................................... 994
Miraj-E-Mostafa, Nokia Mobile Phones, Finland

W 5.1.2 FUTURE SHOPPING - A MOBILE MULTIMEDIA APPLICATION .................................................................................. 1000
Axel Busboom and Guido Zavaglia, Ericsson Eurolab Deutschland GmbH, Germany

W 5.1.3 STANDARDS AND PLATFORMS FOR DELIVERING MOBILE MULTIMEDIA SERVICES .................................................. 1005
S. Anantha Narayanan* and Satu Mäkelä**
* Nokia Internet Communications, Finland; ** Nokia Mobile Phones, Finland

W 5.1.4 SECURE COMMUNICATION PROTOCOL FOR MOBILE MULTIMEDIA APPLICATIONS .................................................. 1011
N. Komninos*, B. Honary* and M. Darnell**
* Lancaster University, UK; ** HW Communications Limited White Cross Industrial Estate, UK

W 5.1.5 CO-OPERATIVE SERVICE AND LINK ADAPTATION TECHNIQUES FOR THE SUPPORT OF MULTI-MEDIA APPLICATIONS OVER WIRELESS CHANNELS .................................. 1015
G. Le Bodic, J. Irvine, D. Girma and J. Dunlop, University of Strathclyde, Scotland

W 6.1 THIRD GENERATION/GSM EVOLUTION
Session Chair: Prof. Hamid Aghvami, King's College, UK

W 6.1.1 ESTIMATION OF THE RANDOM ACCESS SLOTS FOR GSM EVOLUTION .......................................................... 1021
Jahangir H. Sarker and Seppo J. Halme, Helsinki University of Technology, Finland

W 6.1.2 EVOLUTION OF LOCATION SERVICES IN GSM AND UMTS NETWORKS .......................................................... 1027
Timo M. Rantalainen, Maurizio A. Spirito and Ville Ruutu, Nokia Research Center, Finland

W 6.1.3 QUARTER RATE AMR CHANNELS - A SPEECH CAPACITY BOOSTER IN GSM/EDGE ................................................. 1033
Thierry Bellier, Martti Moisio, Eero Nikula, Riku Pirhonen and Henrik Rantala, Nokia Research Center, Finland

W 6.1.4 THE INTEGRATION OF MOBILE COMPUTING IN GSM, GPRS AND UMTS .......................................................... 1039
Dam D. Nguyen* and Gianluigi Redaelli**
* Asian Institute of Technology, Thailand; ** Politecnico di Milano, Italy
W 6.1.5 EFFICIENT VIDEO TRANSMISSION OVER THIRD GENERATION MOBILE SYSTEMS ........................................... 1045
Ruwan N. Gajaweera, R. M. A. P. Rajatheva and Kazi M. Ahmed, Asian Institute of Technology, Thailand

WEDNESDAY, 15 NOVEMBER 2000 * 13:15 – 15:45 HRS.

INVITED SESSION ON WIRELESS/MOBILE IP
Session Chair: Dr. Fumio Teraoka, Sony Computer Science Labs, Japan

1. DATA TRANSFER WITH PREFETCHING ON HOT-SPOTTED NETWORK .............................................................. 1050
Naoki Imai, Morikawa Hiroyuki and Tomonori Aoyama, The University of Tokyo, Japan

2. DESIGN OF MULTICASTING IN AD HOC NETWORK WITH THE OMUSUBI SYSTEM ........................................... 1056
Hideaki Ito*, Katsumi Matsuura*, Shigeaki Tagashira*, Kenya Sato**, Keizo Saisho*** and Akira Fukuda*  
* Nara Institute of Science and Technology, Japan; ** Harness System Technologies Research, Ltd., Japan; *** Kagawa University, Japan

3. AD-HOC ON-DEMAND COMMUNICATION SYSTEM BASED ON MOBILE AGENTS ............................................. 1061
Nobuo Kawaguchi and Yasuyoshi Inagaki, Nagoya University, Japan

4. WIRELESS SCHEDULER PROVIDING RELATIVE DELAY DIFFERENTIATION ...................................................... 1067
Moo Ryong Jeong, Kentaro Kakami, Hiroyuki Morikawa and Tomonori Aoyama, University of Tokyo, Japan

5. THE GLI SYSTEM: A GLOBAL SYSTEM MANAGING GEOGRAPHICAL LOCATION INFORMATION OF MOBILE ENTITIES ................................................................. 1073
Sohgo Takeuchi*, Yasuhito Watanabe** and Fumio Teraoka*  
* Sony Computer Science Laboratories, Inc., Japan; ** Keio University, Japan

6. LIN6: A NEW APPROACH TO MOBILITY SUPPORT IN IPV6 ........................................................................... 1079
Mitsunobu Kunishi*, Masahiro Ishiyama**, Keisuke Uehara***, Hiroshi Esaki**** and Fumio Teraoka*****  
* Keio University, Japan; ** Toshiba Corporation, Japan; *** University of Tokyo, Japan; **** University of Tokyo, Japan; ***** Sony Computer Science Laboratories, Inc., Japan

WEDNESDAY, 15 NOVEMBER 2000 * 16:05 – 17:55 HRS.

PANEL SESSION ON WIRELESS/MOBILE IP
Session Chair: Prof. Ramjee Prasad, Aalborg University, Denmark
M 1.2 SATELLITE COMMUNICATIONS

Session Chair: Dr. Shingo Ohmori, Communication Research Laboratory, Japan

M 1.2.4 JAPANESE NATIONWIDE SURVEY OF SATELLITE-BASED COOPERATIVE TELEMEDICAL PROJECTS INVOLVING DEVELOPING NATIONS ................................................................. 1084
Isao Nakajima, Shigemi Morikawa, Michiya Natori*, Masaomi Takizawa**, Noboru Takamura***, Shun-ichi Yamashita*** and Shigekoto Kaihara*
Tokai Medical Institute, Japan; * National Okura Hospital
** Shinshu University Hospital, Japan; *** Nagasaki University, Japan

T 5.1 PROPAGATION I

Session Chair: Dr. Kazi M. Ahmed, Asian Institute of Technology, Thailand

T 5.1.3 A STUDY ON SEA SURFACE PROPAGATION FOR SEARCH AND RESCUE ................................................. 1090
Hiroshi Juzoji, Isao Nakajima, Masuhisa Ta*, Toshiyuki Ide** and Shin-ichi Hama**
Tokai Medical Institute, Tokai University, Japan; * Tasada Workers Ltd., Japan; ** Communication Research Laboratory, Japan

AUTHORS' INDEX ........................................................................................................................................ 1095
