

Proceedings of the

6th International OFDM-Workshop (InOWo'01)

“From Broadband WLANs to a 4th Generation Radio Network”

September 18th and 19th 2001
at the

Hotel Hafen Hamburg in Hamburg, Germany

SIEMENS

Under the patronage of

Krista Sager

Deputy Mayor and Senator for Science and Research
of the Free and Hanseatic City of Hamburg

TIB/UB Hannover 89
126 455 21X

Technical University Hamburg-Harburg
Department of Telecommunications
Prof. Hermann Rohling

Contents

OFDM Transmission Technique for the 4 th Generation of Mobile Communication Systems <i>Hermann Rohling, Rainer Grünheid, Dirk Galda, TU Hamburg-Harburg, Germany</i>	0-1
--	-----

Session 1: Antenna Techniques

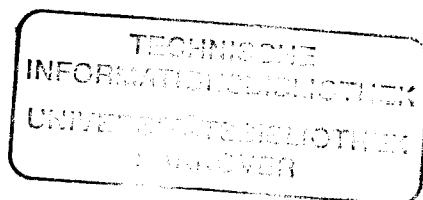

Adaptive Antenna Array for Reliable OFDM Transmission <i>Shinsuke Hara, Yoshitaka Hara, Osaka University, Japan</i>	1-1
Impact of Ubiquitous Antennas to the Interference Cancellation of COFDM Systems <i>Shutai Okamura, Shozo Komaki, Osaka University, Japan</i> <i>Minoru Okada, Nara Institute of Science and Technology, Japan</i>	2-1
Joint Channel Estimation in Multi-User OFDM Systems <i>Ioannis Maniatis, Alexandros Sklavos, Tobias Weber, University Kaiserslautern, Germany</i> <i>Elena Costa, Harald Haas, Egon Schulz, Siemens AG, Germany</i>	3-1

Session 2: Modulation Techniques

Phasor Description of the COFDM Signal in a Multipath Channel <i>Marian Oziewicz, National Inst. Of Telecommunications, Poland</i>	4-1
Adaptive OFDM Transmission for Broadband Fixed Wireless Access Systems <i>Thomas Hunziker, Dirk Dahlhaus, ETH Zurich, Switzerland</i>	5-1
Performance of Wavelet Packet Modulation in Multipath Channel <i>Antony Jamin, Petri Mähönen, University of Oulu, Finland</i>	6-1
Improved Differential Demodulation of OFDM over Two-Path Channels <i>Robert Fischer, University Erlangen-Nürnberg, Germany</i> <i>Ernst Eberlein, Fraunhofer Institut für Integrierte Schaltungen, Germany</i>	7-1

1. Day Poster Presentations

Intercarrier and Intersymbol Interference Analysis of OFDM Systems over Fading Channels <i>Van Duc Nguyen, Hans-Peter Kuchenbecker, Univ. of Hannover, Germany</i>	8-1
OFDM Equalization without Guard Interval <i>Steffen Trautmann, Norbert Fliege, Mannheim University, Germany</i>	9-1
On the Performance of a Decision-Directed Channel Estimator for OFDM <i>Alfonso Troya, IHP GmbH, Germany</i>	10-1
Parallel Interference Cancellation Assisted Decision-Directed Channel Estimation for Multi-User OFDM <i>Matthias Münster, Lajos Hanzo, Univ. of Southampton, UK</i>	35-1

Session 3: Channel Estimation and Equalization

- Blind Channel Estimation for OFDM Systems with Reduced Estimation Error 11-1
Robert Klinski, Holger Hutzemann, Sven Keunecke, Rudi Knorr, Fraunhofer Insitute for Communication Systems, Germany
- Low Complexity Finite-Alphabet based Blind Channel Estimation in OFDM Receivers 12-1
Thorsten Petermann, Sven Vogeler, Karl-Dirk Kammeyer, Univ. of Bremen, Germany
- Adaptive Equalization of IQ Imbalance in OFDM Receivers 13-1
Andreas Schuchert, Ralph Hasholzner, Christoph Patzelt, Motorola SPS, Germany
- Pilot-Aided Channel Estimation Algorithms for Digital Radio Mondial (DRM) 14-1
Frank Hofmann, Robert Bosch GmbH, Germany

Session 4: Synchronization Techniques

- Impact of DC-Offsets and Carrier Feed-Through on Correlation-Based Frequency Synchronization for OFDM 15-1
Klaus Witrisal, Delft University, The Netherlands
- Efficient Training and Synchronization Sequence Structures for MIMO OFDM 16-1
Apurva N. Mody, Gordon L. Stüber, Georgia Insitute of Technology, USA, Wi-LAN, USA
- Frame & Frequency Synchronization for Coherent OFDM Systems Based on Pilots with Pseudo Random Phase 17-1
Christian Hansen, Hans-Peter Kuchenbecker, Univ. of Hannover, Germany
Wolfgang Schäfer, Robert Bosch GmbH, Germany

Session 5: Diversity Techniques

- Simple Transmit Diversity for a Convolutionally Coded Multicarrier QAM System 18-1
Henrik Schulze, Univ. of Applied Sciene Meschede, Germany
- Differential Modulation Diversity for ODFM 19-1
Lutz H.-J. Lampe, Robert Schober, Univ. Erlangen -Nürnberg, Germany
- Synchronization of Single Frequency Networks 20-1
Wolfgang Zirwas, Egon Schulz, Josef Eichinger, Siemens AG,
Tobias Giebel, TU Hamburg-Harburg,
Norbert Esseling, RWTH Aachen, Germany

Session 6: Channel Coding

- Aspects of Coding and Modulation for OFDM 21-1
Dirk Sommer, Gerhard P. Fettweis, Dresden Univ.of Technology, Germany
- A Recursive IR Protocol for Multicarrier Communication 22-1
Argiris Levisianou, Costas Assimakopoulos, F-N. Pavlidou, A. Polydoros, Univ., Greece
- A new Diversity Decoding Scheme for OFDM Signals 23-1
Takaya Yamazato, Weizhong Wang, Akira Ogawa, Nagoya University, Japan

Using CRC for Iterative Decoding of Convolutional Codes <i>Karsten Brünninghaus, Siemens AG, Germany</i> <i>Hermann Rohling, TU Hamburg-Harburg, Germany</i>	24-1
--	------

2. Day Poster Presentations

A Comparison of MC-CDMA and Coded OFDM-FDMA Applied to the Downlink <i>Elena Costa, Chunyang (Vivian) Yin, Harald Haas, SIEMENS AG, Germany</i>	25-1
--	------

Analysis of Extended OFDM-CDMA Systems <i>Tünde Balog Ferenc Balazs, Sandor Imre, Laszlo Pap, Budapest University of Technology and Economics, Hungary</i>	26-1
---	------

Recursive Filters in OFDM Systems <i>Andreas Menkhoff, Infineon, Germany</i>	27-1
---	------

Performance of OFDM Systems in Impulsive Noise Channels <i>Gökhan Pay, Mehmet Safak, Hacettepe University, Turkey</i>	36-1
--	------

Session 7: OFDM Systems

VLSI Implementation of IEEE 802.11a Physical Layer <i>Ludwig Schwoerer, Holger Wirz, Nokia, Germany</i>	28-1
--	------

High Precision Analog Front-End Transceiver Architecture for Wireless Local Area Network <i>Edmund Coersmeier, Ludwig Schwoerer, Nokia, Germany</i> <i>Ken Astrof, Nokia, USA</i>	29-1
---	------

Performance Comparison of Different PLC Architectures <i>Gabor Zsoldos, Ferenc Balazs, Sandor Imre, Laszlo Pap, Budapest University of Technology and Economics, Hungary</i>	30-1
---	------

PAR Reduction Revisited: An Extension to Tellado's Method <i>Werner Henkel, Valentin Zrno, FTW, Austria</i>	31-1
--	------

Session 8: Protocols and Multiple Access Schemes

Framework for Combined Optimization of DLC and Physical Layer in Mobile OFDM Systems <i>Bing Chen, Rainer Grünheid, Hermann Rohling, TU Hamburg-Harburg,</i> <i>Frank Fitzek, James Groß, Adam Wolisz, TU Berlin, Germany</i>	32-1
---	------

Comparison of Collision-Based and Orthogonal Subcarrier Allocation for Congestion Control in the Uplink OFDMA System <i>Slawomir Pietrzyk, Polska Telefonía Cyfrowa Sp. z o.o., Poland</i> <i>Gerard J.M. Janssen, Delft University of Technology, The Netherlands</i>	33-1
--	------

Quasi-Synchronous Multi-Carrier Time Division Duplex DS-CDMA in Reverse Link for Wireless Communications <i>Pheeradej Nanan, Masao Nakagawa, Keio University, Japan</i>	34-1
--	------
