Solar Encounter

Proceedings of the first
Solar Orbiter Workshop
14 - 18 May 2001
Puerto de la Cruz, Tenerife, Spain

Sponsors: ESA & Instituto de Astrofísica de Canarias (IAC)
CONTENTS

Foreword
E. Marsch ix

OPENING SESSION
Solar Orbiter – A High-Resolution Mission to the Sun and Inner Heliosphere
E. Marsch et al. xi

THE FOUR GREAT THEMES OF SOLAR ORBITER
Chair: Valentin Martínez Pillet

Visible-Light Observations and High-Resolution Polarimetry
B.W. Lites 3

High-Resolution EUV Imaging and Spectroscopy of the Corona
S. Patsourakos & J-C. Vial 13

Charged Particles, Neutrals and Neutrons
M-B. Kallenrode 23

The Lower Polar Atmosphere and the Solar Dynamo: Perspectives for the Solar Orbiter
S.K. Solanki 35

The Sun's Global Corona in Three Dimensions
E. Antonucci 43

Key Issues of the Solar Transition Region to be Addressed by the Solar Orbiter
V. Hansteen 51

OLD AND NEW OBJECTIVES FOR SOLAR ORBITER
Chair: Jean-Claude Vial

On the Best Wavelength Ranges for the EUV Spectrometer
M. Landini 61
THE SOLAR ORBITER PAYLOAD CRITICALLY REVIEWED
Chair: Peter Bochsler

A Critical Review of the Heliospheric In-situ Instrumentation Planned for the Solar Orbiter
D.J. McComas

HISTORICAL CONSIDERATIONS
Chair: Ester Antonucci

Roger Bonnet, the Scientist
M.C.E. Huber

Solar Orbiter and the Russian Aviation and Space Agency (RSA) Interhelioprobe
V.N. Oraevsky et al.

Solar X-Ray Spectrometer (SoXS) Development at the Physical Research Laboratory/ISRO
R. Jain et al.

Solar Orbiter and Ground-Based Observations: Lessons from SOHO/TRACE
B. De Pontieu

Solar Orbiter Science
E.R. Priest

A. Gabriel

THE SOLAR ORBITER PAYLOAD SCRUTINIZED
Summaries from the Splinter Group Meetings

Particle and Field Instruments – Report of Payload Splinter Group 1
R.G. Marsden & P. Bochsler

Coronagraph Instrumentation – Report of Payload Splinter Group 2
E. Antonucci

O. von der Lühe & B. Fleck

Solar Orbiter EUV/UV Wavelength Selection and Instrumentation – Report of Payload Splinter Group 4
R. Harrison & J.-C. Vial
POSTERS
- in alphabetical order of first author

How to Get SEP Flux Profiles at 0.4 AU and 1.0 AU
Aran A. et al. 157

Magnetic Fields in the Three-Dimensional Heliosphere: Ulysses Observations
Balogh A. et al. 161

The OAPA/DPSFA: Solar Physics, Instrumental Expertise, and the XACT Facility
Barbera M. et al. 167

Analysis of High Resolution and Full Disk Solar Images
Berrilli F. et al. 173

Stokes Profile Measurements in Each Sodium D-line Using Single and Dual Band
Magneto-Optical Filters onboard Solar Orbiter
Cacciani A. et al. 177

Analysis and Interpretation of Stokes Profiles with Artificial Neural Networks
Carroll T.A. & Staude J. 183

Role of ULF/ELF Waves in the Dynamics of the Solar Wind: Measurements on the Solar Orbiter
Chust T. & Roux A. 189

Magnetic Field Configurations and the Likelihood of Coronal Mass Ejections
Culhane J.L. et al. 193

Spectral Windows of the Solar Atmosphere
Curdt W. & Landi E. 199

Numerical Study of a Quasi-3D Top-Hat Solar Wind Plasma Analyser
D'Amicis R. et al. 205

A High Energy Solar Particle and Cosmic Ray Telescope for the Solar Orbiter
Droge W. 211

Extended UV Corona Imaging from the Solar Orbiter: The UV Visible-Light Coronagraph
Fineschi S. et al. 217

Measuring Weak Polarization
Gandorfer A.M. et al. 223

Time-Distance Helioseismology and the Solar Orbiter Mission
Gizon L. et al. 227

Time-Travel Sensitivity Kernels for Time-Distance Helioseismology
Gizon L. & Birch A.C. 233

Velocity Observations of an Active Region during the Onset Phase of a Coronal Mass Ejection
Harra L.K. & Sterling A.C 237
Neutral Particle Sensor: Goals, Objectives and Complications
Hilchenbach M. 241

Wide Bandgap EUV and VUV Imagers for the Solar Orbiter
Hochedez J.F. et al. 245

A Heliospheric Imager for Solar Orbiter
Jackson B.V. et al. 251

Simultaneous EUV Imaging and Spectroscopy
Kankelborg C.C. et al. 257

Measurements of the Magnetic Field Fluctuations in the Solar Orbiter Project
Krasnosselskikh V. et al. 261

Spectrometer for Neutron and Gamma-Ray Detection
Kuznetsov S. et al. 265

Application of an Analytical MHD Wind Model with Latitudinal Dependences to the Solar Wind
Lima J.J.G. et al. 269

High Energy Particle Acceleration by Solar Flares and Fast Coronal Mass Ejections
Lin R.P. et al. 275

Temporal Evolution of Explosive Events as Observed in Lyman and S VI Lines
Madjarska M.S. & Doyle J.G. 279

Solar Wind Electron Temperature and Density Measurements for the Solar Orbiter using Thermal Noise Spectroscopy
Maksimovic M. et al. 285

Scientific Objectives of the Radiospectrometer aboard Solar Orbiter
Mann G. et al. 289

Science Objectives of the EUV Spectral Imager for Solar Orbiter
Martens P.C. & Kankelborg C.C. 293

A Study of the Plasma and Magnetic Field Topology of Magnetic Clouds
Nieves-Chinchilla T. et al. 297

Contributions of Various Coronal Structures to the Emission Measure vs. Temperature Distribution and X-Ray Spectrum of the Corona
Orlando S. et al. 301

Osokin A.R. & Podlazov A.V. 307

CMOS-Based VUV Detectors for the Solar Orbiter
Pace E. et al. 311

Scientific Objectives and Technologies for the Solar Orbiter Dust Detector
Palumbo P. et al. 315
Searching the Source Regions of the Fast Solar Wind in Polar Coronal Holes: Some Recent SOHO/Eclipse Results and the Potential of the Solar Orbiter
Patsourakos S. & Vial J-C. 321

Multi-Component Structure of the Solar Transition Region
Peter H. 327

Telescope-Spectrometer for EUV Imaging Spectroscopy in the Grazing-Incidence Region
Poletto L. & Tondello G. 331

Observations of Oscillations above Sunspots
Rendtel J. & Staude J. 337

Energetic Particles inside Interplanetary Magnetic Clouds
Rodriguez-Pacheco J. et al. 343

Antenna System Considerations for Solar Orbiter
Rucker H.O. et al. 347

The ESMN/European Solar Physics Research Area
Rutten R.J. 353

DOT Strategies versus Orbiter Strategies
Rutten R.J. 357

A Close Look at Sunspots
Sobotka M. 361

Hydrodynamics of Coronal Loops Subject to Transient Heating
Spadaro D. et al. 367

A Solid-State Detector as the EPD aboard the Solar Orbiter
Sparvoli R. et al. 371

Experience of Wroclaw Team in the Construction of Solar X-Ray Instruments
Sylwester J. 377

The Evolution of Interplanetary Shocks Driven by Magnetic Clouds
Szabo A. et al. 383

Temperature and Density Structure of Hot and Cool Loops Derived from the Analysis of TRACE Data
Testa P. et al. 389

Slow Magneto-Acoustic Waves in Coronal Loops
Verwichte E. et al. 395

Geometry and Kinematic Scalings of Heliospheric Structures
Veselovsky I.S. 401

Ion Acceleration in Solar Flares: Low Energy Neutron Measurements
Vilmer N. et al. 405
On the Role of Ion-Cyclotron Kinetic Alfvén Waves in the Solar Wind: Results from Helios and Expectations for Solar Orbiter
Voitenko Yu. et al. 411

GREGOR: High Resolution Solar Observations from 1 AU
Von der Lühe O. et al. 417

A Proposal for the Visible-Light Imager Magnetograph
Von der Lühe O. et al. 421

Diagnosing Dynamic Coronal Heating: Lessons from Yohkoh, SOHO and TRACE
Walsh R.W. & Galsgaard K. 427

Magnetic Turbulence in the Heliosphere and Magnetic Connection from the Sun to the Earth
Zimbardo G. et al. 433

Coordinated Space and Ground-Based Observations of Rapidly Evolving Active Regions
Zuccarello F. et al. 439

Dust in the Inner Solar System
Mann I. et al. 445

SIM3D: Solar Irradiance Monitor - 3D View
Schmutz W. et al. 447

Ultra-Fast Plasma Analyser – An All-Sky Camera for Charged Particles
Vaisberg O. 451

A Search for the Source Spectrum of Solar Wind Fluctuations
Ruzmaikin A. 455

Resolution 459

ESA's Next Actions 461
