

Material Aspects in Automotive Catalytic Converters

Edited by Hans Bode

UNIVERSITÄTSBIBLIOTHEK
HANNOVER
TECHNISCHE
INFORMATIONSBIBLIOTHEK

Deutsche Gesellschaft
für Materialkunde e.V.

I Introduction

Contribution of Automotive Catalytic Converters <i>R. Searles, Association for Emissions Control by Catalyst, Brussels (B)</i>	3
---	---

II Metals

Development Status of Metal Substrate Catalysts <i>R. Brück, Emitec GmbH, Lohmar</i>	19
---	----

Materials Issues Relevant to the Development of Future Metal Foil Automotive Catalytic Converters <i>J. Nicholls, Cranfield University, Cranfield (GB); W. Quadackers, Forschungszentrum Juelich (D)</i>	31
---	----

High Temperature Corrosion of FeCrAlY / Aluchrom YHf in Environments Relevant to Exhaust Gas Systems <i>A. Kolb-Telieps, Krupp VDM GmbH, Altena (D); R. Newton, Cranfield University, SIMS, Cranfield (GB); G. Strehl, TU Clausthal, Institut für Allgemeine Metallurgie Clausthal-Zellerfeld (D); D. Naumenko, W. Quadackers, Forschungszentrum Jülich, IWV-2, Jülich (D)</i>	49
---	----

Improved High Temperature Oxidation Resistance of REM Added Fe-20%Cr-5%Al Alloy by Pre-Annealing Treatment <i>K. Fukuda, K. Takao, T. Hoshi, O. Furukimi, Technical Research Laboratories, Kawasaki Steel Corp., Chiba (Japan)</i>	59
---	----

Oxidation Induced Length Change of Thin Gauge Fe-Cr-Al Alloys <i>C. Chang, L. Chen, B. Jha, Engineered Materials Solutions, Inc., Attleboro (USA)</i>	69
--	----

Improvement in the Oxidation Resistance of Al-deposited Fe-Cr-Al Foil by Pre-oxidation <i>S. Taniguchi, T. Shibata, Department of Materials Science and Processing, Graduate School of Engineering, Osaka University, Osaka (J); A. Andoh, Steel and Technology Development Laboratories, Nisshin Steel, Osaka (J)</i>	83
---	----

Factors Affecting Oxide Growth Rates and Lifetime of FeCrAl Alloys <i>W. Quadackers, L. Singheiser, D. Naumenko, Forschungszentrum Jülich (D); J. Nicholls, J. Wilber, Cranfield University, School of Industrial and Manufacturing Science, Cranfield (GB)</i>	93
--	----

On Deviations from Parabolic Growth Kinetics in High Temperature Oxidation <i>G. Borchardt, G. Strehl, Institut für Metallurgie, TU Clausthal (D)</i>	106
--	-----

VIII

Effect of Reactive Elements and of Increased Aluminum Contents on the Oxide Scale Formation on Fe-Cr-Al Alloys <i>V. Kolarik, M. del Mar Juez-Lorenzo, H. Fietzek, Fraunhofer-Institut für Chemische Technologie, Pfingztal (D); A. Kolb-Telieps, H. Hattendorf, R. Hojda, Krupp VDM GmbH, Werdohl (D)</i>	117
High Temperature Strength of Metal Foil Materials <i>M. Cedergren, K. Göransson, R&D, AB Sandvik Steel, Sandviken (S)</i>	126
Lifetime Predictions of Uncoated Metal-Supported Catalysts via Modeling and Simulation, based on Reliable Material Data <i>H. Bode, University of Wuppertal (D); C. Guist, BMW AG, Munich (D)</i>	134
Elastic-Plastic Thermal Stress Analysis for Metal Substrates for Catalytic Converters <i>S. Konya, A. Kikuchi, Nippon Steel Corporation, Futtsu (J)</i>	144
A New Type of Metallic Substrate <i>R. Lylykangas, H. Tuomola, Kemira Metalkat Oy (SF)</i>	152

III Ceramics

Development Status of Ceramic Supported Catalyst <i>C. Vogt, E. Ohara, NGK Europe GmbH; M. Makino, NGK Insulators Ltd</i>	173
Evaluation of In-Service Properties and Life Time of Automotive Catalyst Support Materials <i>U. Tröger, M. Lang, Zeuna Stärker GmbH & Co. KG, Augsburg (D)</i>	186
Loads, Design and Durability Evaluation of Mount Systems for Ceramic Monoliths <i>G. Wirth, J. Eberspächer GmbH & Co., Esslingen (D)</i>	191
High Performance Packaging Materials <i>M. Vermoehlen, D. Merry, S. Schmid, Corning GmbH, Wiesbaden (D)</i>	202

IV Catalysts

Three-way Catalyst Deactivation Associated With Oil-Derived Poisons <i>J. Kubsh, Engelhard Corporation, Environmental Technologies Group Iselin (USA)</i>	217
Catalytic Reduction of NO _x in Oxygen-rich Gas Streams, Deactivation of NO _x Storage-Reduction Catalysts by Sulfur <i>C. Sedlmair, K. Sehan, Technische Universität München, Institut für Technische Chemie II, Garching (D); J. Lercher, A. Jentys, University of Twente, Faculty of Chemical Technology, Enschede (NL)</i>	223

Catalytic Reduction of NO _x in Oxygen-rich Gas Streams: Progress and Challenges in Catalyst Development <i>W. Grünert, Lehrstuhl Technische Chemie, Ruhr-Universität Bochum (D)</i>	229
---	-----

Atomic Structure of Low-Index CeO ₂ Surfaces <i>H. Nörenberg, University of Oxford, Department of Materials, Oxford (GB); J. Harding, University College London, Department of Physics and Astronomy, London (GB); S. Parker, University of Bath, Department of Chemistry, Bath (GB)</i>	237
--	-----

Nanostructured Ceria-Zirconia as an Oxygen Storage Component in 3-way Catalytic Converters-Thermal Stability <i>B. Djuricic, Austrian Research Centers, Seibersdorf (A), S. Pickering, Institute for Advanced Materials, Petten (NL)</i>	241
---	-----

V Recycling

Recycling Technology for Metallic Substrates: a Closed Cycle <i>C. Hensel, Demet Deutsche Edelmetall Recycling AG & Co. KG, Alzenau (D)</i>	251
--	-----

VI Miscellaneous

Hot-Corrosion of Metal and Ceramic Honeycombs by Alkaline Metals for NO _x Adsorption <i>M. Yamanaka, Nippon Steel Technoresearch, Futtsu (J); Y. Okazaki, Nippon Steel, Toukai, (J)</i>	263
---	-----

The Effect of Trace Amounts of Mg in FeCrAl Alloys on the Microstructure of the Protective Alumina Surface Scales <i>P. Untoro, M. Dani, National Nuclear Energy Agency, Kawasan PUSPIPTEK, Serpong (Ind); H. Klaar, J. Mayer, Gemeinschaftslabor für Elektronenmikroskopie, RWTH Aachen (D); D. Naumenko, J. Kuo, W. Quadackers, Institut für Werkstoffe und Verfahren der Energietechnik (IWW-2), Forschungszentrum Jülich (D)</i>	271
---	-----
