3rd International Workshop on Human-Computer Conversation

PROCEEDINGS

Grand Hotel Villa Serbelloni
Bellagio, Italy
3-5 July 2000

Production contact: gill@dcs.shef.ac.uk
Contents

Taking Turns Talking About Text In A Reading Tutor That Listens.  
Gregory Aist (LTI, CMU, US)  

Bayesian Selection of Conversational Responses.  
Gene Ball (Microsoft, US)  

The role of robust semantic analysis in spoken language dialogue systems.  
Afzal Ballim and Vincenzo Pallotta (MEDIA Research Group - DI-LITH, CH)  

In the beginning was the "END": Evaluation of Natural Dialogues as a step towards improving artificial ones.  
Jean-Baptiste Berthelin, Yann Girard, Brigitte Grau and Anne Vilnat (CNRS-LIMSI, FR)  

Grammars with Genetic Algorithms (The Sex Life of Grammars).  
Marc Blasband (Compuleer, NL)  

The Infant Conversational System.  
Paul Bucheit (Harold Washington College, US)  

Non-problems and social obligations in human-computer conversation.  
Harry Bunt (Tilburg University, NL)  

The Virtual Presenter: a Conversational Character for Interactive TV.  
Marc Cavazza (University of Teeside, UK)  

A Fundamental Architecture To Integrate Conversation Management Engines with Conversation Development and Evaluation Tools.  
Emmett J. Coin and J Qua (ejTalk Research, US)  

Task-Oriented Dialogues.  
Jim Cowie and Sergei Nirenburg (New Mexico State University, US)  

Verbal and nonverbal discourse planning.  
Berardina De Carolis, Fiorella de Rosis (University of Bari, IT), Catherine Pelachaud and Isabella Poggi (University of Rome, IT)  

What Makes Speakers Angry in Human-Computer Conversation.  
Kerstin Fischer and Anton Batliner (University of Hamburg, DE)  

A Flexible Spoken Dialogue Manager.  
Eli Hagen (Simon Fraser University, CAN)  

DMML: An XML Language for Interacting with Multi-modal Dialog Systems.  
Nanda Kambhatla, Malgorzata Budzikowska, Sylvie Levesque, Nicolas Nicolov, Wlodek Zadrozny, Charles Wiecha and Julie MacNaught (IBM T.J. Watson Research Center, US)  

Information States, Obligations and Intentional Structure in Dialogue Modelling.  
Jörn Kreutel (SAIL LABS, E) and Colin Matheson (University of Edinburgh, UK)
## Contents (cont.)

**Collaboration in Human-Computer Communication.**
Susanne Kronenberg and Franz Kummert (Bielefeld University, DE)  
87

**Question Accommodation and Information States in Dialogue.**
Staffan Larsson, Robin Cooper and Elisabet Engdahl (Goeteborg University, SE)  
93

**Communicative Intentions Generation in Human-Computer Conversation.**
Thierry Lemeunier (Université du Maine, FR)  
99

**Context and Content in Dialogue Systems.**
Bernd Ludwig, Martin Klarner, Heinrich Niemann and Günther Görz, and (University of Erlangen-Nuremberg, DE)  
105

**Animated Conversational Agents in E-Commerce Enterprises.**
Helen McBreen and Mervyn Jack (University of Edinburgh, UK)  
112

**Design and Implementation of Natural Language Interfaces to Robots.**
Ramón P. Neco, Óscar Reinoso, Nicolás García (Universidad Miguel Hernández, E) and Rafael Aracil (Universidad Politecnica de Madrid, E)  
118

**Politeness as Actions of an Implicit Task.**
David Novick (University of Texas at El Paso, US)  
124

**AutoTutor's Conversational Behaviors.**
Natalie Person (Rhodes College, US) and Arthur Graesser (University of Memphis, US)  
130

**Action Modeling in Dialogu Context.**
J.C. Pettier and M. Guyomard (IRISA/ENSSAT, FR)  
136

**Using knowledge to model coorperative information retrieval dialogues.**
Paulo Quaresma and Irene Pimenta Rodrigues (Universidade de Évora, PT)  
142

**The Conita Technologies Personal Virtual Assistant PVA Exchange: a Conversational Dialog Telephone Voice User Interface to Microsoft Outlook.**
Walter Rolandi (Conita Technologies Inc, US)  
148

**Characteristics of Acceptance Utterances in Reaction to Answers to Questions and Their Relations to Dialog Strategies.**
Akira Shimazu, Hiroshi Taguchi (Japan Advanced Institute of Science and Technology, JP) and Masahito Kawamori (NTT Communication Science Laboratories)  
152

"Kairai" - Software Robots Understanding Natural Language.
Yusuke Shinyama, Takenobu Tokunaga and Hozumi Tanaka (Tokyo Institute of Technology, JP)  
158

**Rule-Based Dialogue Management Systems.**
Nick Webb (University of Sheffield, UK)  
164

**Overview of the HAL 9000 System.**
Thomas Yale (HAL Computer Systems Inc., US)  
170
