10th INTERNATIONAL CONFERENCE ON
SOIL DYNAMICS AND EARTHQUAKE ENGINEERING

SDEE’2001

Drexel University
Philadelphia, USA
October 7-10, 2001

VOLUME OF EXTENDED ABSTRACTS

Edited by

A. ZERVA
Table of Contents

Plenary Session

Seismic response of a soil deposit and its interaction with piles
Ishihara, K. & Cubrinovski, M.  
ii

State of the art in liquefaction
Finn, W.D.L.  
iii

Some cornerstones of dynamic soil-structure interaction
Wolf, J.P. & Song, C.  
iv

Probabilistic seismic hazard analysis in the Eastern United States: Uncertainty in seismic source characterization
Abrahamson, N.A.  
v

Borehole array data: Open windows into site response
Archuleta, R. & Steidl, J.H.  
vi

Performance of highway bridges in 1999 Kocaeli and Duzce (Turkey) earthquakes
Erdik, M., Yilmaz, C. & Uckan, E.  
vii

Invited Presentations

Hagia Sofia: A possible reconstruction of the first dome
Cakmak, A.S.  
ix

Development of site specific design ground motions in Western and Eastern North America
Silva, W. & Costantino, C.J.  
x

Site effects and engineering practice
Pitilakis, K.D.  
xi

Footings under dynamic loads: Analysis and design issues with emphasis on bridge foundations
Mylonakis, G. & Gazetas, G.  
xii

A simplified approach for dynamic response analysis of pile foundations
Nogami, T.  
xiii

Identification and analysis of dynamic response of soil systems using earthquake records and experimental data
Zeghal, M.  
xiv
Extended Abstracts

Centrifuge-based evaluation of pile foundation response to lateral spreading
Abdoun, T., Dobry, R. & O'Rourke, T.D.

Assessment and mitigation of seismic hazard in the kingdom of Saudi Arabia
Afif, O.H., Merghelani, T.A., Al-Kanawi, F.J.

Field evidence of potential earthquakes hazards at the site of an embankment dam constructed across a major, active plate boundary fault
Al-Homoud, A.S.

A reliability based expert system for assessment of seismic stability and induced displacement of earth slopes
Al-Homoud, A.S. & Tahtamoni, W.W.

Rockfill dam behavior under weak and strong motion excitation: an integrated approach
Anastasiadis, A., Papazachos, C., Klimis, N., Margaris, B., Papaioannou, Ch., Theodulidis, N., Dimitriu, P. & Fikos, Il.

Verification of precarious rock methodology using shake table tests of rocks and rock models
Anooshehpoor, R. & Brune, J.N.

Intensity re-estimation of the 1918 Srimangal earthquake, Bangladesh
Ansary, M.A. & Sabri, S.A.

3D simulation of wave propagation by FDM with an irregular grid - combination of discontinuous grid and nonuniform-spacing grid
Aoi, S. & Fujiwara, H.

Seismic analysis of Fatih Sultan Mehmet suspension bridge
Apaydin, N. & Erdik, M.

Mitigation of lateral ground displacements of liquefied soils by underground barriers
Arango, I.

An equivalent linear algorithm with frequency - and pressure - dependent moduli and damping for the seismic analysis of deep sites
Assimaki, D. & Kausel, E.

Quantitative seismic modeling of the Kandalaksha region (the eastern part of the Baltic Shield)
Assinovskaya, B.

Seismic hazard potential of the Marmara sea
Atakan, K., Ojeda, A., Erdik, M. & Barka, A.

Analytical and experimental analysis of RC beams strengthened with FRP plates
Atmaca, S. & Karakoc, C.

Dynamic response of foundation on layered soil systems
Baidya, D.K. & Mandal, A.
Local site effects on building damage in Adapazari during the 17 August Izmit, Turkey earthquake
Bakir, B.S., Sucuoglu, H., & Yilmaz, T.

Local seismic hazard and site-city interaction

Evaluation of liquefaction potential using neural-networks and CPT results
Baziar, M.H. & Nilipour, N.

Effect of silt content in sand on CPT results in calibration chambers
Baziar, M.H. & Ziaie-Moayed, R.

A study on the dynamic behavior of tube and outrigger-brace buildings on different soils
Behnamfar, F. & Mohajeri, A.H.

The effect of hammer energy on driven pile response
Benamar, A. & Alem, A.

On wave propagation in a random elastic layer overlying an elastic half space
Bhattacharyya, R.K.

Cyclic degradation effects on seismic response of clay slopes
Biondi, G., Cascone, E. & Maugeri, M.

Lateral spreading failure of sandy slopes
Biondi, G., Cascone, E. & Maugeri, M.

Nonlinear site response analysis by modeling P-SV nonlinear wave propagation in 2-D heterogenous media
Bonilla, L.F., Liu, P.C. & Archuleta, R.J.

Liquefaction strength of fly ash reinforced with randomly distributed fibers
Boominathan, A. & Hari, S.

Some observations of geotechnical aspects of the February 28, 2001, Nisqually earthquake in Olympia, and South Seattle, Washington

Effectiveness of vertical drains in mitigation of liquefaction
Brennan, A.J. & Madabhushi, S.P.G.

Cone penetration testing before, during, and after liquefaction
Camp, W.M. III & Mayne, P.W.

Seismic hazard model for loss estimation and risk management in Taiwan
Campbell, K.W., Thenhaus, P.C., Barnhard, T.P. & Hampson, D.B.

Numerical simulation of liquefaction at soil-structure interfaces
Evgin, E. 47

Piles in liquefiable soils: Seismic analysis and design issues
Finn, W.D.L., Thavaraj, T. & Fujita, N. 48

Earthquake deformation analysis for seismic remediation of Wickiup Dam, Oregon

A fast solution method for 3-D elastic wave scattering by many cracks
Fujiwara, H., Yutaka, N. & Ando, T. 50

Dynamic characteristics and horizontal strengths of a conventional thatched wooden houses with 4 rooms, partitioned only by sliding doors
Fukumoto, K. 51

Continuous investigation of amplification of sedimentary layers and estimation of their structures in Shiga Prefecture, Japan
Fukumoto, K. 52

Influence of the ground profile on the reduction of earthquake motion at the filled man-made islands in the Kobe harbor during the 1995 Hyogoken Nambu earthquake
Fukusumi, T., Kusakabe, K. & Ozaki, H. 53

Influence of colloidal silica grout on liquefaction potential and cyclic undrained behavior of loose sand
Gallagher, P.M. & Mitchell, J.K. 54

Seismic waves generated by oscillating buildings: analysis of a snap-back experiment
Gallipoli, M., Mucciarelli, M., Ponzo, F. & Dolce, M. 55

Stability of HVSR ratio from earthquakes and microtremors
Gallipoli, M.R., Mucciarelli, M., Arcieri, M. & Lapenna, E. 56

Structural vulnerability in Chilpancingo, Guerrero, Mexico

Identification of pile head impedance from experimental data
Ghanem, R., Malek, S. & Tazoh, T. 58

Seismic response of concrete-face rockfill dams, design and analysis
Ghanooni Mahabadi, S. & Mahinroosta, R. 59

Segmental cross-spectrum as a new technique in site identification by spectral ratio analysis of earthquake motions
Ghayamghamian, M.R. & Motosaka, M. 60

An investigation on seismic demands and design criteria for pre-cast concrete industrial structures during the 1999 Turkish earthquakes
Gokalp, G. & Kilic, S.A. 61
Dynamic response analysis of the soil layers of Mexico City
Gomez-Bernal, A. & Saragoni, R. 62

Recent data recorded at borehole arrays instrumented by the California Strong Motion Instrumentation program
Graizer, V., Shakal, A. & Hipley, P. 63

A comparison and critical review of alternative simplified liquefaction evaluation procedures
Green, R.A. & Mitchell, J.K. 64

Development of rule-based expert system using fuzzy logic with application to seismic risk evaluation
Gupta, A., Agrawal, D.P. & Gupta, R. 65

Analysis of in situ seismic data in boreholes by NIOM method
Haddadi, H.R. & Kawakami, H. 66

Fundamental period and mode shape of layered soil profiles
Hadjian, A. 67

Applications of wavelet analysis to the investigation of the dynamic behaviour of geotechnical structures

Nonlinear seismic response of a foundation on layered soil
Halabian, A.M. & El Naggar, M.H. 69

Seismic strengthening of reinforced concrete bridge pier with FRP composites
Hamidifar, H., Hosseini, A. & Ghouzloo, U.H. 70

Seismic hazard in Takamatsu Japan from fault trenching and palaeo-liquefaction studies
Hasegawa, S. & Finn, W.D.L. 71

Site characterization in the New Madrid seismic zone using advanced surface wave methods
Hebeler, G.L., Orozco, M.C. & Rix, G.J. 72

Results from impulse shear tests conducted in saturated loose silty sands
Henke, W. & Henke, R. 73

Seismic analysis of buried and aboveground pipelines considering both multi-support excitation and wave propagation
Hosseini, M. & Rabiei-Far, H. 74

Foundation Design Considerations for a pile supported critical facility
Houston, T.W., Costantino, C.J., Hossain, Q. & Stone, N.E. 75

Surface and downhole shear wave seismic methods for thick soil site investigations
Hunter, J.A., Benjumea, B., Harris, J.B., Miller, R.D., Pullan, S.E., Burns, R.A. & Good, R.L. 76
The role of fines in the liquefaction of a volcanic soil 'Shirasu'
Hyodo, M., Yoshimoto, N. & Nakata, Y. 77

The seismic vulnerability ratings of Bishkek's apartment buildings
Imanbekov, S. & Nogai, R. 78

A study on behavior of pile in a liquefied ground during earthquake
Ishikawa, T., Sato, M. & Sato, H. 79

Dynamic full scale test of Marun Embankment Dam in Iran
Jafari, M.K. & Davoodi, M. 80

Vs-SPT correlation using different methods of Vs measurement, case study: Tehran south microzonation project
Jafari, M.K. & Razmkhah, A. 81

A study on the classification of site effects and its application to the seismic hazard and microzonation
Jean, W-Y. & Loh, C-H. 82

Assessment of seismic resistance of masonry structures including boundary conditions
Juhasova, E., Hurak, M. & Zembaty, Z. 83

The effect of reinforced soil on seismic response of infilled frames
Juhasova, E., Juhas, M. & Crewe, A. 84

Dynamic properties of natural soils from Cyprus
Kallioglou, P., Tika, Th., Petrides, G., Sturaitis, E. & Pitilakis, K. 85

Seismic response analysis of laterally inhomogeneous ground with emphasis on strains
Kamiyama, M. & Satoh, T. 86

Deformations in medium-dense and dense sands under bi-directional shear loading

Response prediction of building structure for great event using ground motion model
Kawano, M., Asano, K., Dohi, H. & Matsuda, S. 88

Soil structure interaction and the stability of spent fuel casks in seismic regions
Khan, A.Z. 89

Earthquake input energy and response spectral parameters
Khashaee, P. & Mohraz, B. 90

Influence of plasticity on the seismic behavior of tunnels
Khoshnoudian, F. & Shahrou, I. 91

A practical hybrid method of time-domain analysis for non-linear soil-structure interaction problem
Kim, J.M., Choi, J.S. & Lee, J.S. 92
Seismic analysis of base-isolated liquid storage tanks using BE-FE-BE coupling technique
Kim, M.K., Lim, Y.M., Cho, S.Y. & Cho, K.H.
93

Seismic response analysis of soil-pile interaction system using FE-BE coupling method
Kim, M.K., Lim, Y.M., Kim, M.K. & Rhee, J.W.
94

Effect of bearing damages upon seismic behaviors of a multi-span simply supported bridge
95

Hybrid vibration experiments with a bridge foundation system model
Kobayashi, H. & Tamura, K.
96

Bedrock structure in Adapazari, Turkey and its geophysical implications - A possible cause of severe damage by the 1999 Kocaeli earthquake
97

Dynamic failure numeric simulations of model concrete-faced rockfill dam
Kong, X & Liu, J.
98

The spatial auto-correlation method for estimation of underground structure using microtremors
Konno, K.
99

Assessment of liquefaction susceptibility of Adapazari City after 17 August 1999 Kocaeli earthquake
Kutanis, M. & Arman, H.
100

Research of the stressed-deformed condition thick cylindrical buried shells interacting with the ground
Kuzmin, M.
101

Computation of response spectra from mining tremors using neural networks
Kuzniar, K., Maciag, E. & Waszczyszyn, Z.
102

Application of multi-station methods to surface wave testing
Lai, C.G., Rix, G.J., Foti, S. & Roma, V.
103

Modeling of seismic wave propagation with optimally varying mesh size
Laurenzano, G. & Priolo, E.
104

Seismic Microzonation Map of Taipei Basin in Chi-Chi Earthquake
Lee, S.H. & Wu, C-M.
105

Monitoring of geomaterial stress state time dependencies on a basis of the surface infra-red emission measurements
Levin, B.W., Morozov, A.A., Motovilov, E.A. & Sheinin, V.I.
106

Rotational components of earthquake motions obtained from surface wave
Li, H.-N., Sun, L. & Wang, S.
107
Nonlinear elastic modeling of reinforced soils under cyclic loading  
Li, J.  
108

Analysis of an ultrahigh-rise SRC building by 3-D nonlinear model  
Li, K., Kubo, T., Xu, Y. & Gong, S.  
109

A stochastic approach to site-response component in seismic ground motion coherency model  
Liao, S. & Li, J.  
110

A numerical model for dynamic soil liquefaction analysis  
Liyanapathirana, D.S. & Poulos, H.G.  
111

Wharf and embankment strengthening program- Port of Oakland  
Lobedan, F. & LaBasco, T.  
112

Free field traffic induced vibrations: in situ measurements and numerical predictions  
Lombaert, G. & Degrande, G.  
113

Shaking table model test on dynamic soil-structure interaction system  
Lu, X., Chen, Y., Chen, B. & Li, P.  
114

Seismic hazard assessment and engineering application in Italy  
Lucantoni, A., Sabetta, F. & Bramerini, F.  
115

Simulation of fire loss following earthquakes  
Luithardt, H.H., Nasri, V. & Lum, K.S.K.  
116

Empirical mode decomposition of the 1994 Northridge earthquake and its interpretation for seismic source mechanism  
Ma, S. & Zhang, R.R.  
117

Effects of plasticity of soil on nonlinear dynamic analysis of pile groups  
Maheshwari, B.K., Truman, K.Z. & Gould, P.L.  
118

Complex site effects in EUROSEISTEST and potential applications in seismic norms  
Makra, K., Raptakis, D. & Pitilakis, K.  
119

The role of the reactivated alpine structures to the distribution of damages and rockfalls at Parnis Mt. During the Athens (Greece) earthquake (Sep. 7, 1999, Ms=5.9)  
Mariolakos, I. & Fountoulis, I.  
120

Evaluation of liquefaction potential of railway embankments  
Martin, J.R. II, Pando, M.A. & Olgun, C.G.  
121

Centrifuge modeling of the seismic behavior of a slope in liquefiable soil  
Martinez-Ramirez, G., Taboada-Urtzuastegui, V., Abdoun, T. & Dobry, R.  
122
Validation of numerical and theoretical rocking stiffness of a shallow foundation by means of shaking-table tests
Massimino, M.R., Maugeri, M. & Novita, D.

Study of seismodynamical processes in loess soils
Mavlyanova, N.

CPT site characterization for seismic hazards in Mid-America
Mayne, P.W., Liao, T., Zavala, G. & McGillivray, A.

Seismic evaluation of reinforced concrete piers in typical Pennsylvania bridges
Memari, A.M., Harris, H.G. & Hamid, A.A.

Impact bearing capacity of building foundation
Men, F.L., Sun, G.M. & Cui, J.

Lifelines earthquake vulnerability assessment: a systemic approach
Menoni, S., Pergalani, F., Petrini, V., Boni, M.P. & Mandelli, M.

Comparing shear-wave velocity profiles inverted from multi-channel surface wave with borehole measurements
Miller, R.D., Xia, J., Park, C.B., Hunter, J.A., Harris, J.B. & Ivanov, J.

Dynamic soil-structure interaction. A comparison of theoretical and finite element methods
Mills-Bria, B. & Lam, I.P.

Statics and dynamics of ground structures
Mirsaidov, M.M., Matkarimov, P.D. & Rumi, D.F.

Nonlinear behavior of saturated sandy soil evaluated by shaking table test using large shear vessel
Miwa, S. and Mizuno, H.

Spatial variation of peak ground acceleration using records of strong motion arrays
Mogi, H. & Kawakami, H.

Experimental study on earthquake induced deformation of earth structures
Mohajeri, M. & Towhata, I.

The use of geosynthetic in mitigating pipeline flotation during soil liquefaction
Mohri, Y., Kawabata, T. & Ling, H.

Earthquake evaluation of the San Juan City's Historical Hospital 'Dr. Guillermo Rawson', Argentina
Monguilner, C.A., Aladro, S.B. & Castro, M.E.

Comparison of the potential damages of the earthquakes of San Juan and Mendoza - Argentina
Monguilner, C.A., Ponti, N.A. & Pavoni, S.

Measurement of acceleration during vibratory compaction of unsaturated soil
Mooney, M.A., Bouton, C. & Pan, J.
Analytical representation of phase characteristics for source time function modeled by stochastic impulse train
Morikawa, H., Sawada, S., Toki, K. & Kawasaki, K. 139

Wavelet-based generation of spectrum compatible time histories
Mukherjee, S. & Gupta, V.K. 140

Land use decisions in Pennsylvania: Where seismic hazard joins other geophysical hazards
Mulhern, M. 141

Effect of fines content on steady-state line of mixed layered samples of a sand
Naeini, S.A. & Baziar, M.H. 142

Non-linear shear stiffness of sand layer observed through volcanic earthquake swarm
Nakamura, M., Suzumura, J.-I., Hanada, K. & Yamada, M. 143

Non-stationary response of structures excited by random seismic processes with time variable frequency content
Naprstek, J. & Fischer, C. 144

Liquefaction Damage Estimation for Large Scale Portfolio Loss Analysis in San Francisco Bay Area
Nasri, V., Luithardt, H.H. & Lum, K.S.K. 145

GIS-based seismic hazard and risk analysis
Nikolaou, S. & Gaus, M. 146

Torsion shear tests on rate-dependent behavior of liquefied sand
Nishimura, S., Honda, T. & Towhata, I. 147

Impedance functions in simple form for embedded foundations
Nogami, T. & Chen, H.S. 148

Seismic hazard assessment in the Catalanan coastal ranges, Spain, using paleoseismological constrains
Ojeda, A., Atakan, K., Jimenez, M.J., Garcia-Fernandez, M., Masana, E. & Santanach, P. 149

The new accelerograph network for Santa Fe de Bogotá, Colombia, and implications for microzonation
Ojeda, A., Martinez, S., Bermudez, M.L. & Atakan, K. 150

Influence of damping on dynamic site response analyses
Olgun, C.G., Green, R.A., Martin, J.R. II & Gutierrez, M.S. 151

Investigation and evaluation of liquefaction-induced ground deformations at Izmit Bay during the 1999 Kocaeli (Izmit), Turkey earthquake
Onder Cetin, K., Seed, R.B. & Youd, T.L. 152

Wall-type drain method using recycled concrete crushed stones as liquefaction countermeasure for underground structures
Orense, R., Morimoto, I., Yamamoto, Y., Yumiyama, T., Yamamoto, H. & Sugawara, K. 153
Analytical method of lateral spreading using time-depending Lagrange FEM and proposal of simple formula for estimating permanent displacement
Ozaki, R. & Takada, S.

Energy dissipating pre-cast coupling beams
Ozden, S., Yuzugullu, O. & Meydanli, H.

Analysis of liquefaction-induced deformation for damaged dikes in the 1993 Hokkaido Nansei-oki earthquake
Ozutsumi, O., Sugiyama, W., Sawada, S., Takeshima, Y. & Iai, S.

Seismic behaviour and retrofitting of joints in traditional timber roof structures
Parisi, M.A. & Piazza, M.

Characterization of geotechnical sites by multichannel analysis of surface waves (MASW) method
Park, C.B., Miller, R.D., Xia, J. & Ivanov, J.

Study of time-dependent nonlinear soil behavior in the 1995 Hyogo-ken Nanbu earthquake using borehole array records at Port Island, SGK and TKS sites
Pavlenko, O. & Irikura, K.

Nonlinear system identification technique applied to study of the soil response at Port Island, SGK, and TKS sites in the 1995 Hyogo-ken Nanbu earthquake
Pavlenko, O. & Irikura, K.

The effects of local soil conditions and liquefaction on the damage patterns observed in Adapazari-Central District after the 17th August, 199 Izmit-Turkey earthquake
Pekcan, O., Onder Cetin, K. & Sadik Bakir, B.

A global approach for dealing with spatial variability, site effects, soil structure interaction and nonlinearity in R/C bridges: A. Verification study
Pitilakis, K., Sextos, A. & Kappos, A.

H/V ratios of seismic noise in the Catania area (Sicily, Italy)
Priolo, E. & Laurenzano, G.

Understanding the threshold shear strain in soil dynamics
Rahhal, M.E. & Lefebvre, G.

Seismic hazard for the City of Tashkent, Uzbekistan
Rashidov, T. & Kuzmina, Y.

Inventory and seismic vulnerability assessment of residential buildings in Tashkent, Uzbekistan
Rashidov, T., Abdullaev, E., Ismailova, G., Badriyev, B., Akhmedov, M. & Kuzmina, Y.

The use of various calculation methods for the lifeline systems vulnerability assessment in the city of Tashkent, Uzbekistan
Rashidov, T., Kuzmina, Y., Rashidov, I. & Yusupov, A.
Effect of soil layer depth variability on statistically developed site specific surface response spectra at layered sites
Rieck, P.J. & Houston, T.W. 168

Site response to near-fault ground motions
Rodriguez-Marek, A., Bray, J.D. & Pestana, J.M. 169

Preliminary observations of the geotechnical aspects of the June 23, 2001 Southern Peru earthquake

The effect of the Mississippi embayment on response spectra
Romero, S., Rix, G.J. & Silva, W.J. 171

Seismic hazard assessment in the state of Kuwait
Sadek, A.W. 172

Detection of nonlinear site amplification
Safak, E. 173

Inelastic quasistatic analysis to simulate dynamic behaviors of multi-degree-of-freedom system
Saitoh, M. 174

Modeling dynamic soil properties for uncemented and lightly cemented granular soils
Salvati, L.A. & Pestana, J.M. 175

A case study on the seismic performance of shallow foundations in Adapazari, Turkey

Dynamic behavior of reinforced concrete pile foundation on sand deposits using centrifuge modeling
Sato, M., Hotta, H. & Okamoto, S. 177

Analysis of phase characteristics of path effects on seismic ground motion based on ray theory
Sawada, S., Morikawa, H. & Kataoka, K. 178

Analysis of liquefaction induced deformation for damaged dikes in the 1995 Hyogoken-Nambu earthquake
Sawada, S., Takeshima, Y., Ozutsumi, O., Sugiyama, W. & Iai, S. 179

Array technique to investigate seismic wavefield: application to the Annot experiment
Schisiele, E., Cansi, Y. & Gaffet, S. 180

Fundamental frequencies of alluvial basins: estimation by various modal methods
Semblat, J.F., Chabert, R., Paolucci, R. & Duval, A.M. 181

Seismic site effects for shallow and deep alluvial basins: in-depth motion and focusing effect
Semblat, J.F., Dangla, P., Kham, M. & Duval, A.M 182
A global approach for dealing with spatial variability, site effects, soil-structure-interaction and nonlinearity in R/C bridges: B. Parametric study
Sextos, A., Pitilakis, K. & Kappos, A.

Seismic response of water pipeline systems in the Ji-Ji earthquake
Shi, B.-J. & Chen, W.W.

921 Ji-Ji earthquake: Lifeline performance and post-earthquake response
Shiah, G-C.

A modified slip-lock pinching model for the earthquake performance of water main sections near the reverse fault
Shiah, G-C.

Analytical Study of shaking table tests on effect of steel sheet pile walls for embankments: Analysis by "FLIP"
Shimazu, T., Sato, S., Ikeda, T., Ozutsumi, O. & Iai, S.

A new simple approach to substantially increase the seismic stability of reinforced soil structures
Shinoda, M., Uchimura, T., Tatsuoka, F., Tateyama, M. & Natsuki, T.

Mechanism of liquefaction of sandy ground during a great earthquake
Shioi, Y. & Hashizume, Y.

Estimation of local site effects by a generalized inversion scheme using observed records of "Small-Titan"
Shoji, Y. & Kamiyama, M.

Evaluation of rupture directivity effects on peak ground motion using stochastic Green's function method
Si, H.J. & Midorikawa, S.

Characteristics of strong ground motion during the 1999 Chi-Chi earthquake (Taiwan) and large aftershocks: comparison with the previously established models
Sokolov, V.Yu., Loh, C.-H. & Wen, K.-L.

Study of site response characteristics in the Taipei basin (northern Taiwan) during earthquakes of various magnitudes and location
Sokolov, V.Yu., Loh, C.-H. & Wen, K.-L.

Seismic base isolation of low rise structures: frictional sliding type
Souissi, M., Siller, T. & Charlie, W.

Pore pressure observations from the 1999 M7.1 Hector Mine earthquake on the liquefaction array at the Garner Valley Engineering Seismology test site
Steidl, J.H., Archuleta, R.J. & Bonilla, L.F.

Ground motion evaluation procedures for performance based design
Stewart, J.P., Abrahamson, N.A., Bray, J.D., Chiou, B., Graves, R.W. & Somerville, P.G.
Behavior of suction caissons for taut leg mooring systems under dynamic loads
Sukumaran, B. & McCarron, W.

The law of deformation and structural destruction of soils under dynamic action
Sultanov, K.S., & Khusanov, B.E.

The approach of P-waves polarization analysis in transversely isotropic medium to estimate cracks alignment under the Toba region

Effect of variations of dynamic soil parameters of surface layers on S-wave ground motions
Suzuki, S. & Asano, K.

Microzonation in Chi-Chi village based on interpolation of strong ground motion records and questionnaire intensity
Takada, S. & Kuwata, Y.

A new proposal for simplified design of buried steel pipes crossing active faults
Takada, S., Hassani, N. & Fukuda, K.

Scenario faults and micro-zonation in Tehran City
Takada, S., Hassani, N. & Rasti, R.

Analysis of liquefaction induced residual deformation for caisson type quay wall
Takeshima, Y., Sawada, S.-I., Yamamoto, A. & Yashima, A.

Seismic soil-structure interaction of underground structures considering soil liquefaction
Tamari, Y., Takahashi, M. & Towhata, I.

New attenuation relation of peak ground motion and acceleration response spectrum
Tamura, K., Nakao, Y. & Matsumoto, S.

Damage to reclamation land embankment caused by past earthquakes
Tani, S.

Parametric study of slope safety subjected to dynamic earthquake loads considering the stochastic spatial variability of soil properties
Tantalla, J., Prevost, J.-H. & Deodatis, G.

Dynamics of spatial-temporal processes in the peri-contour zone rocks
Tatarinov, V.N & Tatarinova, T.A.

A new pile-head device for decreasing construction costs and increasing the seismic performance of pile foundations
Tazoh, T., Ohtsuki, A., Aoki, T., Mano, H., Isoda, K., Iwamoto, T., Arakawa, N., Ishihara, T. & Ookawa, M.

Usage of miniature CPT in dynamic centrifuge modelling to evaluate liquefaction resistance
Teymur, B. & Madabhushi, S.P.G.
Liquefaction in silty soils - screening and remediation issues  
Thevanayagam, S. & Martin, G.R.  

Pipeline failure probability assessment with respect to landslides  
Timashev, S.A. & Yerigina, A.V.  

Structure-soil-structure interaction based on dynamic experiment of adjacent low and medium-rise ordinary buildings  
Tobita, J. & Fukuwa, N.  

Site specific hazard of some towns/cities in Uganda  
Tugume, F.A.  

Some results of analysis of the seismological, geophysical and geological data, necessary for assessment and mitigation of seismic risk in Bishkek, Kyrgyz Republic  
Turdukulov, A.T., Muraliev, A.M. & Kamchybekov, M.P.  

A simplified lumped parameter model for non-linear soil structure interaction analyses of structures  
Uckan, E., Fahjan, Y. & Erdik, M.  

Seismic Evaluation and Remediation of Webber Dam  
Uddin, N.  

Response of Cedar Hills Nursery Strong Motion Site During the Northridge Earthquake  
Vahdani, S. & Wikstrom, S.  

Static and dynamic stability and soil liquefaction analyses of the San Roque dam  
Vahdani, S., Povone, M., Benson, S., Osmun, D., Ehasz, J., & Wartman, J.  

Dynamic characteristics of a base isolated building from ambient vibration measurements and low level earthquake shaking  
Ventura, C.E., Finn, W.D.L. & Fujita, N.  

Seismic evaluation of existing nuclear facility using ambient vibration test to characterize dynamic behavior of the structure and microtremor measurements to characterize the soil: a case study  
Volant, P. & Orbovic, N.  

Effects of random soil properties on site amplification of seismic waves  
Wang, S. & Hao, H.  

Use of an inclined plane to evaluate the Newmark sliding block procedure  
Wartman, J., Bray, J.D. & Seed, R.B.  

Site effect on vulnerability of 21-story-buildings in Hong Kong under near and far field earthquakes  

Development of preliminary seismic design parameters for the potential nuclear waste repository at Yucca Mountain, Nevada  
Wong, I., Silva, W., Thomas, P., Stepp, J.C., Quittmeyer, R., Lee, R. & Sullivan, T.
3D near-surface soil response of earthquake engineering interest from H/V ambient noise ratios
Woolery, E.W. & Street, R.

Earthquake motion simulation for Mid-America cities
Wu, C.L. & Wen, Y.K.

Inversion of phase velocities of surface waves with higher modes
Xia, J., Miller, R.D. & Park, C.B.

Soil amplification and its relationship with damage properties at 27 June 1998 Adana-Ceyhan earthquake
Yalcinkaya, E. & Alptekin, O.

A seismic hazard map for the Great Tehran Area, Iran
Zare, M.

Post-processing of downhole shear wave measurements by cross-correlation
Zavala, G.J & Mayne, P.W.

Local identification analyses of the dynamic response of soil systems
Zeghal, M. & Oskay, C.

Spatial variation of seismic motion induced by propagation of body waves
Zendagui, D. & Berrah, M.K.

Stochastic description of seismic random fields from recorded data
Zerva, A. & Zervas, K.

Near source strong ground motion synthetics and wave propagation analysis in an irregular site for the 1999 Chi-Chi earthquake
Zulfikar, A.C., Shimabuku, J. & Takemiya, H.
