Table of contents

Foreword 1X

**Strain Localisation. Modelling and Experiments**

Some remarks on stability of elastic-plastic saturated porous media
*A.Benallal & C.Comi* 3

On the post-localization behavior of elasto-plastic solids with strong discontinuity
*R.J.Borja* 13

Incremental behaviour of a simple deviatoric constitutive CLoE model
*R.Chambon* 21

Modelling of granular avalanches as material instabilities
*F.Darve & F.Laouafa* 29

Stress induced elastic anisotropy and strain localisation in sand
*A.Gajo, D.Bigoni & D.Muir Wood* 37

Forced and spontaneous polarization in shear zones
*G.Gudehus* 45

Pressure- and density-dependent bifurcation of soils
*I.Herle & D.Kolymbas* 53

Application of a nonlocal model to the softening behaviour of Hostun sand
*T.Marcher, P.A.Vermeer & P.G.Bonnier* 59

Numerical Evolution of Localized Dilated Shear Zones
*K.Nübel & G.Gudehus* 69

Effect of transport of pore water on strain localization analysis of fluid-saturated strain gradient dependent viscoplastic geomaterial
*F.Oka, M.Jiang & Y.Higo* 77

Some remarks on shear band analysis in hypoplasticity
*C.Tamagnini, G.Viggiani & R.Chambon* 85

Shearing of an infinite narrow granular layer between two boundaries
*J.Tejchman* 95
Dynamical uniaxial and radial flow for hypoplastic granular materials
J.M.Hill

Friction models of kink-banding in compressed layered structures
G.W.Hunt, M.Ahmer Wadee & M.A.Peletier

Crushing behaviour of granular materials
H.A.Joer

Micro-structural change during shearing and its contribution to the reliquefaction phenomena of saturated granular soils under cyclic loading

Stress and failure localization associated with sliding in layered materials
E.Pasternak, A.V.Dyskin & H.B.Mühlhaus

Patterning of cracks and interfaces
Bifurcation and damage localisation in a softening interface
A.Delaplace, G.Pijaudier-Cabot & S.Roux

Bifurcation in periodic arrays of growing cracks, 2-D analytical solutions
A.V.Dyskin & A.N.Galybin

Accumulation and localization of interacting uni-directional microcracks
R.Freij-Ayoub & A.V.Dyskin

Localised fault instability triggered by water injection
A.N.Galybin

Analysis of periodic shear band formation: model experiments and numerical simulation
M.Hori, M.S.Anders & T.Mizutani

A random lattice solid model for simulation of fault zone dynamics and fracture processes
D.Place & P.Mora

Geodynamics
Viscoelastic formulation for modeling of plate tectonics
L.Moresi, F.Dufour & H.Mühlhaus

Particle-in-cell solutions for creeping viscous flows with internal interfaces
L.Moresi, H.-B.Mühlhaus, F.Dufour

Multiple scales in rock alteration and ore deposit genesis
H.-B.Mühlhaus, B.E.Hobbs, R.Freij-Ayoub, J.L.Walshe, A.Ord & N.Stokes
