PROCEEDINGS
OF THE
4TH ASIA-PACIFIC CONFERENCE ON
SHOCK & IMPACT LOADS ON STRUCTURES

Singapore
21 – 23 November 2001

Editors
A/Prof. Lok Tat Seng
Nanyang Technological University, Singapore
Mr Lim Chee Hiong
Defence Science and Technology Agency, Singapore
Prof. Li Xibing
Central South University, Changsha, Hunan, P.R. China
Prof. Liu Deshun
Xiangtan Polytechnic University, Xiangtan, Hunan, P.R. China

ISBN: 981-04-3831-1

organised by:
• CI-Premier Conference Organisation, Singapore

with the official support of:
• Impact Committee, Japan Society of Civil Engineers
• Central South University, China
• Xiangtan Polytechnic University, Hunan, China
TABLE OF CONTENTS

Foreword iii
Message iv
Preface vi
Advisors & Committee vii
Table of Contents ix

KEYNOTE PAPERS

Protective structures for the 21st Century 1
R Eytan*

Blast moments of detonating HE charges in the near field 13
M Held*

Impact failure analysis of prestressed concrete beams using RBSM-FEM combined model 27
N Ishikawa*, S Katsuki and K Takemoto

Falling-weight impact tests and impact response analyses of two-layered absorbing system 39
R Kawase, N Kishi*, H Konno and K G Matsuoka

Impact dynamic inverse design for the split Hopkinson pressure bar 47
D S Liu*, A H Chen, X B Li, T S Lok and P Y Zhu

Experimental study on some parameters for simulation of rock fall on slope 63
H Masuya*, T Ihara, S Onda and A Kamijo

Impacted Concrete - should it integrate or resist? 71
S Perry*

Large scale impact load testing of rock and stope support 85
T R Stacey* and W D Ortlepp

Parameters of impact of a heavy mass falling onto a concrete surface 97
G Szuladzinski*

TECHNICAL PAPERS

Dynamic response of orthotropic plates on a winkler foundation 111
S W Alisjahbana*

Penetration process in the armour of dual hardness 121
J Bucher* and J Voldrich

</tbody>
</table>
Nonlinear dynamic response analysis and damage assessment of RC structures to blasting ground motion

H Hao*, G W Ma, Y Lu and Y X Zhou

Deflection and rupture of beams subjected to impulsive loads

G Horoschun*

Analytical study on the Impact response of flexible rockfall fence

S Ishii, Y Sonoda*, H Hikosaka and H Muraishi

Numerical analysis of free metal sheet forming using underwater shock wave

H Iyama*, Y Kato K Murata and S Itoh

On free metal sheet forming using underwater shock wave

H Iyama*, Y Kato K Murata and S Itoh

An experimental study on shock absorbing effect of collision between two steel bars using laminated fibre reinforced rubber

A Kanamitsu*, Y Kajita, Y Nishimoto and N Ishikawa

Numerical modeling unexpected behaviour of cylindrical panel after removal of impulse load

A B Karshiyev*, Sh U Galiev and Kh Khudaynazarov

An applicability of FE impact analysis on shear-failure-type R C beams with shear rebars

N Kishi*, H Mikami and T Ando

The influence of attenuation barrier on loads acting on a soil-buried cylindrical structure caused by a buried explosion

S Kobielak*, A Walczak and T Krauthammer

Dynamic pressures acting on buried reinforced concrete cylindrical structures caused by underground explosions

S Kobielak*, A Walczak and T Krauthammer

Discontinuous deformation analysis of impact force propagation in sand cushion

A Koike* and T Mikami

Study on parameters concerning impact of falling rock on field slopes and rock fall simulation method

T Komura*, T Muranishi, K Nisizawa and H Masuya

Numerical simulations of ground shock attenuation layers for Swedish rescue centres and shelters

L Laine*

Derivation of mechanical properties for sand

L Laine* and A Sandvik

Experimental study on blast fracture of furnace sediments

Q Y Li, G Y Zhao, X B Li* and L Q Hu

Energy transfer and relationship between blast wave and contact medium

X B Li*, D S Gu and T S Lok

Dynamic cumulative damage of rock induced by repeated impact loading

X B Li*, L Q Hu and T S Lok

Large-scale blasting in underground pillar recovery

J X Li*, Z Q Luo and J H Chen
The close-in physical characteristic of TNT charge explosion
X J Li*, F J Zhao and Y Q Chen

Numerical simulation of shear failure of RC beams subjected to impulsive loading
J C Liu, Q Fang* and Y D Zhang

Anti-seismic experimental research on the 1/8 scale model brick masonry building
with frame-shear wall structure at first two stories
X J Liu*, M Q Zhu, Y S Zou and S G Huang

An approach for stress prediction of stiffened panel under shock loading
Z J Liu*, H K Lee, S W Gong and K C Hung

Numerical simulation of dynamic tensile splitting response of steel fibre
reinforced concrete
T S Lok*, G Lu, P J Zhao, X B Li and D S Liu

Parametric study on drop/impact effects of an iron product
K H Low* and J Wen

On the coefficient of restitution during impact of slender bars with external surfaces
K H Low* and X W Zhang

Structural response to blasting ground shock: a laboratory perspective
Y Lu*, H Hao, G W Ma, Y X Zhou

A practical expert system for rock blasting planning in open-pit mines
Z Q Luo*, J X Li and A B Chen

Stability of a rock pillar subjected to explosions
H L Ong, S G Chen* and K H Tan

Numerical study investigating the range of applicability for energy balance analysis
in blast resistant design
D J Pope* and F G Hulton

On a mathematical programming procedure for solving pulse loaded elastoplastic
ReissnerMindlin plates
C L Sahlit* and L S da Silva

Plates subjected to blast loading conditions - modelling, simulation and experimental
investigation
R Schmidt*, M Stoffel and D Weichert

Analytical study on the mitigating effect of rubber absorber
Y Sonoda*, Y Nishimoto and H Hikosaka

Viscoplastic plates under repeated impulsive loadings
M. Stoffel*, R. Schmidt and D. Weichert

Residual strength estimation of reinforced concrete beam at several damaged levels
B Supriyadi*, Priyosuliisty and F N Sidik

Elastodynamic response of a transversely isotropic, thick rectangular plate
H Tsunokake*, H Kobayashi and D Sukata

Numerical investigation of chamber separation requirement in underground
ammunition storage design
C Q Wu*, H Hao and C C Seah
Pressure vibration in a blast-hole with divided charge and its blasting effects  
*C S Wu* and *J X Li*  
527

Large deformation of shallow covered structures under the resonance condition  
*J Wu*, *Q P Zheng*, *H X Dong* and *G Y Pei*  
533

Study on composite sandwich structure under explosion loads using finite element method  
*G C Xu*, *W L Zhao*, *H C Bai* and *P Hu*  
539

Study on the impact test method and characteristics of behaviour of reinforced concrete beam by a weight drop  
*M Yamamoto*, *H Masuya*, *S Onda*, *H Kobayashi* and *Y Horie*  
547

Boundary collocation method with orthogonal polynomials for plate bending problems  
*C G Yang*, *T S Lok* and *S R Lan*  
555

A continuum model for dynamic damage and fragmentation of brittle solids  
*Y Q Zhang*, *H Hao* and *Y X Zhou*  
565

Behaviour of steel fibre reinforced concrete under dynamic load  
*P J Zhao*, *T S Lok*, *X B Li* and *C H Lim*  
573
